

# How to turn off online status on Teamviewer

You use TeamViewer, but want to turn off online status but don't know how to do it because this new version has many changes compared to the old versions.

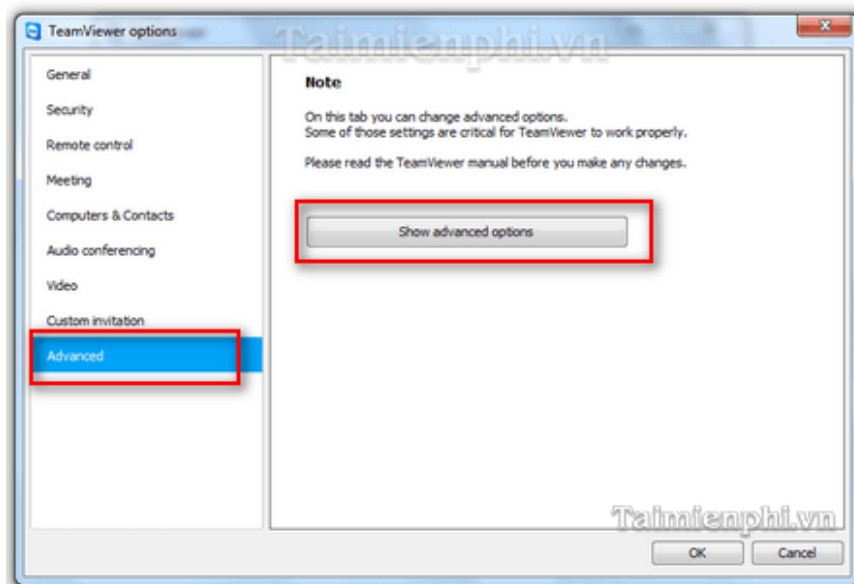

## Instructions to turn off online status on Teamviewer

You can download the latest version of the software here: [Download TeamViewer](#)

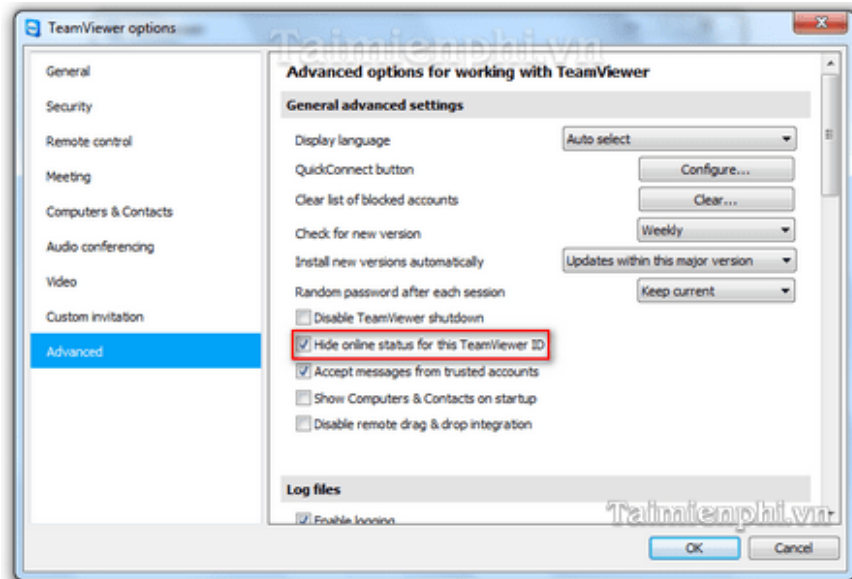

**Step 1:** After installation is complete, start Teamviewer and select the **Extras => Options tab.**

**Step 2:** Scroll down to the line named **Advanced** . Select the **Show Advanced Options** box and click.

**Step 3:** Select **Hide online status for this TeamViewer ID** and click **Ok** .

You have successfully disabled TeamViewer's online status. When you enable **Hide online status for this TeamViewer ID** , TeamViewer will hide you from the **Computer and Contact** lists .

This will help you avoid being interrupted when you don't want to join a virtual meeting or allow the host to connect and take control of your computer. You can easily restore online mode by repeating the steps above.

This article has guided you how to switch to offline mode on TeamViewer in a simple and detailed way, helping you to stay anonymous when using the software and avoid being bothered.
