How to turn off Adblock on Chrome, Coc Coc. Adblock is an extension that has a very nice feature that blocks annoying pop-up ads while we surf the web. However, there are a few websites that require us to turn off Adblock in order for p

Adblock is an extension that has a very nice feature that blocks annoying pop-up ads while we surf the web. Thanks to Adblock, our web surfing is faster and not covered by unintentional ads that obscure website content. However, there are a few websites that require us to turn off Adblock to allow access, so how to temporarily turn off Adblock in these cases? Invite you to refer to the following article.

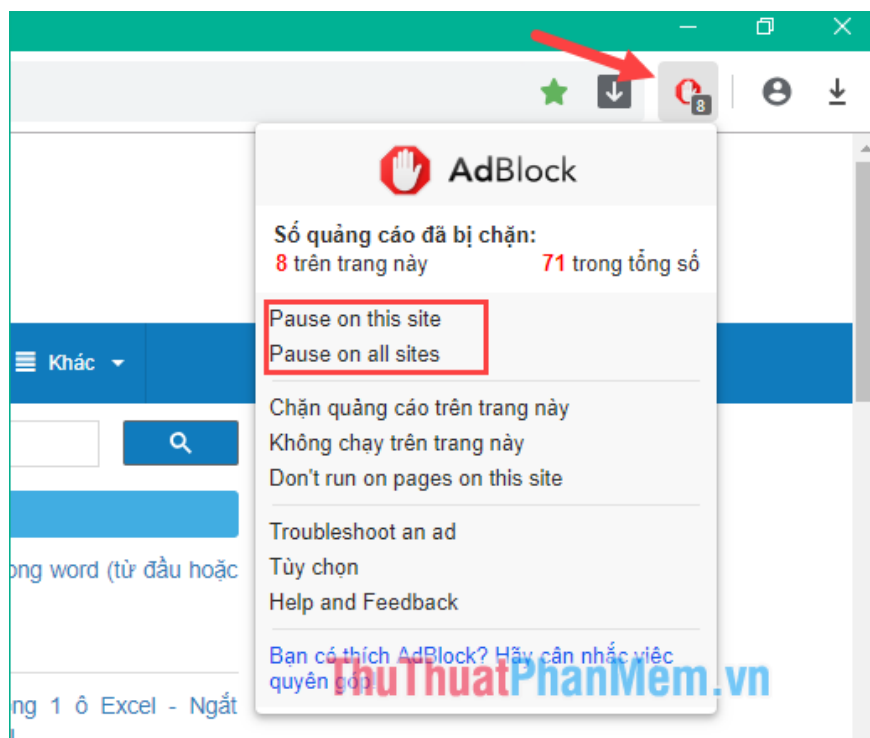

The way Adblock on Chrome browser and Coc Coc is completely identical so you can follow the steps below:

You click on the icon Adblock shaped hands on the right corner of the screen and choose one of two options that are:

Pause on this site : Pause blocking ads on the page you are opening

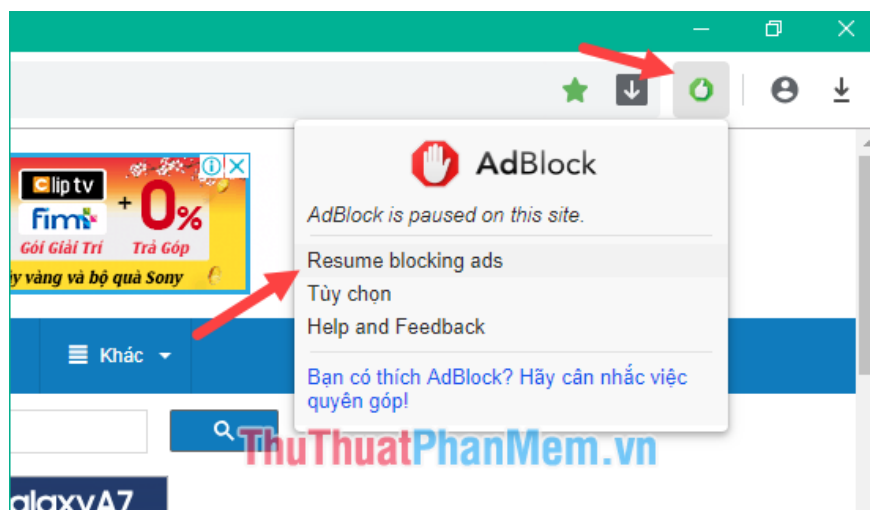

Pause on all site : Pause ad blocking on every page.

If you just want to pause blocking ads on the open page, select **Pause on this site**, when you visit another page, adblock will still block ads normally.

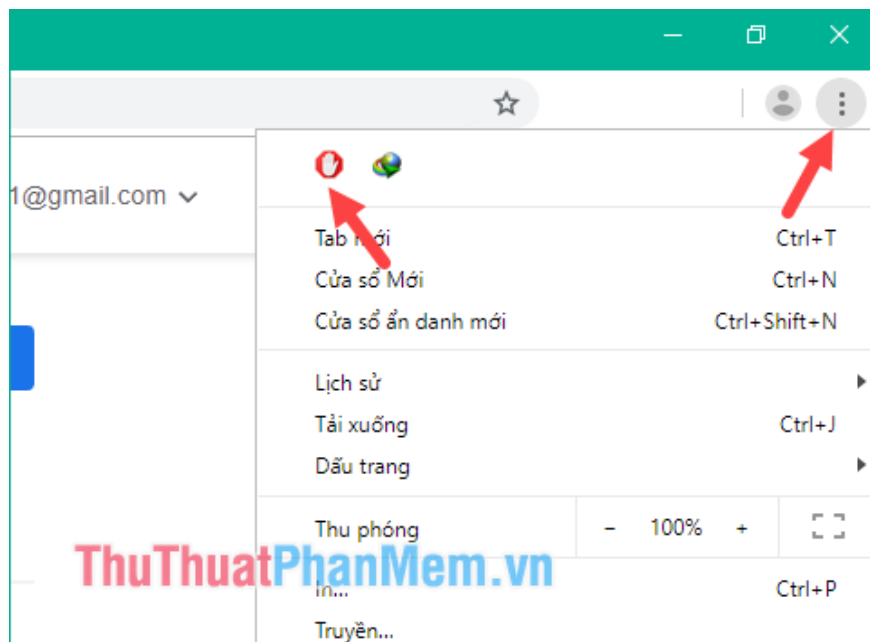

After pausing the ad, you need to reload the page for the changes to take effect.

In the future, if you want to turn on Adblock again, click on the blue hand icon and select **Resume blocking ads** then reload the page.

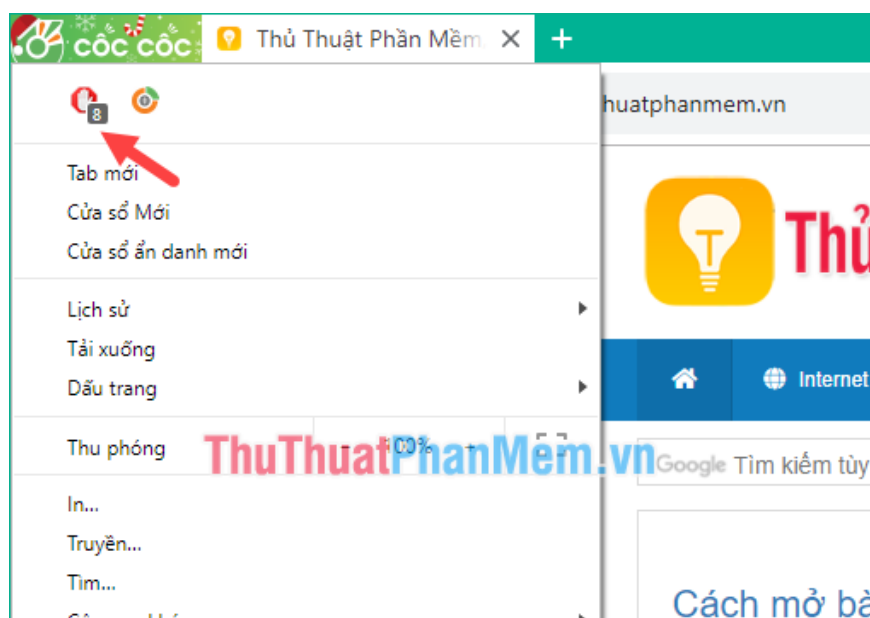

In case you do not see the hand icon, then press the 3 dots button on Chrome browser or click on Coc Coc button on Coc Coc browser and you will see the icon appear on the window.
