

How to turn off notification bubbles on Android

Notification Bubble is a feature introduced in Android 11 that works much like Facebook Messenger Chat Heads. Chats pop up on the active screen. If you don't want to use this bubble, you can turn it off.

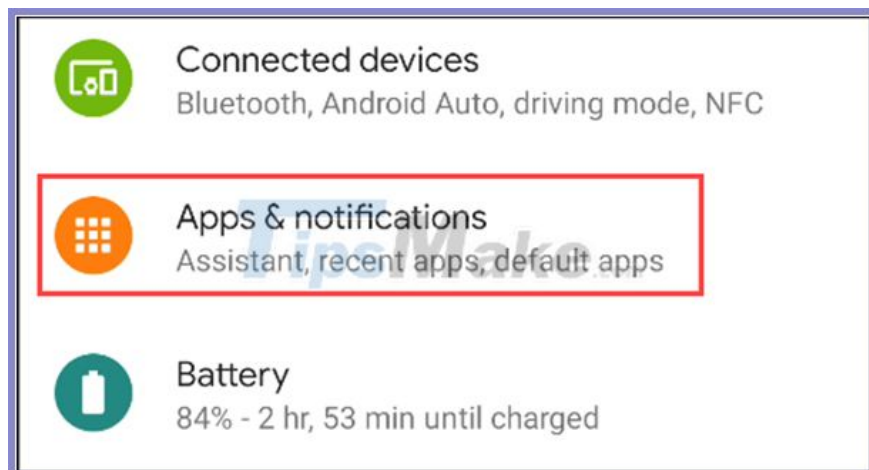

This bubble feature is enabled by default. When the app uses bubbles for the first time, you will have the option to turn them off by app. If you want, you can turn off all apps completely.

Turn off bubbles one by one

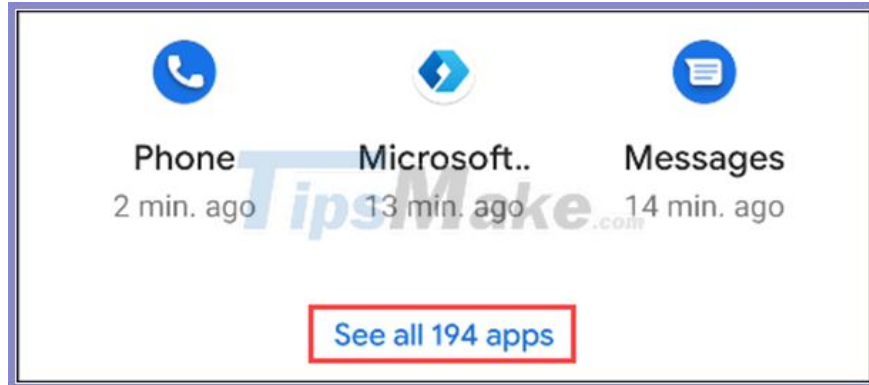

On an Android phone or tablet, swipe down from the top of the screen (once or twice depending on the device) then open the **Settings** menu .

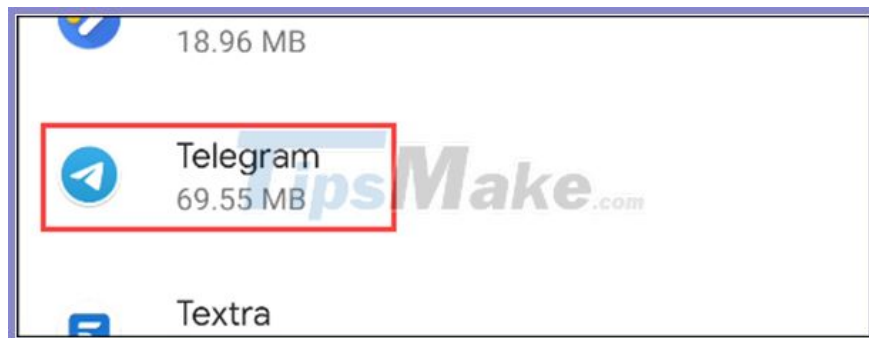

Scroll down and select **Apps and Notifications** .

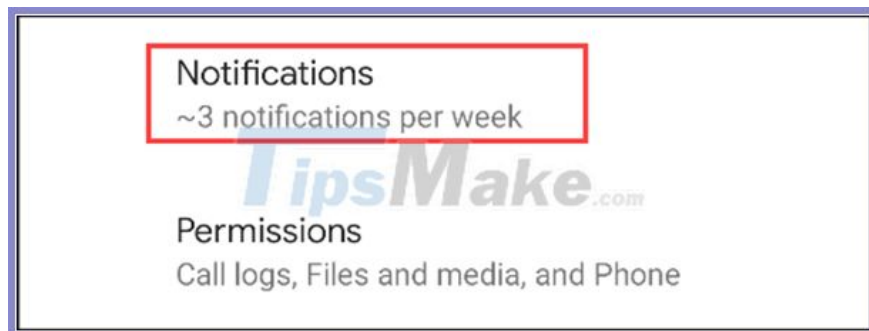

At the top of the screen, select **See all (X) apps** , 'X' is the number of **apps** you have.

Choose the apps you don't want to use bubbles.

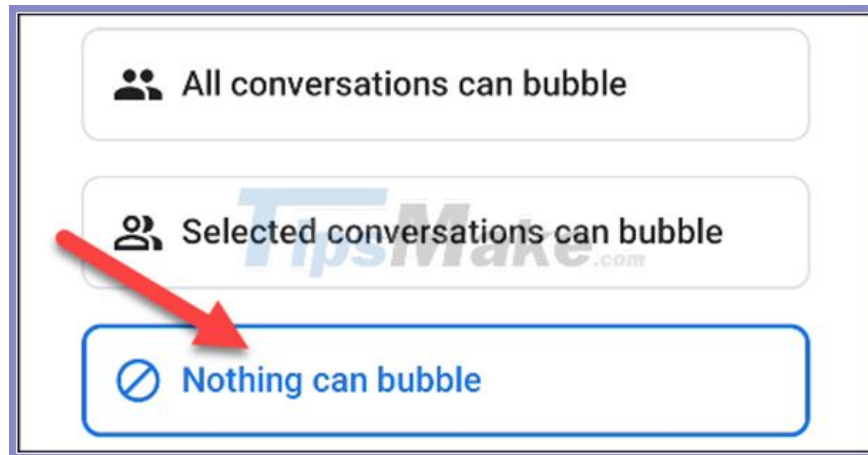

Select **Notifications** .

Finally, select **Bubbles** .

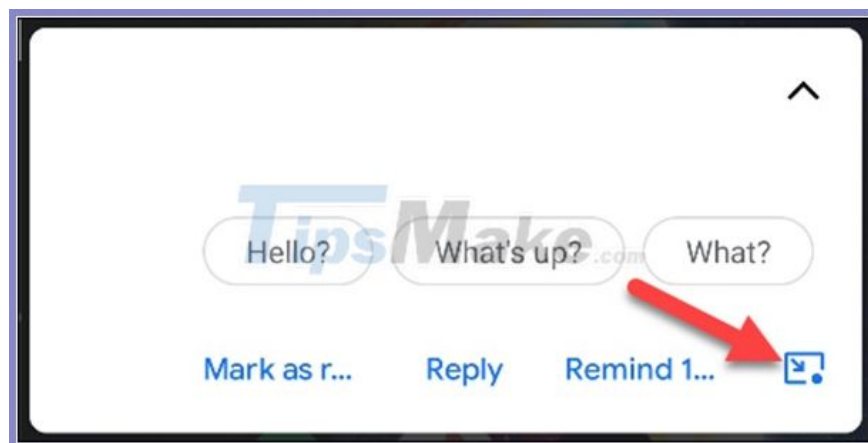

Change to **Nothing Can Bubble** .

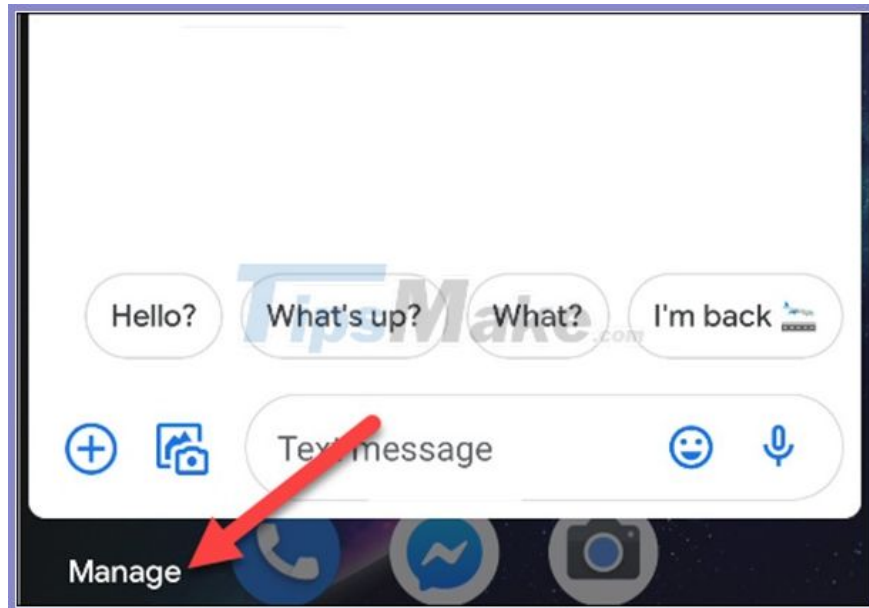

Now, whenever you receive a new message in that app, you won't see the new message bubble pop up again.

Turn off partial notification bubbles

If an app supports notification bubbles, you'll see a small icon in the lower right corner of the notification, click on it to make the window pop up.

Click **Manage** in the pop-up window.

A series of menus will pop up for the application. Click **Don't Bubble Conversation** to turn off partial in-app notification bubbles.

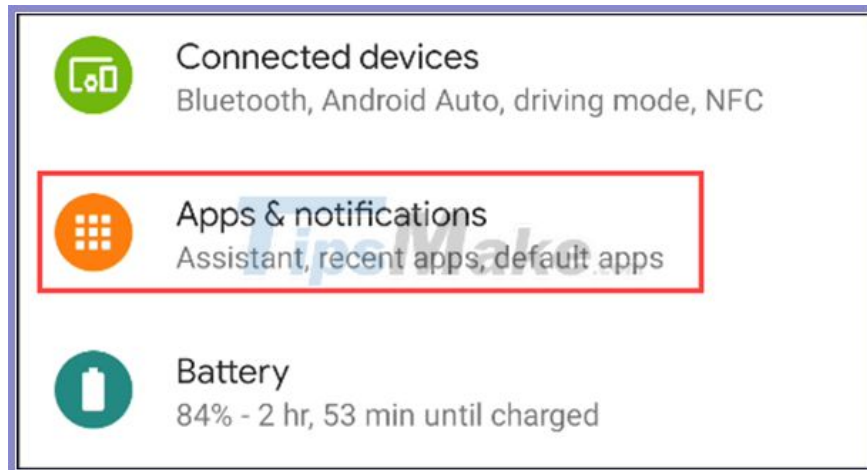

Turn off the bubble feature completely

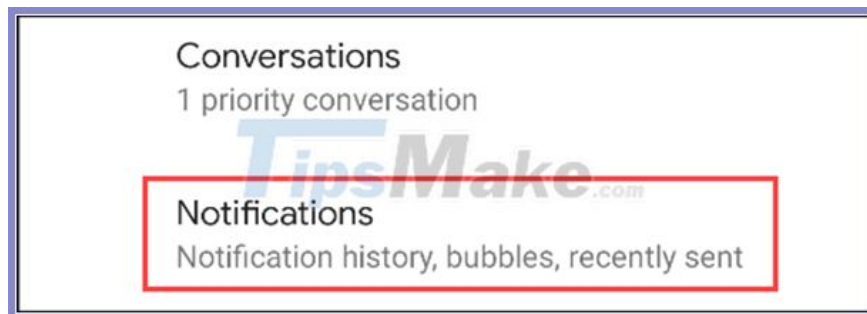

If you don't want to use it, you can also turn off the bubble feature. On an Android phone or tablet, swipe down from the top of the screen (once or twice depending on the device), then tap **Settings**.

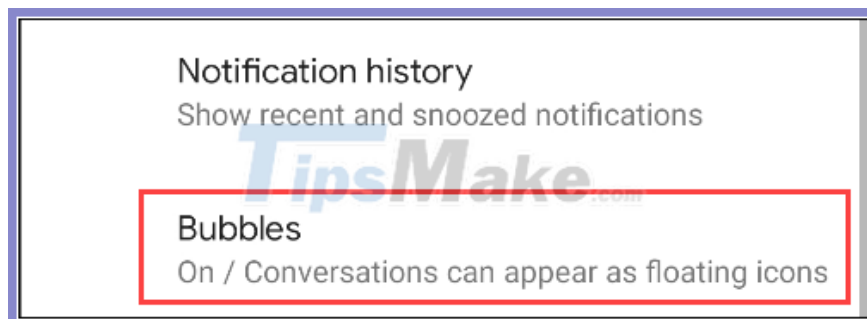

Select **Apps and Notifications** .

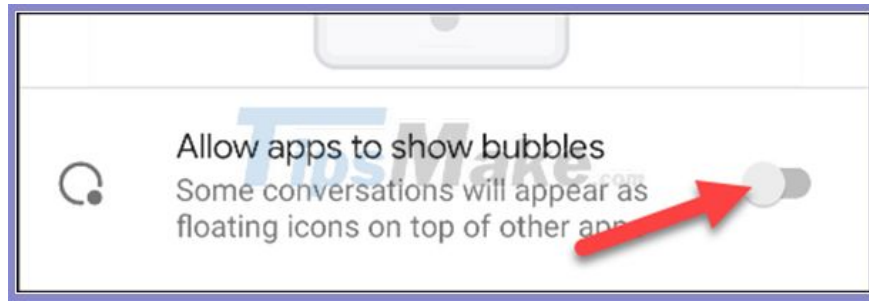

Next, select **Notifications** .

On top, select **Bubbles** .

Turn off **Allow Apps to Show Bubbles** .

No apps can use Bubbles anymore. You can go back to these steps and re-enable the bubble feature again.
