

How to turn off automatic reading of incoming phone numbers on iOS 11.3

As you know iOS 11.3 version for Apple devices has officially launched with many extremely wonderful features. However, there are many people who are complaining that when they update to iOS 11.3, they face the situation that iPhone automatically reads the phone number / caller is quite annoying.

As you know iOS 11.3 version for Apple devices has officially launched with many extremely wonderful features. However, there are many people who are complaining that when they update to iOS 11.3, they face the situation that iPhone automatically reads the phone number / caller is quite annoying. Of course, not every phone when updating, this feature is enabled. So if you accidentally fall into the same situation as above, then you can apply the following simple steps to turn off the feature that allows the display along with reading the phone number and caller information on iOS version 11.3.

1. Instructions for iOS 11.3 official update to turn off the iPhone slowing feature
2. Why does iOS 11.3 report battery status "Maintenance"?
3. Answer 12 frequently asked questions about iOS 11.3 update

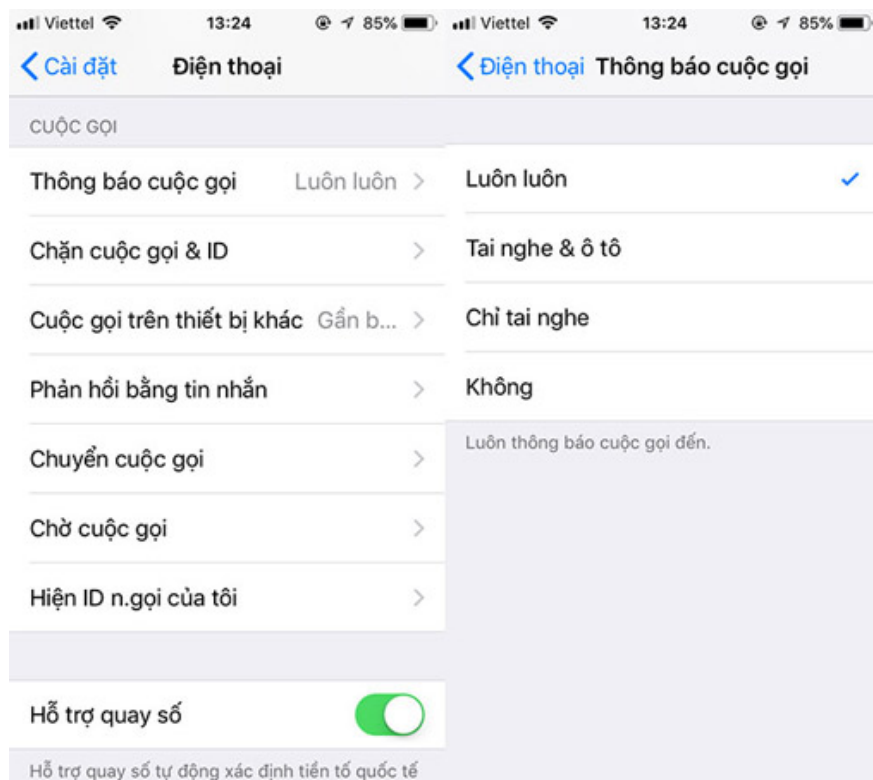

Step 1:

First of all, you access the **Settings** application of the device you are using. Now, a new interface will appear, scroll down to the bottom and select **Phone** .

Step 2:

In the **Call notification** section, click the arrow icon as shown and switch from **Always** to **No** mode.

Thus, if there is an incoming call from now on, the iPhone will not automatically read the caller's name or phone number. Turning off the automatic read phone number and caller information on iOS 11.3 version will help you avoid certain troubles.
