

How to Turn a Jfif Into a JPG

This wikiHow teaches you how to convert an image file in JFIF format to a JPG file. You may want to do this if you having difficulty opening the .jfif file with a certain program, or want to use a more common and universal file extension....

Using a File Conversion Website

1. **Go to <https://convertio.co/jfif-jpg/>.** Use any browser on your computer, phone, or tablet.
2. **Click** . This is in the red bar in the dark gray window, and is depicted with a folder icon and a magnifying glass. This option allows you to choose a file from your computer, phone, or tablet.
 1. To select a file saved from another location, choose one of the other options to the right of **Choose Files**.
 2. Tap the box icon to load a file from Dropbox, or tap the triangle icon to load a file from Google Drive. Tap the link on the far right to put in a link from a website.
3. **Select the .jfif file.** Double-click or tap on the file to select it. You can also select the file then click **Open**.
4. **Click** . This is a red button with an arrow.
 1. The file will start converting. An orange status bar will display the conversion progress.
5. **Click** . This is a blue button that will appear once the file is done converting.
 1. The file will download in the background. Click on it to open or save it to your device.

Using a Google Chrome Extension

1. **Open Google Chrome on your computer.** The icon is a multicolor ball with a blue center.
2. **Open the Chrome Web Store.** Go to <https://chrome.google.com/webstore/>.
3. **Search "change JFIF to JPG".** Click into the search bar in the top left and type in the query, then hit .
4. **Click next to the result.** It should be called something like "Change JPEG/JFIF to JPG".
 1. The extension will be automatically added to your browser.
 2. This extension works without you needing to click on anything. Whenever you download a .jfif file using Chrome with the extension enabled, it will automatically convert to a .jpg before the download file appears in your browser at the bottom.
