

# How to turn off the lock screen on Windows 10 Creators Update

When logging into Windows 10 Creators Update, users are forced to bypass the lock screen Lock Screen to access the login interface to use.

Lock Screen Lock Screen on Windows 10 will display information such as battery status, time, Internet connection status, or some information of some running applications. However, many people think that this lock screen is really unnecessary, when they have to use the mouse to skip this screen to the system login interface. In the following article, we will show you how to remove Lock screen lock screen on Windows 10 Creators Update.

1. How to enable File Explorer new interface on Windows 10 Creators Update
2. Don't miss out on useful tools available on Windows 10!
3. How to enable Dynamic Lock in Windows 10 Creators Update

## Step 1:

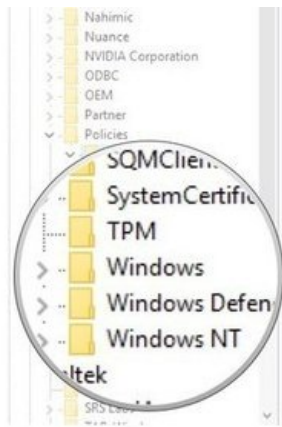

First of all, we select the **Windows + R** key combination to open the Run window. Then enter the **keyword regedit** and click **OK**.

## Step 2:

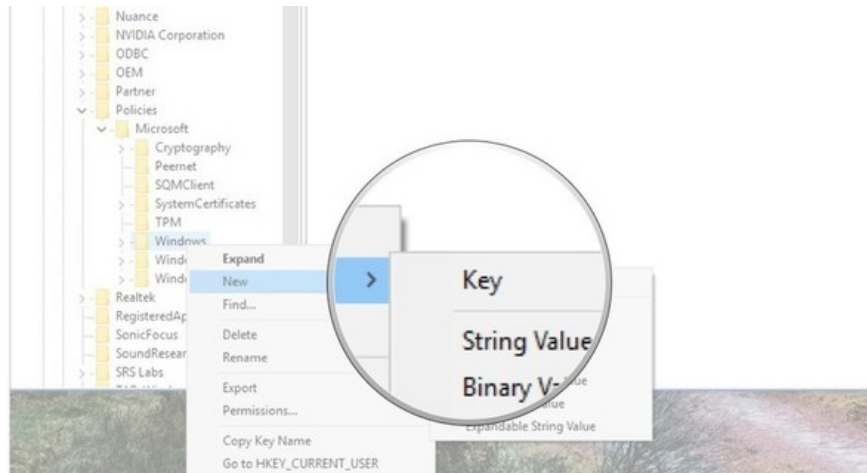

Next in the interface of Registry Editor, users follow the following directory path:

HKEY\_LOCAL\_MACHINE\SOFTWARE\Policies\Microsoft\Windows

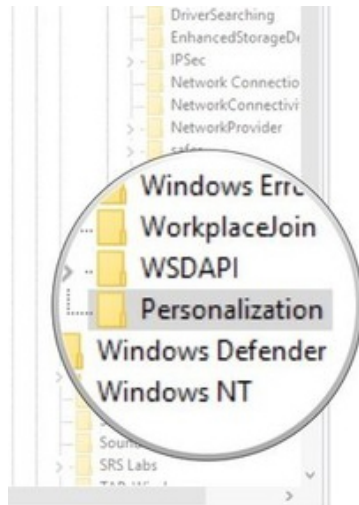

### Step 3:

Here, the user will right-click on the Windows folder and select **New** and select **Key**.

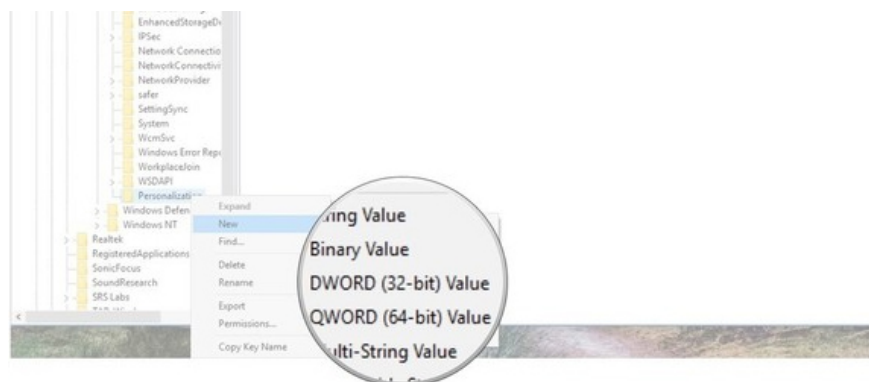

We will enter **Personalization** and press **Enter** to create a new folder.

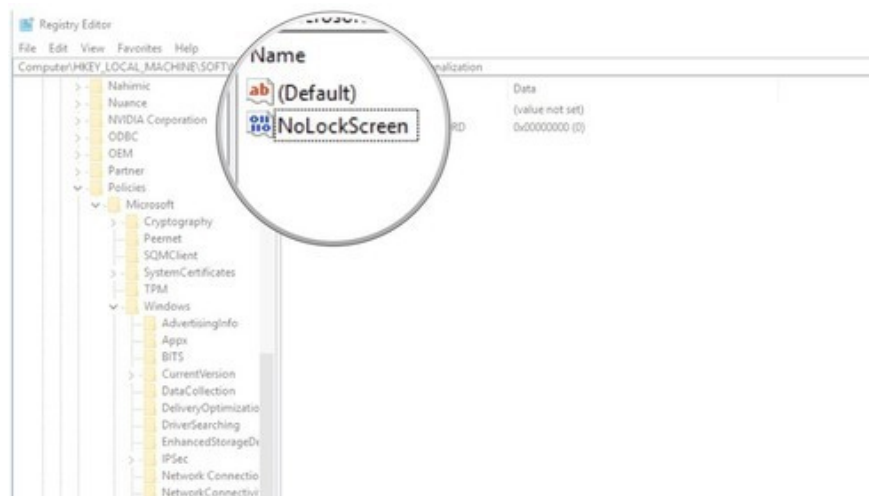

## Step 4:

Next, right-click on the Personalization item we just created and select **New** . Then the user selects the **DWORD (32-bit) option** .

On the right interface you will enter **NoLockScreen** .

## Step 5:

You will double click on the NoLockScreen value to bring up the main edit dialog box. Here, if the user wants to **turn off the Lock Screen lock feature** on Windows 10 Creators Update, fill in the **Value data as 1** .

In case you want to **re-enable the lock screen feature** on the system, enter the value at **Value data as 0** . Finally click **OK** to save.

Above is how to turn off the Lock Screen lock screen on Windows 10 Creators Update version. Enabling or re-enabling the Lock Screen screen on the system is extremely simple, when we only need to change the value in the Registry Editor according to the above instructions.

I wish you all success!
