After installation is complete, you proceed to log in to Dropbox (*Use your Dropbox login account on the computer*).

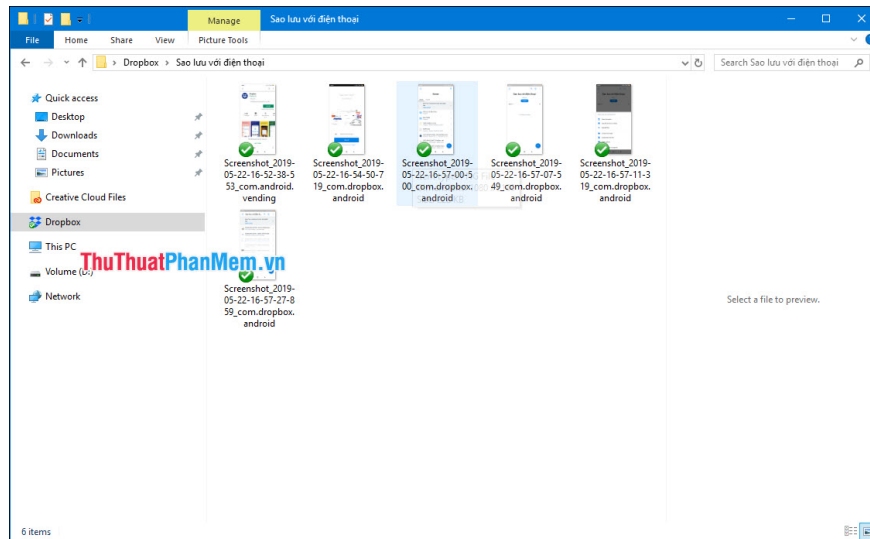

Step 2: When successfully logged into Dropbox, you open the folder you created in **Part 1** , then Dropbox will have a display window for you to choose such as:

1. **Scan document:** Scan the document
2. **Upload photos or videos:** Upload photos or videos
3. **Upload files:** Upload documents
4. **Create new Folder:** Create a new folder
5. **Create new text file:** Create a typed document
6. **Take a photo: Take a photo** upload
7. **Add file From a computer:** Add documents from the computer

In this article, the Software Tips will guide you how to synchronize photos and videos, with other documents you synchronously do the same:

You choose **Upload photos or videos** and proceed to select images / videos on your phone.

Everything will automatically be Uploaded, after the Upload is complete you can go to the newly created folder in **Part 1** on your computer to view.

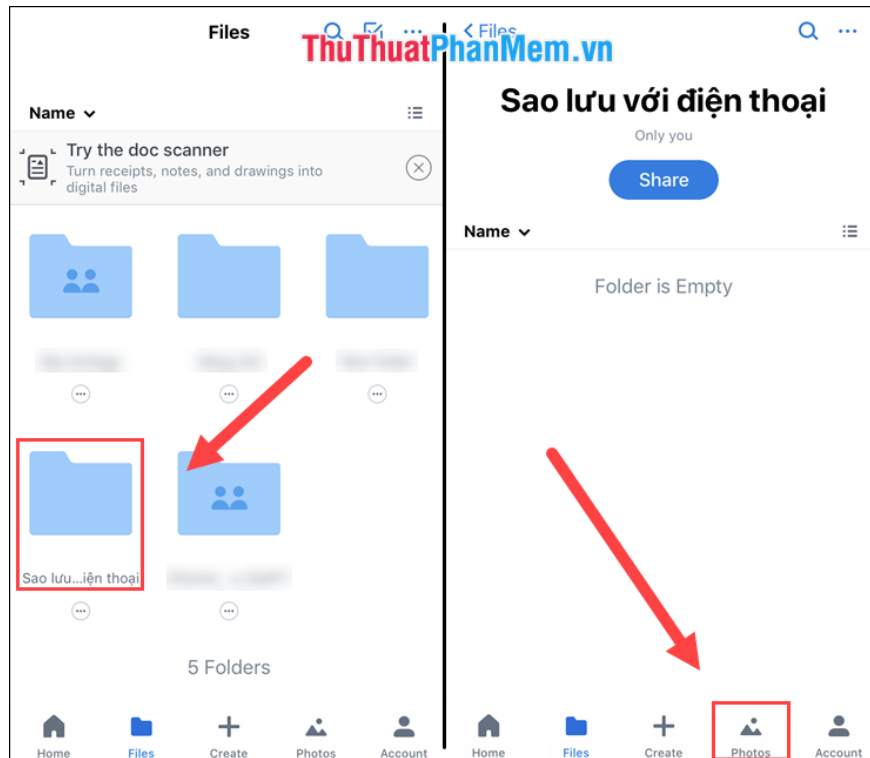

3. For phones using the IOS operating system

With IOS, you also need to install the Dropbox application and log in with your account logged in on the computer Dropbox.

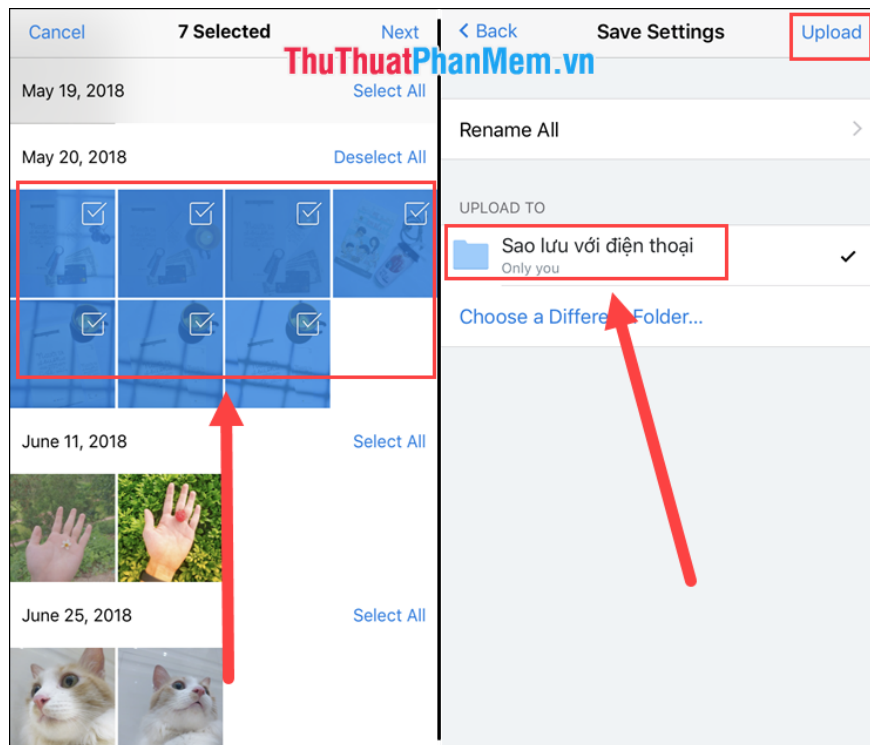

Link: <https://itunes.apple.com/us/app/dropbox/id327630330?mt=8>

Step 1: After you download, you proceed to log in to your Dropbox. Now will display the folder in Dropbox, you select the Folder that you just created in **Part 1** and you proceed to open that folder.

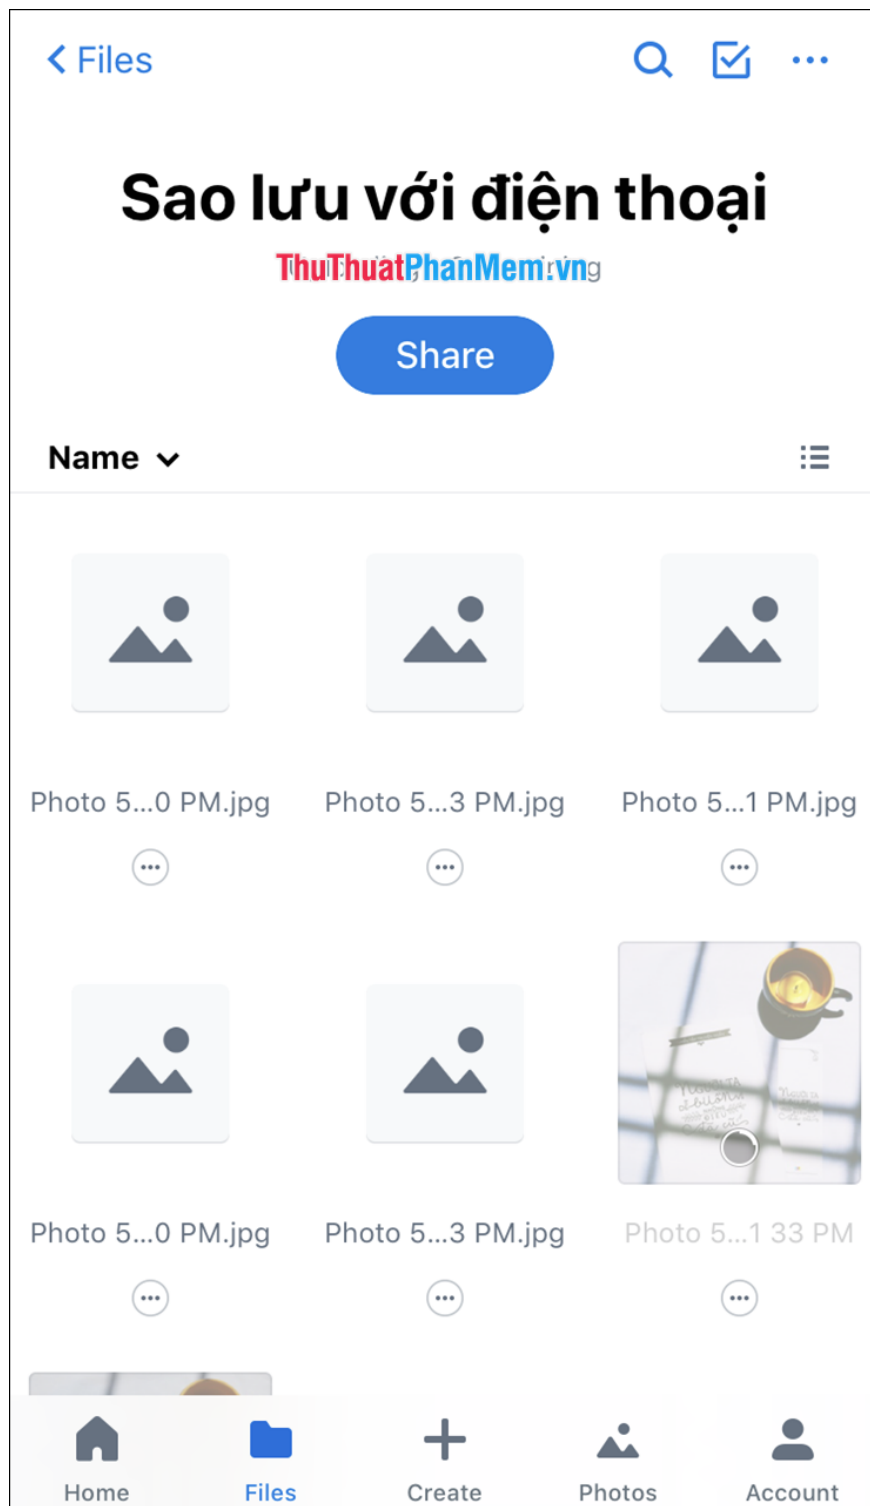

*With iOS, Apple does not give users much access to the File in the system. You just choose to sync photos so we will choose **Photos** .*

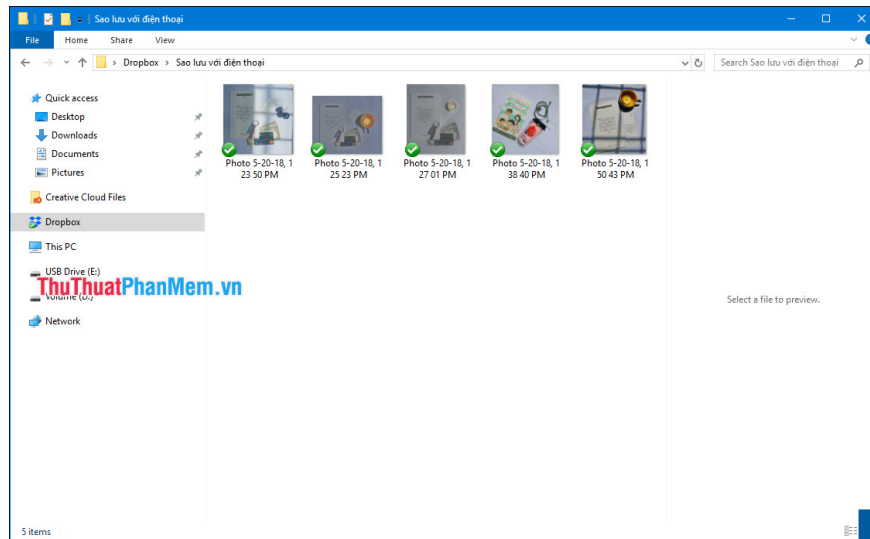

Step 2: You proceed to select the images that you want to upload and click **Next** . Next you choose the storage directory and click **Upload** .

Step 3: After that, the software will automatically upload to your Dropbox.

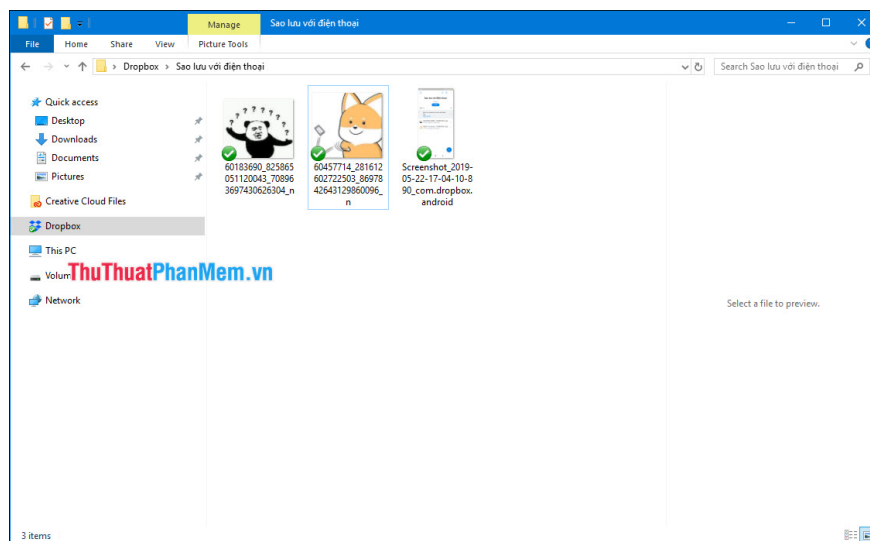

After the **Upload** is complete, you can open the folder on your computer **Dropbox** to view the backup data.

4. How to back up data from computer to phone

To backup data from your computer to your phone using Dropbox, simply Copy the data you need to back up to the folder created in Part 1.

Thus, the Software Tips guide you how to sync data between your phone and computer using Dropbox. Good luck!
