

# How to take screenshots on Apple Watch

Apple always makes it easy for users to take screenshots on iPhone or iPad. And the Apple Watch is no exception. This is useful for many reasons, including writing Apple Watch user guides like this article!

Apple always makes it easy for users to take screenshots on iPhone or iPad. And the Apple Watch is no exception. This is useful for many reasons, including writing instructions on how to use Apple Watch like this article!

## Enable screenshot from iPhone

1. From your iPhone, open the **Apple Watch** app .
2. Click the **My Watch** tab > **General** .
3. Scroll down and switch the **Enable Screenshots** option to **On**.

4. Press the **Digital Crown** and the **Side** button (power button) at the same time on the Apple Watch.

5. New screenshots from Apple Watch will now be copied to the **Photos** app on iPhone devices.

For some other ways to get the most out of your Apple Watch, please refer to the following:

1. Instructions for using Apple Watch to find iPhone
2. How to use the Zoom feature on Apple Watch for people with low vision
3. How to create and manage alarms on Apple Watch
4. How to boot and reset Apple Watch

Hope you are successful.
