

How to try the app before installing it on Google Play via Instant Apps

Google has just announced many new updates on Play Store, but the most interesting one is the appearance of Instant Apps, which lets you try it before installing the application.

Google has just announced many new updates on Play Store, but the most interesting one is the appearance of Instant Apps, which lets you try it before installing the application.

We first heard about Instant Apps at the event for Google's IO developers from May last year. Google started supporting this program in January, but there were still very few applications.

Now, Google says users can try supported apps on Play Store by selecting **Try It Now** . The list of apps is here https://play.google.com/store/apps/collection/promotion_3002d0f_instantapps_featuredapps, but depending on the geographic location you can see more or less. Perhaps Instant Apps still doesn't support anywhere and on all devices.

Use before downloading is very useful before deciding to purchase the app on Google Play Store

This feature will make it easier for users to make decisions before purchasing a paid game or application. Even if you have a refund system, if you repay after buying for 2 hours, it is still better to know before buying. If you want your application to support this feature, follow the instructions here. <https://developer.android.com/topic/instant-apps/index.html>
