

How to turn off the required password entry when downloading applications from the App Store on iPhone

You feel frustrated because every time downloading applications from the App Store on iOS, they must re-enter the password even if it is a free application? Please turn off the notification of entering Apple Store password.

When downloading the application from Apple Store on your iPhone, you will receive a message asking for a password even if it is a free application. In fact, this is the specific security of this operating system, but sometimes it causes trouble because you have to enter a tired hand password to download the favorite application to the device. So if you are annoyed, turn off the Apple Store password.

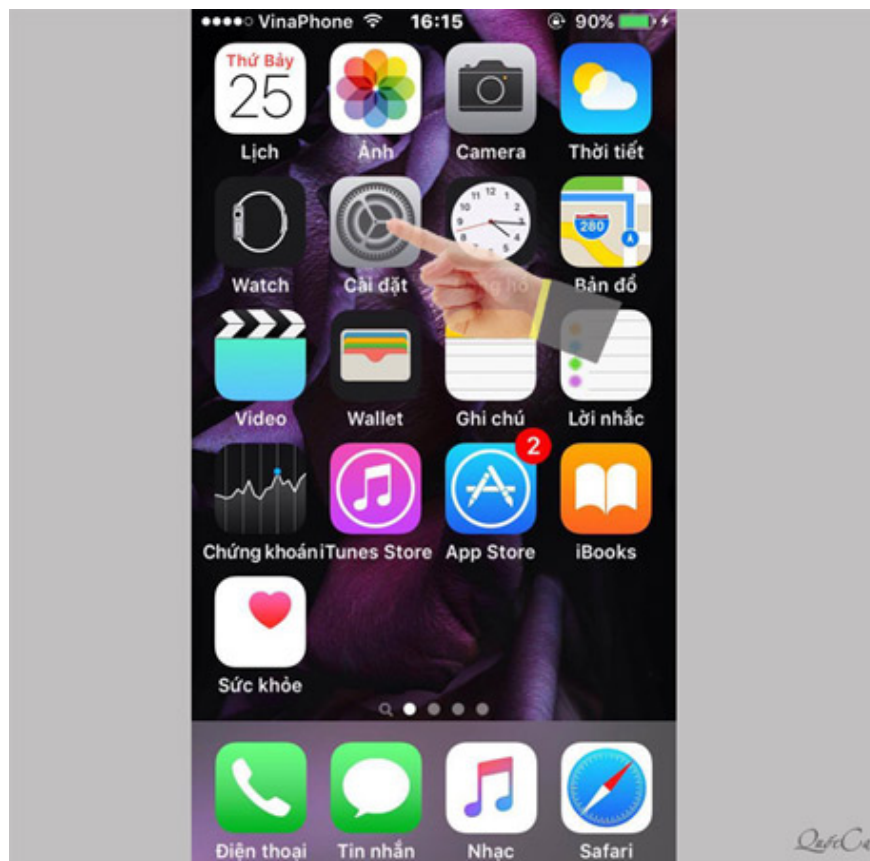

The message requires entering a password when downloading applications from Apple Store on iPhone phones.

Instructions to turn off the required password entry when downloading applications from the App Store on iPhone

To turn off entering a password when downloading free apps on your iPhone, follow the instructions:

Step 1:

Go to *Settings* on the phone home screen.

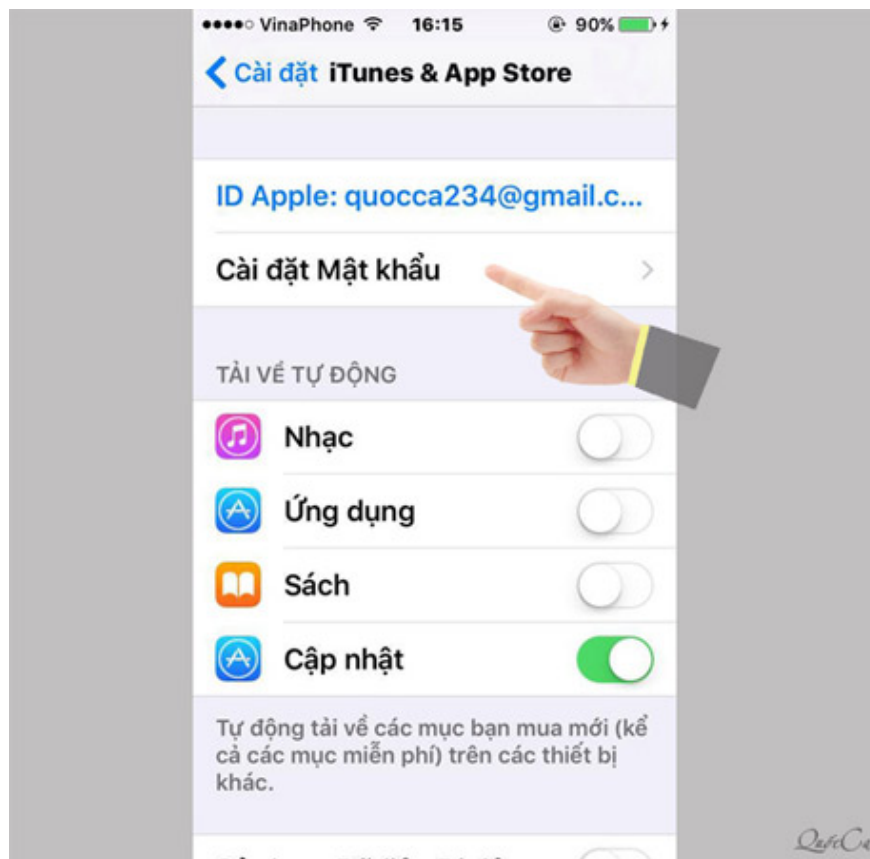

Step 2:

Search and select the *iTunes & App Store* item.

Step 3:

Here, click *Install password* .

If you do not want your iPhone to ask for a password when downloading free applications, simply turn off the section *Request a password* (Download it for free).

With the application or payment transactions in the application, you can limit the password by selecting *Request after 15 minutes* (Since the first time) or *Always asking* if you are worried about your security.

Thus, with just a few steps, you can download the free application quickly and easily instead of entering a tired password like before. Hopefully this tip will help you in the process of using your iPhone.

Good luck!
