Suppose if your iPhone's memory capacity is full and you want to transfer pictures from iPhone to Windows computer. If you are an expert in iOS devices, you can easily do it. But if it is a new user, unfamiliar with the features of iOS, it is indeed very difficult.

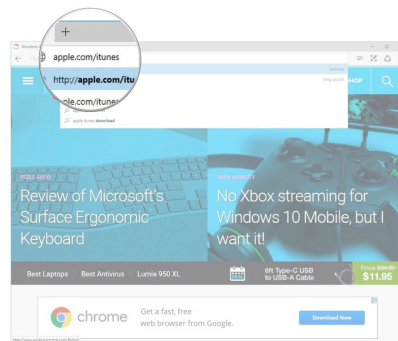

Suppose if your iPhone's memory capacity is full and you want to **transfer pictures from iPhone to Windows computer** . If you are an expert in iOS devices, you can easily do it. But if it is a new user, unfamiliar with the features of iOS, it is indeed very difficult.

In addition Apple does not allow users to transfer data directly from iPhone phones to Windows computers and even Macs. So how to transfer photos from iPhone to Windows computer, readers can refer to the article. Below of Network Administration.

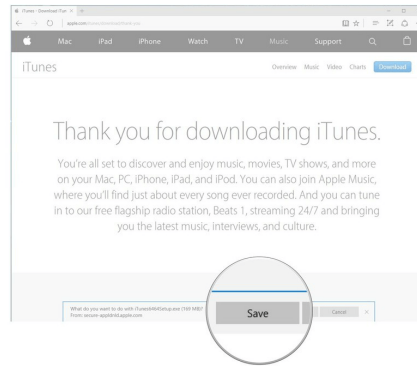

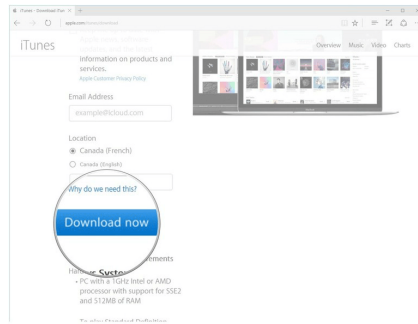

## 1. How to download and install iTunes?

In order for your Windows computer to receive iPhone and iPad on File Explorer, you need to install iTunes.

1. Open any browser on your Windows 10 computer.
2. Navigate to the page: [www.apple.com/itunes/download](http://www.apple.com/itunes/download).

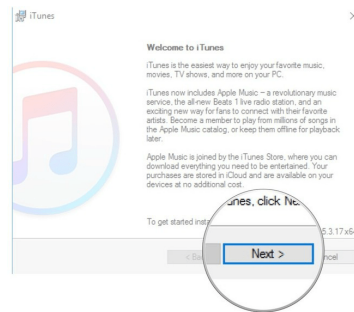

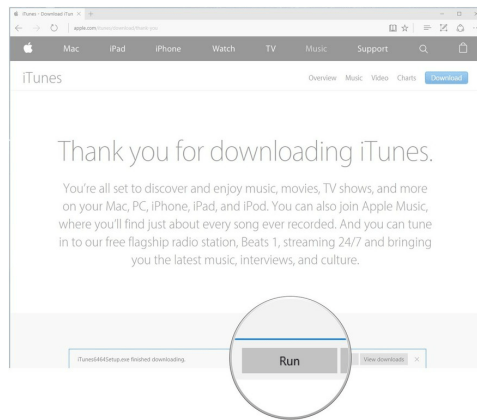

3. Click the **Download** button.
4. Click the **Save** button, and will begin the process of downloading iTunes.

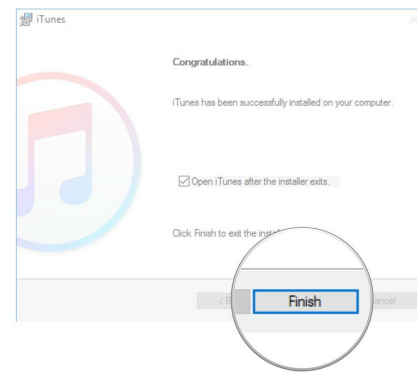

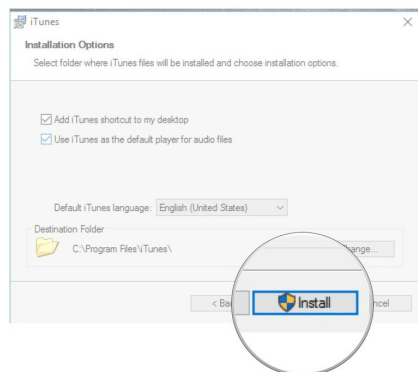

5. After the download process is complete, click **Run** and the iTunes installer will appear on the screen.

6. Click **Next**.

7. Click **Install**.

8. Click **Finish**.

## 2. Windows Explorer

No matter what version of Windows you are using, to transfer images from your iPhone to a Windows computer you can use Windows Explorer. Using File Explorer to transfer photos from iPhone, iPad to Windows 10 computer doesn't take too long. After installing iTunes, follow the steps below.

To transfer images from your iPhone device to a Windows computer using Windows Explorer, follow the steps below:

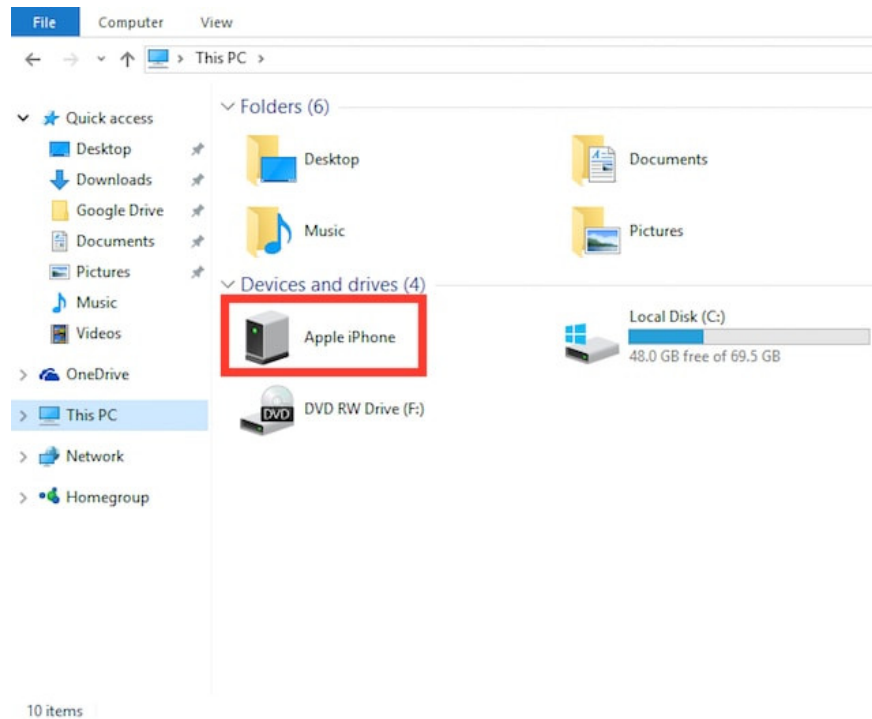

- First connect your iPhone phone to Windows computer. Now on the iPhone phone screen you will see a message asking: 'Do you want to allow this device to access photos and videos on the iPhone?'. Very simply you just need to click **Allow**.

- Open Windows Explorer by double-clicking on **This PC** icon on your computer, or click on the **Explorer** icon on the **Taskbar** .

Or you can press **Windows + E** key combination to open Windows Explorer. On the Windows Explorer window you navigate to This PC.

- Now you will see the iPhone phone displayed on the computer.

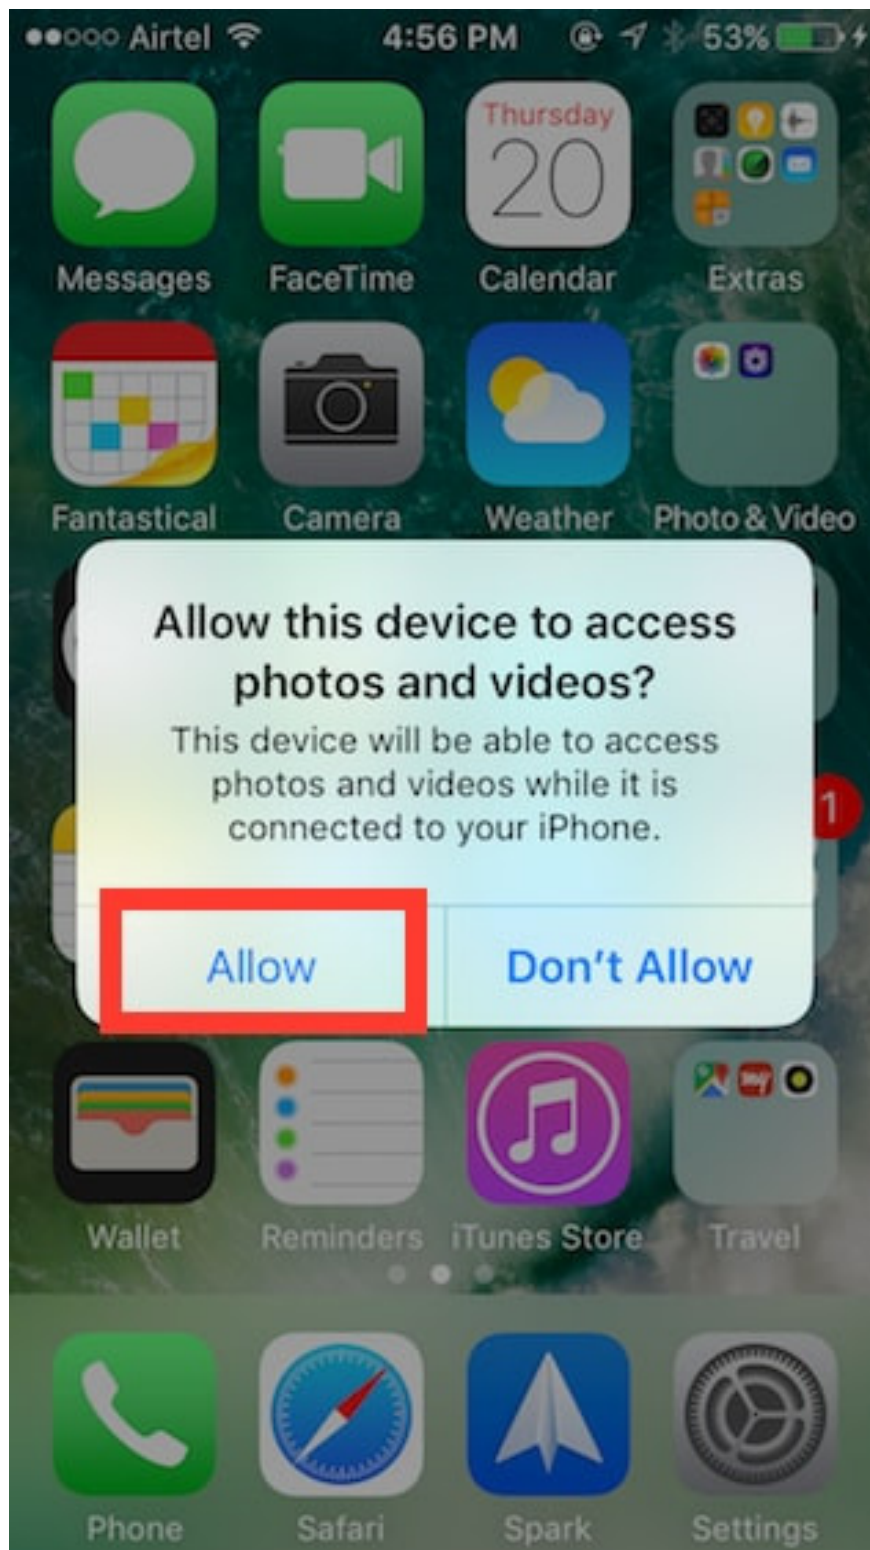

Your task is to open the **Apple iPhone** folder, then navigate to the **DCIM folder** . This folder contains all photos and videos stored on iPhone devices. Quite simply, you can copy and paste the images you want to transfer to a Windows computer.

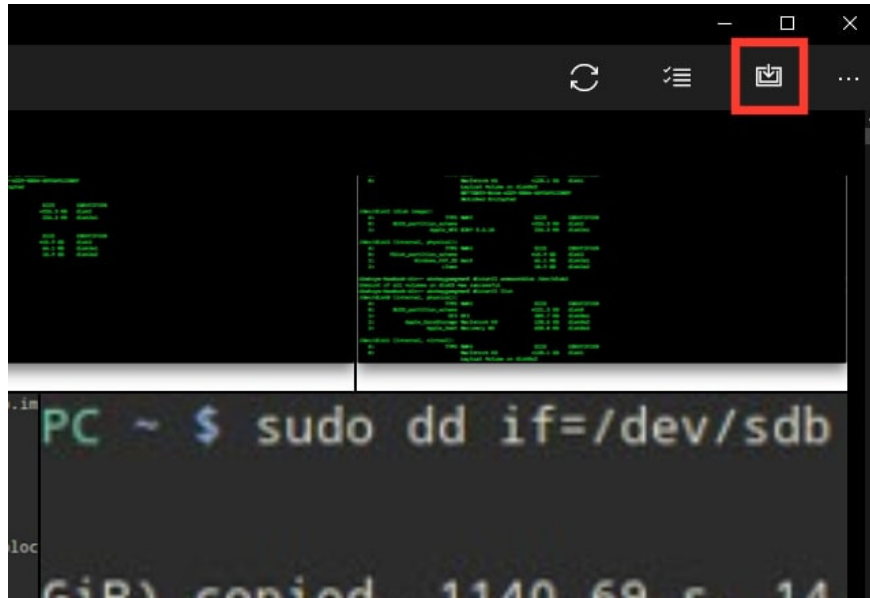

### 3. Use the Windows Photo application

The easiest way to transfer photos from iPhone to computer is by using the built-in Photo app on Windows. The application allows users to easily transfer images from iPhone phones to Windows computers. To do this, follow the steps below:

- **First connect your iPhone phone to Windows computer** . Now on the iPhone phone screen you will see a message asking: 'Do you want to allow this device to access photos and videos on the iPhone ?'. Very simply you just need to click Allow.

- Next on Windows computer, you open **Photos** app. Here click the **Import** icon in the top right corner of the application window.

- **Select the image you want to enter** . You can select each image one by one or you can select all images. Then click **Continue** .

## Select items to import from Apple iPhone

New items [Clear all](#)

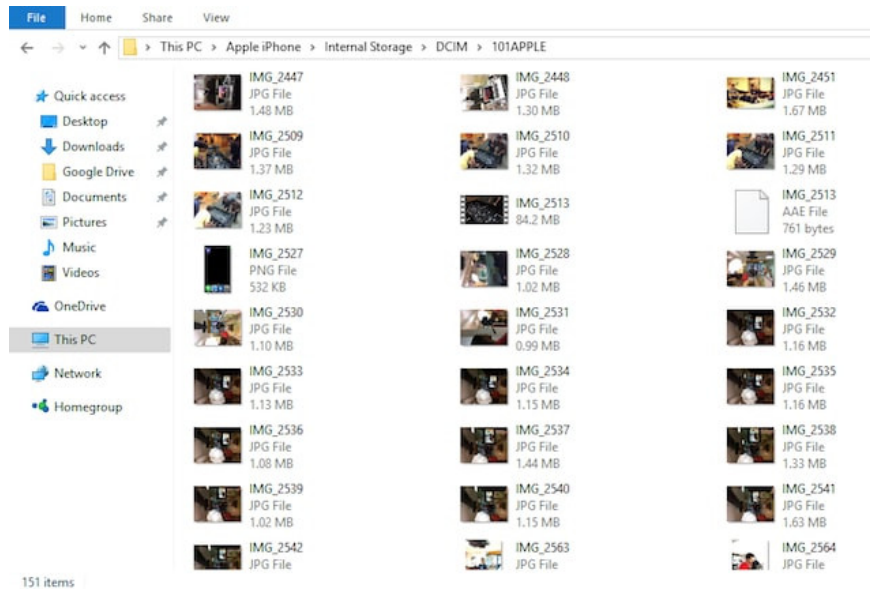

150 of 150 items selected

Continue

Cancel

And all the images you selected will be transferred to the Windows computer.

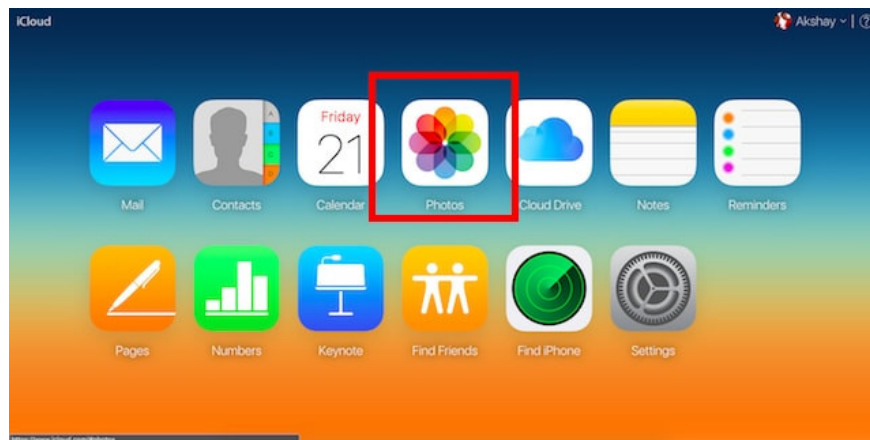

## 4. iCloud Photos

iPhone integrates a great feature called " *iCloud Photo Library* ", which automatically syncs all photos on your iPhone to iCloud account.

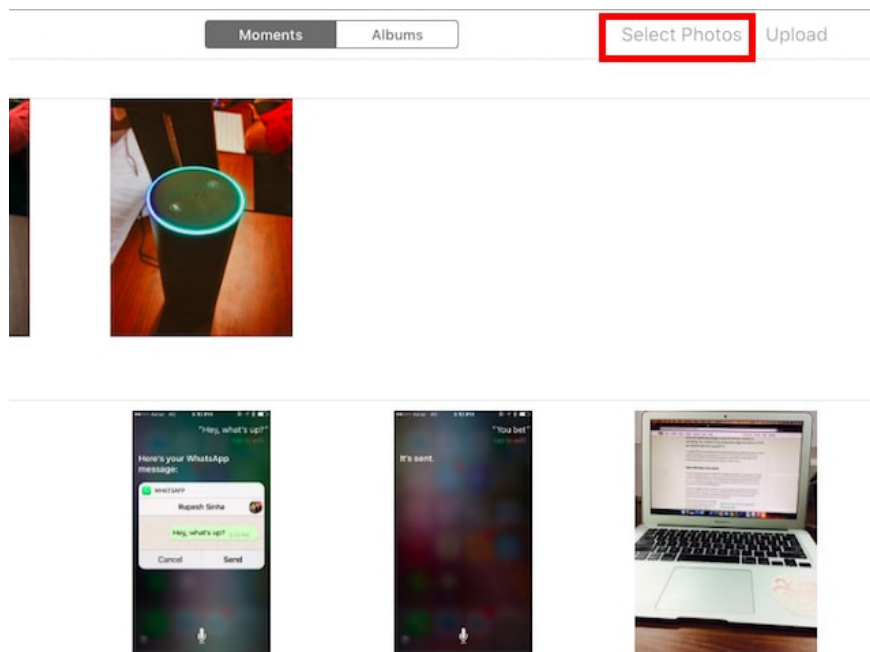

If you have not activated iCloud Photo Library, simply go to **Settings => Photos and Camera** . Here you change the status of iCloud Photo Library option to **ON** . And your images will be uploaded to iCloud account.

To transfer images to a Windows computer, follow the steps below:

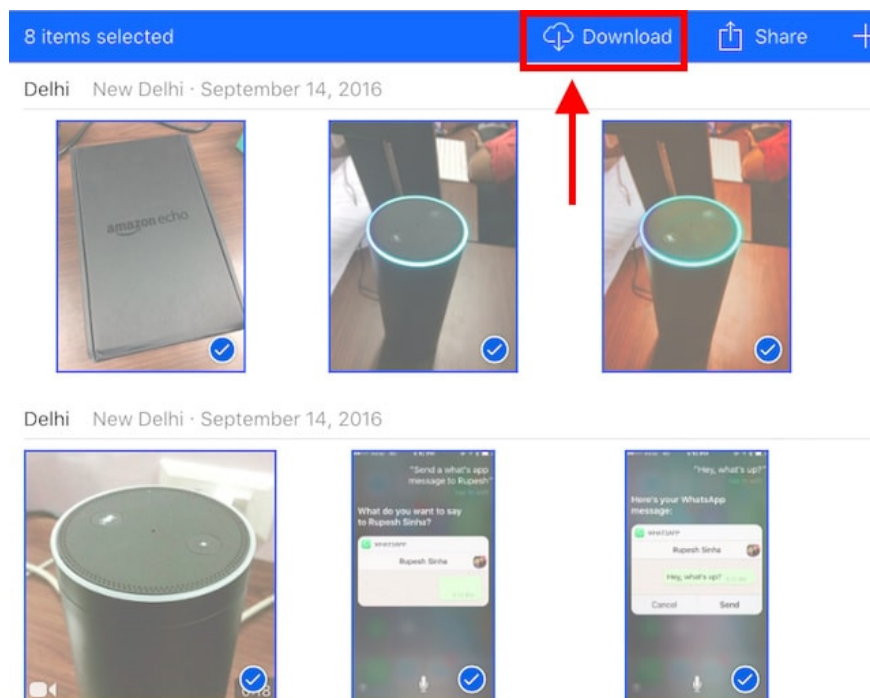

- First open your Windows computer, then open any browser and access iCloud. Log in with **Apple ID** and select Photos (photos).

- Here, you will see all your images on the web browser. Your task is to select **Select photos** (select images) and select the images you want to export to the computer (hold Ctrl to select multiple photos).

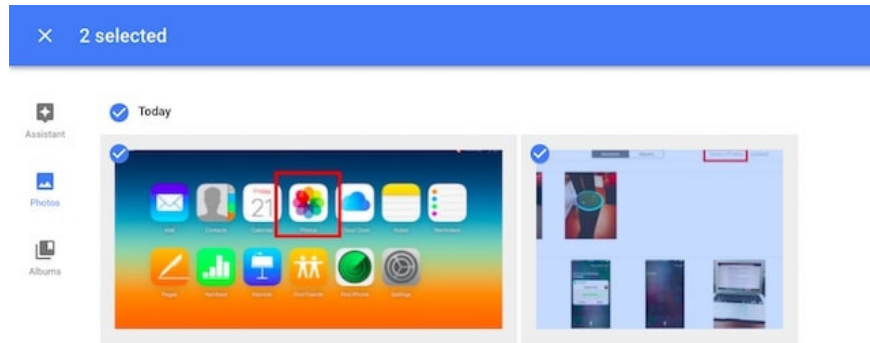

- Next, click **Download** to download the image to your computer.

## 5. Google Photos

If using Google Photos on an iPhone phone, you can easily transfer images from your device to your Windows computer. To use Google Photos to transfer photos to a Windows computer, follow the steps below:

- First on your computer, visit the Google Photos web app page. Here you can choose the image you want to download.

- Click on the **3 dots** icon in the top right corner, then click **Download** .

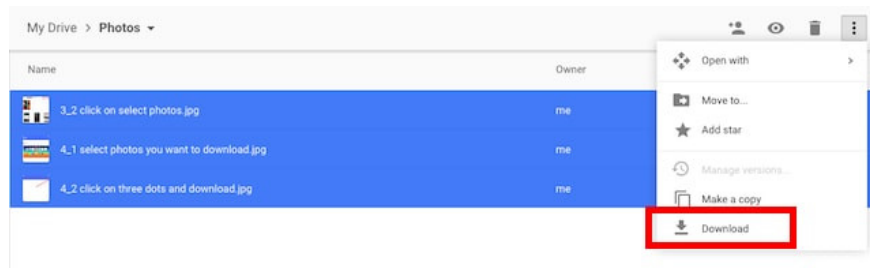

## 6. Google Drive or Dropbox

In addition, you can choose to use cloud storage services to transfer images from iPhone phones to Windows computers. To use Google Drive or Dropbox to transfer images to a Windows computer, follow the steps below:

First download the Google Drive app or Dropbox application to your iPhone phone. Then upload the image to the cloud service.

1. Download Google Drive to your iPhone and install it here.
2. Download Dropbox to your iPhone and install it here.

Next on the computer, you open Google Drive or Dropbox then log in your account. And you will see all the images you upload. Just select any image you want to download, then click the **3 dots** icon in the top right corner, select **Download** .

After you have downloaded the image to your computer, you can delete the images on your iPhone device to free up memory space.
