

# How to transfer notes from Evernote to Mac's Notes

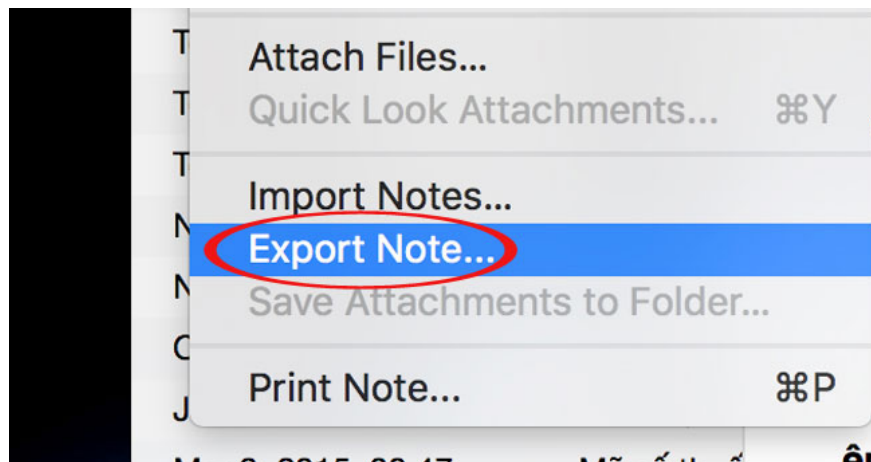

The latest operating system version of Mac OS X El Capitan has upgraded many new features to support users, including the ability to copy notes from Evernote software to Notes

In the new version of OS X El Capitan on the Mac, the application is either upgraded or provided by the manufacturer. The Notes app is now able to copy all data from Evernote to without losing fonts, images, text colors, etc. Follow the Network Administration steps below to enable transfer notes.

1. Download Evernote software for free
2. Download OS X El Capitan for free

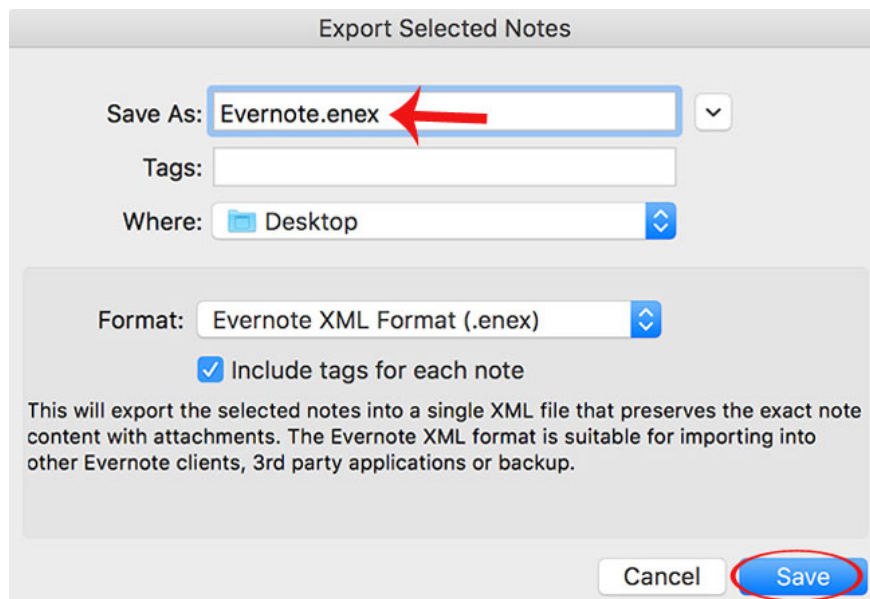

## Step 1:

Open the Evernote application, in the window containing the notes list, press **Cmd + A** to select the entire note (or just select the notes you want to switch to Notes).

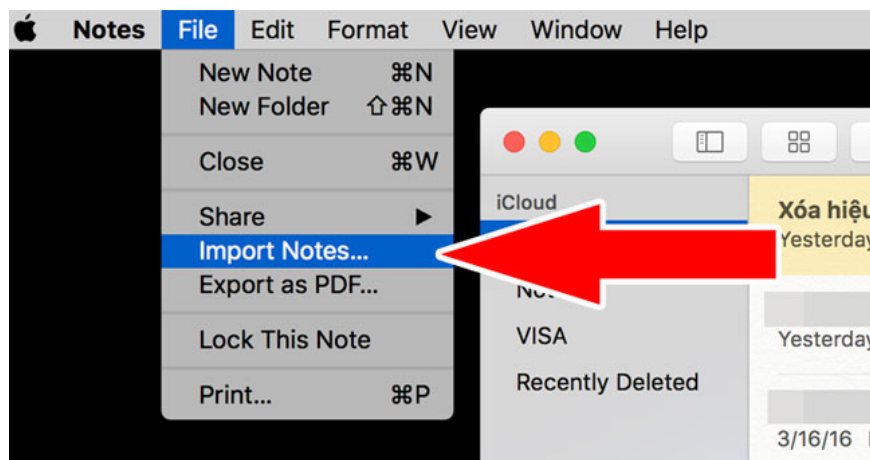

## Step 2:

Select **File> Export Notes** to name the output file **.ENEX** , select the **destination** and click **Save** .

### Step 3:

Open the Notes application, go to **File**, select **Import Notes** . Then select the **.ENEX** file just recently **exported**

Thus, the steps to transfer notes to the Notes application on the Mac have been completed. Now, users can hide notes by password or lock them to avoid being peeked.
