

How to turn off Windows 7, Windows 8 / 8.1 updates

Turning off Windows update on Windows 7, Windows 8 / 8.1 can help you avoid unnecessary troubles. TipsMake.com will guide you how to turn off updates on Win 7, Windows 8 versions you do the same.

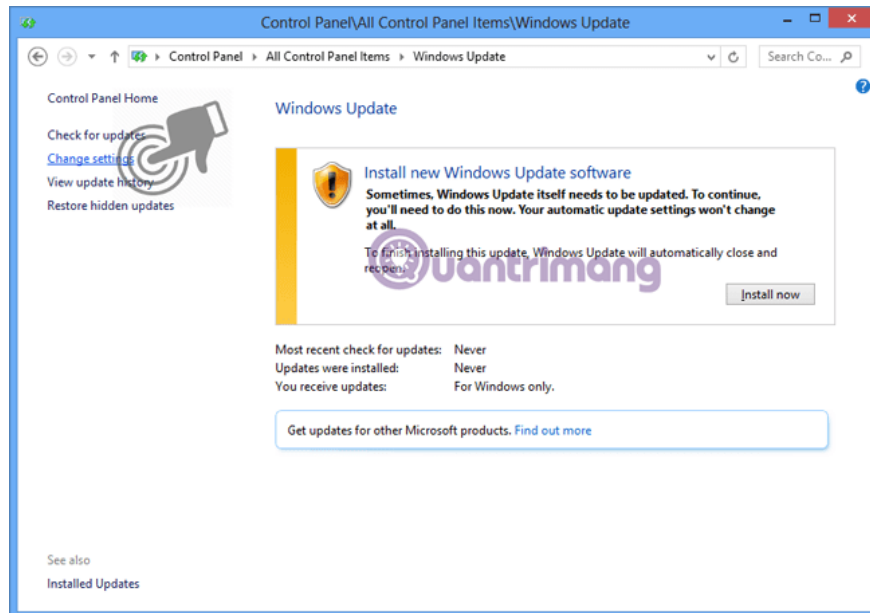

Turning off Windows update on Windows 7, Windows 8 / 8.1 can help you avoid unnecessary troubles. TipsMake.com will guide you how to turn off updates on Win 7, Windows 8 versions you do the same. Although Windows 7 is about to be killed and won't receive updates anymore, in a particularly dangerous case Microsoft still breaks the update rules for older operating systems. Therefore, it should be noted that the emergency security patches that Microsoft has released for Windows 7 are important, so you should occasionally check to make sure your computer is safe.

How to turn off updates on Windows 7/8 / 8.1

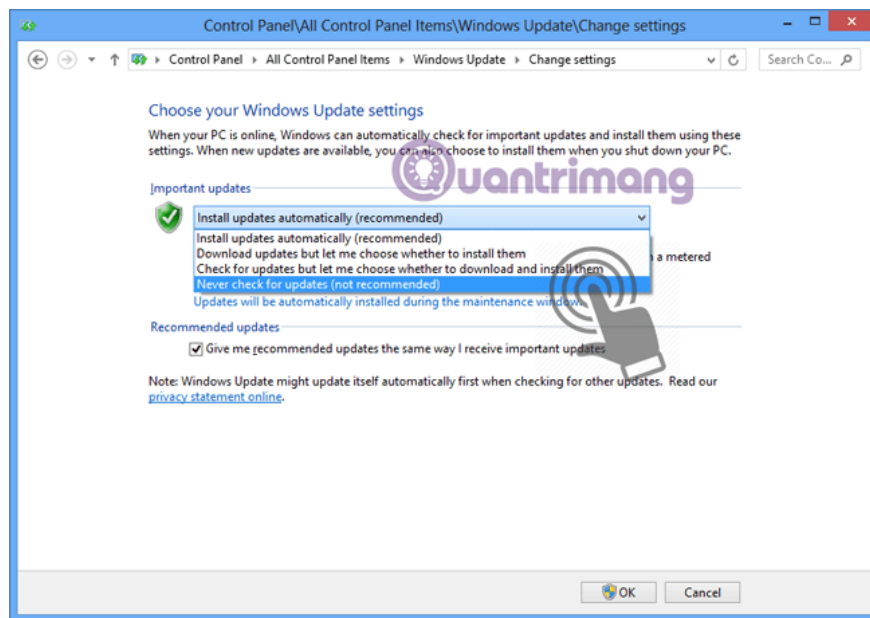

Because the method is similar, I will do the test on Windows 8 (with other Windows versions, you do the same). To turn off Windows Update, we open **Control Panel > Windows Update** :

Select the **Change Settings** section on the left:

The Settings window is displayed, here you select **Never check** . to turn off Windows Update. If you still want to check for updates automatically but when you decide to install it at any time, select **Check for updates but let me choose whether to download and install them** .

Click OK to save setting changes. And from now on, our Windows system will no longer check for updates from Microsoft. As mentioned above, Windows Update can make your computer more secure and secure, and will cause some unexpected errors. So people consider carefully turning off or turning on this Windows Update feature!

Good luck!
