

How to take screenshots of the game screen on Steam

Steam has a built-in screen capture tool when playing games, and users can reset it.

To take a screenshot of the computer screen, we usually use the PrtSc key or some tools on Windows 10. When playing games, although we can also use that key, but some games when using the smart way will usually display images with no content especially when you take photos when playing games on Steam. If so, you should immediately use the built-in photography feature in Steam to produce sharp, full-screen image quality. Besides, we can also reset screen capture feature on Steam for more convenient to use. The following article will guide you how to take photos when playing games on Steam.

Instructions for taking a screenshot of the game screen on Steam

Step 1:

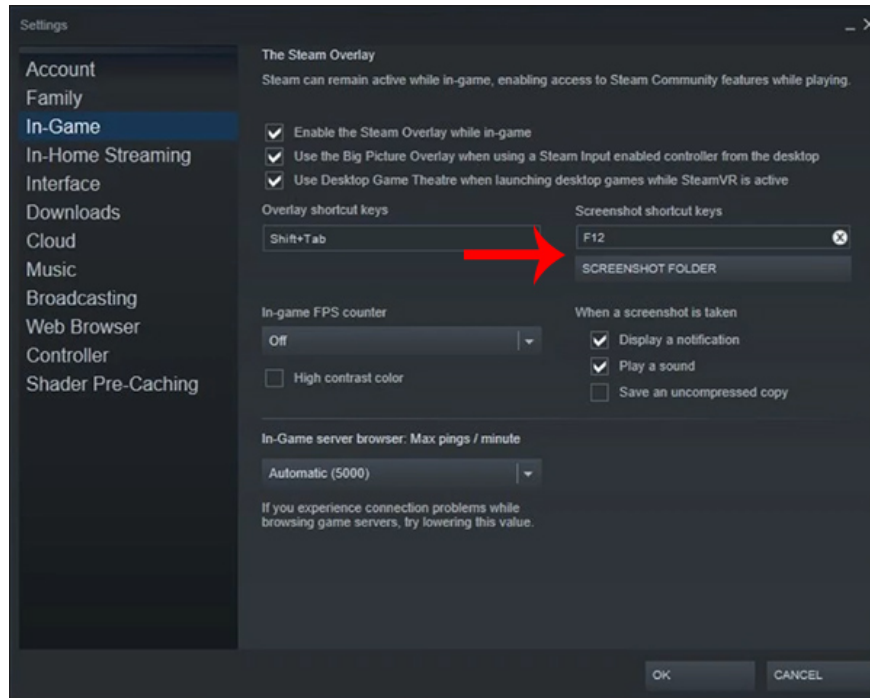

First of all, we need to proceed to set up a screenshot of gaming screens on Steam. The default shortcut that Steam uses to take screenshots is F12. At the interface, click **Steam** in the top left corner and select **Settings**.

Step 2:

Switch to the installation interface. Here, users click on **In-Game** and then look at the content next to, **Screenshot shortcut keys** will select shortcuts to take snapshots of the screen, select a folder to save screenshots. Below will be the option to send notifications or sound when taking screenshots.

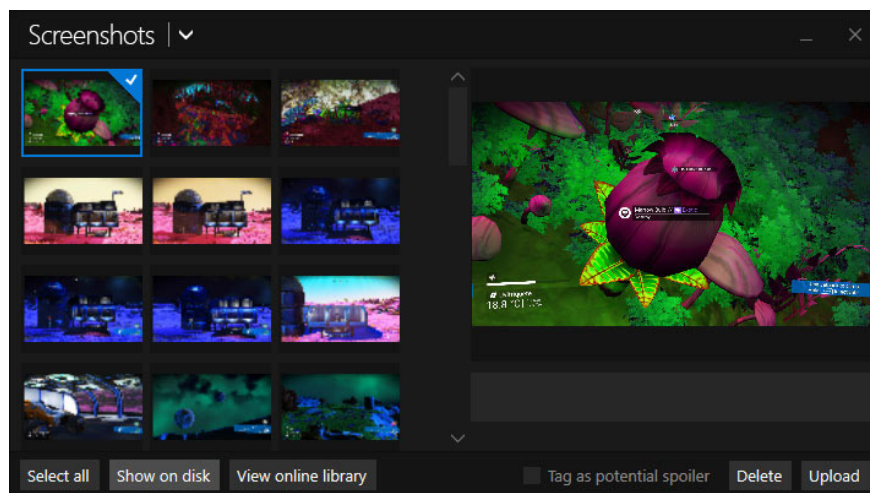

Finally **click OK** to save the changes.

Step 3:

Open the gaming screen and then press the screen capture key you set earlier. When the screenshot is completed, the Steam Uploader screen will appear, saving the screenshots you have taken, along with a number of options:

1. Select All: Select all of this photo just taken.
2. Show On Disk: Displays pictures in the folder you have set up earlier.
3. Delete: Delete the selected image.
4. Add a caption: Add a description to the photo.
5. Upload: Upload the selected photo with Caption wrote.
6. View Online Library: If you've clicked Upload, you will see the photos in the library on Steam.

Note to you , in case we can not find the image in the saved image folder, you access the path C: Programfiles (x86) SteamuserdataID_Steam760remoteID_Game screenshots

ID_Steam is the Steam account ID of each person and ID_Game can be viewed in the game introduction page after the / app / character at the game's URL.
