

How to translate Messenger calls directly

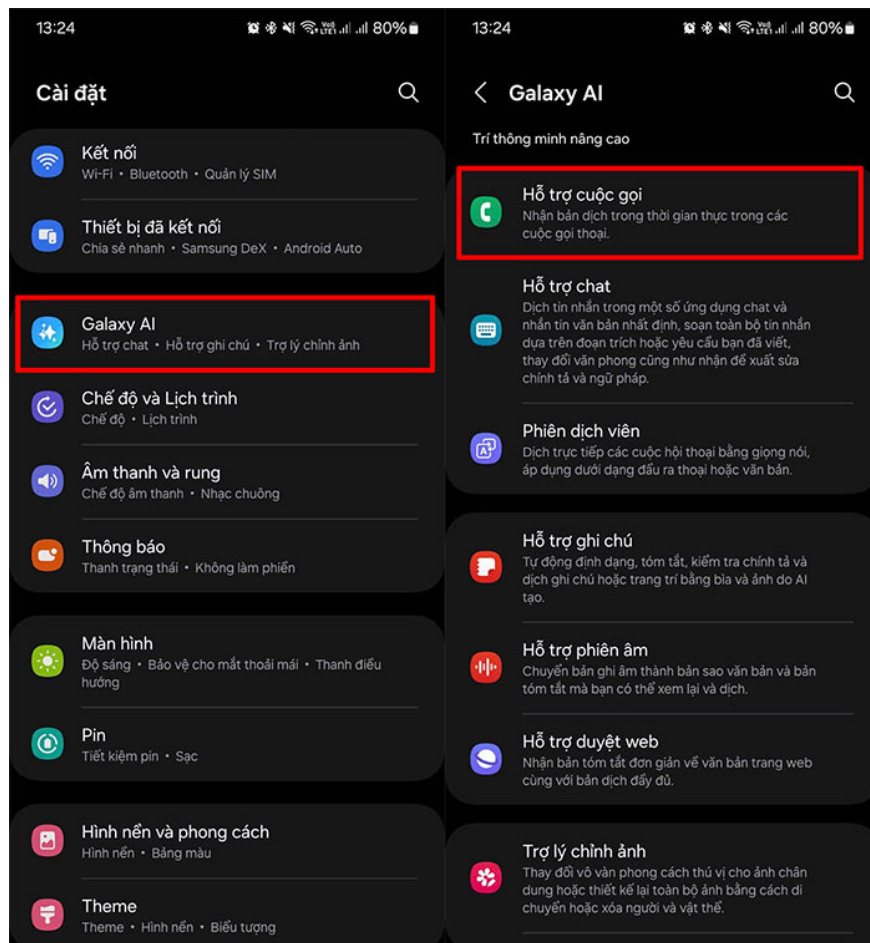

Samsung Galaxy phones support live call translation, including calls on apps, for example you can translate calls directly on Messenger.

Samsung Galaxy phones support direct call translation, including calls on other applications. For example, you can translate calls directly on Messenger, through the AI call translation feature on Samsung Galaxy phones. Then users can understand the content of the conversation on Messenger. Below are instructions for translating Messenger calls directly.

How to translate Messenger calls directly

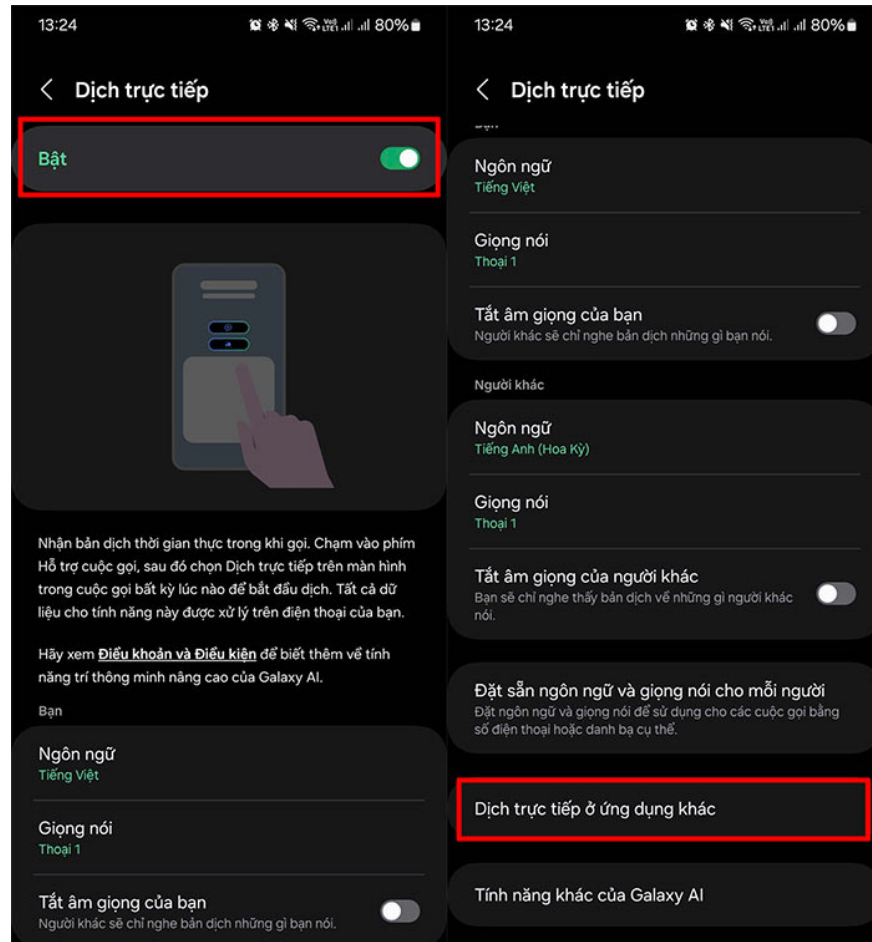

Step 1:

First, users access **Settings** on the phone, then click on **the Galaxy AI feature** and then click on **Calls** to adjust.

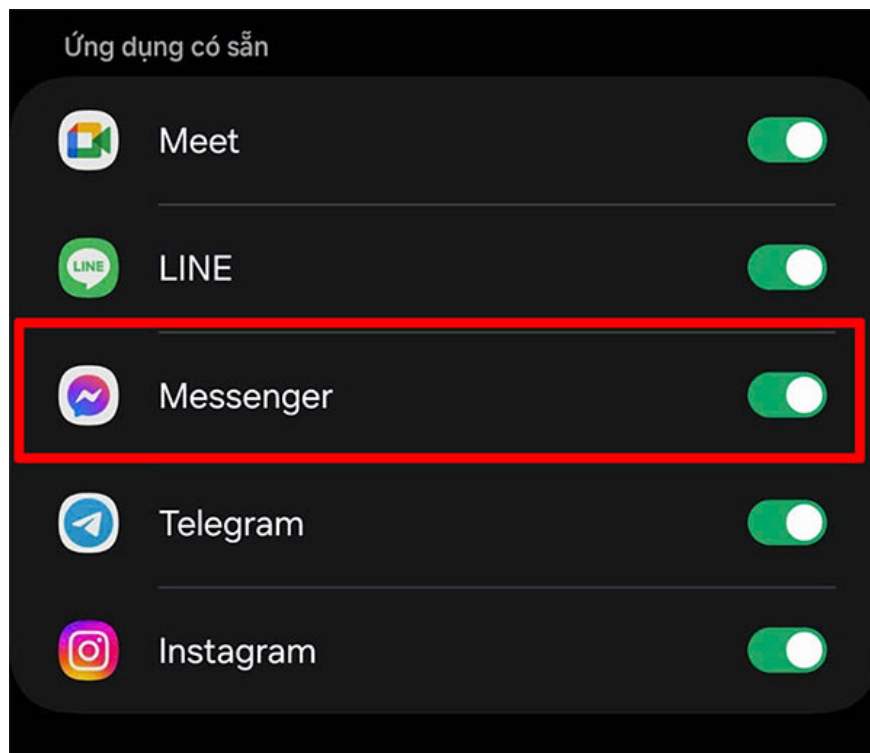

Step 2:

Next, you need to **activate the direct translation feature** on your phone, then scroll down and **select Direct translation** in other applications.

Step 3:

At this time, users will see applications that support direct call translation, we **activate the Messenger application** to use on this application.

Step 4:

When **making a call on Messenger** , users **swipe down from the top of the screen** and then select **the Live Translate feature** for the Messenger call they are making.

The user will see the translation displayed on the screen so we can follow the call content.
