

# How to turn off computer using keyboard on Windows, MAC in a snap

Below, HACOM will guide you on how to turn off your computer using the keyboard very quickly for those who need to turn off their computer urgently. Please watch!

Turning off your computer in the traditional way is sometimes a bit long and inconvenient in case you need to turn it off urgently. A much faster method is to turn off your computer using the keyboard, so how to do it? See how to turn off your computer using the keyboard that TipsMake guides for both Windows and Mac computers below!

## How to turn off computer quickly with keyboard on Win 7, 8, 10

**Step 1:** Press **Windows+D** to return to the computer's main screen. If you are on the main screen, you can skip this step.

**Note:** this action will return the computer to the main screen but will not close all running applications. If you want to close all running programs on the computer, just press **Ctrl + W** until all applications are closed one by one.

**Step 2:** Press the shortcut key **Alt + F4** then press **Enter** and you're done.

### **Shut down computer using keyboard on Windows 7**

For those of you using Windows 7, there is another way to turn off the computer using the keyboard as follows:

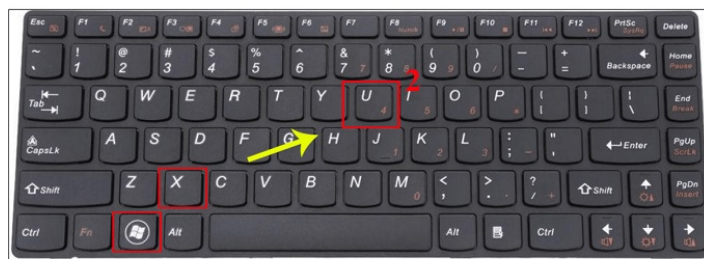

Press the windows key, then press the right arrow and press **Enter**, and you're done.

### **Turn off computer with keyboard on Windows 8, 10**

For those of you who are using Windows 10 or 8 operating system, you can do the following: Press the **Windows + X** key combination then press the U key twice continuously and your computer will automatically shut down as quickly as the wind.

## Tổ hợp Windows + X + 2 lần U giúp tắt máy nhanh trên Windows 8 & 10

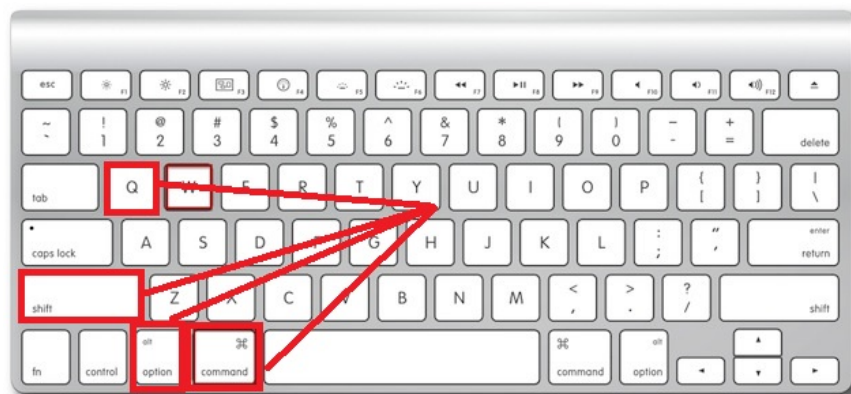

For those of you using Windows XP, you can press Ctrl + Esc and press the letter U twice in a row.

**Note:** Although these ways to turn off the computer using the keyboard are quick, when performing this operation, you must make sure that the files you are working on are definitely saved to the computer so that when you turn it off, you do not lose the files.

## How to shut down your computer using the keyboard on Mac OS

For those of you who are using Macbook, turning off the computer using the keyboard is even easier. You just need to press the key combination Command + **shift** + **Option** + **Q** to turn off the computer as fast as lightning. In addition, before turning off, you can press the key combination **Command** + **Option** + **Power** to turn off all running applications.

Just like Windows, remember to save the files you are working on before shutting down to ensure that you don't lose any files.

Above is how to turn off the computer quickly with the keyboard in just a note. To learn more tips about computers and technology, follow the TipsMake website or comment below for the fastest response. Or you can call the hotline 19001903 for free consultation.
