

# How to turn on and turn off smooth scrolling on Opera

On Opera also features Smooth Scrolling that smooth scrolls, increases scrolling effect and makes it uncomfortable to the eyes.

Smooth Scrolling on Chrome will enable the scrolling effect to create a smoother feel when scrolling content on the page. This effect will be optimized to fit the web content, limiting discomfort to users' eyes when rolling content. However, like on Chrome, smooth scrolling on Opera has also been hidden and users need to activate it to use it. The following article will show you how to enable Smooth Scrolling on Opera.

2. How to watch videos from the thumbnail screen on Opera
3. Guide to Facebook Messenger chat on Opera

## Instructions for activating Smooth Scrolling on Opera

### Step 1:

Open Opera browser and then in the address bar you enter the address below and press Enter to access.

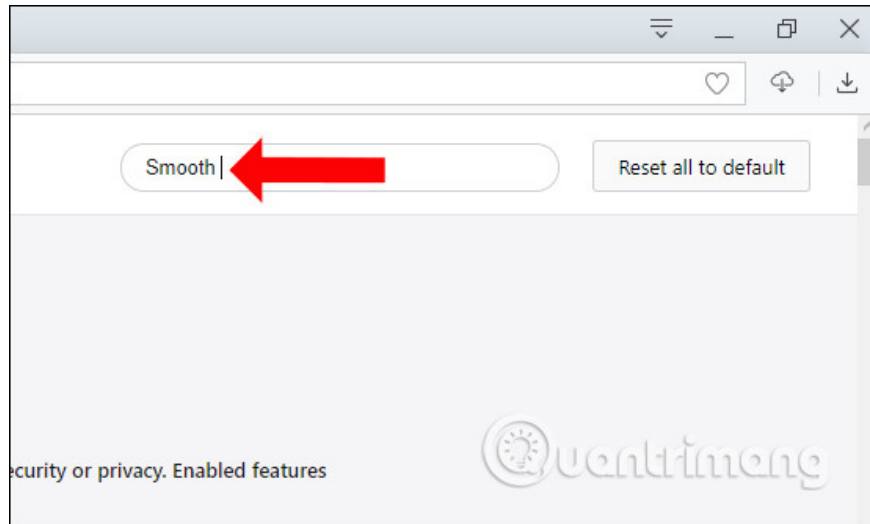

1. opera: // flags /

### Step 2:

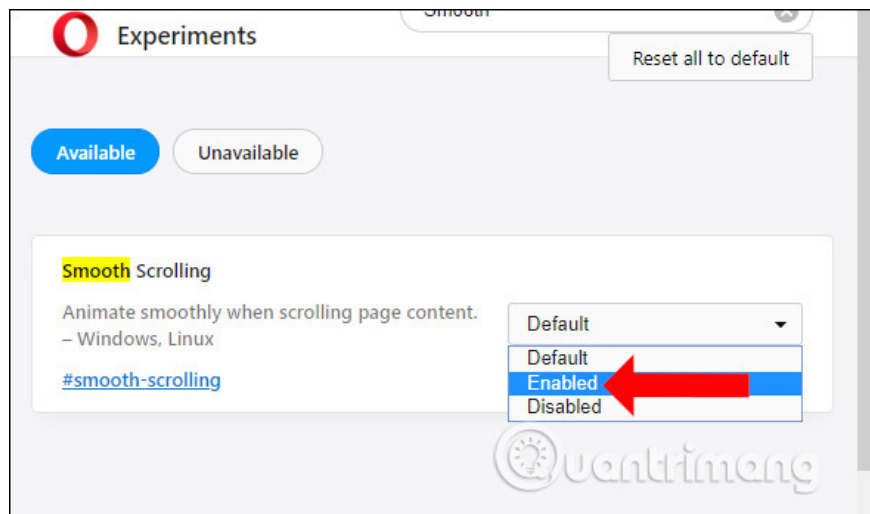

Users will then access the Opera features test page, so be careful when changing features. Change only when there is a need.

In the search bar **enter the Smooth keyword** to search for Smooth scrolling feature.

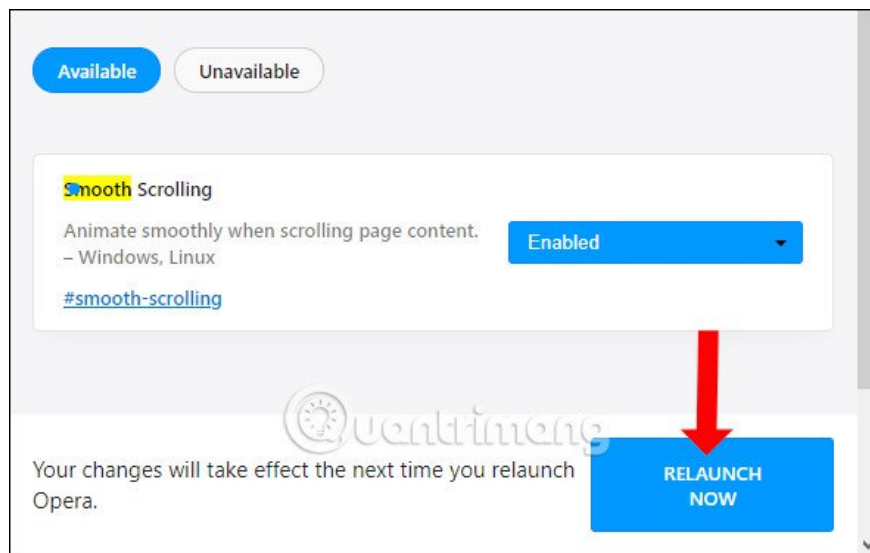

### Step 3:

Click on Default and **select Enable** in the drop down list.

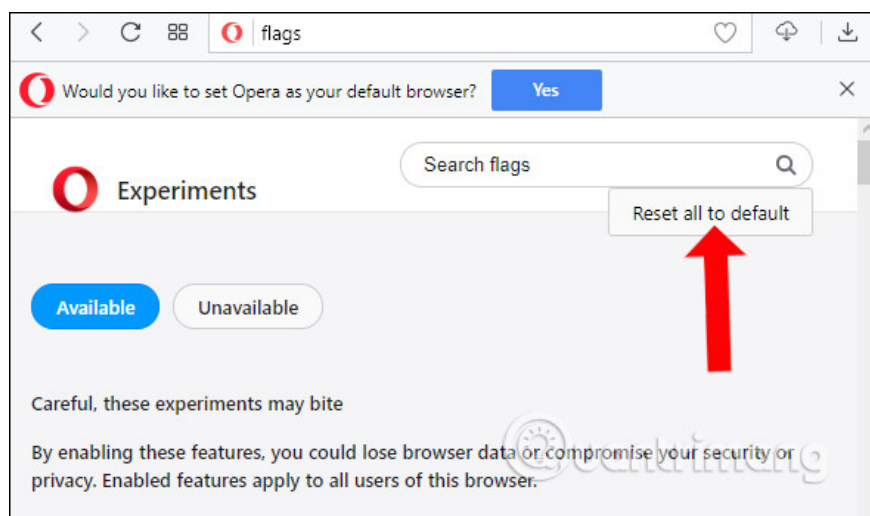

Finally, users need to press **Relaunch Now** to restart Opera browser. Thus the new changes take effect.

#### Step 4:

In case the user does not want to use this smooth scrolling feature, you can switch to Disabled or click the **Reset all to default** button to bring all features back to the default mode, before changing.

After activating the Smooth Scrolling feature on Opera, you will immediately see the difference when viewing content with the mouse scroll. In addition, users also pay attention to limit the continuous editing of features in Opera's testing interface to avoid browser errors.
