

How to turn on/off the automatic screenshot saving feature in Snipping Tool on Windows 11

This guide will show you how to enable or disable automatic screenshot saving for the Snipping Tool app on Windows 11.

This guide will show you how to enable or disable automatic screenshot saving for the Snipping Tool app on Windows 11.

The Snipping Tool app includes a built-in screen recorder and lets you quickly capture and annotate screenshots, photos, and other images with a pen, touch, or mouse, then save, paste, or share with others. other applications.

Starting with Snipping Tool app version 11.2209.2.0, Snipping Tool will now automatically save your screenshots by default to Screenshots in the Pictures folder (e.g. "%UserProfile%PicturesScreenshots") for the account your.

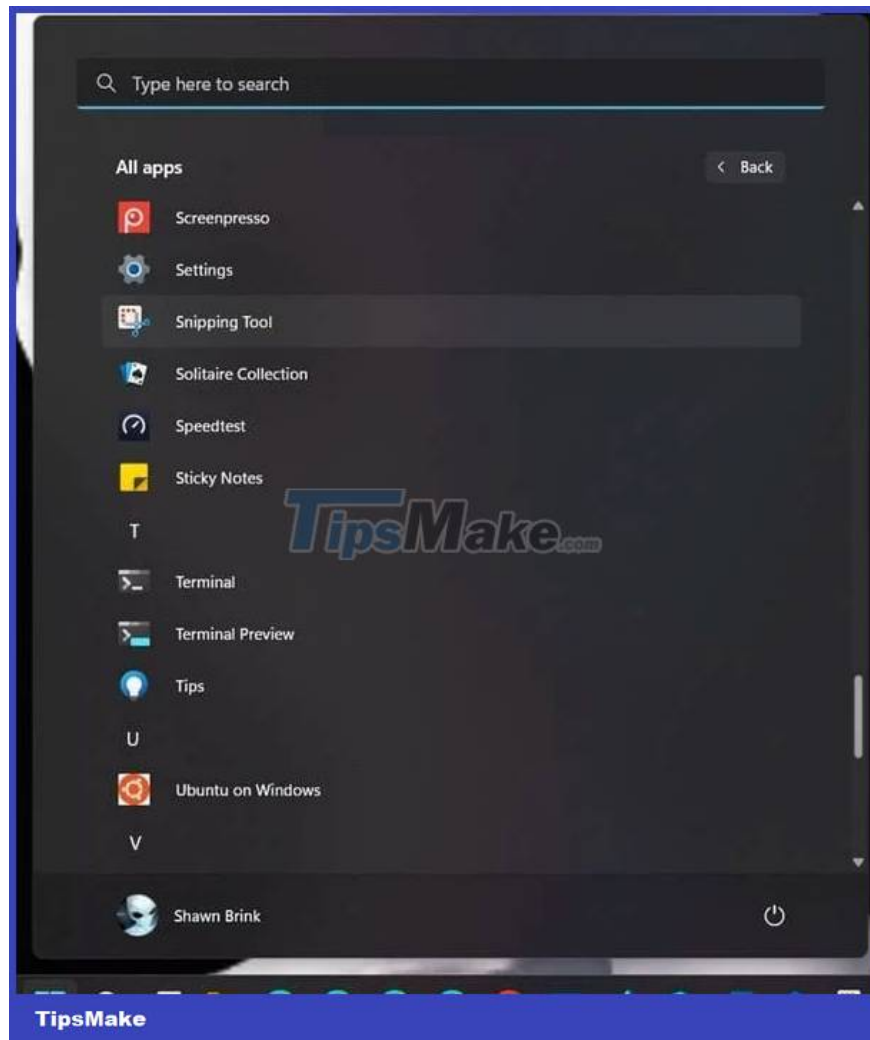

Note: Screenshots captured by the Snipping Tool are temporarily cached in the %LocalAppData%PackagesMicrosoft.ScreenSketch_8wekyb3d8bbwTempState folder for the current user.

You can restore missing screenshots from this folder location if they have not been automatically deleted.

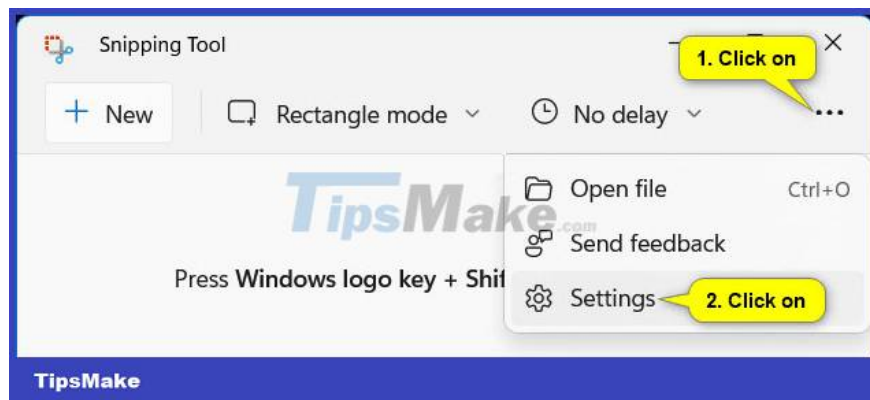

How to turn on/off the automatic screenshot saving feature in Snipping Tool on Windows 11

Here's how:

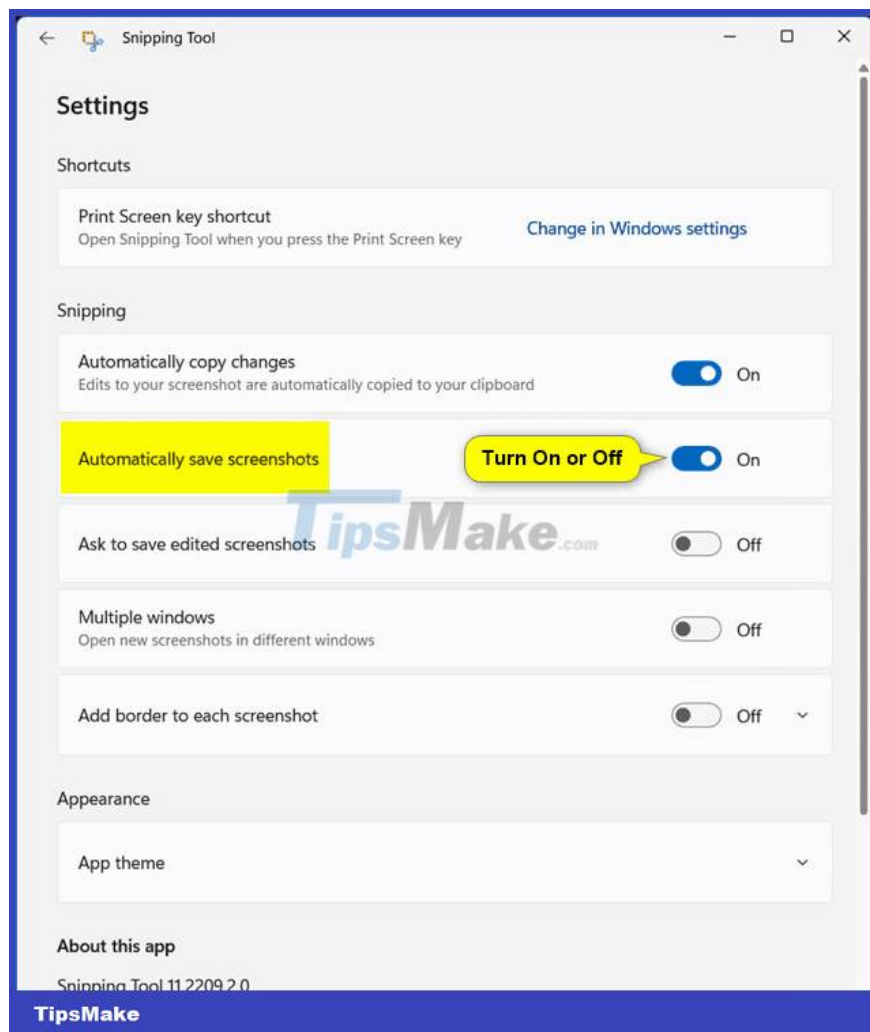

1. Open the Snipping Tool application.

2. Click the See more button (3 dots) and click Settings.
