Step 2:

After the installation is complete, it will automatically apply the feature to the device without accessing Settings. This tweak adds functions for volume up / down keys including:

1. Press and hold the volume up button to move to the next song.
2. Press and hold the volume down button to return to the previous song.

3. Press and hold both keys to stop or listen to the song, acting as the Play / Pause button.
4. Press the power button and volume up button at the same time to maximize the volume.
5. Simultaneously press the power button and volume down button to turn off the sound.

Tuning VolSkip11 brings different options when listening to music for volume up and down keys. Besides the traditional function of the key, you can now transfer songs easily when listening to music on iPhone with the equalizer button.
