

How to take a 1998 film effect image on iPhone

The HUJI Cam application is an iPhone photography application with a photo shoot style in 1998. From the way of shooting to the color of the images, the images were taken in 1998.

If you like shooting nostalgic movie effects, capturing film colors, you can try Huji Cam on iPhone. The application will only have a film effect of 1998, so we don't need to spend time selecting effects. Each image will be randomly displayed with red light streaks, creating excitement and surprise for users.

Since the application is in 1998 style, when taking photos, there will be year 98 in the right corner of the screen. But users can change the time to coincide with the date of the photo. The following article will guide you how to take a photo film 1998 using HUJI Cam application.

Step 3:

Click on the **number 1998** to use HUJI Cam application for the film effect photo 1998. The app will ask if you want to turn on HUJI Cam location.

Step 4:

This is the main interface of HUJI Cam when you visit. The application interface is quite strange to users, with the film camera simulation in 1998. The viewfinder is located in the top left corner, and the left button is left to take pictures.

The application will suggest users to put their eyes into the viewfinder to take pictures as if they were using a camera. To switch back to normal shooting mode, tap on the viewfinder and will be switched to Like view mode. The screen will look like a normal photo.

Step 5:

On the shooting interface you will have the option of changing the front or rear camera with a rotating arrow, circle with 3 tiles to turn on or off randomly the lighting and clock effects to calculate the time and circle of 3 marks. dots to adjust image quality. Also we can turn on / off the Flash.

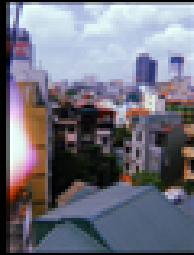

Step 6:

When you're done taking photos, click on the **Lab (Photo Room)** to review the photos you've taken. The photo will look like the image below. That's quite strange.

If you like any picture, click **the Save icon** to save it to the device, or click the share icon to send the image.
