Step 5:

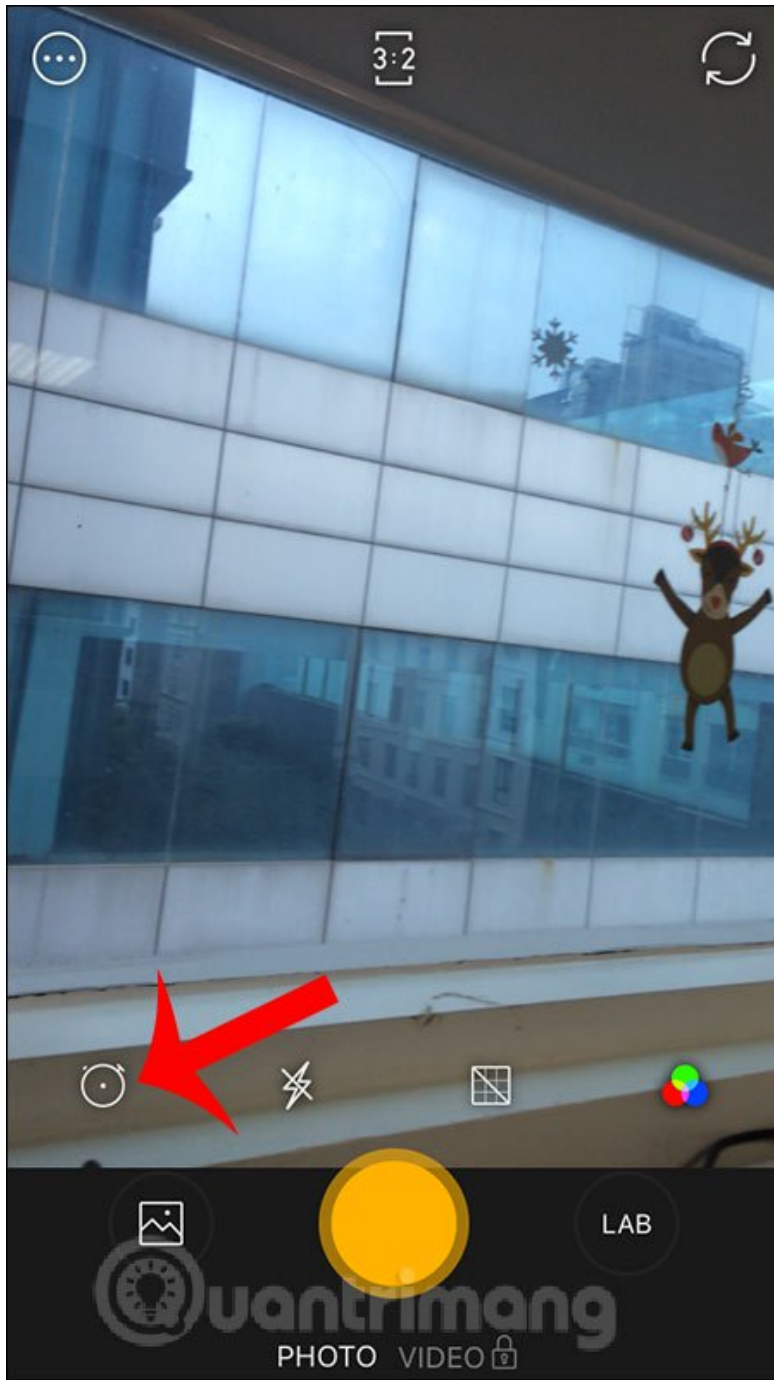

To **adjust the level of brightness** for photos, you **press the screen** to display a light bar on the right side of the screen, can adjust brightness or decrease light depending on the photographer.

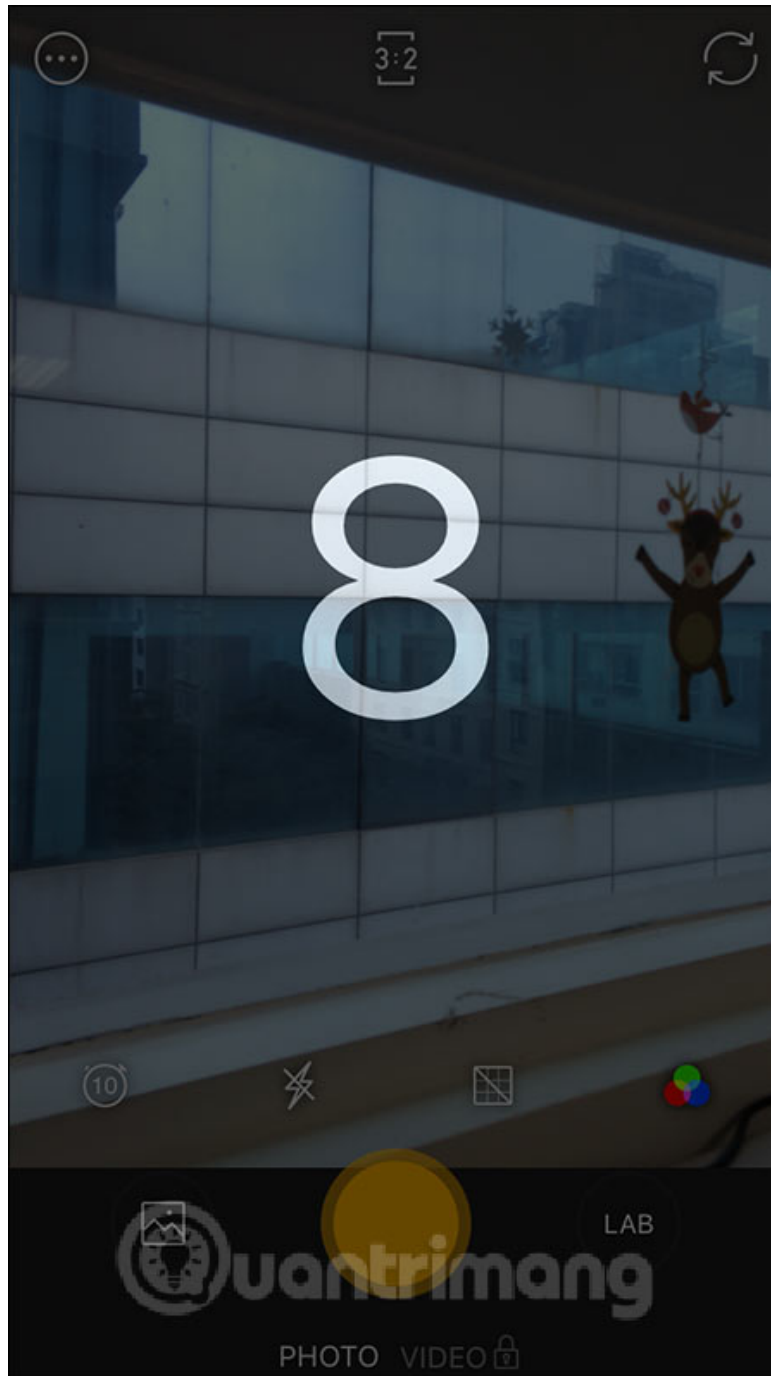

Step 6:

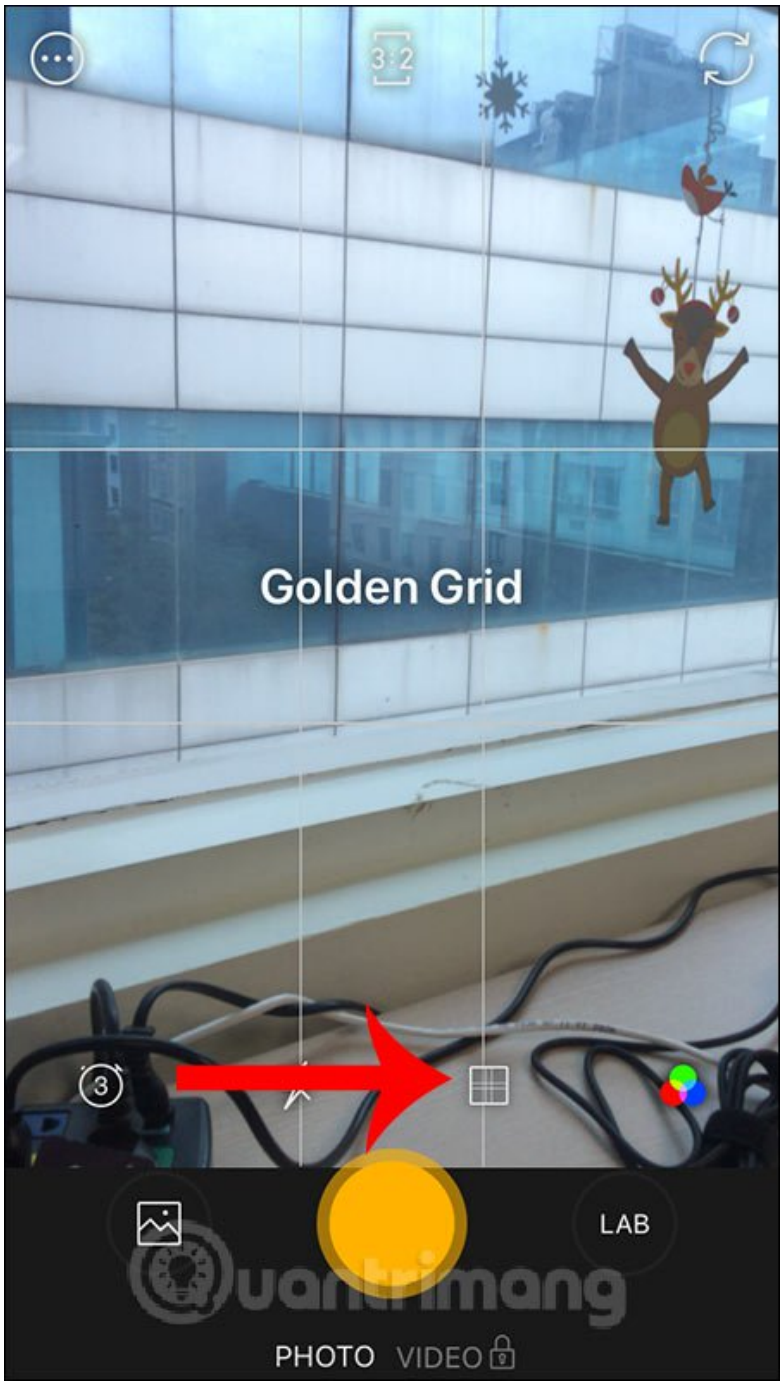

If you want to use **timer mode**, then click **the clock icon** and select the timer, 3s or 10s.

Step 7:

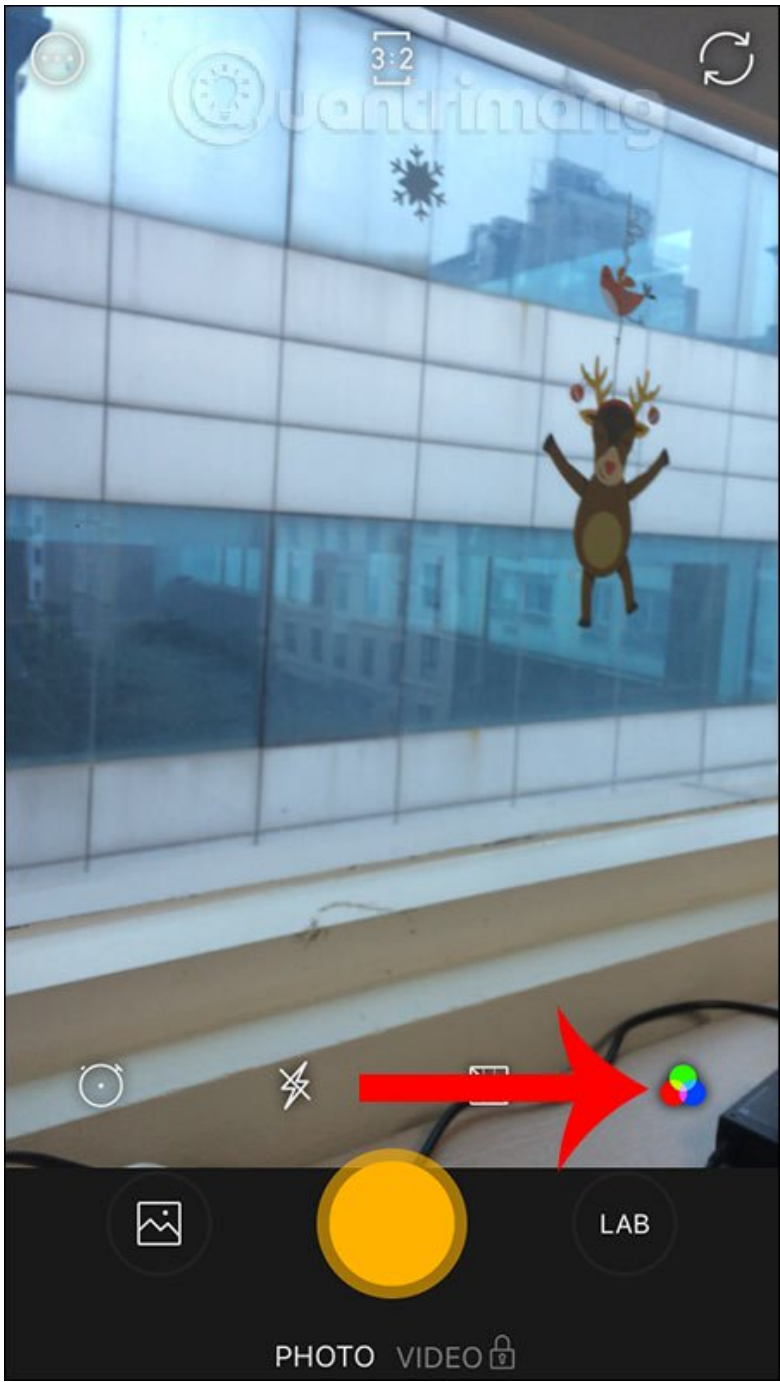

The app also provides a **scale grid** for taking photos, with those of you with some experience in photography. Click **the grid square icon** below, then select the scale you want to use.

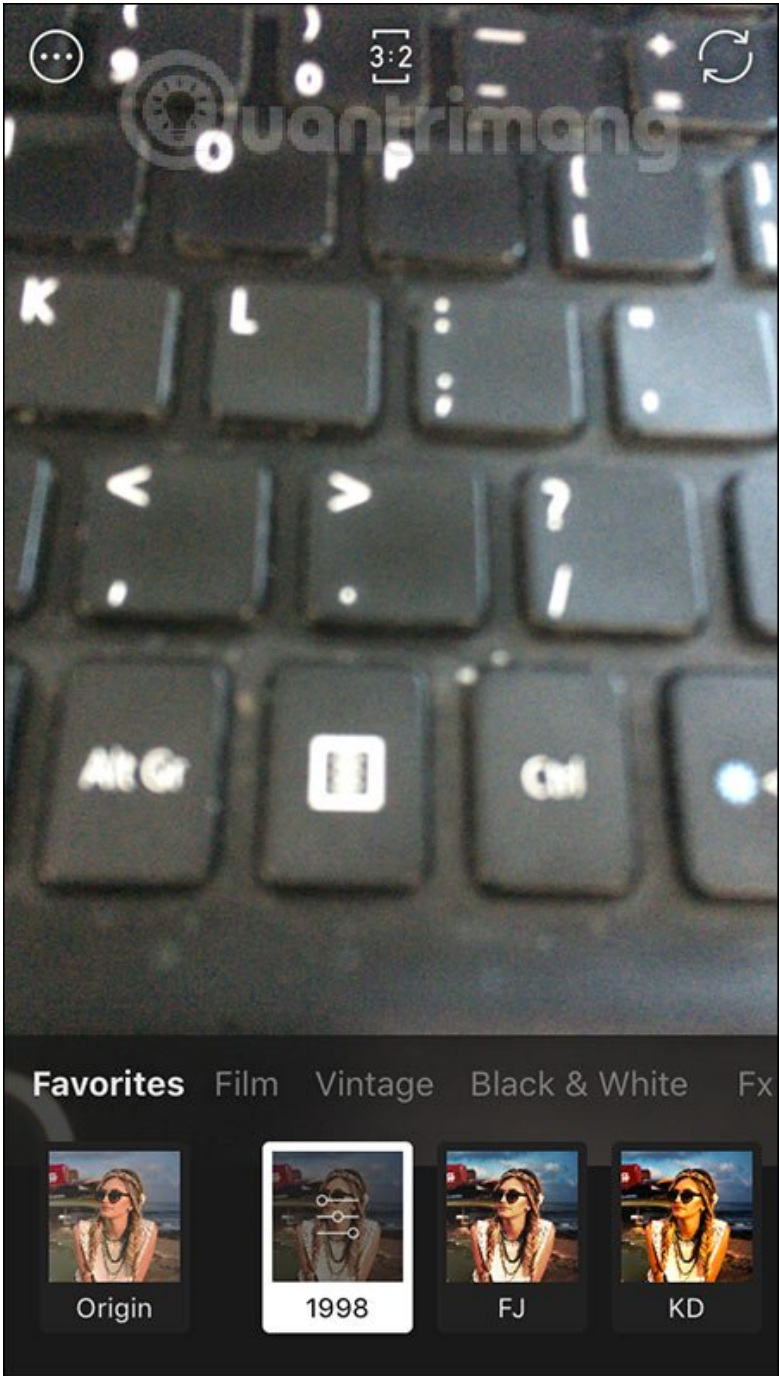

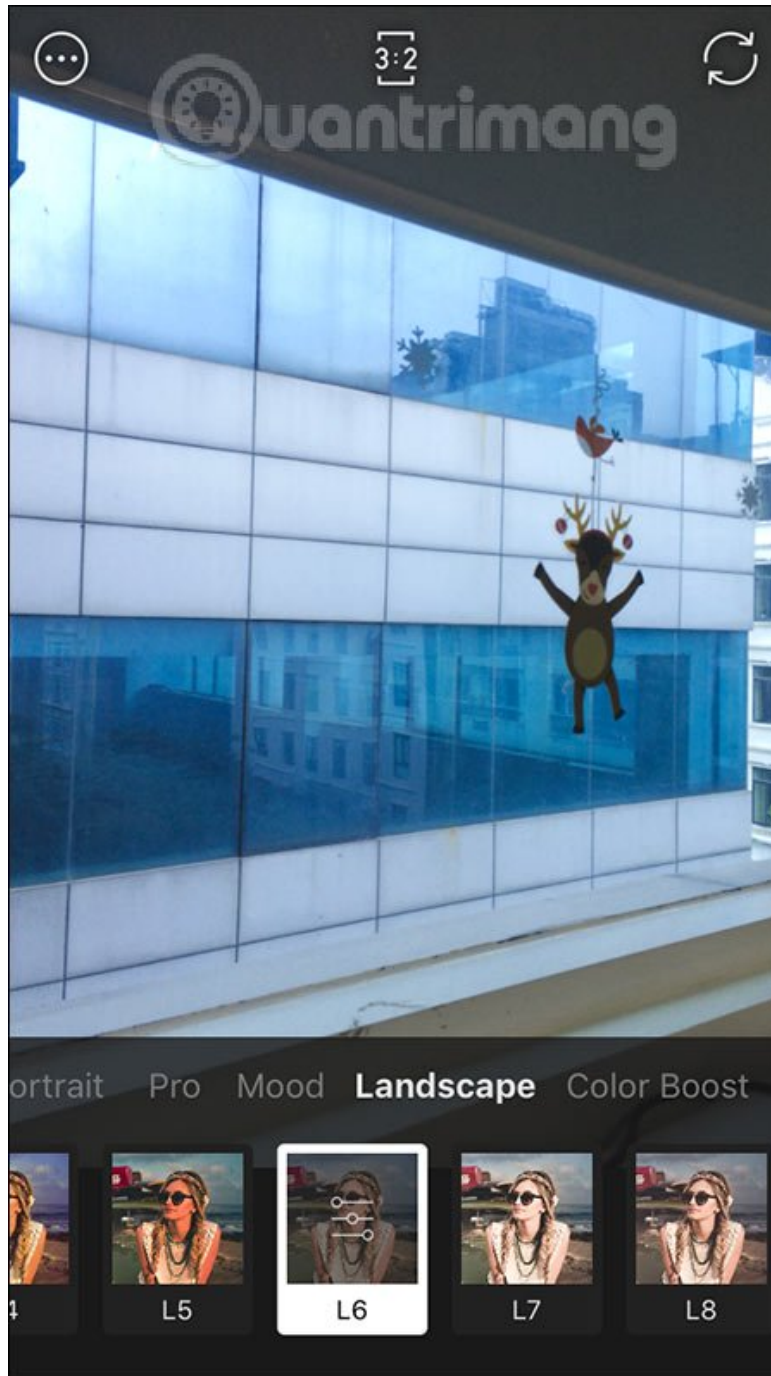

Step 8:

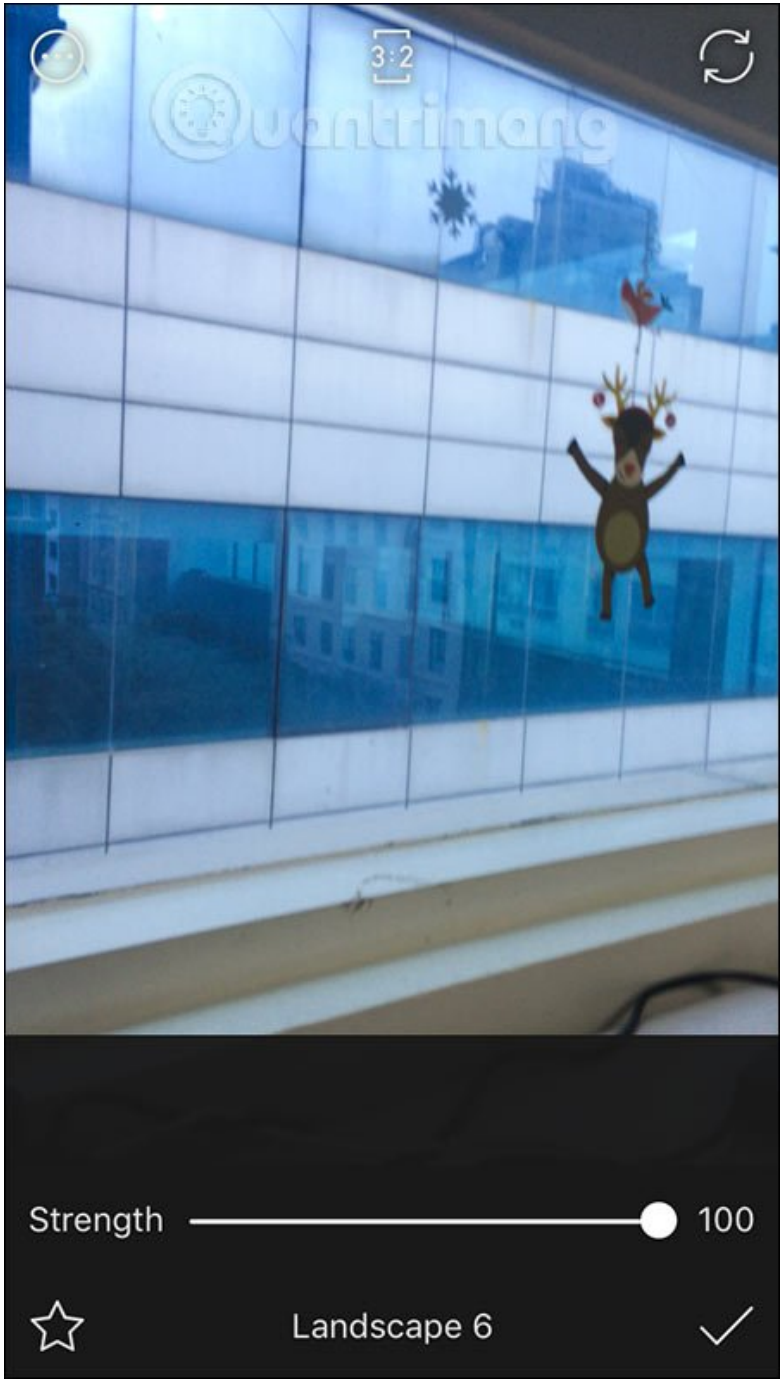

The application automatically applies vintage color filters to photos. If you want to **choose the color you want** , then click on **the icon of 3 interlocking circles** . Now display a lot of color filters to choose from.

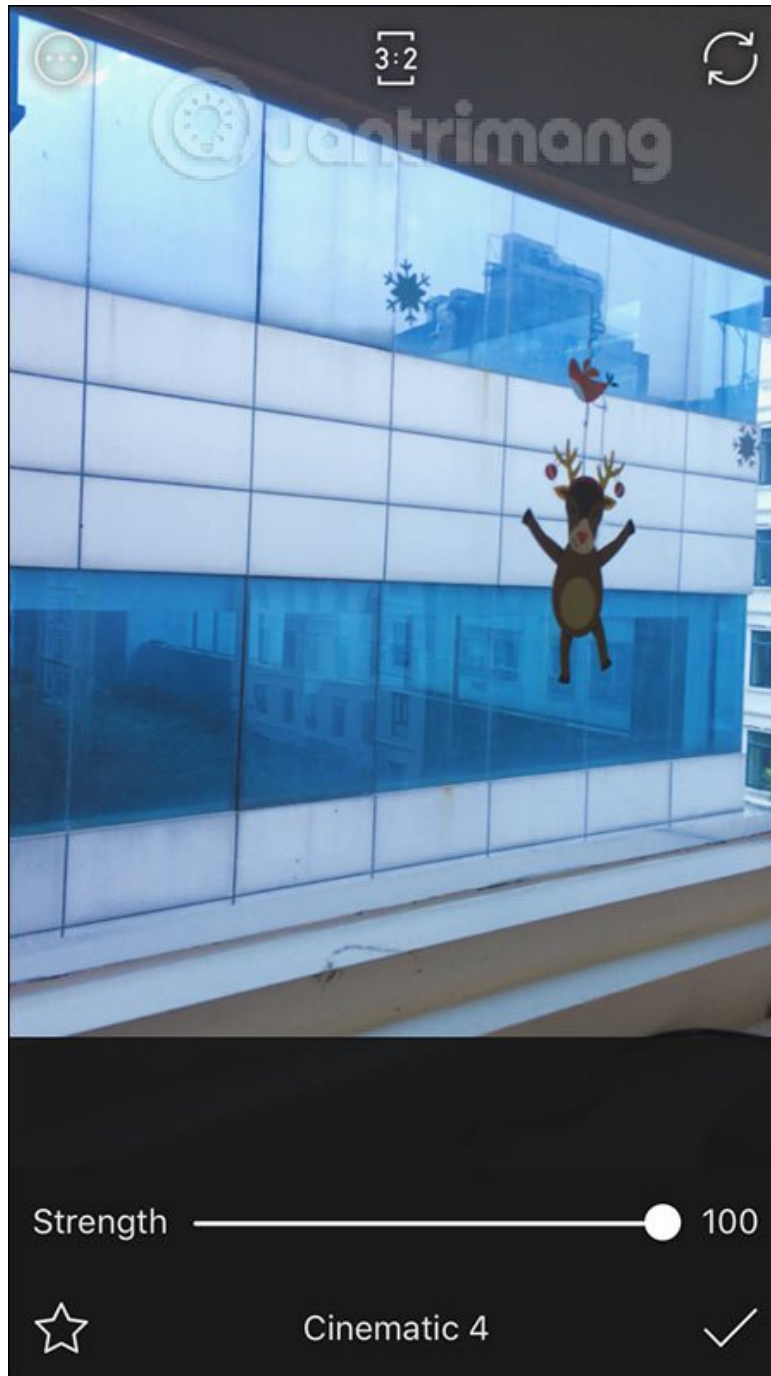

At each filter, there is a level adjustment bar that applies color to the image. So users can easily adjust the colors to better suit.

Step 9:

Once setup is complete, all you have to do is take a photo. Photos after taking are displayed in the gallery of the application. **Click on the image** to see there are many image options. To **edit photos**, click **the filmstrip icon** in the bottom right corner.
