How to turn on the window to select the location for saving files when downloading on Chrome, Coc Coc, Firefox browsers. When we at a file with a browser will usually have a window pops up for us to choose where to save the file. However, it is possible that for some reason c

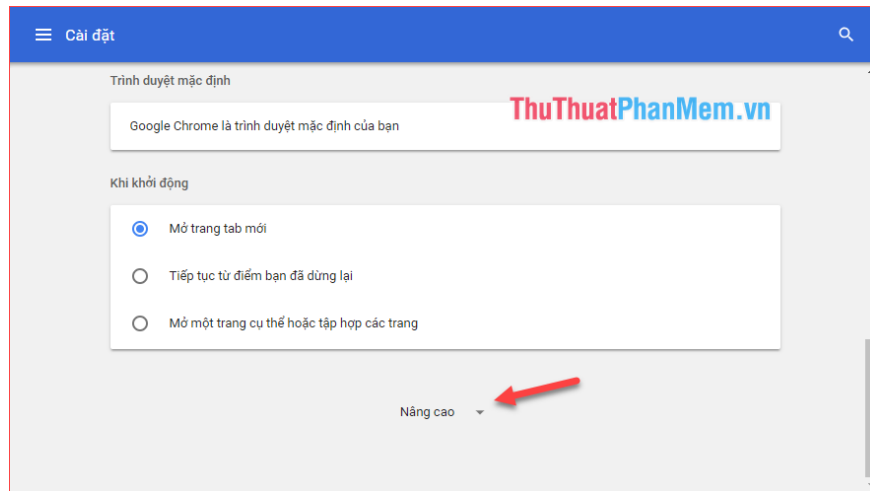

When we at a file with a browser will usually have a window pops up for us to choose where to save the file. However, maybe for some reason this window does not appear or you do not want this window to appear because of trouble, how are we going to solve it? The following article of TipsMake.com will guide you how to turn on and off the file saving window on Chrome, Coc Coc, FireFox browsers. Please follow along.

## For Chrome browser

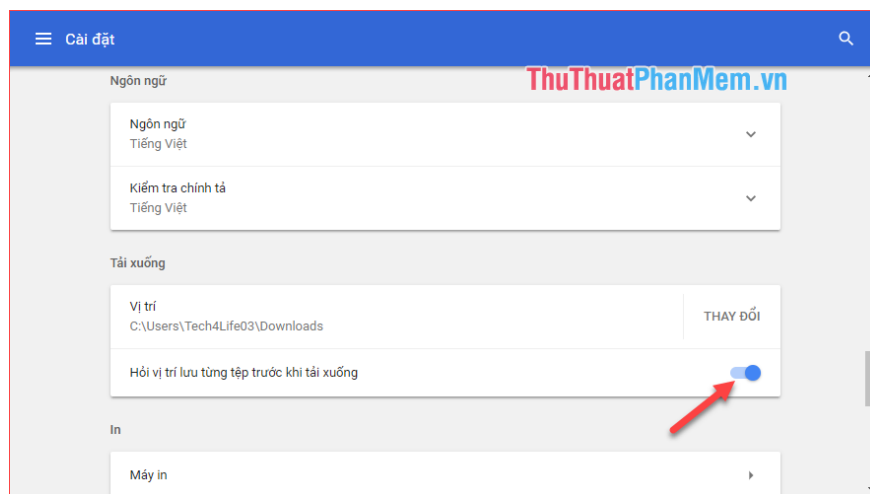

**Step 1 :** On Chrome, go to Settings.

**Step 2 :** Next, in the settings window, scroll down to the bottom and select **Advanced**

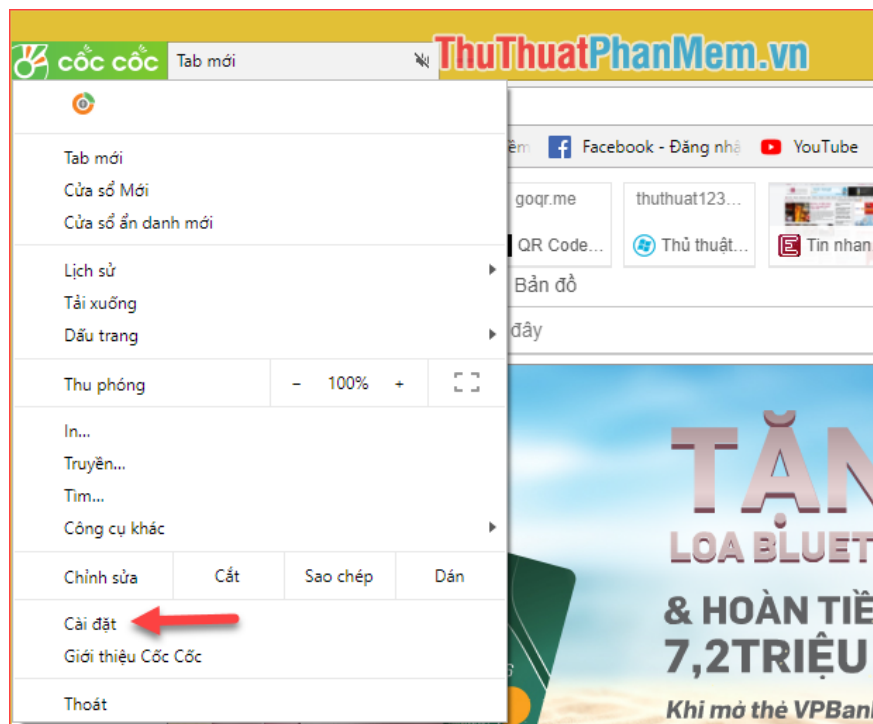

**Step 3** : You continue to pull down **Download** and then turn on **Ask location where to save each file before downloading** . Thus each file download will have a window to choose where to save the file appears for you to choose.

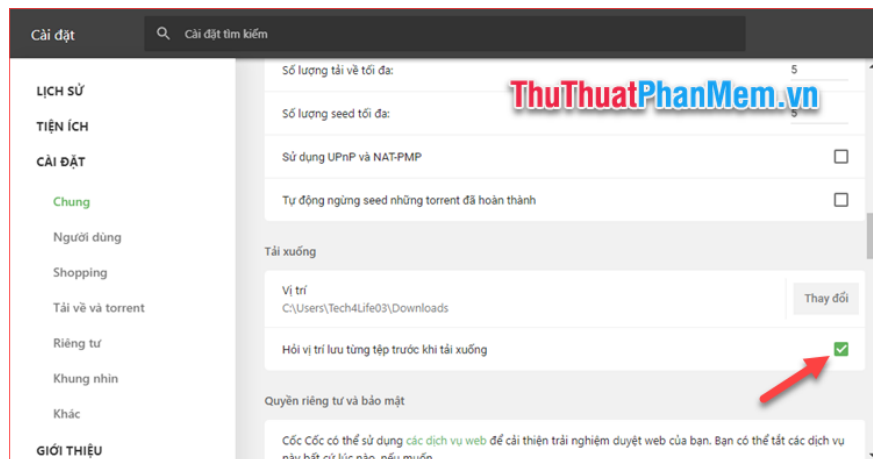

## For C?c C?c browser

**Step 1** : Go to **Settings**.

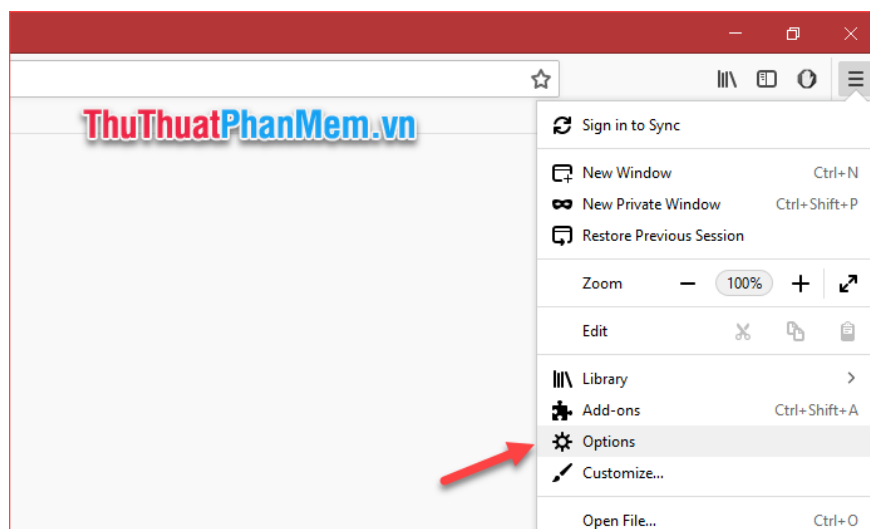

**Step 2 :** In the settings window, scroll down to the **Download** section, and then select the **Ask where to save each file before downloading** to enable the window to select a location for each file we download.

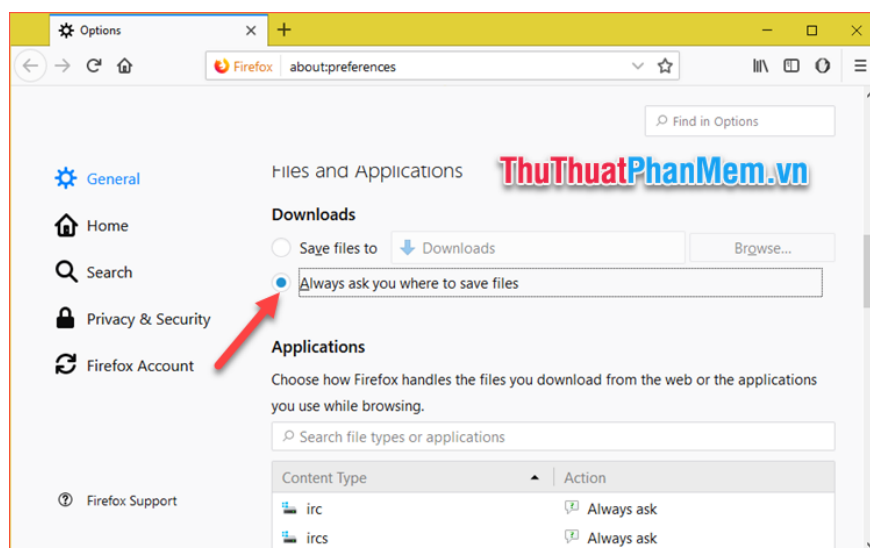

## For Firefox browser

**Step 1:** You select the Options

**Step 2 :** In the Options window, scroll down to the **Downloads** section and select the **Always ask you where to save files** to enable the window to select where to save the file each time we download any file.

Above is an instruction on how to turn on the window to select a location for saving files when downloading on Chrome, Coc Coc, FireFox browsers. Hope the article will be helpful to you. Good luck!
