In many cases we need to take screenshots of a computer to use for work or personal purposes. Many people do not know how to take a screenshot of the computer, but actually it is extremely simple operation. In this article, TipsMake.com will guide you how to take screenshots on HP top lap extremely fast and simple, invite you to follow.

The easiest way to take a screenshot of your computer is to use the **Windows + Print** shortcut , and you will see that the screen flickers 1 play, that is, the image has been taken.

Photos will be automatically saved in the Picture folder, go to **My Computer**, open the **Picture** folder will have a folder named **Screenshots** and in the Screenshots folder will contain the photos you have taken earlier.

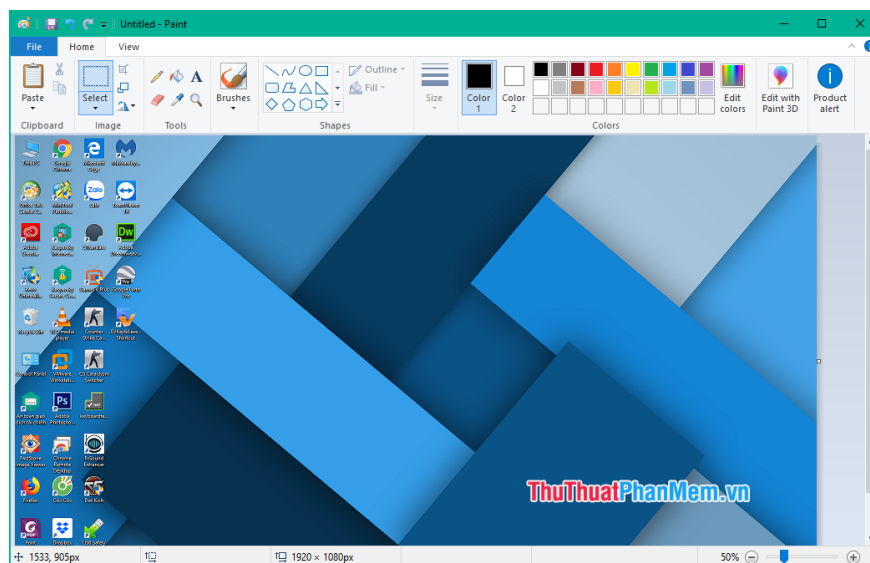

In addition to the above we can use another way to take screenshots that is just press each **Print** button .

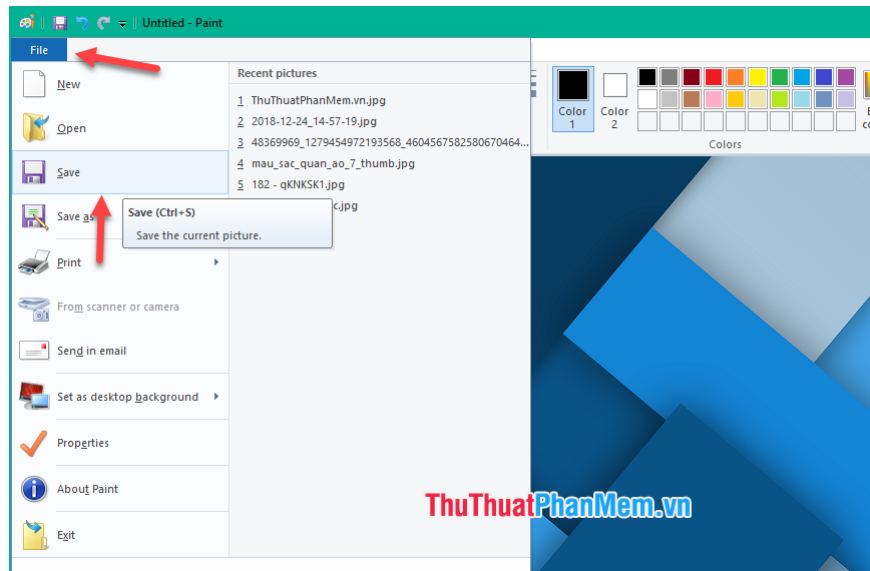

When you press the Print button, the screen will be captured and cached, now open the Paint application and press Ctrl + V to paste the image into Paint.

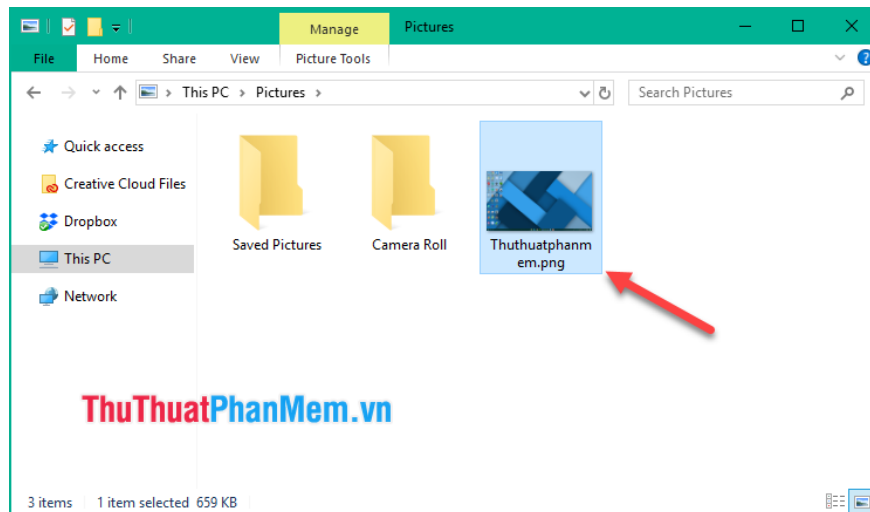

Here you can edit the image if desired.

Finally, select **File -> Save** to save the image.

So we have a screenshot as you like:

Above are the 2 easiest ways to take screenshots on HP computers, wish you success!
