## Instructions for using Nimbus Capture to take photos of Chrome

### Step 1:

We click on the link below to install the Nimbus Capture utility on your computer and click **Add to Chrome** to install.

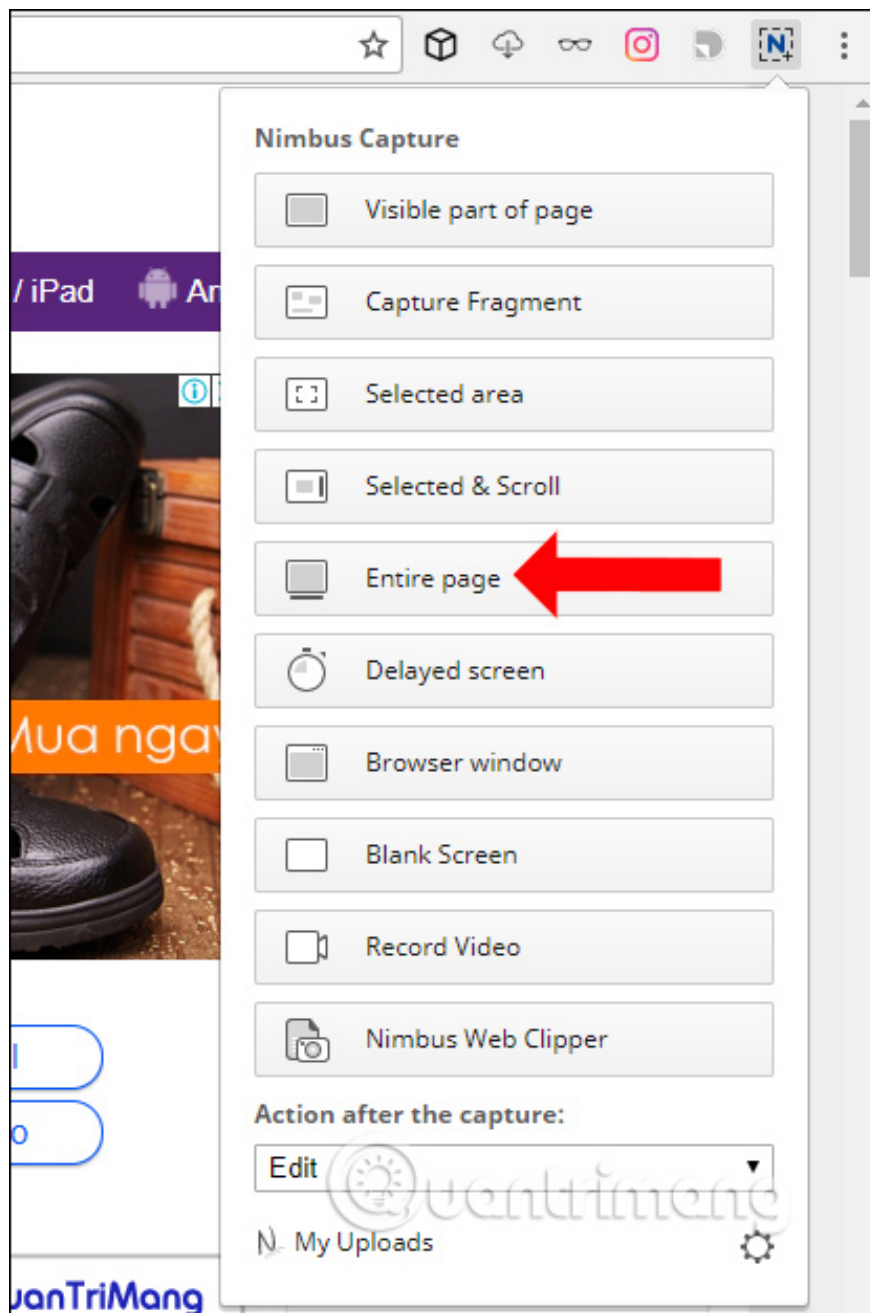

1. Download the Nimbus Capture Chrome utility

## Step 2:

The installation process is soon and you will see the utility icon at the end of the address bar. Open the website to take a screenshot and click on the widget icon. A list of screen capture options appears.

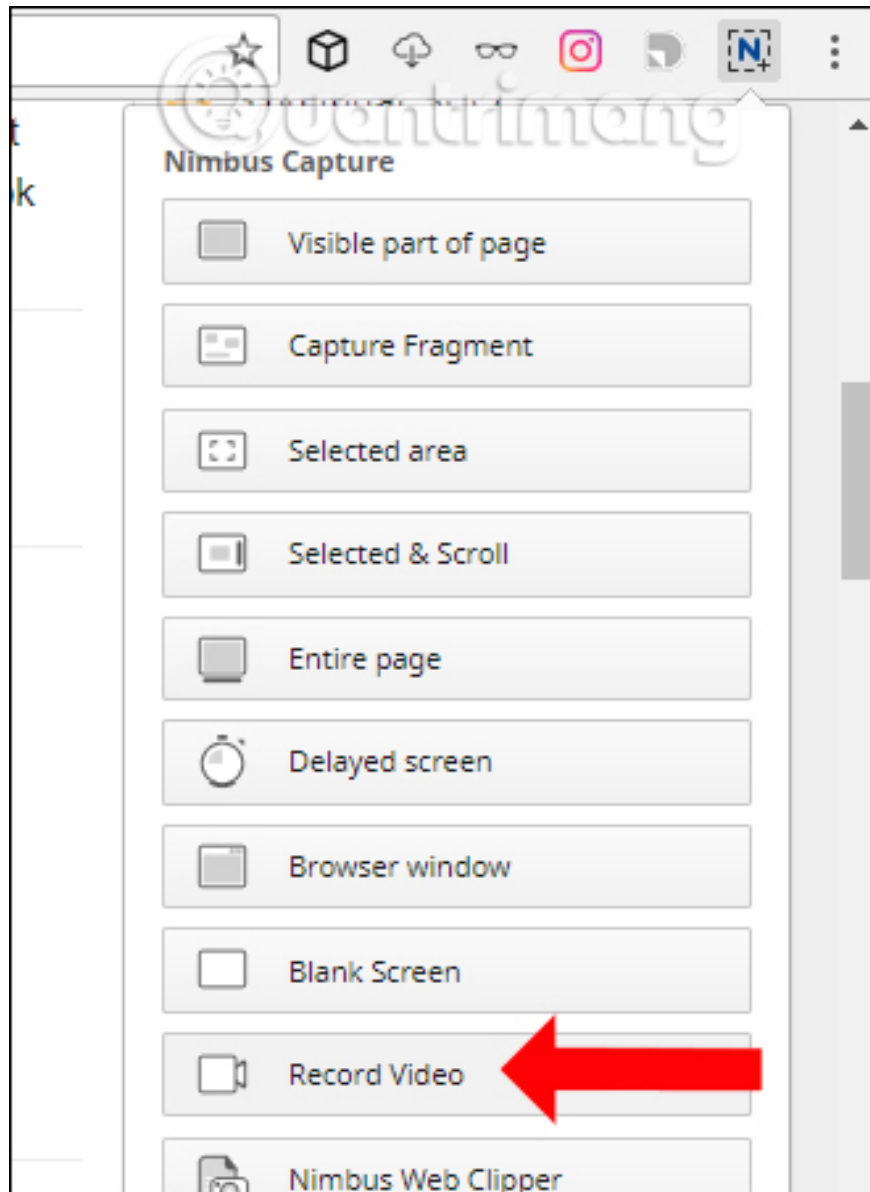

If you want to capture the entire screen, press **Entire page** .

If you want to capture a certain area then click on **Selected area** and drag the plus sign to surround the area you want to take a picture.

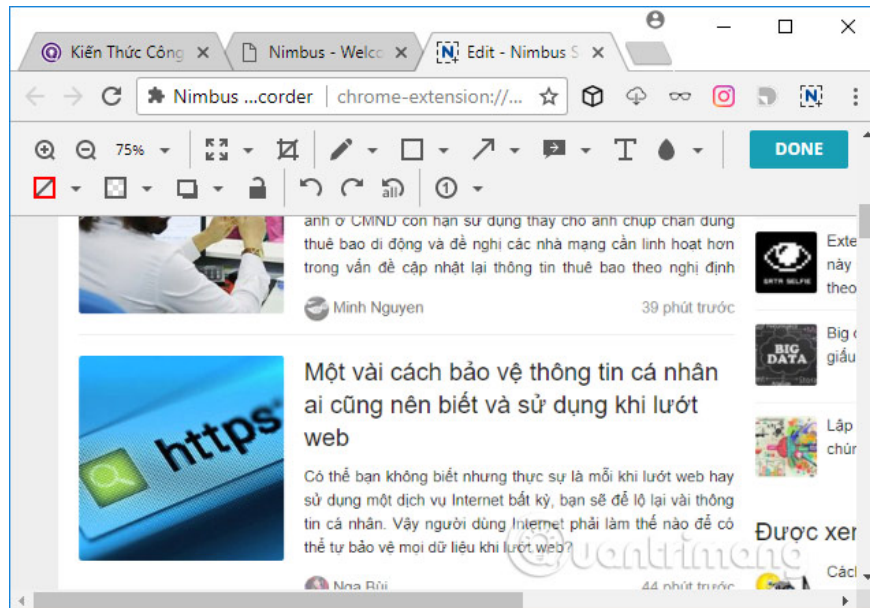

To record a video of the screen click on **Record Video** and then agree to let the utility use the microphone on the computer.

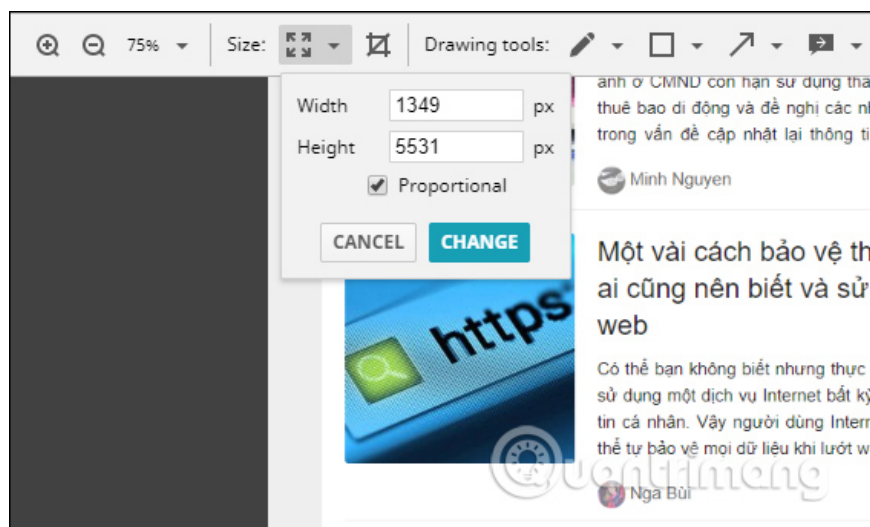

**Step 3:**

The utility will automatically switch from top to bottom to capture the full length and width of the page. After that, the user will be moved to a custom page of screen shots, with tools above the interface.

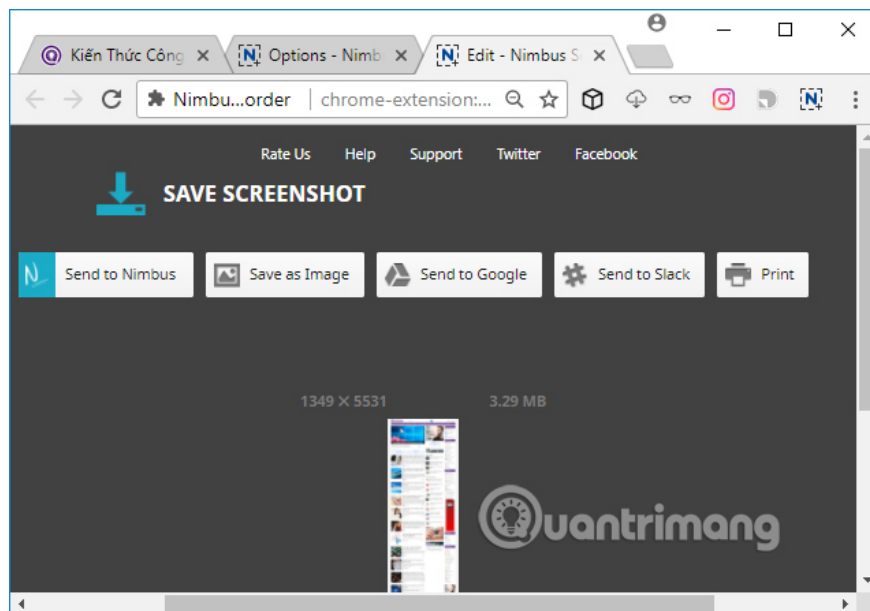

For example, we choose to capture the screenshot size. **Done** editing press **the Done button** in the right corner to save.

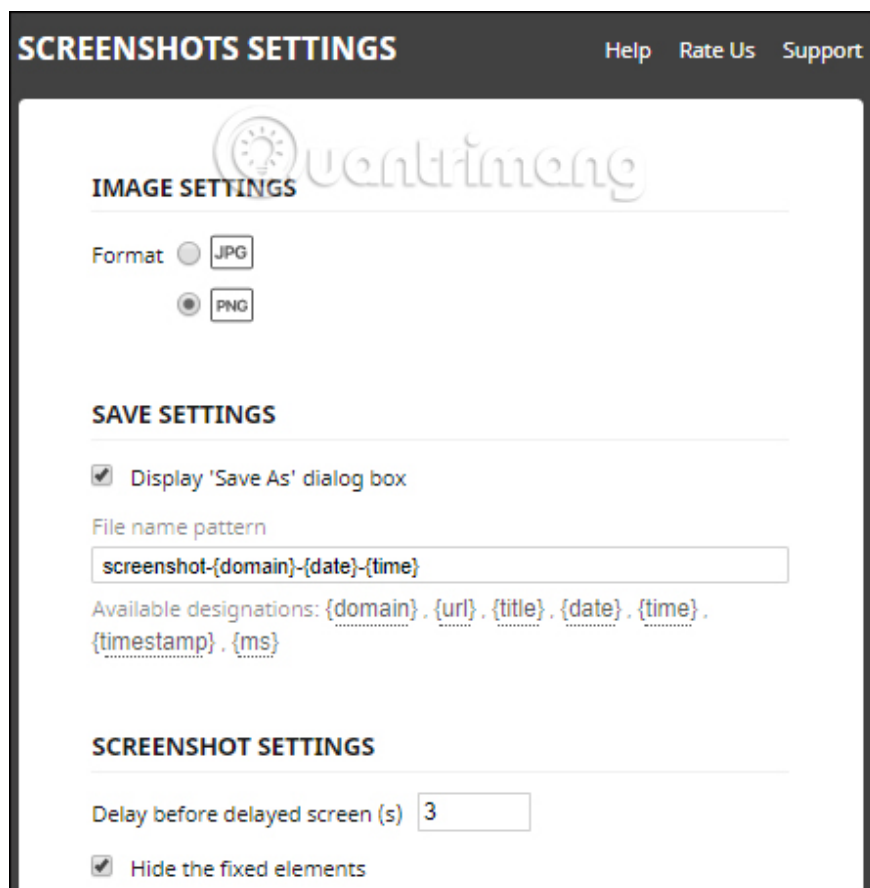

**Step 4:**

Users will then be given the option to save images to a computer or save them on Google Drive, print images.

### Step 5:

If you want to customize the gadget Nimbus Capture click **the gear icon** in the Nimbus Capture utility interface. At the custom website utility, we can change the saved screenshot format, edit screen capture options, change the Nimbus Capture list display or shortcut using Nimbus Capture.

Nimbus Capture utility on Chrome as well as other screen capture tools, help you take screen capture options and record the screen video you need. If you register for a Nimbus Capture account, users will have additional options when they can store photos in their accounts.
