

# How to translate web pages on Safari browser with Microsoft Translator

Microsoft Translator is a translation application that allows users to translate web pages on Safari, via voice, text or images. Besides, Microsoft Translator also supports direct calls.

For iOS devices, Safari is set to be the default web browser. However, this web browser does not have a built-in translation feature, so users will experience some difficulties accessing foreign websites. Therefore, in order to translate any web page on Safari, we must use the third application.

Microsoft Translator is a professional translation application with many useful features. Users can conduct translation work via voice, text, images. In addition, Microsoft Translator also supports language switching for making voice calls. Steps to set up Microsoft Translator to translate web pages in Safari will be included in the tutorial below.

## Step 1:

First of all, we will download the Microsoft Translator application for iPhone / iPad devices according to the link below.

1. Download the Microsoft Translator iOS application

## Step 2:

After downloading the application and proceeding to launch, we will come to **the** application's **terms** interface, click **OK** . Next to Microsoft Translator will require users to allow the **use of Micro** , click **OK** .

## A note about privacy

Translator is powered by machine learning and the image, voice and text information you provide for translation will be used to improve Microsoft products and services. We protect your privacy by taking steps to de-identify your data and keep it secure.

By continuing to use Translator, you agree to our [Privacy Statement](#) and [Services](#)

### Step 3:

Next, the user opens the Safari browser on the iPhone or iPad. At the website interface, click **the square icon with the arrow mark** in the middle of the bottom edge of the screen. App installed on the device, swipe to the right of the screen and then click **the 3 dots icon** to open more extensions.

#### Step 4:

In the Activity interface we will see the Microsoft Translator application. **Activate the application** by swiping the horizontal bar to the right. Finally press the **Done** button in the top right corner of the interface. When returning to the Safari interface, you will see the Microsoft Translator application appear in the extensions

section.

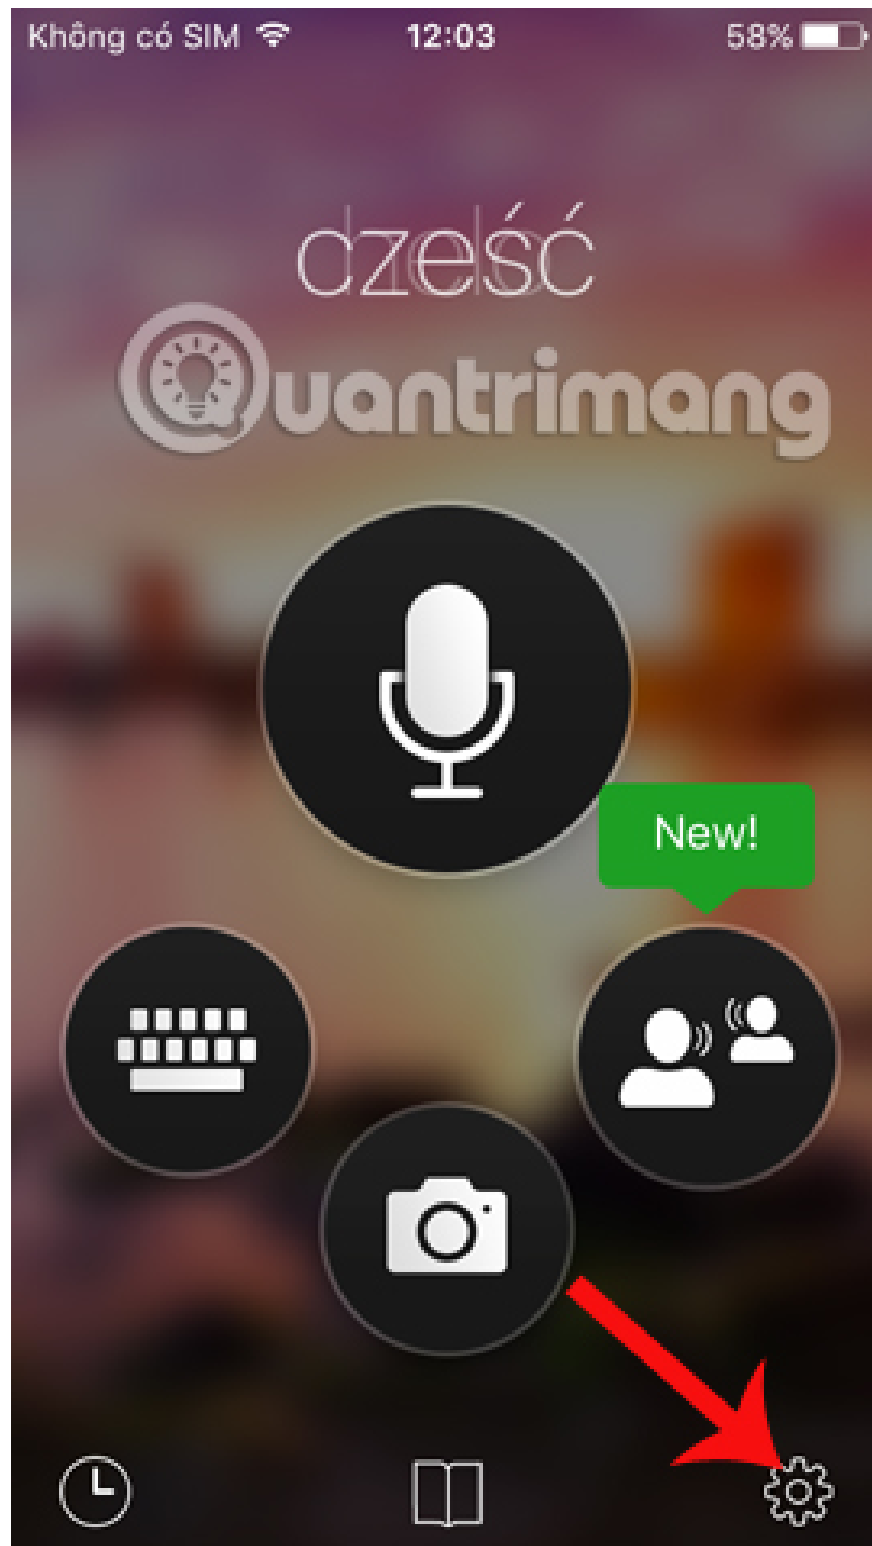

### Step 5:

The application will proceed to translate the default language according to the device's current location. However, you should set up to choose to change to many other languages, serving your language translation needs.

At the interface of the Microsoft Translator application, click **the gear icon** . Next click on **Safari Translation Language** (Language translated Safari).

A list of languages ??appears, click on the language you want to use.
