

How to transfer data from old iPhone to new iPhone automatically on iOS 11

Later this year, with iOS 11 update, you can set up to transfer data from the old iPhone to the new iPhone automatically without using iTunes or iCloud anymore.

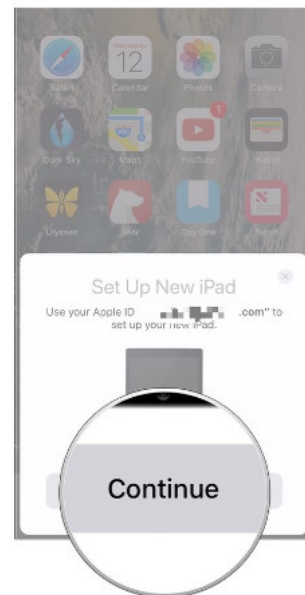

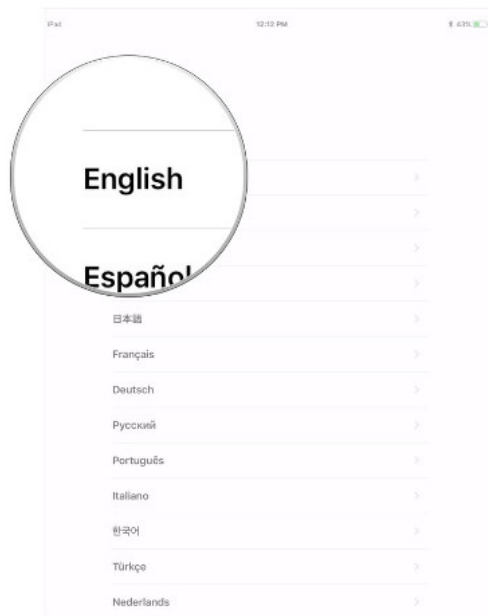

Apple occasionally provides updates for iOS, watchOS, tvOS, and macOS in the form of Developer Preview or Public Beta versions for iPhone, iPad, Apple TV and Mac (sadly, there is no Public Beta version for Apple Watch). Although the beta has new features, they also contain pre-release bugs that can interfere with your normal use of your iPhone, iPad, Apple Watch, Apple TV or Mac and are not intended for use. daily on the main device. That's why you should stay away from Developer Preview updates unless you need them to develop the software and use your Public Beta versions carefully. If not, wait for the final release.
