

How to translate many languages ??on Siri iOS 11

Translating many languages ??on Siri iOS 11 is an extremely attractive feature, enabling users to quickly translate English language into any language.

Siri virtual assistant on iOS 11 is also provided with some new features, such as control by the content importer in addition to voice control. Or useful multilingual translation capabilities. For example, if you are traveling and want to ask for directions, then Siri will become your interpreter. Especially in this iOS 11 version, Siri virtual assistant also has the ability to understand the context better, help you give the correct words.

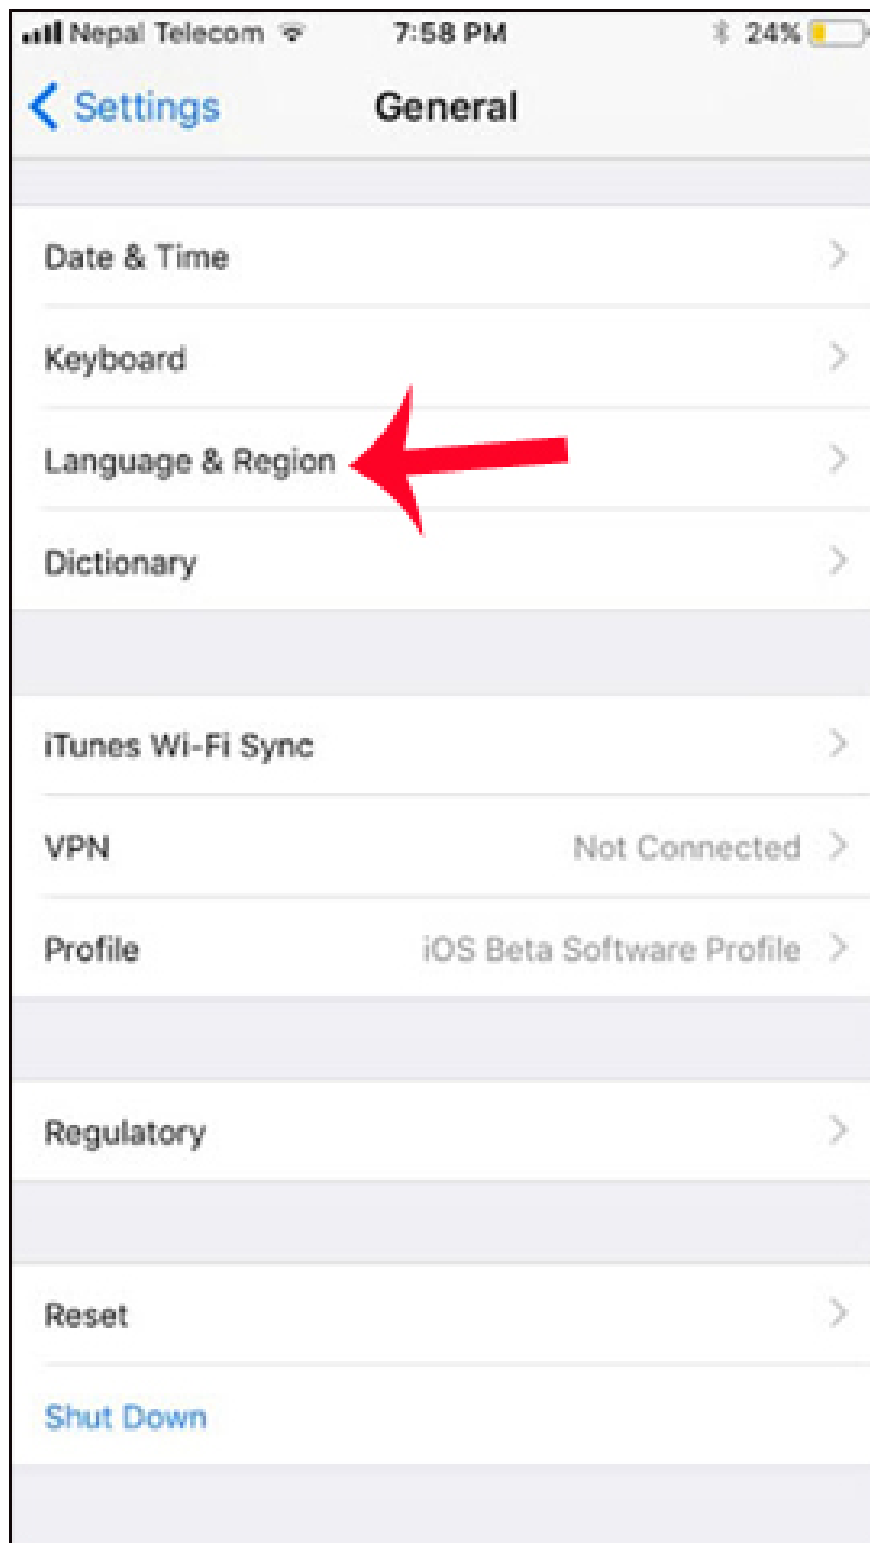

Because Siri is currently in the early stages of testing, Siri can only translate from English to some other languages ??such as Chinese, French, Italian, German, Spanish, etc. How to set up the translation feature Word on Siri iOS 11 will be in the article below.

Step 1:

First we will proceed to set the default language on iPhone. Click on **the Settings icon** on the interface. Next, click on **General** . Then select the **Language & Region option** .

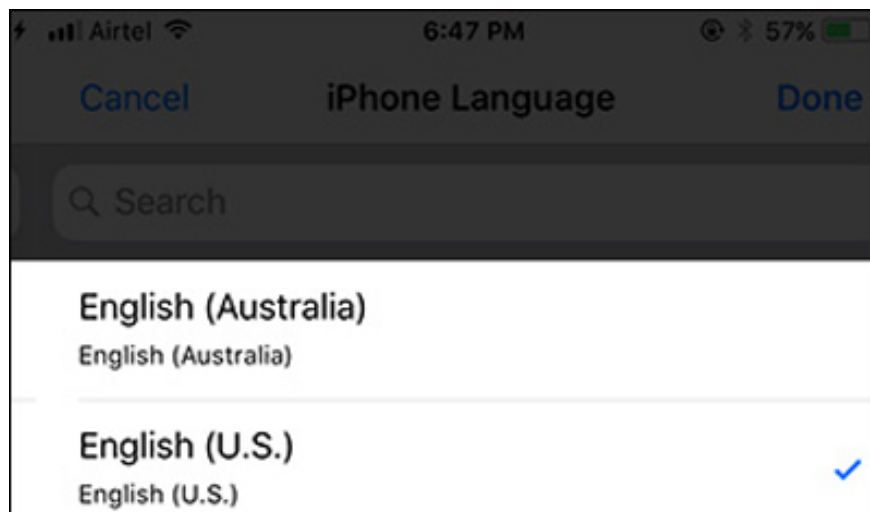

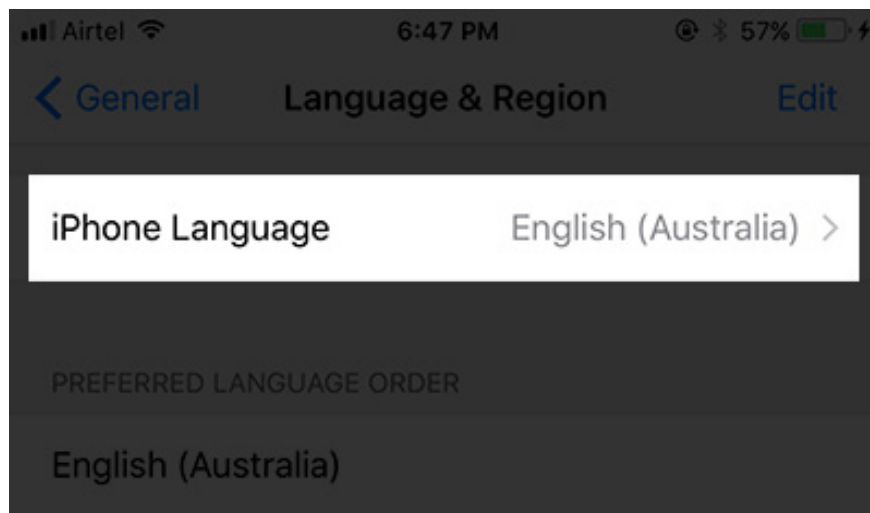

Settings

-  General >
-  Display & Brightness >
-  Wallpaper >
-  Sounds & Haptics >
-  Siri & Search >
-  Touch ID & Passcode >
-  Emergency SOS >
-  Battery >
-  Privacy >
-  iTunes & App Store >
-  Wallet & Apple Pay >

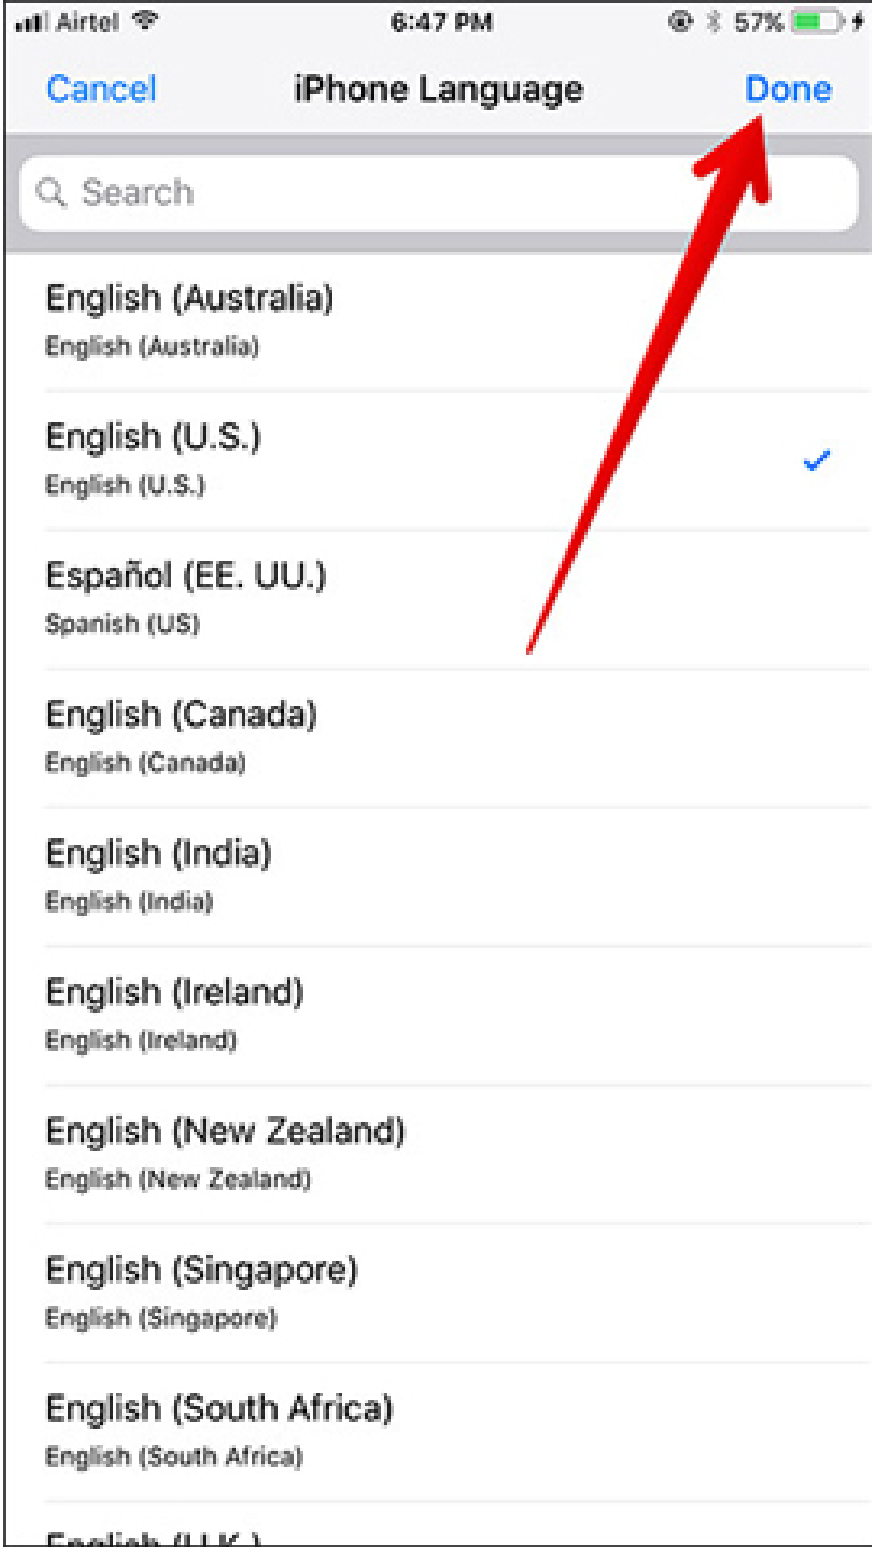

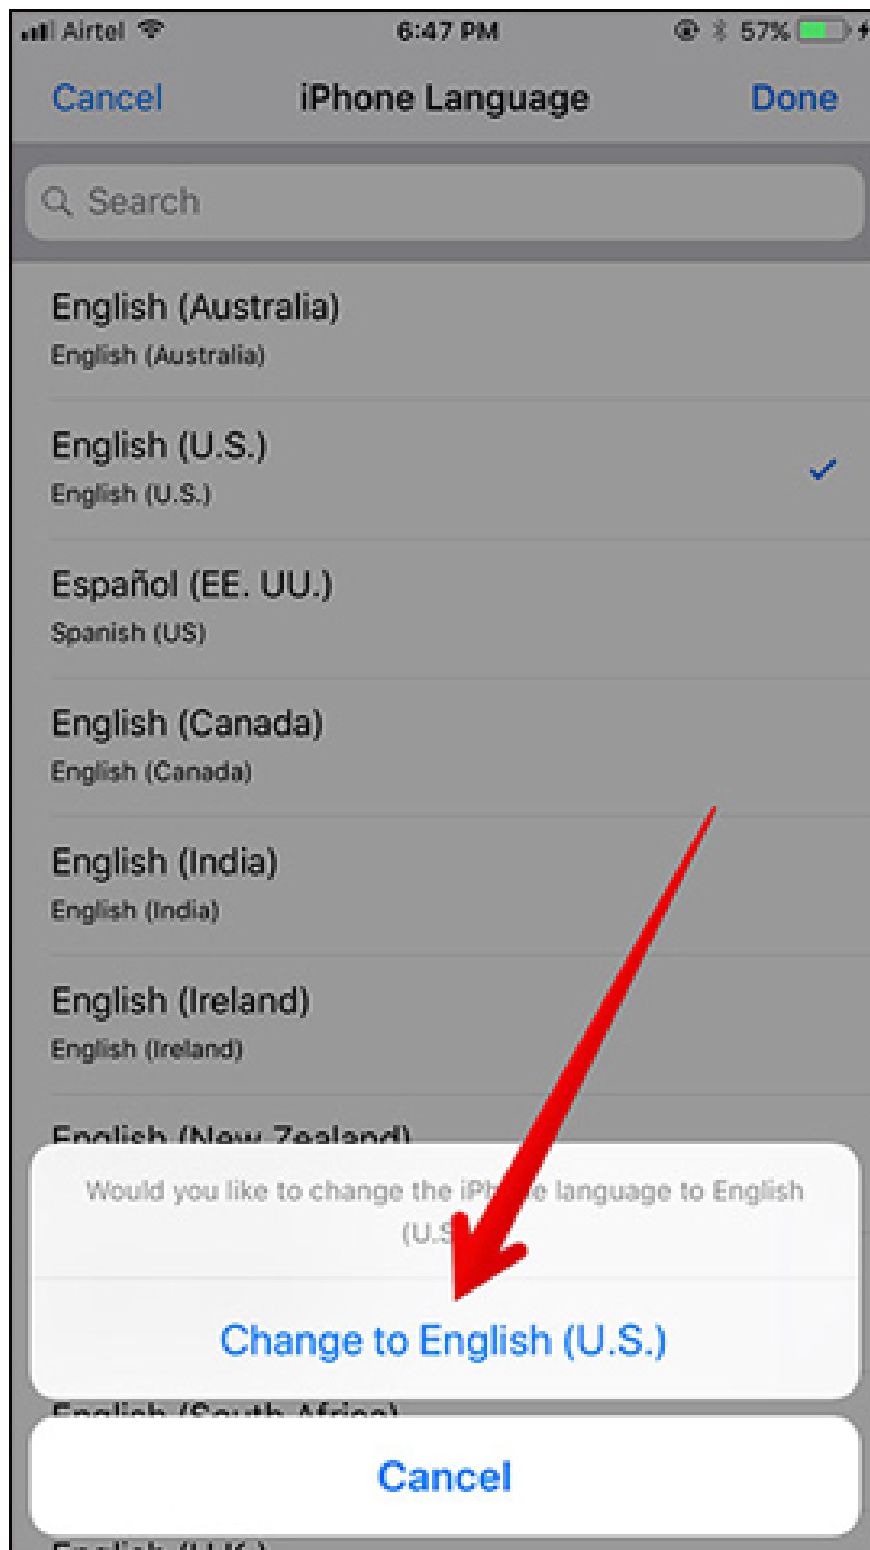

Step 2:

Next click on the **iPhone Language** item. In the language list, users click on **the language English (US)** to switch the language for the device.

Then click **Done** in the upper right corner to save the changes. Next go to **Change to English (US)** to confirm the language change option for iPhone.

Step 3:

After the user changes the language on the iPhone, we will proceed to customize Siri to translate the language. To **activate Siri** you need to press and hold the Home button or say Hey Siri to call the virtual assistant. After that, we can ask questions in English and then Siri will translate into other languages.

For example, the user controls Siri with the phrase "How do I say Good Morning in French". Soon after, Siri will answer us with the result in greeting in French.

Note to users , broadcast the correct and accurate way so Siri can easily analyze the sentence, then switch to the source language and the target language you need.

In case you do not hear the language of Siri clearly, click on **the play icon** as shown below. We can also switch to another translation language if you want.

How do I say good morning in French

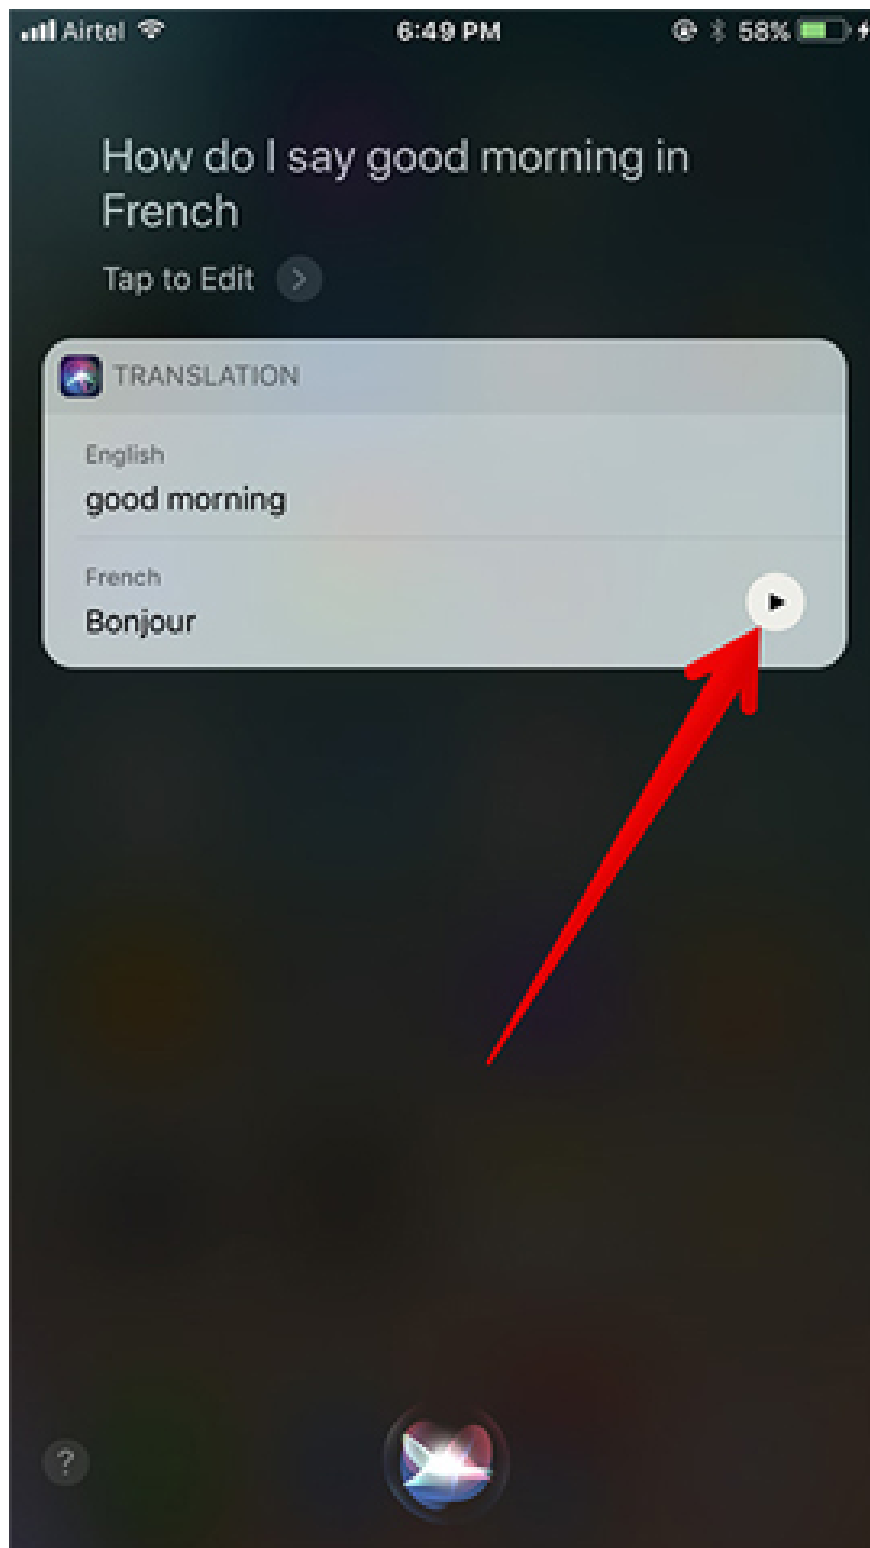

Tap to Edit >

 TRANSLATION

English
good morning

French
Bonjour 

If Siri doesn't understand your question, we can change it by typing the question content. You need to start the **Type to Siri feature on iOS 11**. How to turn on Siri control mode in writing, reference readers in the article How to turn on the mode to control content of Siri iOS 11. When entering the original sentence content in English, it is necessary to enter the correct grammar and spelling, so Siri can quickly translate the target to the user.

An extremely useful feature of Siri virtual assistant on iOS 11. You can translate any content from English to other languages to use. Siri's ability to translate languages is relatively accurate and fast. However, we need to read exactly the English sentence for Siri to work effectively.

I wish you all success!
