

How to turn off the Laptop screen but the program still runs on Windows 10, 7

How to turn off the Laptop screen but the program still runs on Windows 10, 7. As you know the screen is one of the components that consume a lot of power on our laptop so sometimes we want to turn off the screen to Save more battery.

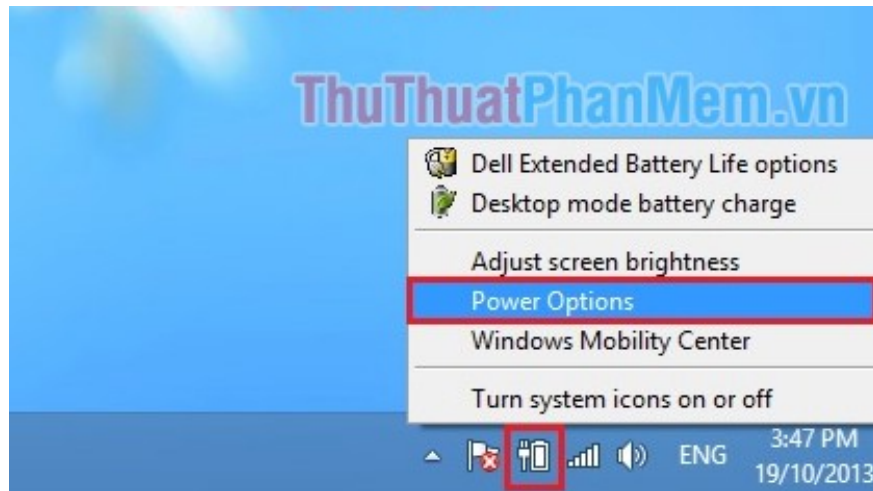

As you all know the screen is one of the components that consume a lot of power on our laptops so sometimes we want to turn off the screen to save more battery. But when the computer screen is turned off, the applications stop working so that we cannot continue to do what we are doing. In this article, TipsMake.com will guide you how to turn off the laptop screen but the program still works, please refer.

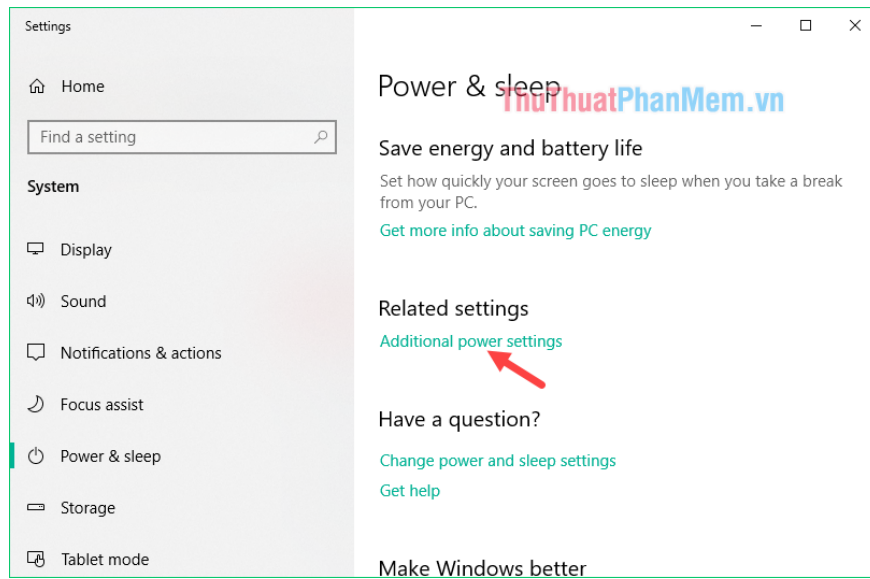

1. How to fold a laptop screen but the computer still works.

Normally when we fold the laptop screen, the computer will go back to sleep and the running applications will stop working. To fold the screen but the application still works we do the following:

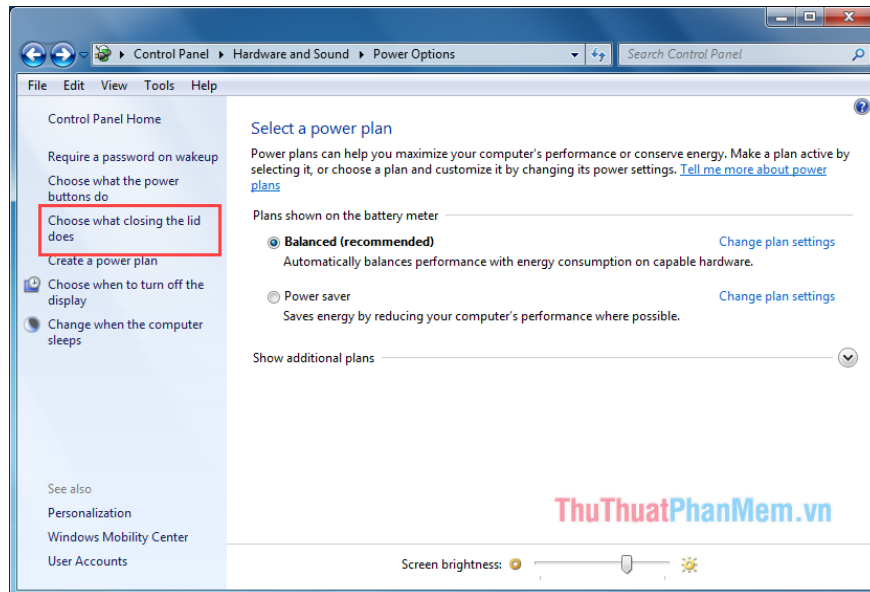

Step 1: Right-click the battery icon on the Taskbar and select **Power Options**

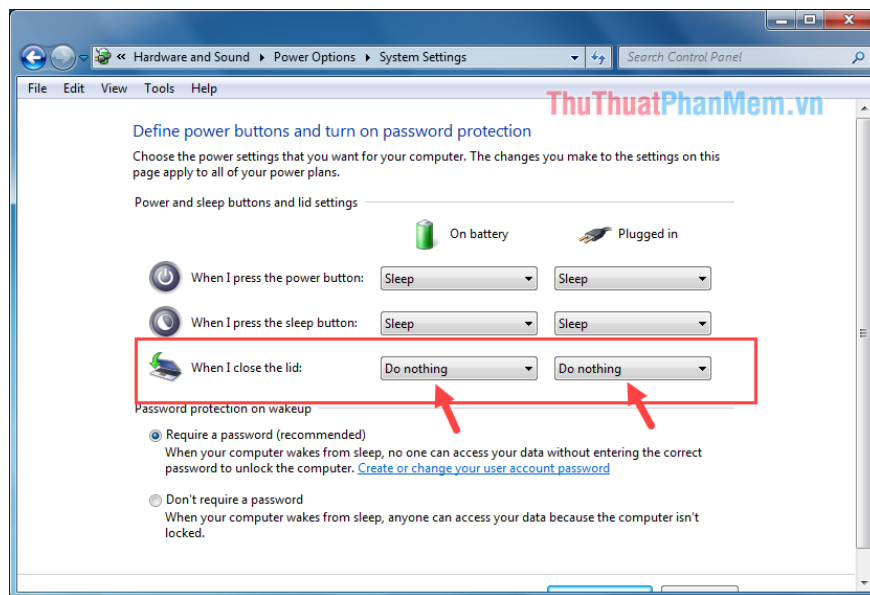

For Windows 10 after selecting **Power Option**, if the window appears as shown below, select **Additional power settings**

Step 2: A new window appears, select **Choose what closing the lid does**

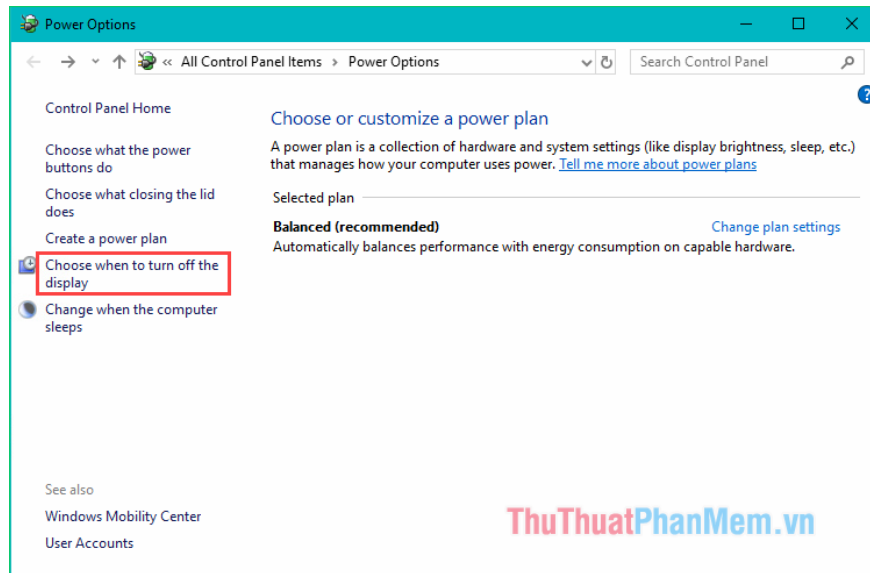

Step 3: In the **When I close the lid** section, select **Do nothing** in both items, then click **Save Change** to save. So now you can fold the laptop screen comfortably and the application is still active.

2. Set the computer to turn off the screen after a certain time

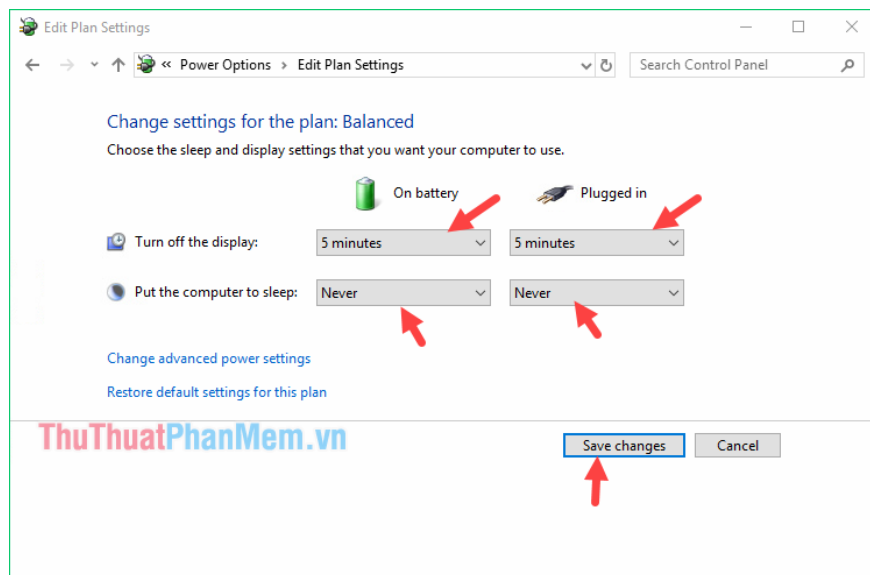

If you do not like to fold the laptop screen, you can set the computer to turn off the screen automatically after a period of time you choose. How to do the following:

Still in the Power Options window, select **Choose when to turn off the display**

Next in the new window in the Turn off the display section, select the time the screen will automatically turn off. For example below we choose 5 minutes, then after 5 minutes the screen will automatically turn off.

For **Put the computer to sleep**, select **Never** so the computer will not automatically enter **Sleep** mode. Finally click **Save Changes** to save.

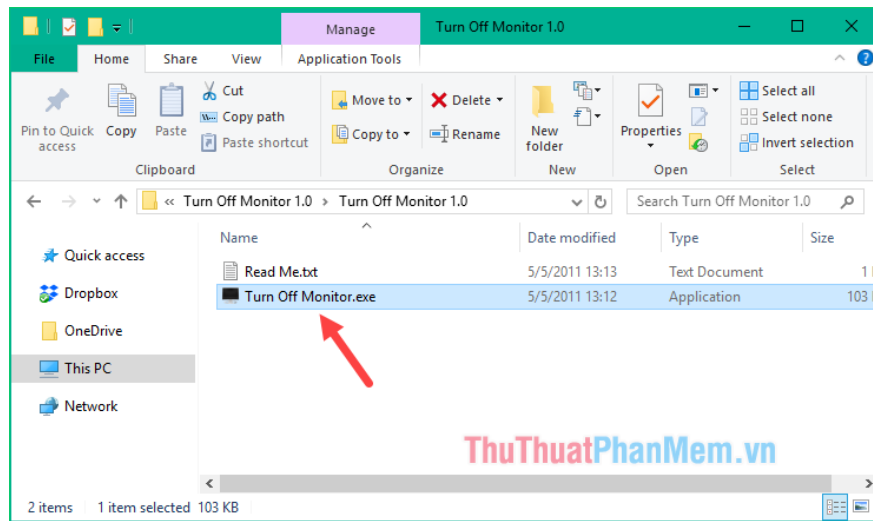

3. Use software to turn off the laptop screen

If you do not want to wait for the computer screen to turn off, you can use the software to turn off the screen with just one click.

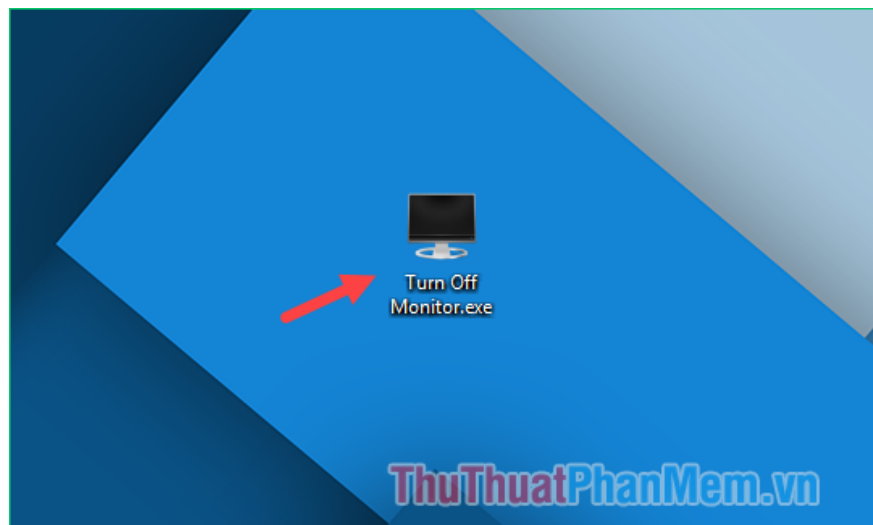

Software called **Turn Off Monitor**, this software is very light at only 100kb and does not require installation.

You can download it here: <https://sourceforge.net/projects/turnoffmonitor/>

After downloading and extracting the Zip file, the **Turn Off Monitor.exe** file will be downloaded . You just need to double click on this file and the screen will turn off.

For more convenience, you can copy to the Desktop, when you want to turn off the screen just click on is done:
