

How to turn off Share with Copilot on Windows 11

When you hover over applications on the Taskbar, you'll see the 'Share with Copilot' option to share that application with Copilot. Although this experience is AI-powered, not everyone wants to use it.

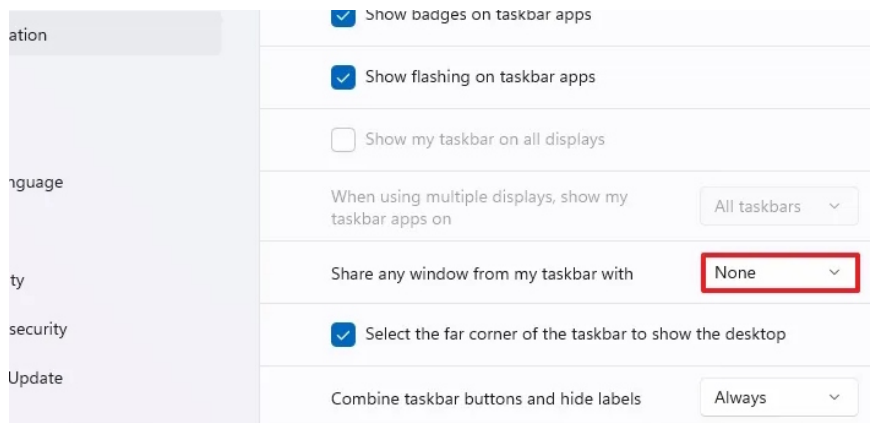

When you hover over applications on the Taskbar, you'll see the "Share with Copilot" option, allowing you to share the application with Copilot when you want to learn about it. While this experience is AI-powered, not everyone wants to use it. Here's how to disable "Share with Copilot" on Windows 11.

Instructions on how to disable Share with Copilot on Windows 11

Step 1:

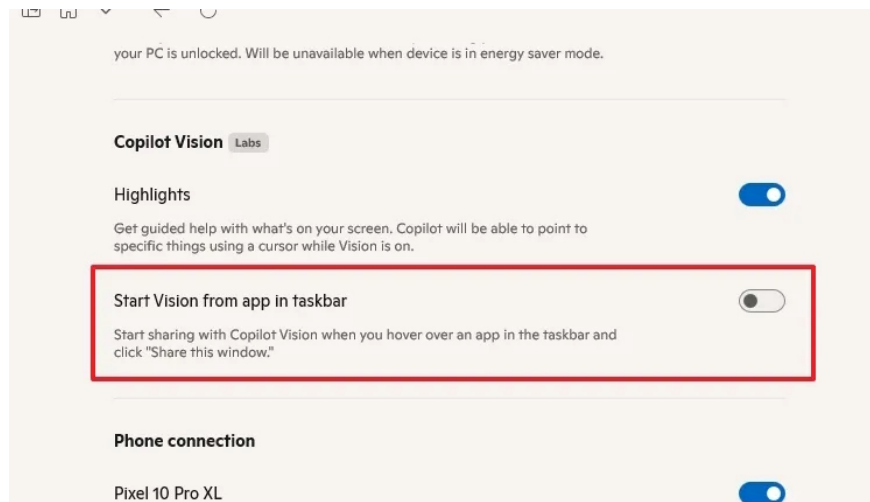

Open **Settings** , select **Personalization** , then tap **Taskbar** and choose **Taskbar behaviors** to adjust the Taskbar settings.

In the "Share any window from the taskbar with " section, select "None" .

Step 2:

Open the Copilot app and tap **Settings** . Here, find the **Copilot Vision** option and turn off the "Start Vision from app in taskbar" setting .

After you make these settings, the Share with Copilot option from the Taskbar with Copilot Vision will be completely disabled on Windows 11.

Microsoft is gradually rolling out this feature with the Windows 11 December 2025 security update (KB5072033), and it will eventually be available to everyone, regardless of whether you have a Copilot+ computer or not.
