

How to turn on noise cancellation of AirPods Pro headphones

The noise canceling feature of the AirPods Pro headphones helps you to have very high quality chats, if you do not know how to turn it on then follow the following article.

AirPods Pro headphones are becoming an indispensable technology accessory for music lovers. The noise canceling feature of the AirPods Pro headphones helps you to have very high quality chats, if you do not know how to turn it on then follow the following article.

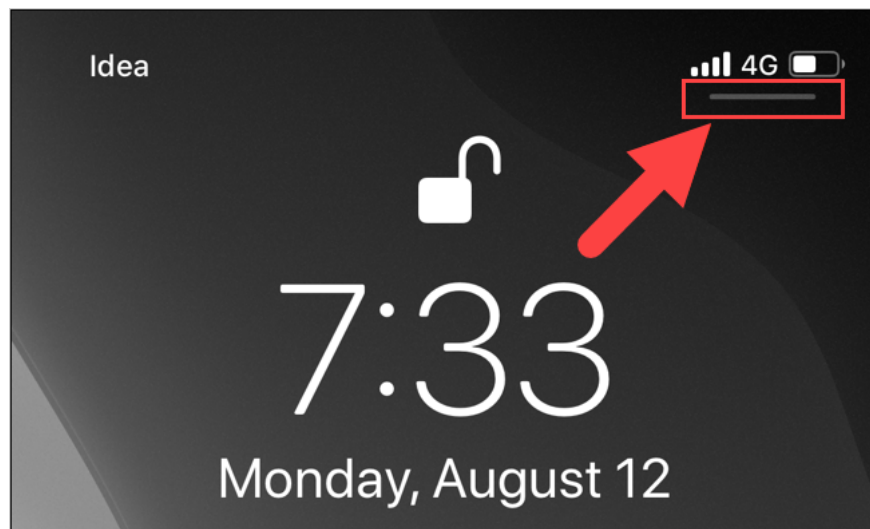

The noise cancellation feature on the AirPods Pro headphones is greatly appreciated thanks to specialized algorithms and useful designs. However, the default noise canceling feature will be off and forced to activate it manually on the phone or via the touchpad.

1. How to turn on AirPods Pro headphones noise cancellation on iPhone, iPad .

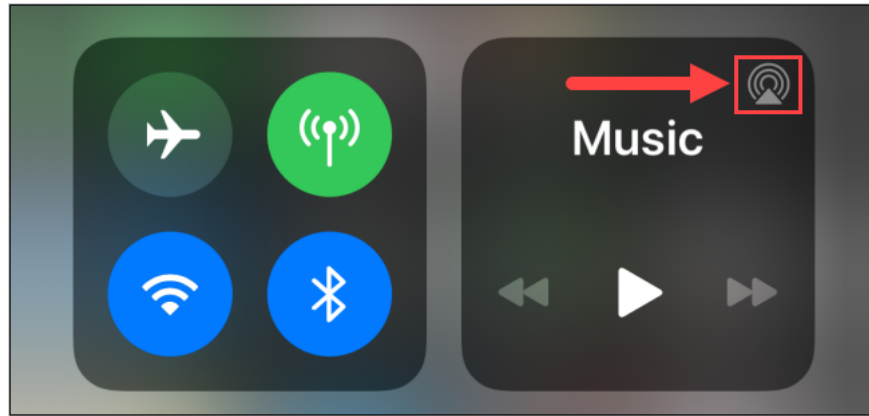

For Apple mobile devices, you will be able to enable noise cancellation through a simple setup.

Step 1: You pair your AirPods Pro with your iPhone and iPad devices.

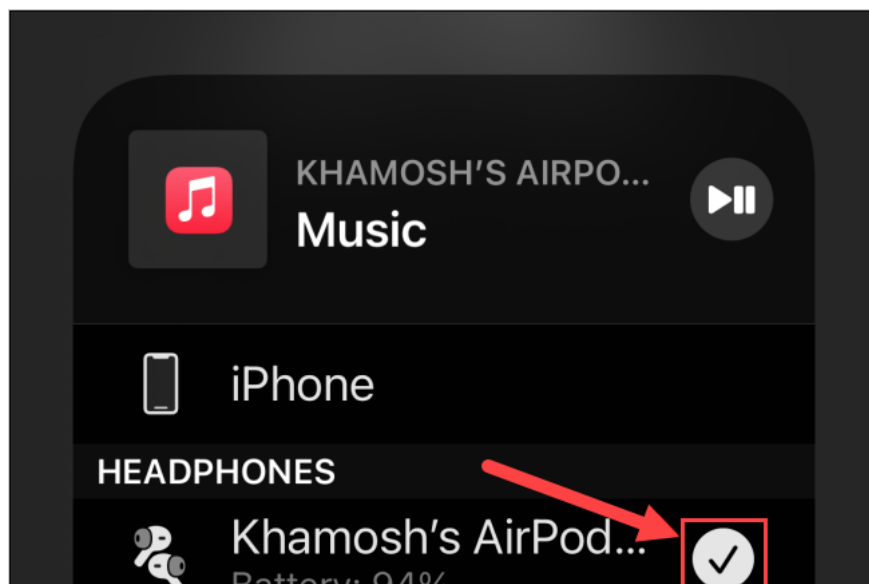

Step 2: After successful pairing, at the lock screen you will see an Expand icon below the column and Pin. You proceed to drag the Expand icon down to see the content inside.

Step 3: Next, you select the AirPlay icon to open the devices that are being paired.

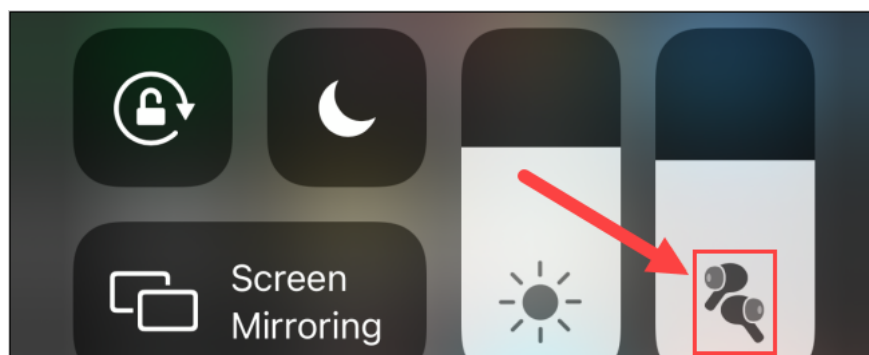

Step 4: When the window of paired devices appears, can you check to see if the AirPods Pro has been successfully paired?

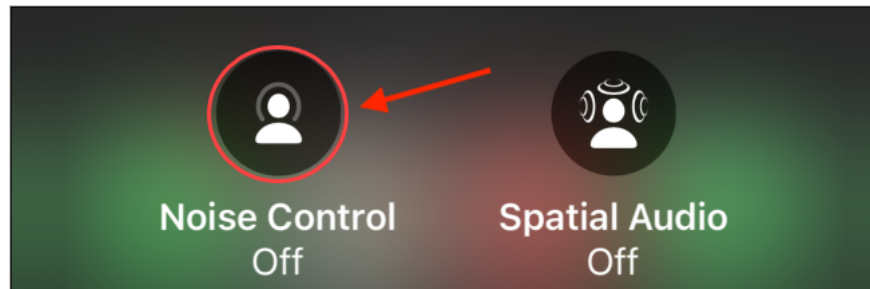

Step 5: When the device is successfully paired, open the Control Center by swiping up from the bottom.

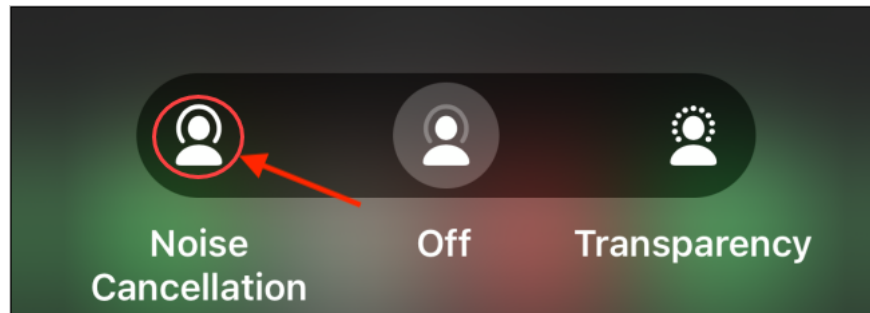

Now, press and hold on the AirPods Pro icon.

Step 6: The features of the AirPods Pro will appear, you just need to select the Noise Control item to turn them on.

Step 7: Finally, you choose the noise cancellation mode and we prioritize using Noise Cancellation.

2. How to enable direct noise cancellation on the AirPods Pro headphones

On the AirPods Pro headphones, we have touch keys to change modes quickly, and here's how to enable noise cancellation directly on the headset.

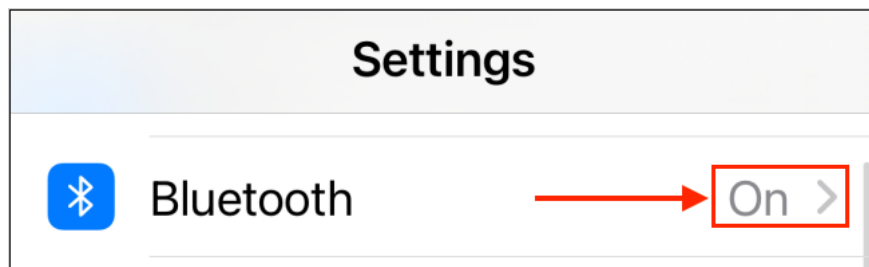

Step 1: You pair your AirPods Pro with your iPhone and iPad devices.

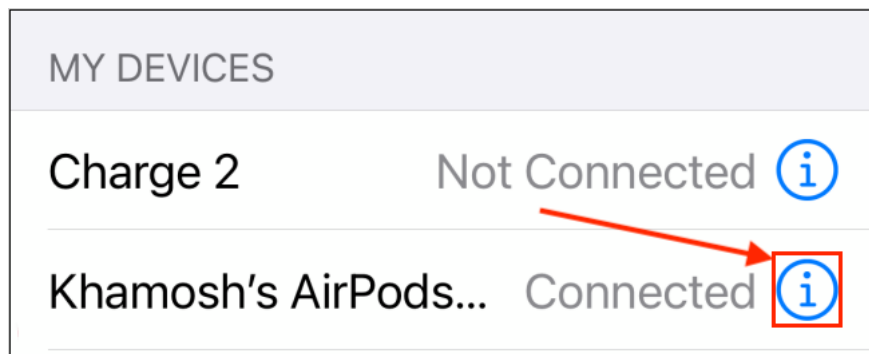

Step 2: Then, open Settings on your iPhone, iPad.

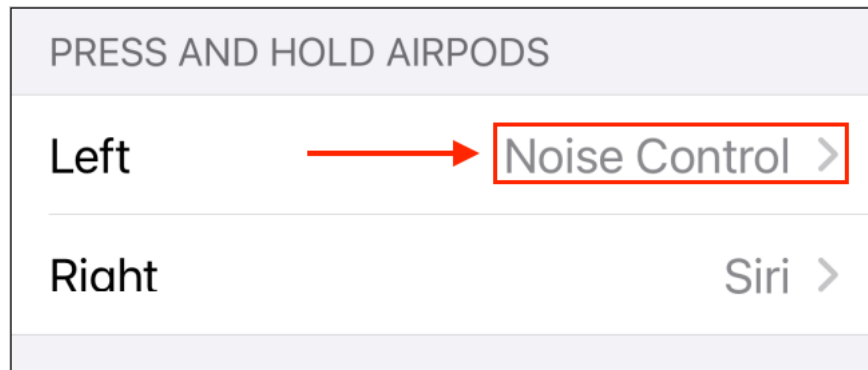

Step 3: Next, you select Bluetooth to open the list of paired devices.

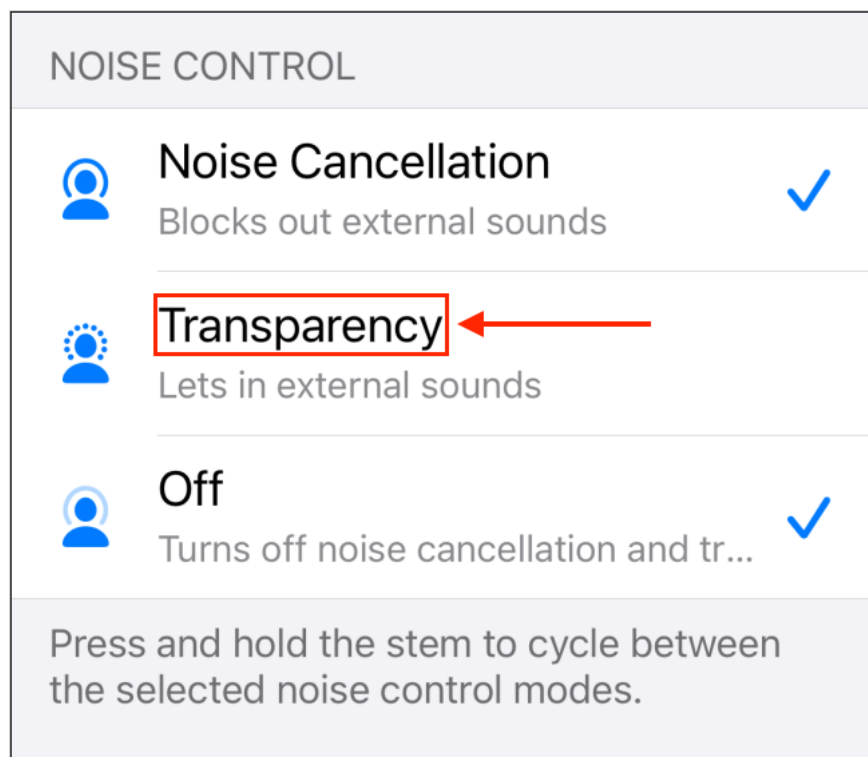

Step 4: To open the settings of the AirPods Pro headset, click the i icon.

Step 5: In the setting up features for touch keys (Press and hold Airpods), you proceed to select a headset with Noise Control to set up.

Step 6: In the Noise Control section, just uncheck the Transparency item to complete. This means that when you press the touch button on the headset, the system will only switch back and forth to hold two modes: Off and Noise Cancellation (noise cancellation).

Thus, to turn on and off the noise canceling feature, you just need to press the touch button on the AirPods Pro.

In this article, TipsMake instructed you how to turn on the noise canceling feature on AirPods Pro headphones quickly. Have a nice day!
