

# How to turn off all sounds on Android phones with one touch

If you find that turning off the music and removing the headset takes too much time to understand other people's stories, you can use the Android Mute application. The app lets you all the sounds on your mobile phone with the click of a button.

Today, smartphones become an indispensable item in our lives. It is equipped with quad-core / octa-core processor with 2 GB or more RAM, allowing you to use a smartphone as a desktop computer. You can listen to music, watch HD videos, edit Word documents, play games, visit websites, design programs, etc. However, smartphones also turn you into 'deaf' people before others, especially when you use headphones to listen to music. You do not hear what others say until the music player is turned off and the headset is removed.

If you find that turning off the music and removing the headset takes too much time to understand other people's stories, you can use the Android Mute application. The application allows you to turn off all sounds on mobile phones with the click of a button.
