

How to turn off Firefox notifications on Action Center Windows 10

To cancel Firefox notifications in Action Center on Windows 10, you need to change your Firefox settings again.

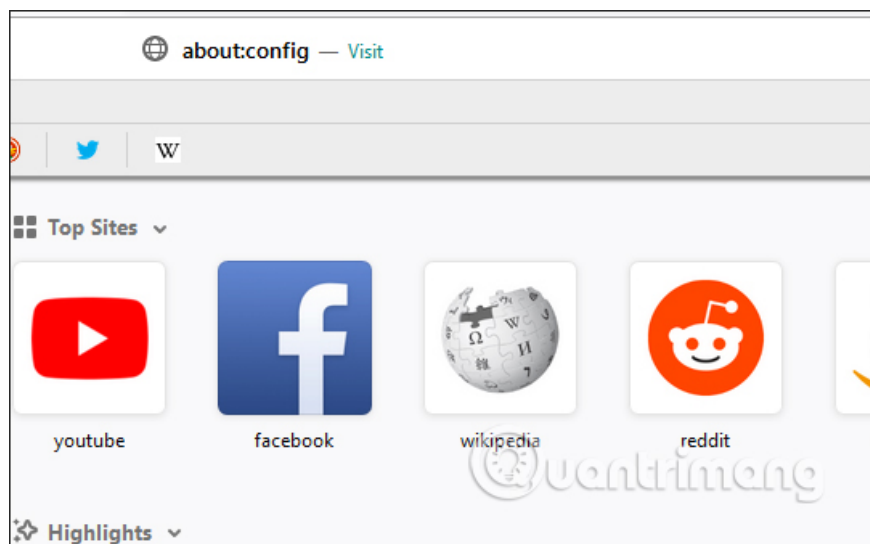

The browsers on Windows 10 are all set to turn on notifications in the Action Center. When there is any new notification from the browser such as notifications on Facebook, notifications from Gmail, or websites, it will display a pop-up in the right corner of the screen for users to know. You can then review all of the notification content in the Action Center. However, too many notifications from the browser in Action Center are annoying to users, losing focus on work. If you want to turn off all Firefox browser notifications in the Action Center, please refer to the article below.

1. How to turn on Windows 10 Notification on Google Chrome
2. This is how to customize and disable (turn off) Action Center on Windows 10
3. How to block websites from displaying notifications on browsers
4. The "About: Config" tricks improve Firefox browser

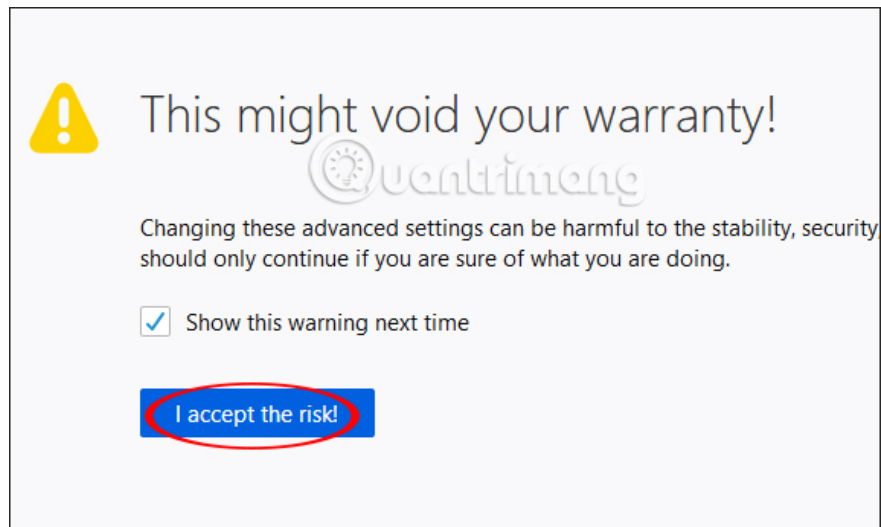

Instructions to turn off Firefox notifications on Windows 10

Step 1:

In Firefox browser, **enter about: config command** and press Enter to access.

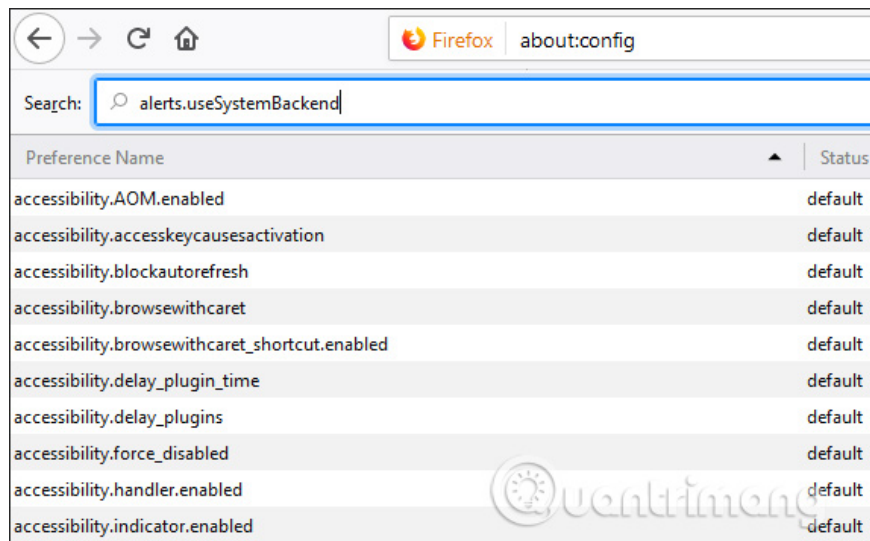

Continue clicking **the I accept the risk button!** to enter the advanced configuration page on Firefox browser. If the next time you do not want to see this warning page interface, uncheck Show this warning next time.

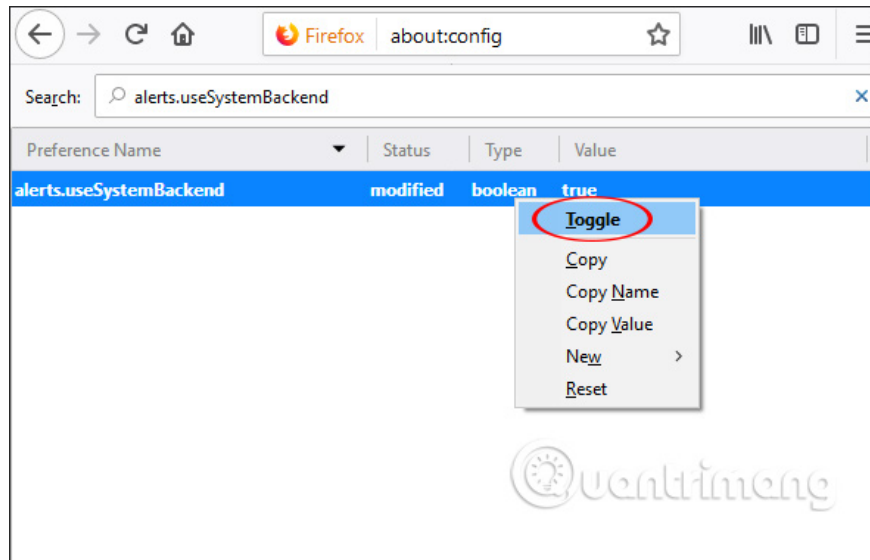

Step 2:

In the next interface at the Search bar above, users **enter the alerts.useSystemBackend** key to find this entry.

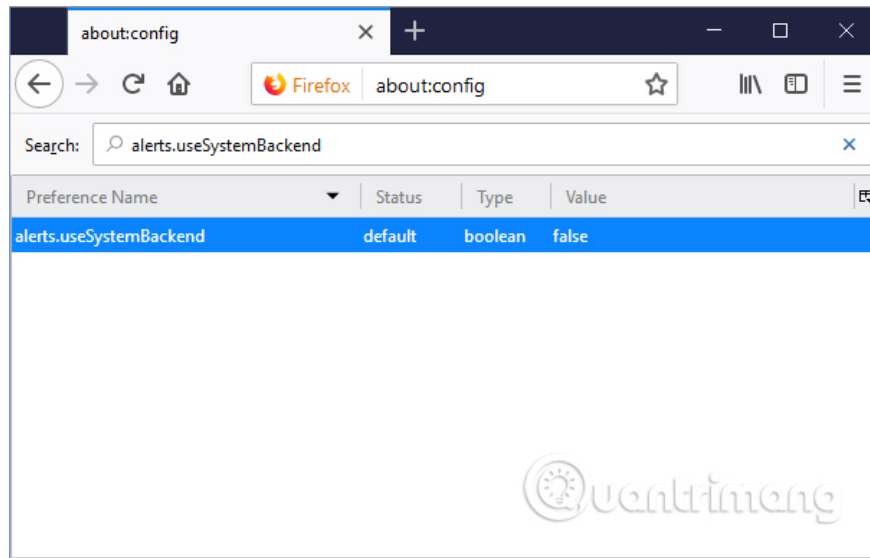

Step 3:

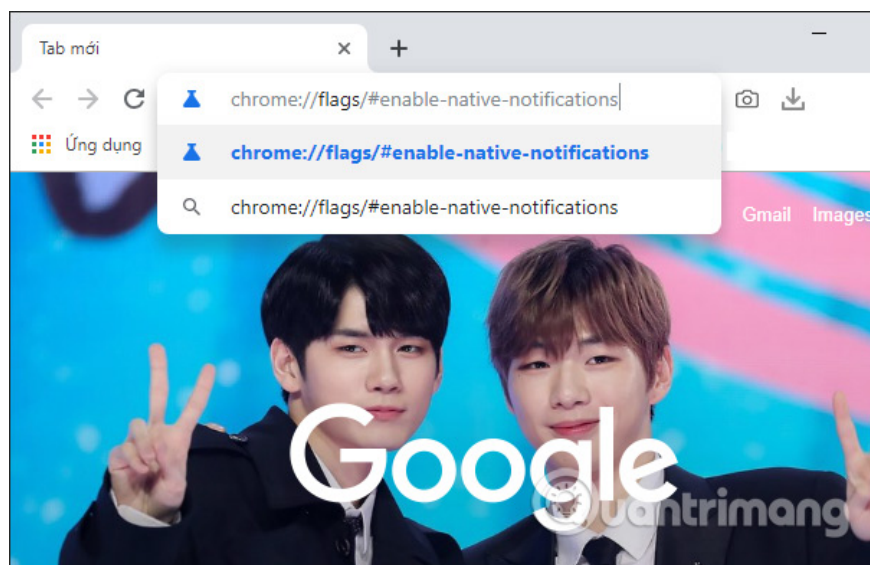

If the current value of this item is true, Firefox's notification feature on Action Center is enabled. We right-click on this item and **select Toggle** , or double-click this item.

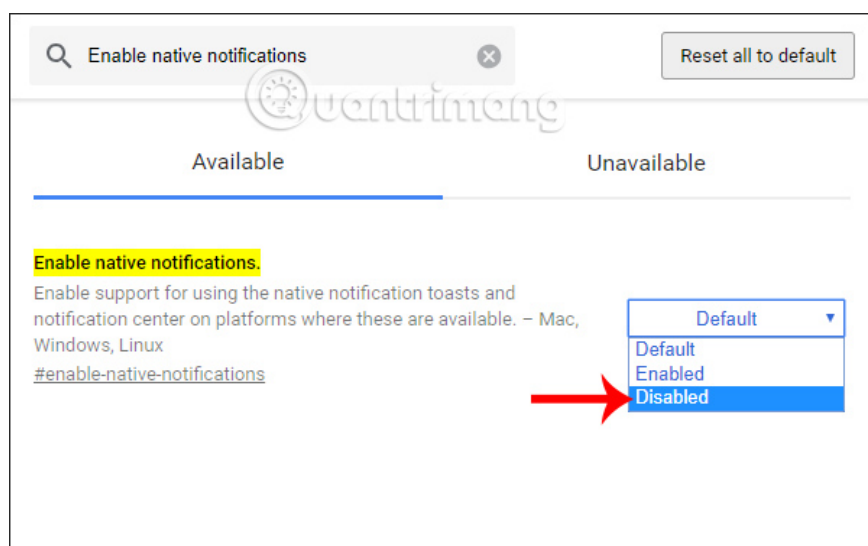

Immediately the value of this item has **changed to false** to turn off Firefox notifications to Action Center on Windows 10.

If a user wants to **turn off Google Chrome notifications** , enter the **command chrome: // flags / # enable-native-notifications** on the browser.

Then at **Enable native notifications** , we click Default and **select Disabled** . Finally press **Relaunch now** to restart the browser and apply changes.

Simply changing notifications from Firefox will no longer show up on the system tray and Action Center. If you want to display the messages at the Action Center again, just change the value to true.

I wish you all success!
