

How to turn off Cortana on Windows 10 - How to turn off Cortana on Windows 10

How to turn off Cortana on Windows 10 - How to turn off the virtual assistant Cortana on Windows 10. As you know in Windows 10 has a built-in virtual assistant named Cortana. With Cortana you can give commands directly to the computer by voice or even a game

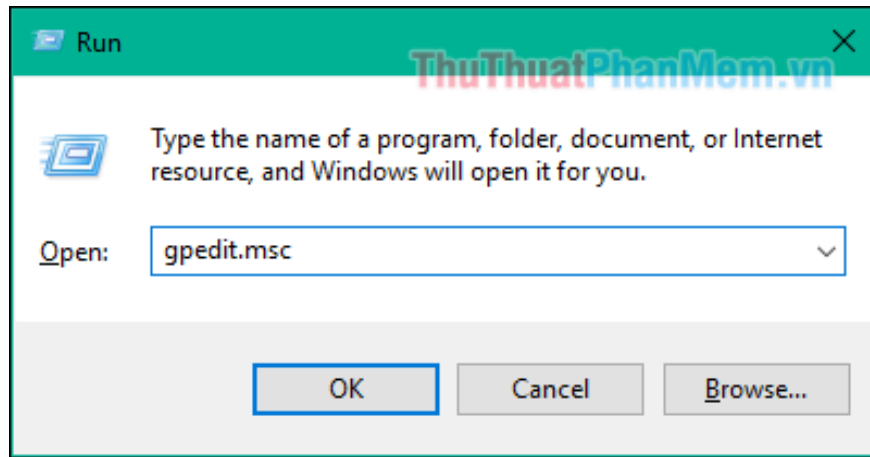

As you know in Windows 10 has a built-in virtual assistant named Cortana. With Cortana, you can order computers directly by voice or even chat with Cortana. However, in Vietnam, Cortana is not used much simply because Cortana does not understand Vietnamese, if you can speak English, Cortana will be very helpful. In the following article, TipsMake.com will guide you how to disable Cortana on windows 10 to save more computer resources, please refer.

Note how to disable Cortana on Windows 10 Home will be different than on Windows 10 Professional and Windows 10 Enterprise, so follow the version of Windows 10 you are using.

1. Turn off Cortana on Windows 10 Pro and Enterprise

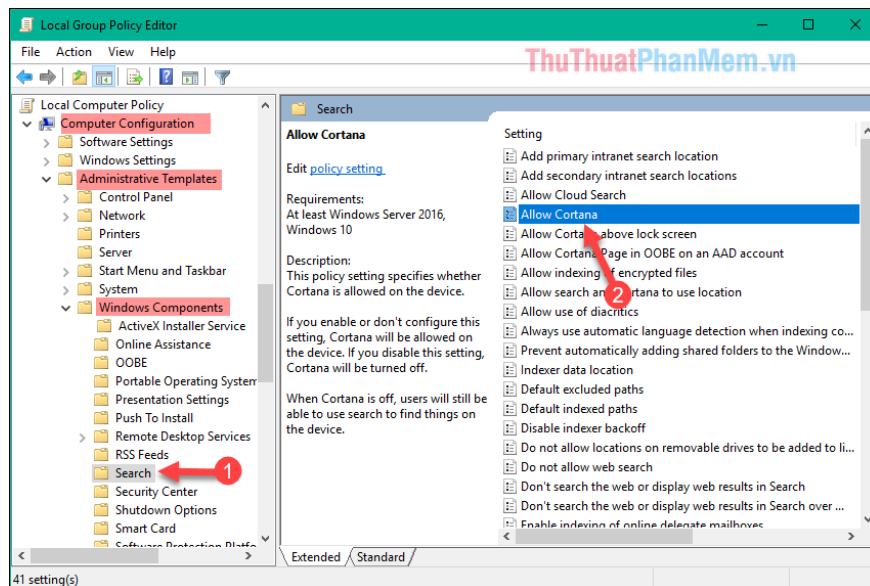

Step 1 : You press **Windows + R** to open the Run dialog box, then enter the command `gpedit.msc` and press Enter.

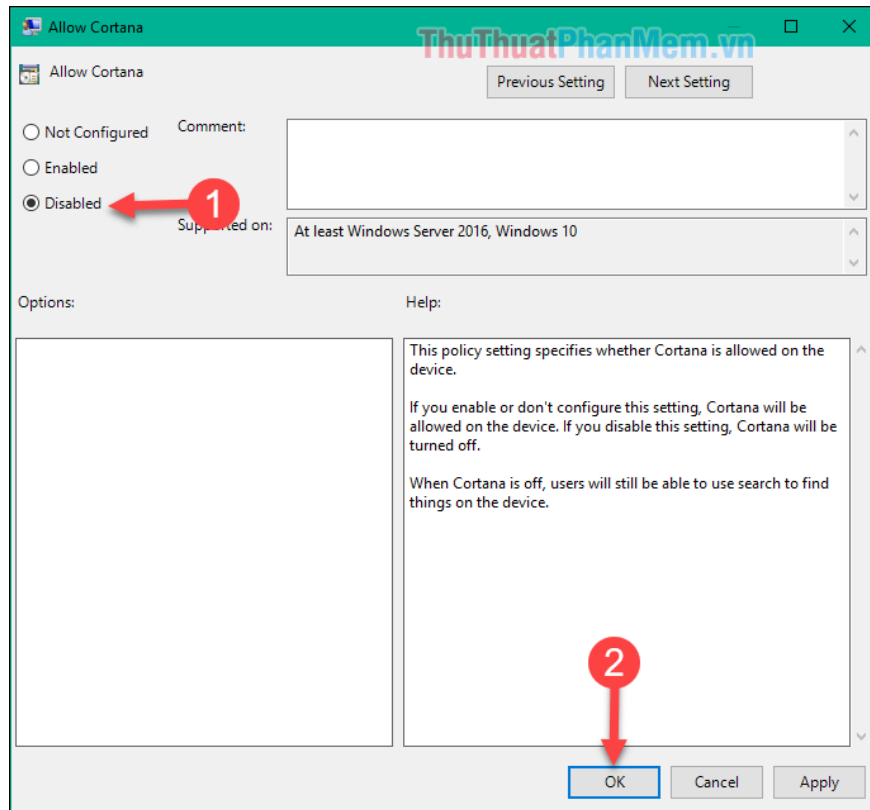

Step 2: The Local Group Policy Editor window appears, select each item according to the following path:

Computer Configuration -> Administrative Templates -> Windows Components -> Click the Search key.

Next look to the right of the window and double click on **Allow Cortana**

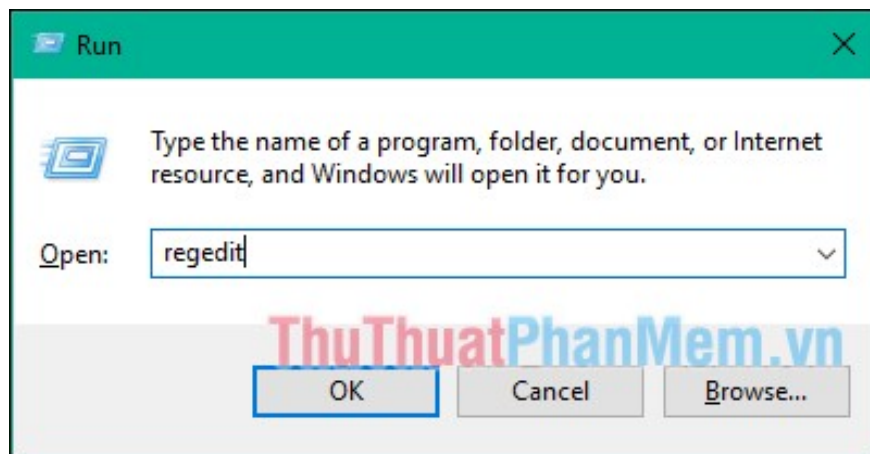

Step 3: A new window appears, select the **Disabled** items and then click **OK** to save

2. Disable Cortana on Windows 10 Home

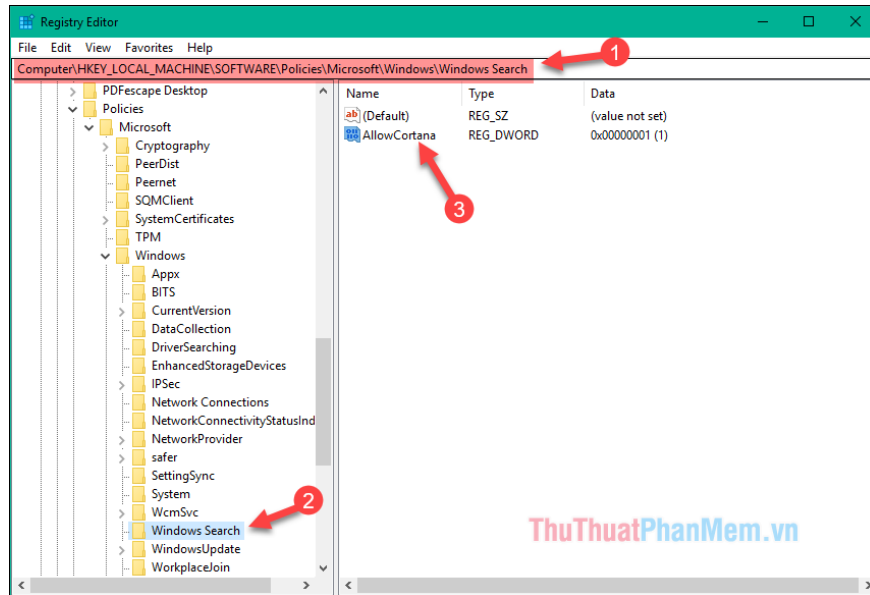

Step 1 : Open the Run dialog box, then enter the command **regedit** and press Enter.

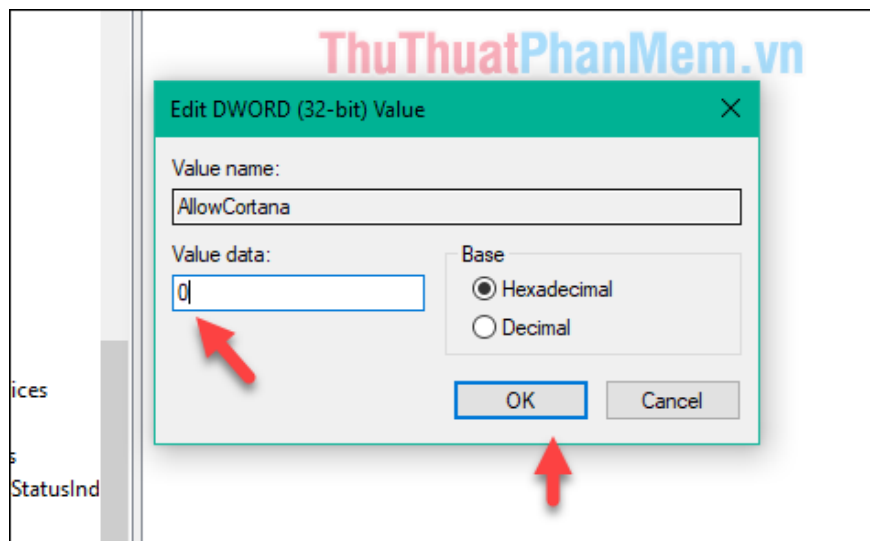

Step 2: Registry Editor window appears, browse the folder by following path:

Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\Windows Search

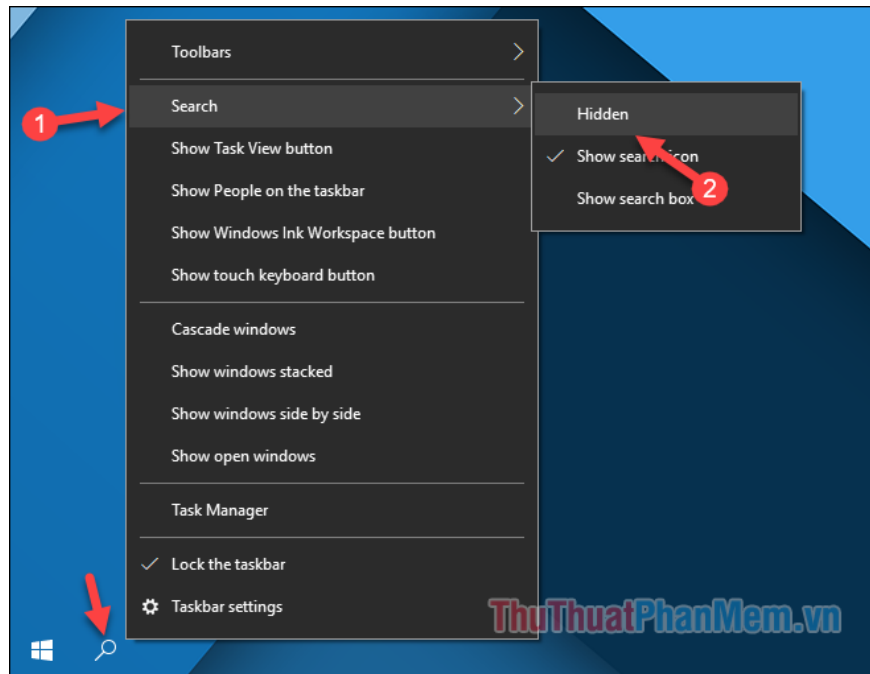

You can copy the above link and paste it into the address bar to open it faster. Click on the Windows Search folder, you will see the file **AllowCortana** on the right of the screen, if there is no AllowCortana file you can create by right-clicking on the blank area, selecting **New -> DWORD (32-bit) Value** and setting The file name is AllowCortana.

Step 3: Open the file AllowCortana and change the value in the **Value data** box to 0 and click **OK** to save. So we have successfully disabled Cortana.

After disabling Cortana, you will see the Cortana icon changes to a magnifying glass icon, if you want to hide it, right-click the icon and choose **Search -> Hidden**.

Above is a tutorial on how to disable Cortana on windows, hope you will find the article useful. Good luck!
