

How to turn on Color Filters on Mac to improve the reading experience

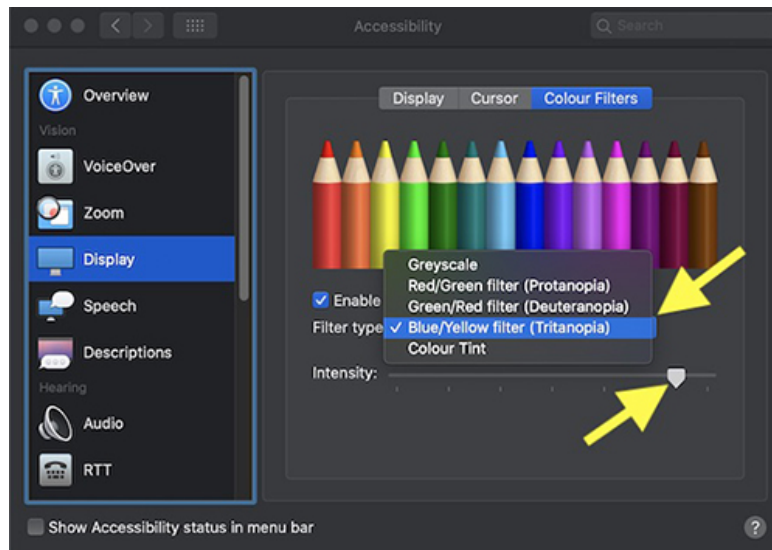

In addition to my favorite dark background mode, many people rely on color filters to read text on Mac more easily. Let TipsMake.com show you how to turn on Color Filters on Mac to improve the reading experience!

In addition to the favorite dark mode, many people rely on color filters to read text on Mac more easily. These filters work effectively in changing the appearance of images and the user interface. Ready to try this great feature? Let **TipsMake.com** show you how to turn on Color Filters on Mac to improve the reading experience!

Customize Color Filters on Mac

As part of **Accessibility**, color filters can be turned on / off via the handy **Accessibility** shortcut, without going into **System Preferences**.

1. Click the **Apple** menu in the top left corner of the screen.
2. Now, select **System Preferences** in the menu.
3. Next, select the **Accessibility** panel .
4. Next, select the **Display** option in the sidebar.
5. Next, click on the **Color Filters** tab .
6. Now, check the box of '**Enable Color Filters**' .
7. Click the **Filter type** pop-up menu and select your preferred filter. You have 5 options to choose from: **Greyscale, red / green filter (protanopia), green / red filter (deuteranopia), Blue / yellow filter (tritanopia)** and **color tint** . Choose the one that suits your preferences.

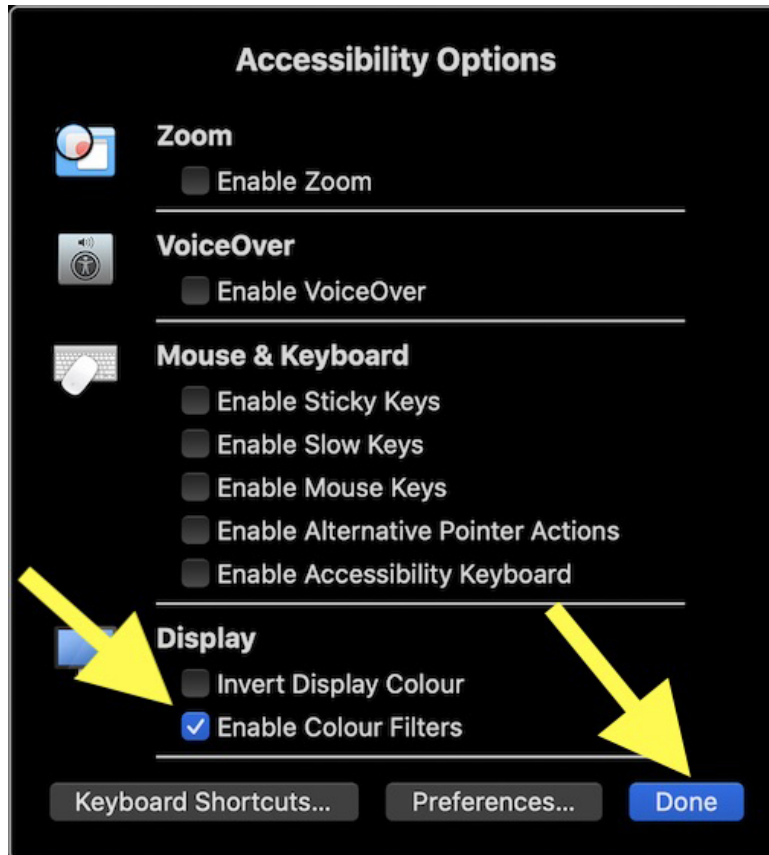

Choose the appropriate option

Now, the color tone will apply to the full screen, making it easier for you to view the content. Since most filters allow you to adjust the intensity, you can also drag the slider to the left or right to fine-tune it easily.

Quickly enable / disable Color Filters on macOS with Accessibility shortcut

Using quick shortcuts, you can easily turn on / off color filter on Mac. Just press the `Option + Command + F5` keys at the same time to access the **Accessibility** options shortcut table . If your Mac has Touch ID, press the Touch ID button 3 times to display the shortcut panel and then select / uncheck the box of '**Enable Color Filters**' as needed.

Quickly enable / disable Color Filters on macOS with Accessibility shortcut
