## Instructions for transferring 11-digit contacts to 10 numbers on black-and-white phones

As mentioned above, since there are currently no applications that support users to use the black-and-white phone on top of digital conversion, you have to do the following manually:

### Step 1:

On the black and white phone, press and hold the **Cancel call** button to turn off the device.

### Step 2:

You remove the sim from the device to perform the switch to the phone number of the brick phone directory.

### Step 3:

Complete the above step, you use the sim and install on any Android smartphone (iPhone devices cannot support you to update the black and white phone book).

### Step 4:

When the smartphone device has successfully identified the SIM, you can convert the number by using supporting applications such as: My Viettel, Edit Prefix Number, Transfer Phone Number, or the new number conversion application. . and countless other similar applications.

If you do not know how to do it, you can refer to how to transfer the 11-digit subscription to 10 numbers in the Android phone book to know how to do it in detail with the above applications.

### Step 5:

Successfully switching on smartphones, you just need to remove the sim on your Android phone and put it back into our popular black and white phone.

So, with just a few simple steps like this, you will be able to transfer the 11-digit number to the phone 'leper' already, hopefully you will also perform successfully on your device to quickly get the name New contact book on your contacts application.

I wish you all success!
