

How to Try on Clothes at Home on Google

Google has just introduced a new Try-On feature that lets you try on different outfits right at home. This is a new feature that is part of Google's AI mode.

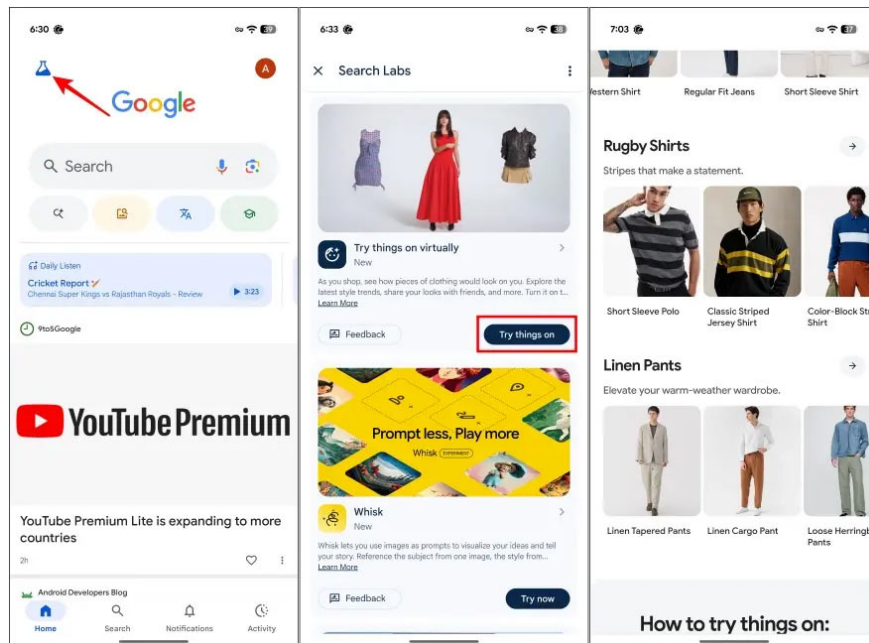

Google has just introduced a new Try-On feature that allows you to try on different outfits right at home. This is a new feature in Google's AI mode, allowing you to preview how the clothes you like will look on you. This also helps you save more time before choosing the right outfit. Here is a guide to trying on clothes at home on Google.

How to try on clothes at home using Google AI

Note, this feature is currently only available in the US region.

Step 1:

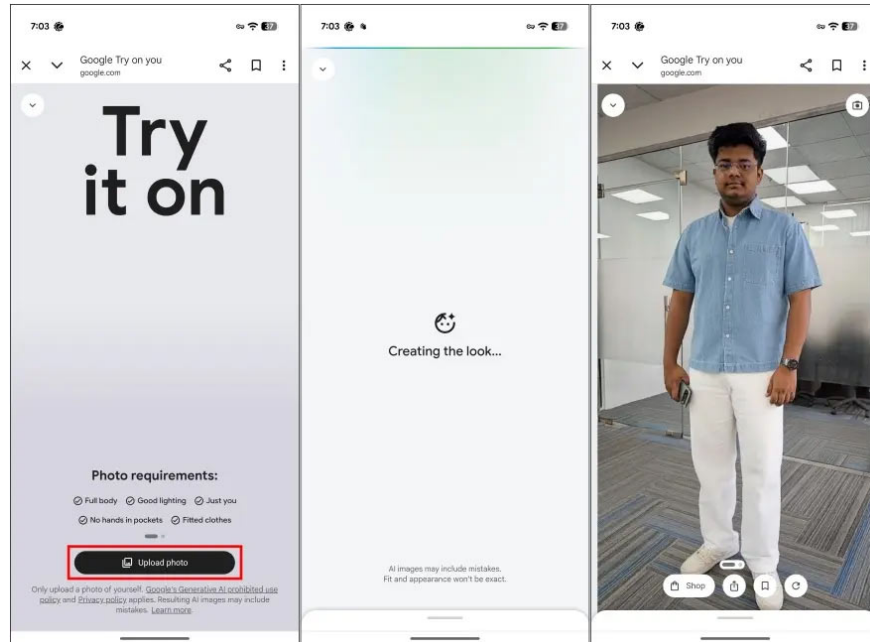

At the interface on Google, users click on **the Google Labs icon** in the left corner. Next, **click on Try things on at Try things on virtually** . At this point, users choose one of the different styles and tap on the outfit to try.

Step 2:

You will then need to upload a full body photo with a clear, unobstructed view so that Google can recognize your image.

Wait a moment for Google to try on clothes for you and when the results come back you will know if the outfit is suitable for you or not.

If you want, you can try on more styles in Google Shopping. Currently, the new try-on feature is not widely developed and there are also errors with some outfits that do not allow trying on.
