

How to turn off accessibility on iPhone is super simple that not everyone knows

Turning off accessibility on iPhone is not as difficult as many people think, on the contrary, it is extremely simple to do. To know how to turn off the accessibility key on iPhone, please refer to the article below.

How to turn off accessibility on iPhone is information that many people are looking for because this feature is sometimes not really necessary for everyone. Below are details on how to turn off accessibility on iPhone with a few simple steps.

How to turn off accessibility on iPhone through Settings

The fastest way to turn off accessibility on iPhone is through the Settings section available on the device. To turn off accessibility on iPhone using Settings, follow these steps:

Step 1: First, you need to access Settings and select Accessibility, then select Touch.

Step 2: Here, select Assistive Touch and drag the slider to the left to turn off this feature.

How to turn off accessibility using Siri

In addition to turning off the accessibility key on iPhone using Settings, you can also ask virtual assistant Siri to turn off this feature simply:

Step 1: Bring your phone closer and say 'Hey Siri'.

Step 2: If virtual assistant Siri does not appear, press and hold the side button for a few seconds for Siri to appear.

Step 3: When the virtual assistant Siri starts working, say the command 'Hey Siri, can you disable Assistive Touch for me?'. At this time, the accessibility key will be turned off according to your request.

The above article has just shared with you how to turn off accessibility on iPhone. Thanks for watching.
