

How to stream BlueStacks with Facebook Live

BlueStacks users can now broadcast game matches directly to Facebook, thanks to the updated Facebook Live feature.

Live Stream is now not too strange a term for users when Facebook leads this famous trend. And even the community of gamers has been updated to stream this game when BlueStacks once combined with Twitch to stream video games.

And recently, BlueStacks and Facebook have joined hands to use the Facebook Live feature, stream games right on BlueStacks to personal Facebook accounts to many friends. This is considered an attractive combination for gamers, when Facebook accounts for the majority of social network users. Please follow the following article of Network Administrator to see how to stream games from BlueStacks to Facebook via Facebook Live feature.

1. Instructions to stream BlueStacks game to Facebook:

First of all, download the latest version of BlueStacks software at the link below:

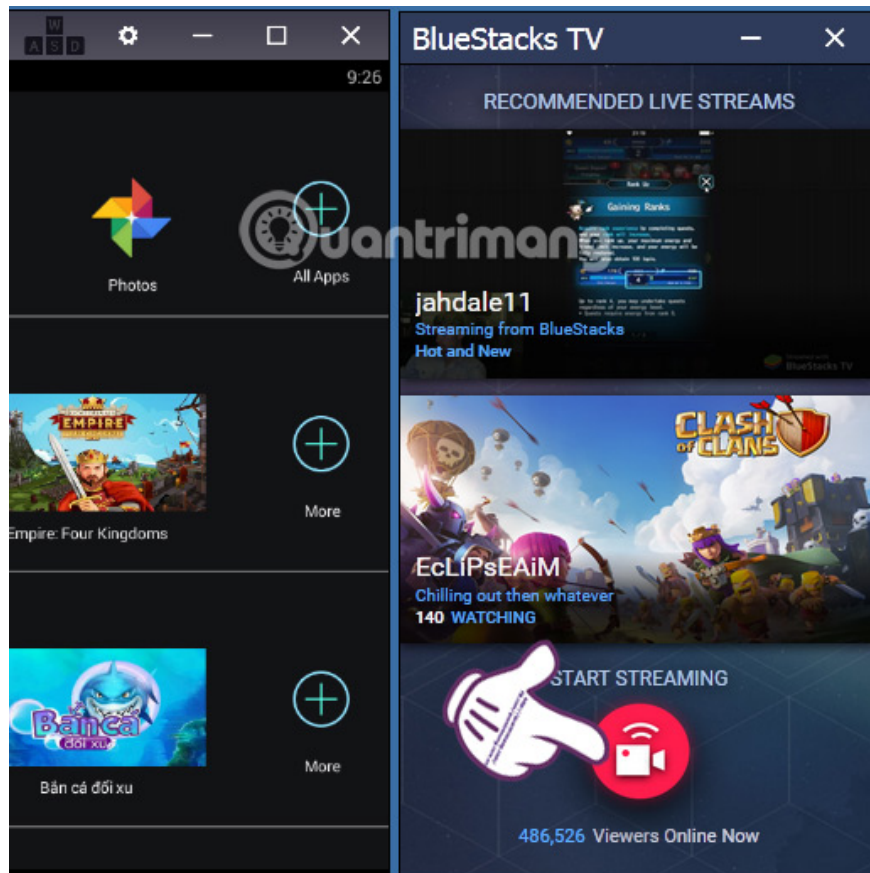

1. Download the latest BlueStacks software

After that, you proceed with the installation steps and log in as usual.

Step 1:

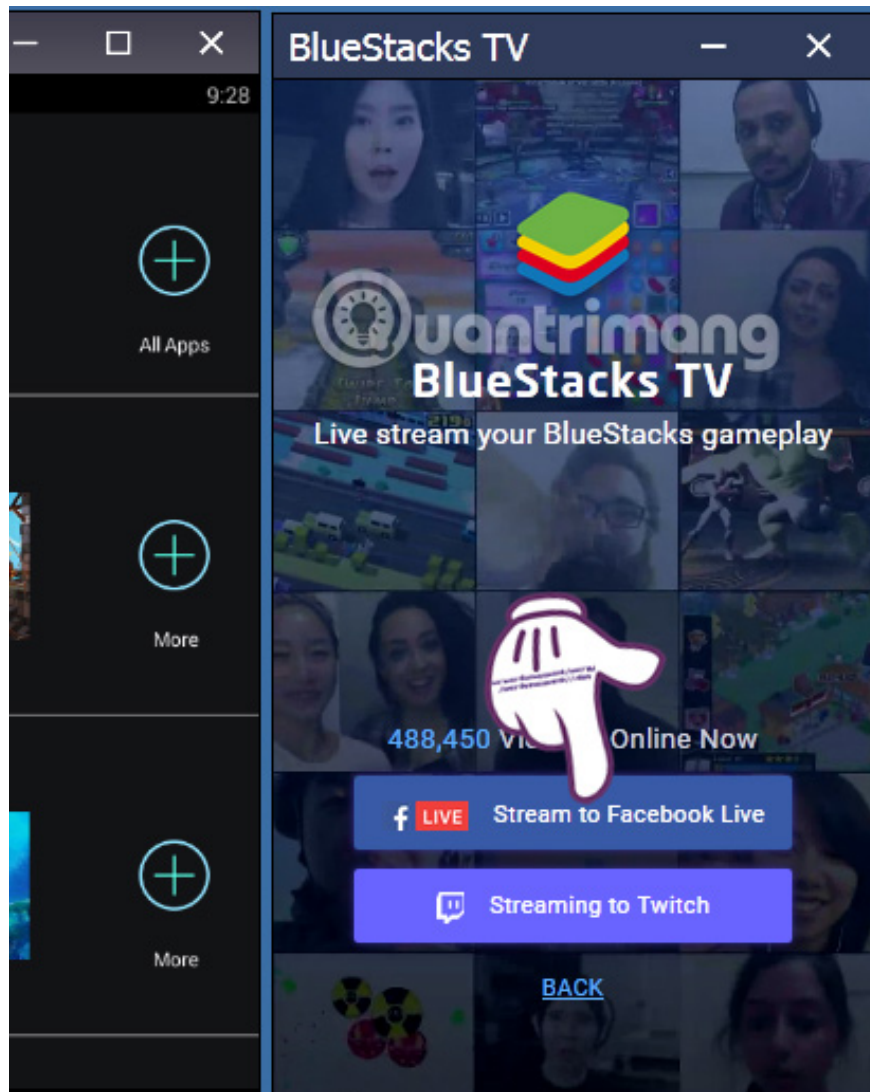

At the main interface of BlueStacks, gamers will see a small interface on the right to allow users to proceed to stream games.

We click on **the red Start Streaming camera icon** to play video games on Facebook. The gamers choose the game then proceed to live stream or, click this icon and select the game.

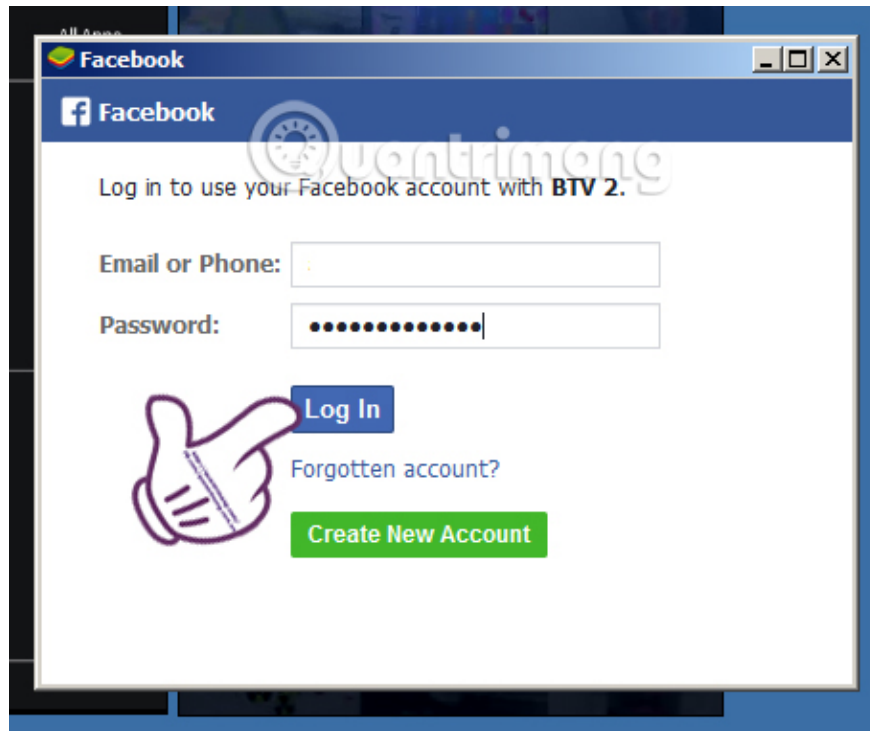

Step 2:

Next we choose the method of conducting video game streams on BlueStacks. Click on **Stream to Facebook Live**.

Step 3:

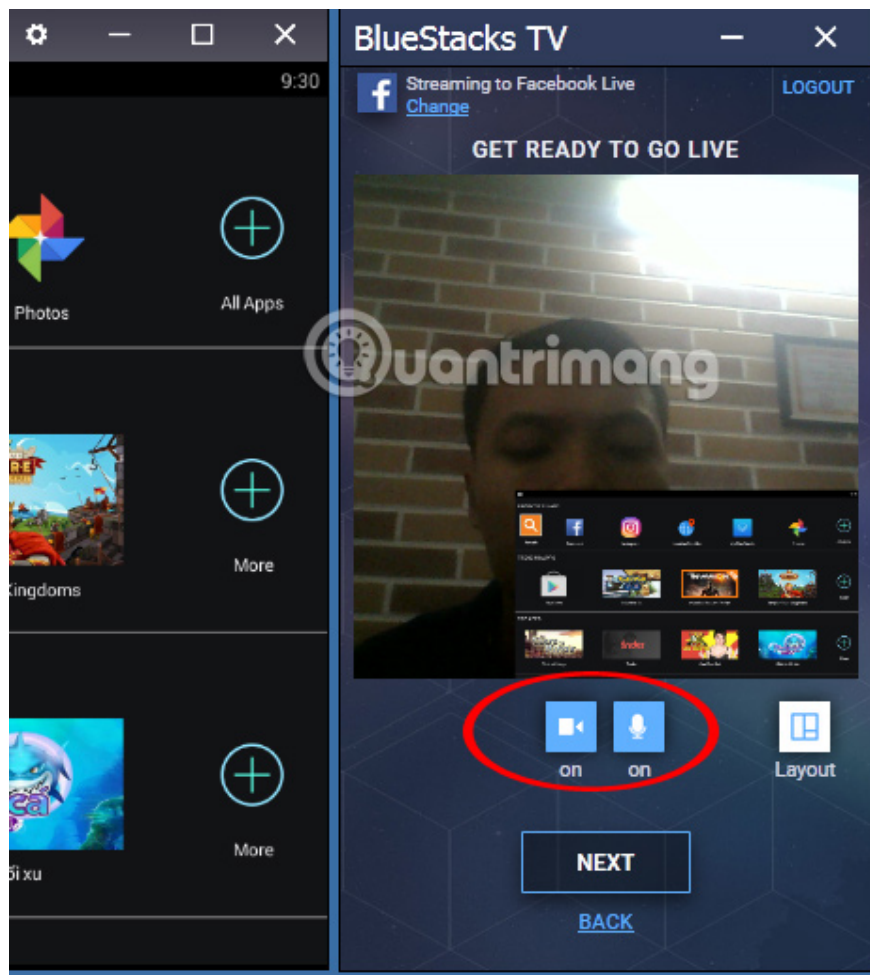

Soon a small window appeared for gamers to **log into their personal Facebook account** . After entering, click **Log in** to login.

Step 4:

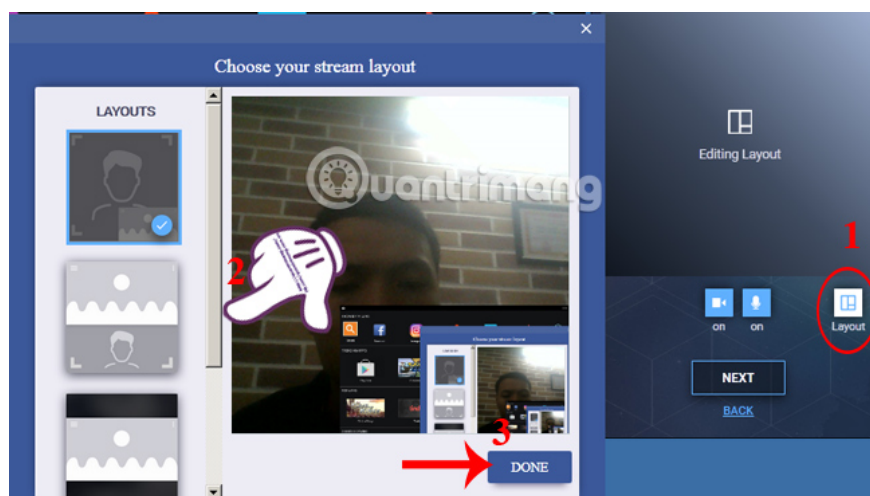

Next, you will be redirected to the video game streaming screen. We can **adjust to turn on or off the Micro and Webcam** when clicking the icons directly below the live stream screen.

Depending on the ambient conditions, the current sound plays live stream that you can turn off the Micro, without recording, but only using the Webcam.

Step 5:

In addition, gamers can change the location of the live stream screen with the webcam screen when clicking the **Layout** item. There will be about 6 different display modes for us to choose. Click **Done** to save.

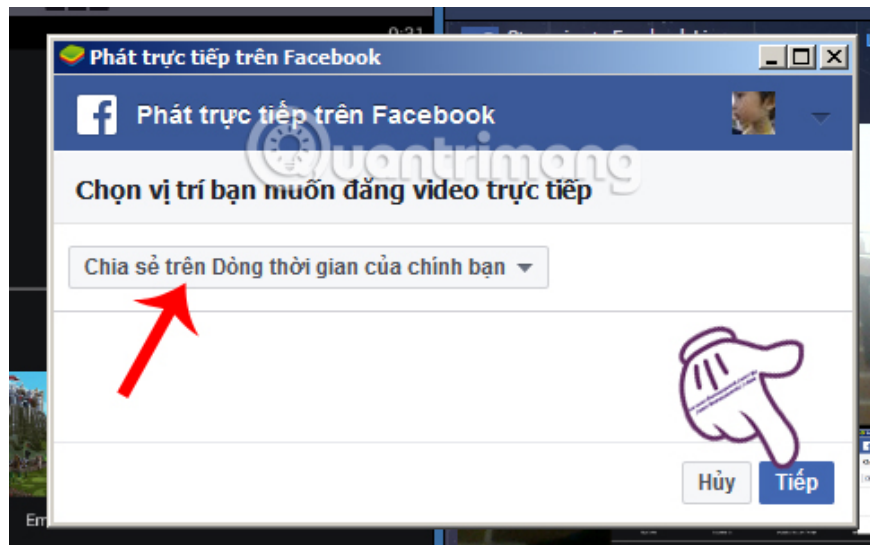

Step 6:

Next, Facebook will ask you where you want to post live video stream to Facebook, including:

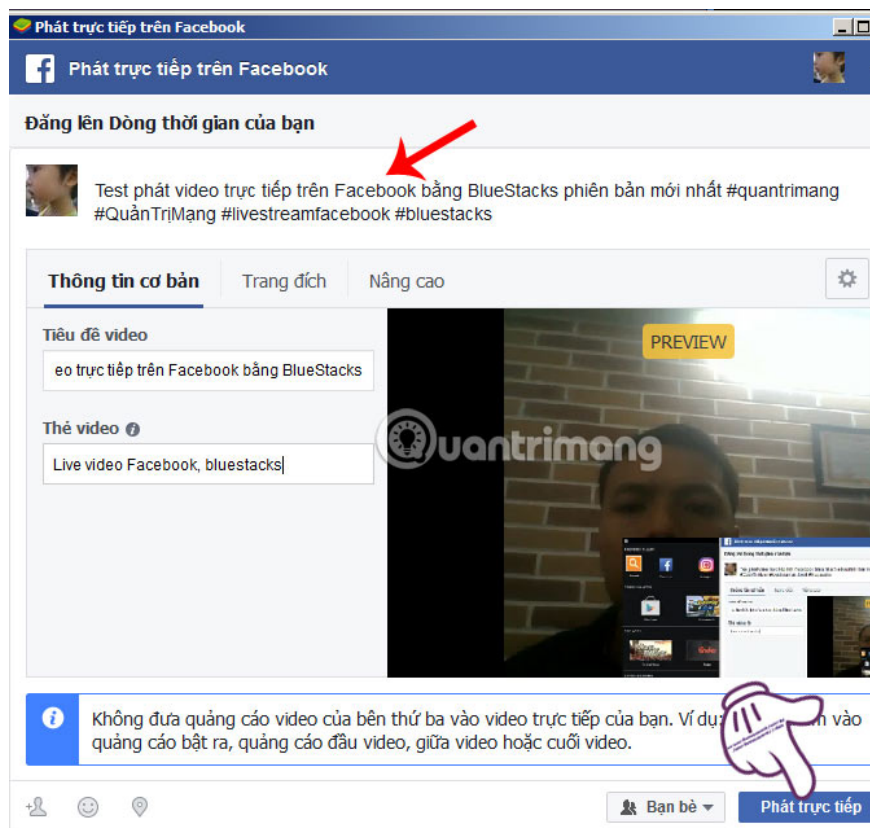

1. Share on your own Timeline.
2. Share on a friend's Timeline.
3. Share in a group.

Select the posting location and press **Next** .

Step 7:

Switch to the video posting interface. The players wait a few seconds to appear the game stream screen. Here, we can write the status, tag our friends, add the position or mood as when you posted the article on Facebook. Click **Play directly** to start the game.

Step 8:

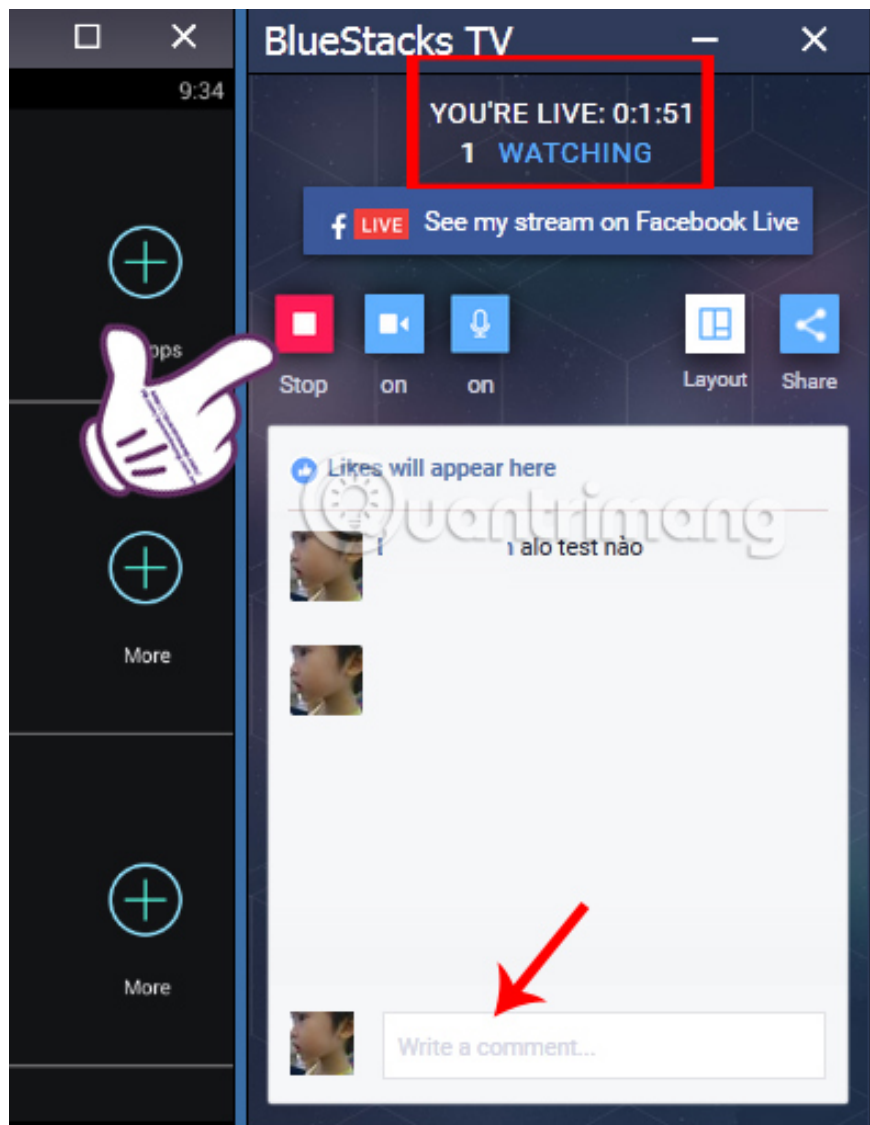

Soon, you will see a live stream game screen appear on the Facebook interface.

Test phát video trực tiếp trên Facebook bằng BlueStacks phiên bản mới nhất

Step 9:

To stop streaming games, at the interface of BlueStacks, we click on **the Stop icon** . Besides, you will also see the number of people watching live video games as well as the time to stream games to Facebook. We can also write comments directly at the interface of BlueStacks.

The steps to stream game BlueStacks to Facebook with that Facebook Live feature are quite simple. In addition, you can also try to stream the BlueStacks game through Twitch guided by us right below.

2. Instructions to stream games on BlueStacks with Twitch:

The first thing you need is a Twitch account under the tutorial Create a Twitch account. Then start doing the actions that Network Administrator instructed below to stream video game.

Step 1:

Install and launch BlueStacks on your computer to play Android games. We can optionally choose any game saved in the system to stream the video. Or you can install new games right on BlueStacks.

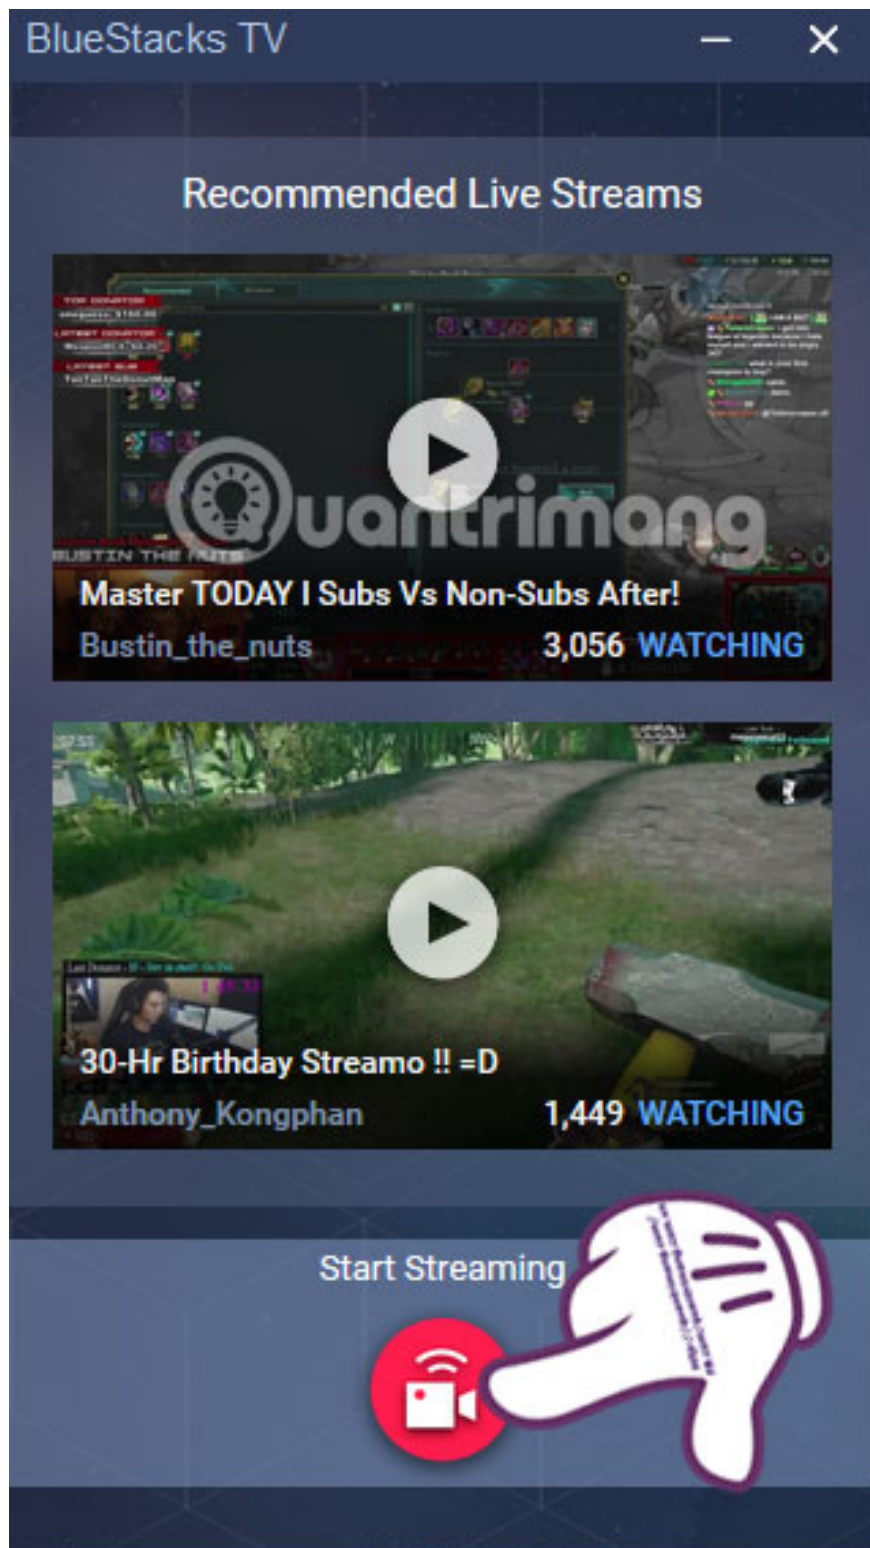

Step 2:

At the main interface, click the **Twitch** icon in the menu bar on the left side of the screen.

Step 3:

Appears BlueStacks TV panel. Scroll down and click **the video recording icon** .

Step 4:

Log in to the Twitch account you created when clicking **Sign in with Twitch** . Table of account information appears. Click **Log in** to login. If a bulletin board appears, click **Authorize** to continue.

Step 5:

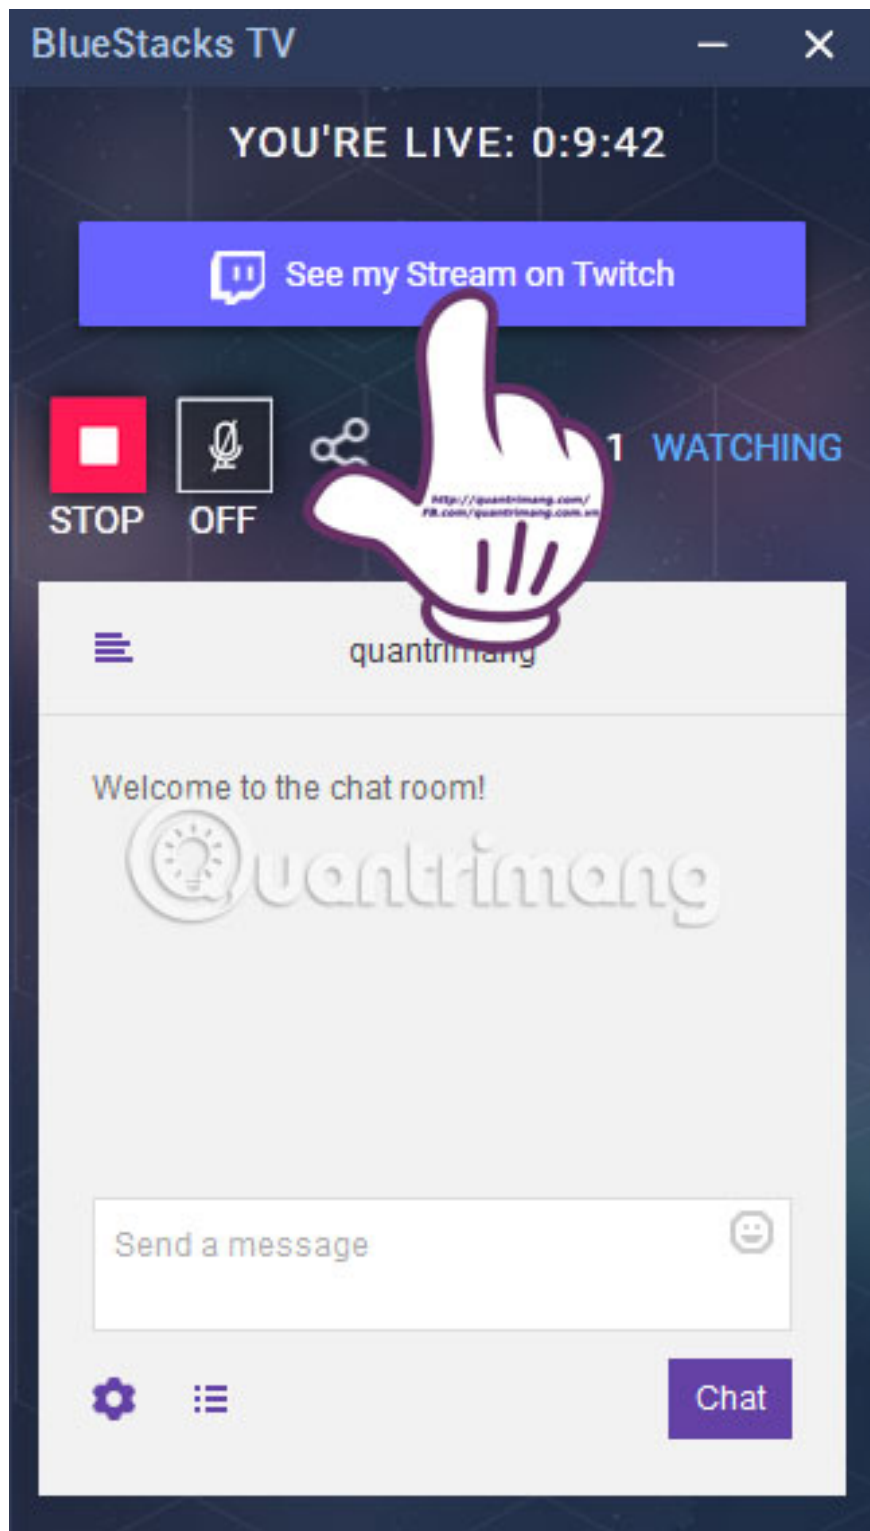

The setting table appears:

1. **Camera and mic icons** : Turn off or turn on webcam and mic.
2. **Name of the game being Stream** .

3. Select the regional network to stream the video .

After editing the settings, click **Go Live** to record the video game. Continue to select **See my Stream on Twitch**

Step 6:

To end the video recording process directly, click the **Stop** icon. After that, the program will record the time you just recorded the video game.
