

How to turn off Instagram notifications on iPhone, Samsung, Oppo, LG, HTC phones.

It can be annoying to receive constant notifications from Instagram on your mobile device. Just like Facebook, turning off Instagram notifications is important to avoid being bothered by user interactions on Instagram. So how do you turn off Instagram notifications on Android and iOS devices? The answer is below.

Besides Facebook's dominance on social networks, Instagram also has its own place on mobile and web platforms and is known as a social network specializing in photos.

How to turn off Instagram notifications on your phone

- Download **Instagram for Android**
- Download **Instagram for iPhone**

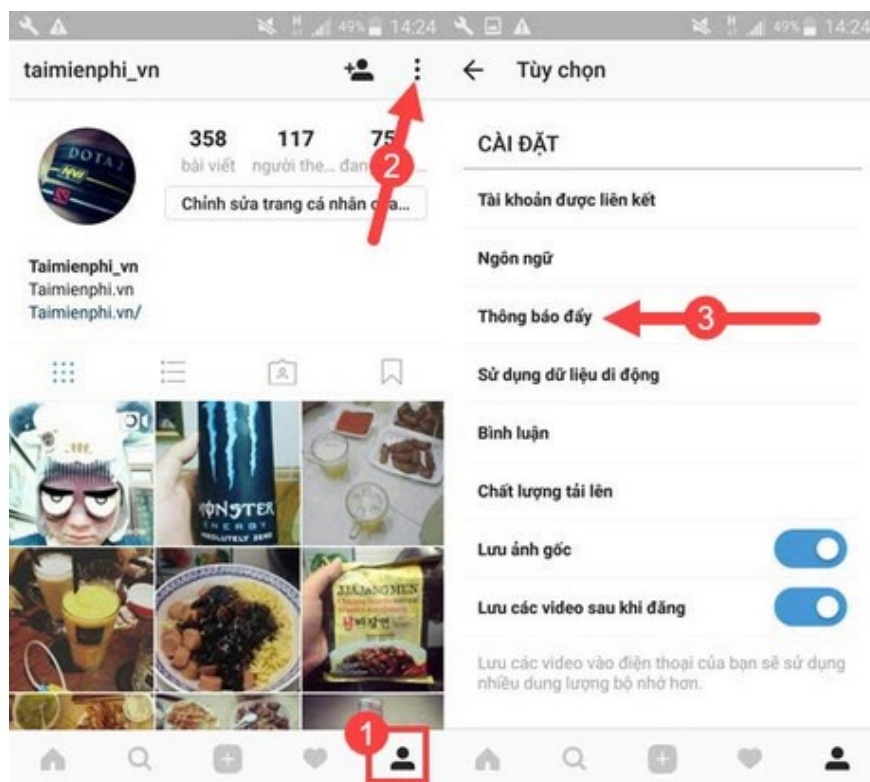

Instagram has a huge user base, and each Instagram account displays the number of followers and who is following you. Imagine if you have 1000 or more followers; every time you turn on 3G or WiFi, you'll receive hundreds of messages and notifications constantly, even on your browser. So how do you turn off Instagram notifications? This is a question many Instagram users have.

How to turn off Instagram on your phone

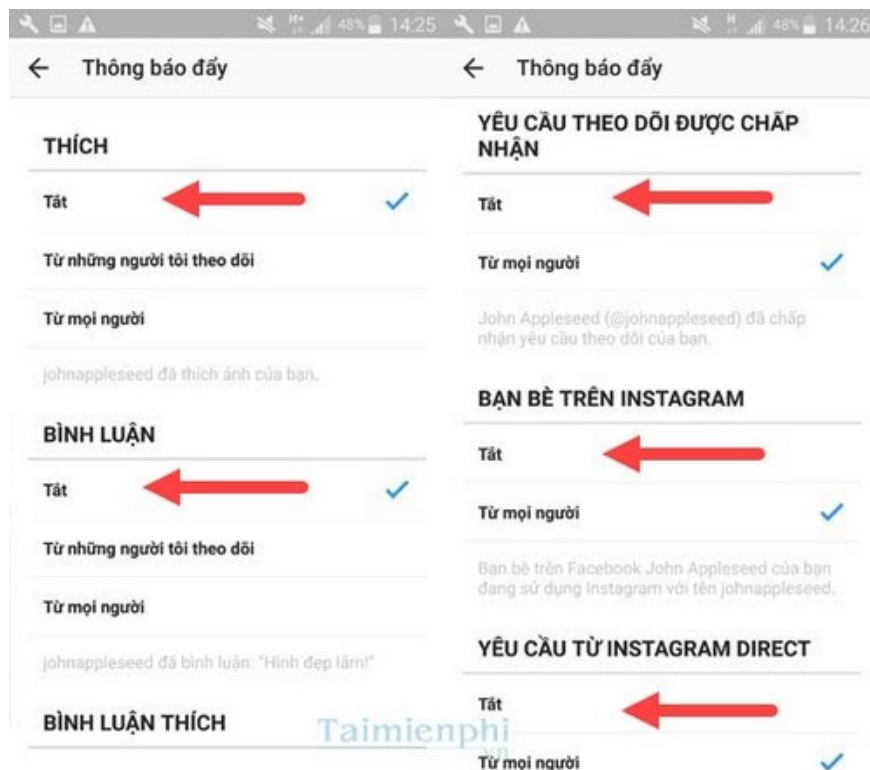

How to turn off Instagram on Android, Samsung, Oppo, HTC, LG, Lenovo phones.

Method 1: Turn it off directly through the Instagram app for Android.

Step 1: To log in to Instagram on your Android phone, select the **Profile** icon in the upper right corner of the screen, then tap **the three dots and** choose **Push Notifications**.

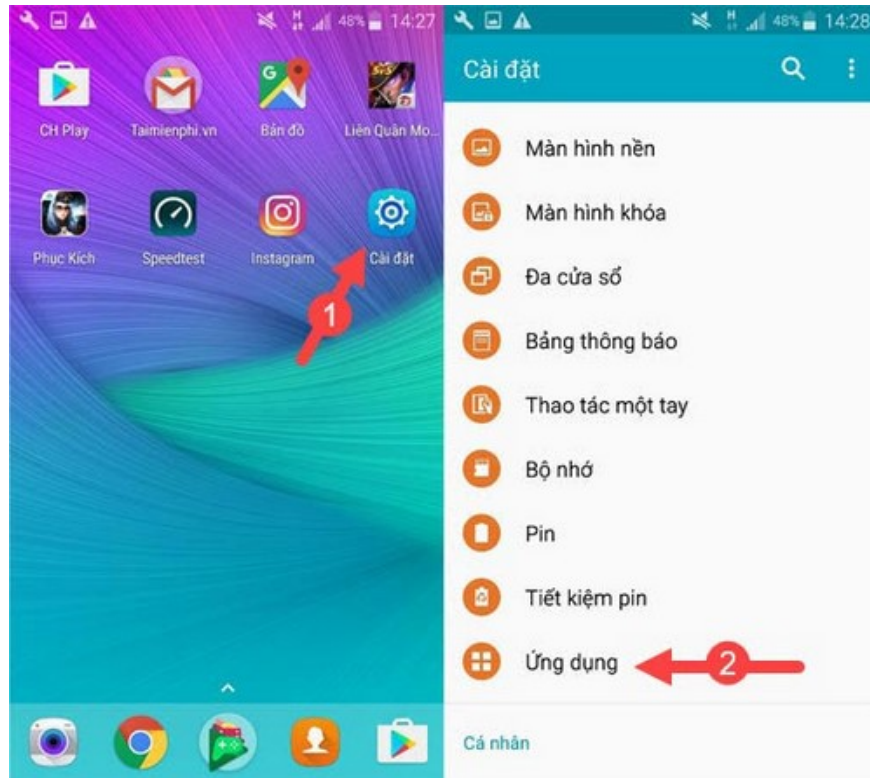

Step 2: In the push notification section, there are illustrative examples. To turn off Instagram notifications, select "Turn Off" for each corresponding item.

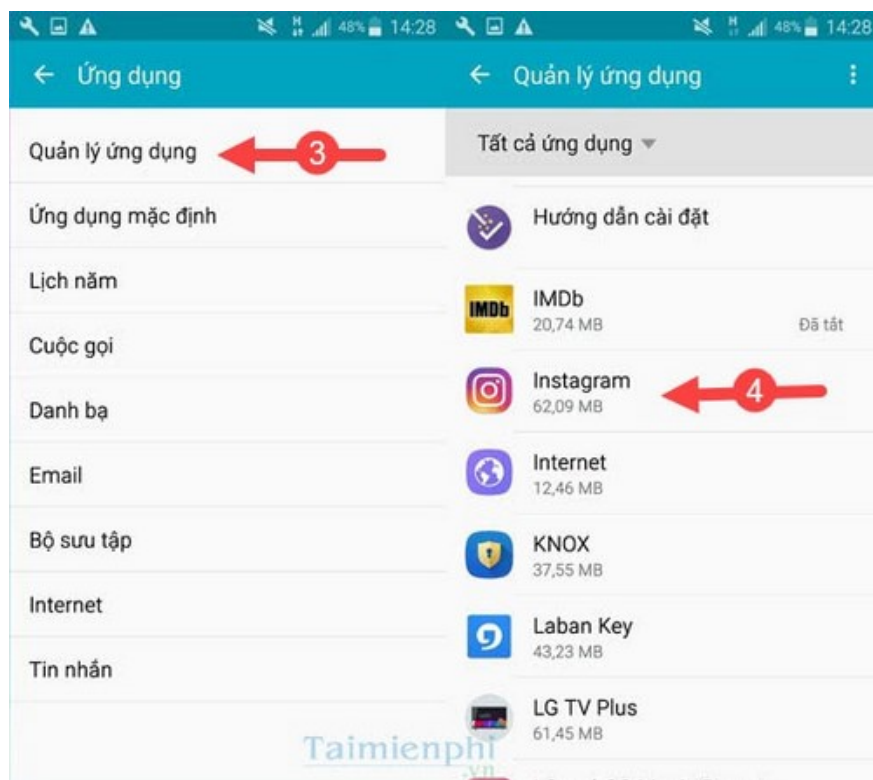

Method 2: Turn it off in the Android system settings.

This method will help you manage not only Instagram but also many other applications. Please note that this article uses Android 6.0.1, so users with lower versions may experience some differences.

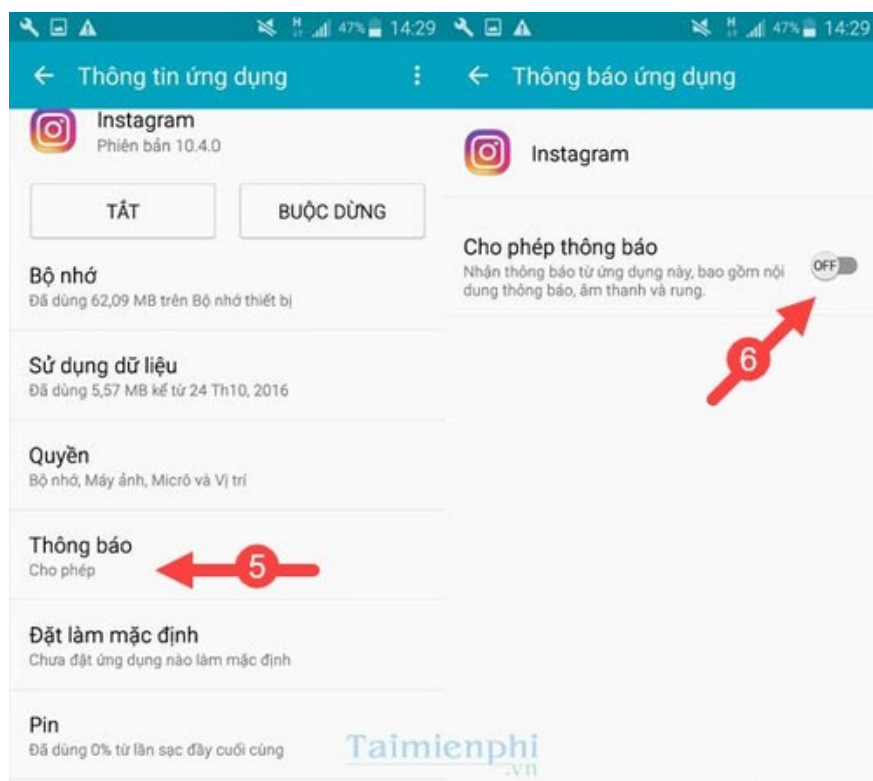

Step 1: Go to **Settings** and select **Applications** .

Step 2: In the applications section, select **Manager Applications** and find the **Instagram** app to enable Instagram notification settings.

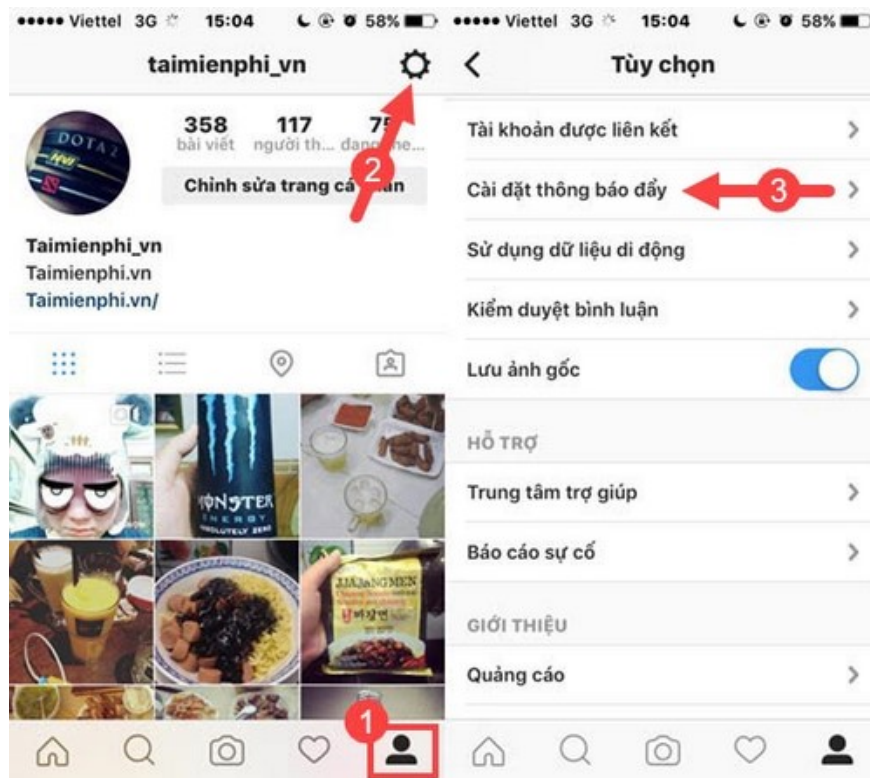

Step 3: In the Instagram app, select **Notifications** and close the notifications.

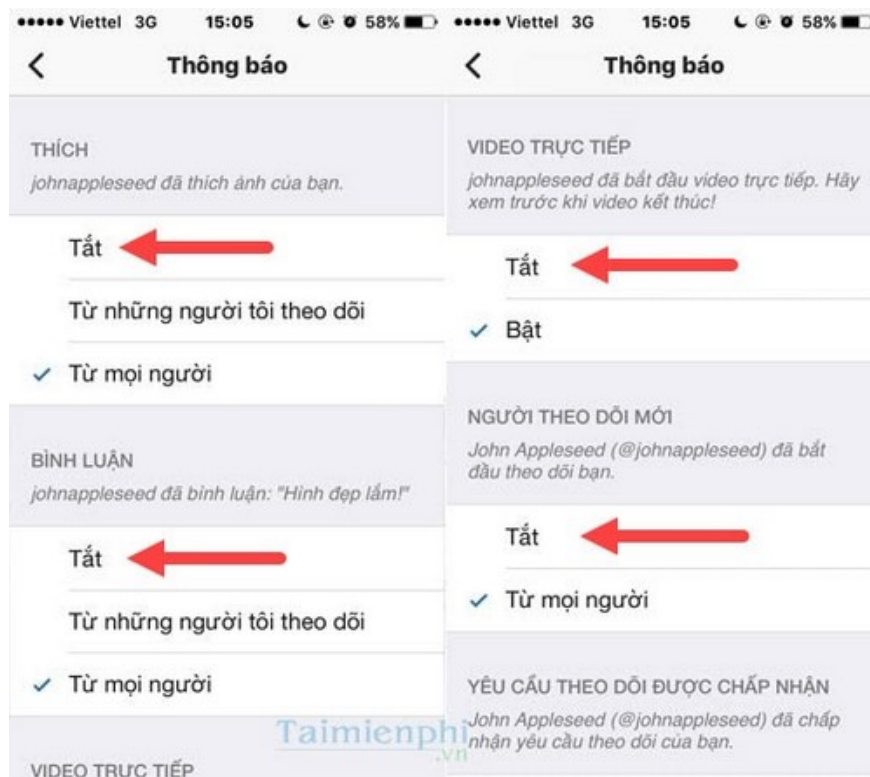

How to turn off Instagram on iOS devices like iPhone and iPad.

Method 1: Turn it off directly in the Instagram app for iPhone.

Step 1: Select the **Profile** icon , then go to **Settings** (the gear icon). In the options section, you will find the **Notification Push** setting .

Step 2: Similar to method 1 for Android, you can turn off anything you want here to stop receiving Instagram notifications.

Method 2: Turn it off in iPhone/iPad settings.

The iOS operating system has a very intuitive and convenient app and notification management system; you can use this to quickly turn off notifications from apps you don't want to receive.

Step 1: Go to **Settings** and select **Notifications** to turn off Instagram notifications.

Step 2: In the notifications section, find the **Instagram** app and turn off **notifications** . That's it.

Above are two ways to turn off Instagram notifications on your phone, for both Android and iOS operating systems. Turning off Instagram notifications this way will help you be more proactive in managing notifications, and of course, you can apply these methods to other apps on your device as well.

During phone usage, especially with smartphones, if your iPhone isn't charging, don't worry too much. Refer to the troubleshooting guide for iPhone charging issues provided by TipsMake for the best solution.
