

How to take screenshot on HP windows 10 computer

Taking a screenshot of an HP laptop is a fairly simple trick that users should know to be able to apply it conveniently. Refer to how to take a screenshot of an HP laptop.

Taking a screenshot of an HP laptop is a fairly simple trick that users should know to be able to apply it conveniently and quickly. However, for many new users of technology, understanding how to perform these useful operations is still quite vague. Let's learn how to take a screenshot of an HP computer with TipsMake.

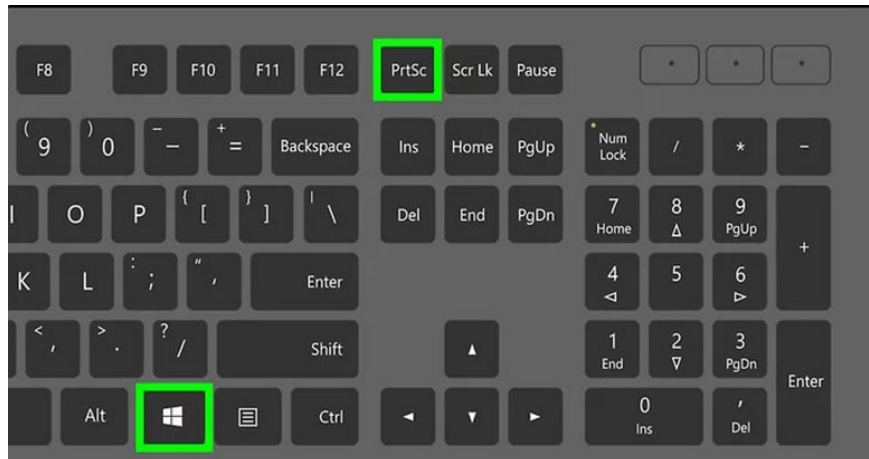

How to take screenshot on HP windows 10 computer

Use keyboard shortcuts

This is the fastest way to take a screenshot on an HP computer for you to easily operate. You follow these steps:

Step 1: Select Print Screen, this key is located on the far right of the first horizontal row at the top of the keyboard. This shortcut can also be written as prt scr, prnt scrn,... or replaced with the PS key.

Step 2: Next, press Ctrl + V and paste it into the file and send it to the target you want.

How to automatically save screenshots on HP laptops

After this capture operation the screen will flash black immediately to confirm the capture process is complete.

Step 1: Press the Windows + Prt Sc key combination. After completing the operation, next open the captured image with the following steps.

Step 2: Go to My Computer (this PC) => Open the File Explorer folder (quick operation with the key combination Windows + E).

Step 3: Select Pictures => Select Screenshots. The HP laptop screenshot taken with the above operation will be saved.

Use Snip & Sketch to take screenshots on HP laptops

You can use the application available on your laptop to take a screenshot without relying on keyboard shortcuts. Use the Snip & Sketch application to take a screenshot on your HP laptop.

Step 1: Go to Start Menu

Step 2: Search for Snip & Sketch in the search bar and tap on the app

Step 3: A menu bar will appear at the top of the screen. Click the fourth option to capture the entire image, which is an icon that looks like a rectangle with dots in each corner.

Step 4: Once done, Windows will save the image to the clipboard and a notification will appear. Click on the notification to open the customization window.

Also, if you want to insert an image into a word or document, you don't need to click on the thumbnail. Place the cursor where you want the image to appear, then just press Ctrl + V to insert the image.

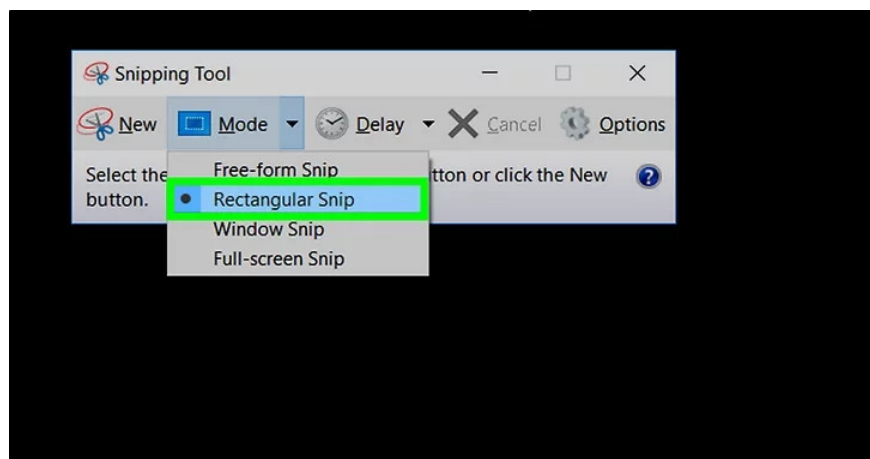

Step 5: In this window, you mark and crop the image using the tools at the top of the screen.

Step 6: Click the Save icon to save the image

Step 7: In the window, choose a file name and location for the saved image.

Use Snipping Tool to take screenshots on HP laptops

In case you want to take a screenshot of a certain part of the screen, you can use the application available on HP laptops. How to use the application is extremely simple with the following steps:

Step 1: Select the screen location you want to capture. Go to the Start Menu.

Step 2: Search for Snipping Tool and click on the application

Step 3: In the Mode category, select the type you want to use. To capture the entire screen, tap Full screen Snip. To capture in certain locations, tap New.

Step 4: Snipping Tool will display the captured image in a new window, you can use the above tools to take notes and mark before saving.

Step 5: To save the image, click on the disk icon.

Step 6: A new window appears where you can name the image, select the file type and click save to the location you want.
