Instructions for using Online IP Cameras PRO Windows 10

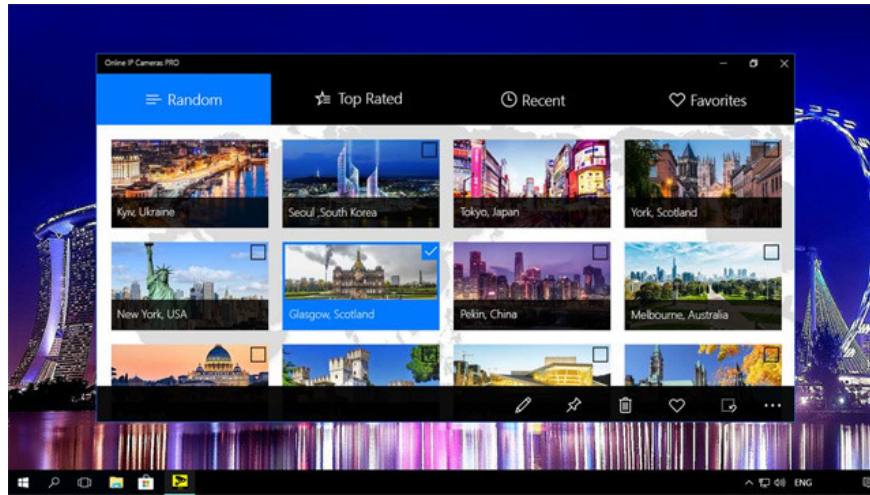

Step 1:

Download the application according to the link below and proceed with the installation on the device.

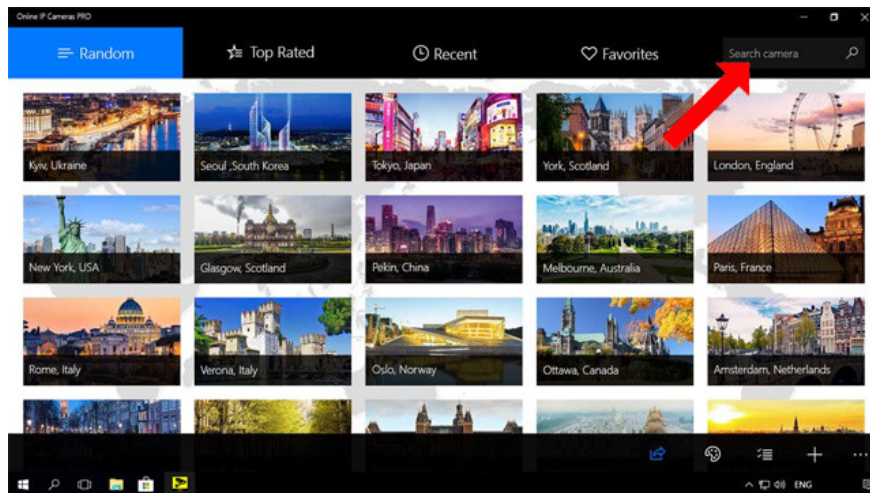

1. Download the Online IP Cameras PRO application

Step 2:

The main interface of the application will have sections like Random, Top Rated, Recent and Favorites.

With the Random section, you will randomly display the location that the application supports. Preview image will come with country name as well as location for users to know. In addition, users can enter the location you want to view into the **Search camera** frame.

Step 3:

Click on the location you want to see. Below the interface will be a custom toolbar for users.

1. The arrow icon on the far right is right: camera forward, or camera reversing.
2. Heart icon (Add to Favorites): bookmark if you like this place.
3. Rate icon: Rate the camera quality for the location.
4. Camera icon (Take a screenshot): take a screenshot and save it in the Pictures section.
5. Drawing board icon (Inking): open the drawing tool to add content if desired.

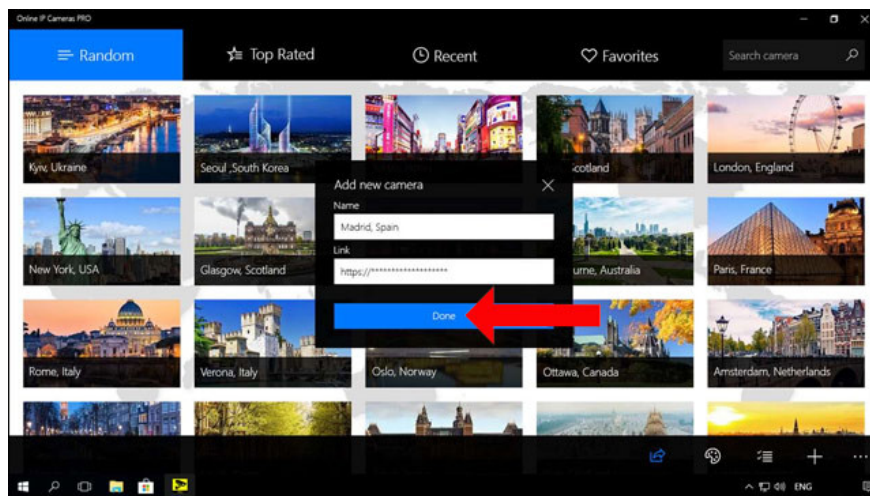

Step 4:

The **Rated** item will display the cameras in the top of the vote. We can also change the camera image if it is not displayed, by right-clicking on the camera and selecting Delete to delete, or Edit to update the link for the camera.

If you want to add an image to a place you like, click **the plus button** below the interface. Appears Add new camera interface to enter the location name at Name, camera address at Link. Finally **click Done** to save.

To get the link of the camera, click Select and select the location, press the pen icon to add the location.

Step 5:

The **Recent** section will be the locations that users viewed on the application. Favorites section is the location that users love. In addition, when clicking on **the 3-dot icon**, select **Settings**, we can use Windows Hello or the established PIN to protect the application.

The Language section to change the language and Scenshot can be saved to change the path to save the screenshot.

With the Online IP Cameras PRO application on Windows 10, users can view the whole world. Each camera will have a preview image and location name for us to choose easily. Besides, the application also has useful security features.
