One of the useful features that only Windows 10 has is Clipboard History, this is a very good solution for office workers and has to deal with many data to copy, copy, . In this article, Software Tips will guide you how to turn on and use the Clipboard History feature on Windows 10.

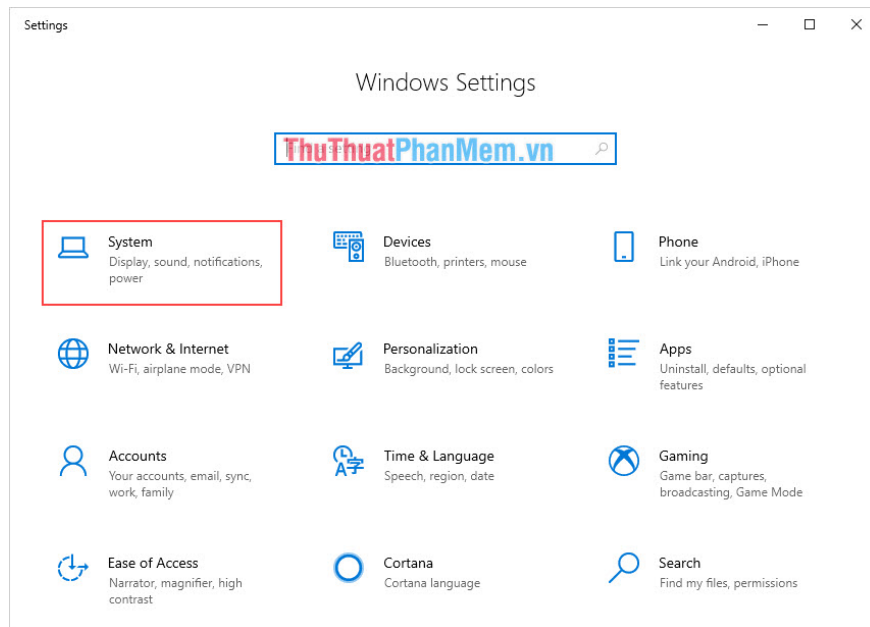

1. What is Clipboard History?

Clipboard History is a feature built into Windows and we can set it on / off through the system's Settings. The main purpose of Clipboard History is to store all data that you have previously copied to search, search and copy quickly. Instead of having to search for those data to copy again, you just need to open Clipboard History and view them in the list of copied data to Clipboard system.

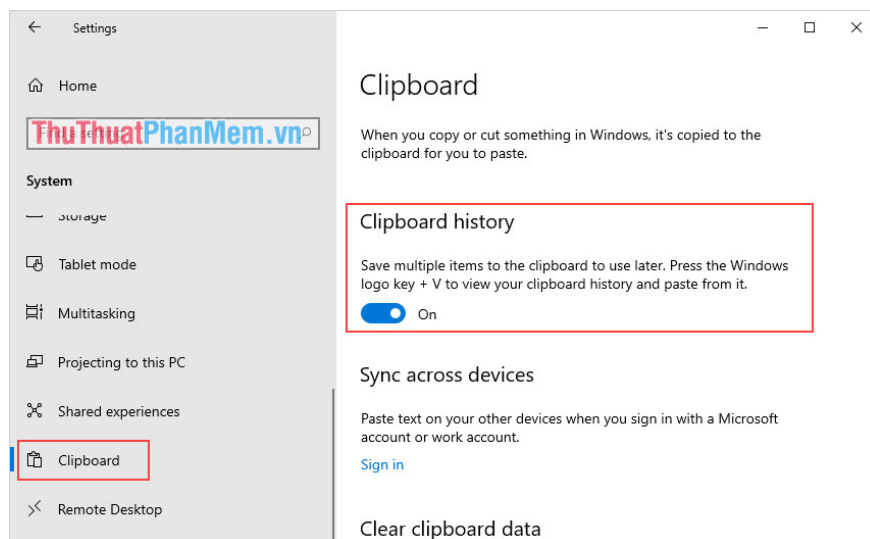

2. How to turn on the Clipboard History feature

On the Windows 10, the Clipboard History feature is off by default and you need to enable them manually in **Settings** .

Step 1: You press **Windows + I** to open Settings and you select the **System** section to set the system.

Step 2: Then, you find the **Clipboard** section and activate **Clipboard History** to **On** is finished.

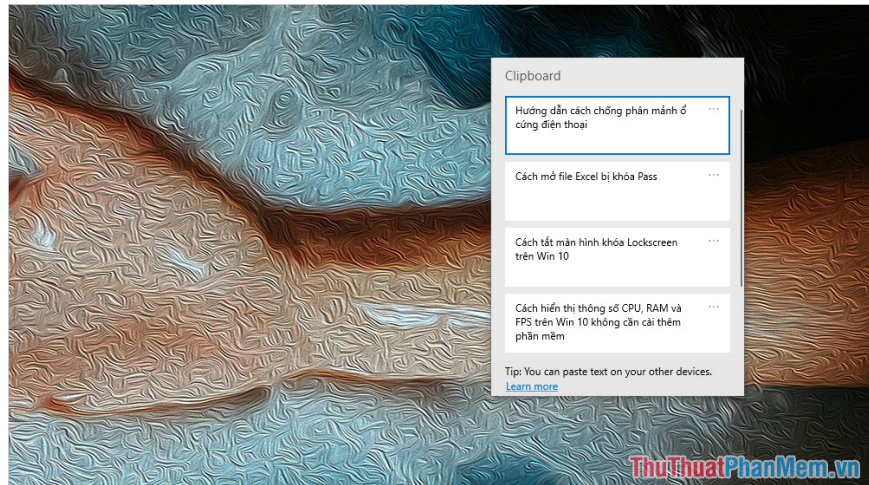

3. How to use Clipboard History on Windows 10

On Windows 10, anywhere, any application that is opening on your computer can call Clipboard History through the shortcut Windows + V. When you call Clipboard History, you will see a copy. Clipboard includes a lot of content we have previously copied.

The order of content is sorted by time, which means that the most recently copied content will be at the top of your list.

To copy a content in Clipboard, you do not need to press Ctrl + V, you just need to **Double click on the content** to finish.

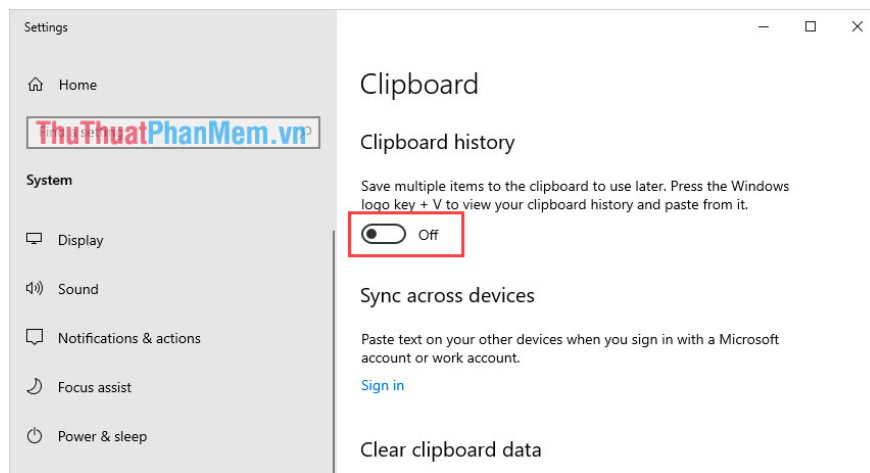

When you click on the extension, we will have the following content:

1. **Delete:** Delete the data of the currently selected content
2. **Pin:** Pin the currently selected content (they are always at the top of the list)
3. **Clear All:** Clear all data on the Clipboard

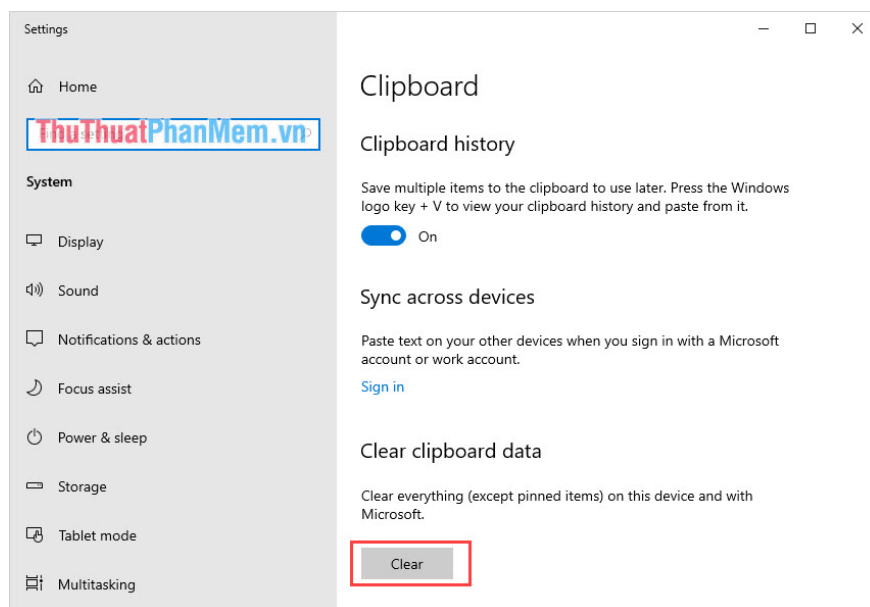

4. How to turn off Clipboard History and delete its content

To turn off Clipboard History, you just need to repeat the **operations of part 1** and turn into **Off** is finished.

To clear all data on Clipboard History, select **Clear** within Clipboard settings at Settings .
