

How to turn off displaying message preview content on iPhone

When using iPhone, the message content will be displayed partially or completely when a new message arrives, whether or not you have a password set up. This feature accidentally reveals important information in messages ...

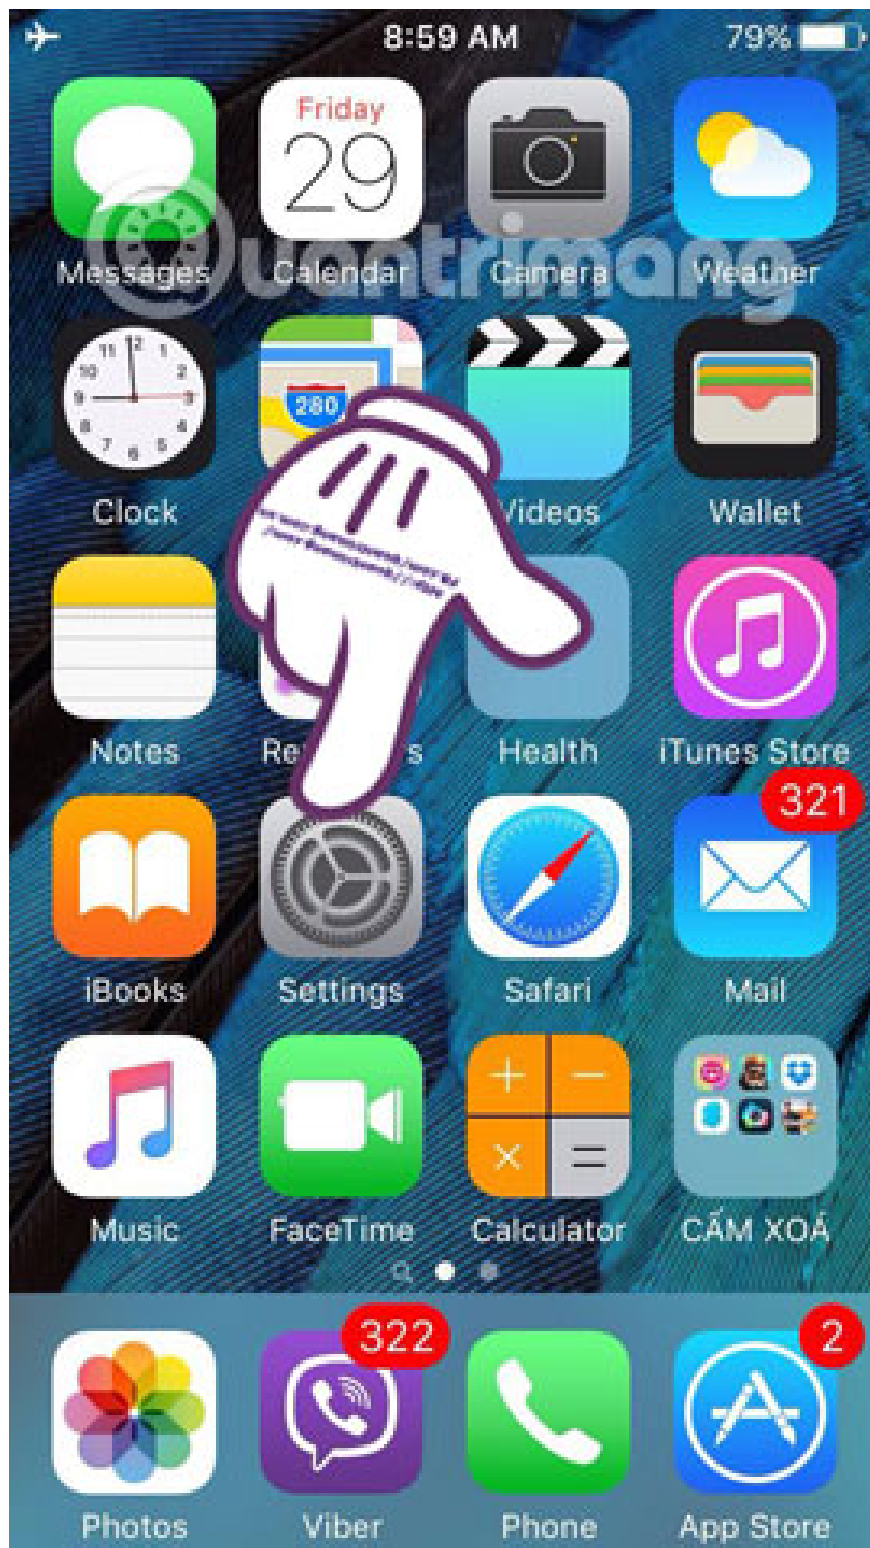

Usually by default, the iPhone always displays the content of the entire message or part when a new message arrives. This has caused many difficulties for users, when unintentionally disclosing the message content with confidential and private information on the screen. Even if you set a password or not, the message will be displayed.

3. How to download and install applications for iPhone and iPad

In the following article, the Network Administrator will guide you step by step to turn off the preview of the message content on iPhone, to secure all important information in the message.

Step 1:

At the main interface of the phone, click on **Settings (Settings)** .

Step 2:

Find and click the **Notification Center** section . Next, we select the **Messages** section below.

Step 3:

If you do not want to display the content of the preview message, but still want the notification on the lock screen, scroll down and turn off the **Show Previews** feature.

Step 4:

If you do not want any new message notifications to appear on the screen, turn off the **Show on Lock Screen** option by swiping the horizontal bar to the left. Messages will only display preview content at the top of the phone screen. To get rid of the complete notifications, turn off **Allow Notifications** .
