## Instructions to turn photos into paintings on WutaCam

Basically, the steps of creating a picture with WutaCam on Android phones and iPhones are quite similar, so in this tutorial we will use Android device to create pictures on the phone with you.

### Step 1:

First, you need to download and update the latest version of WutaCam application to your device here.

1. Download WutaCam for Android
2. Download WutaCam for iOS

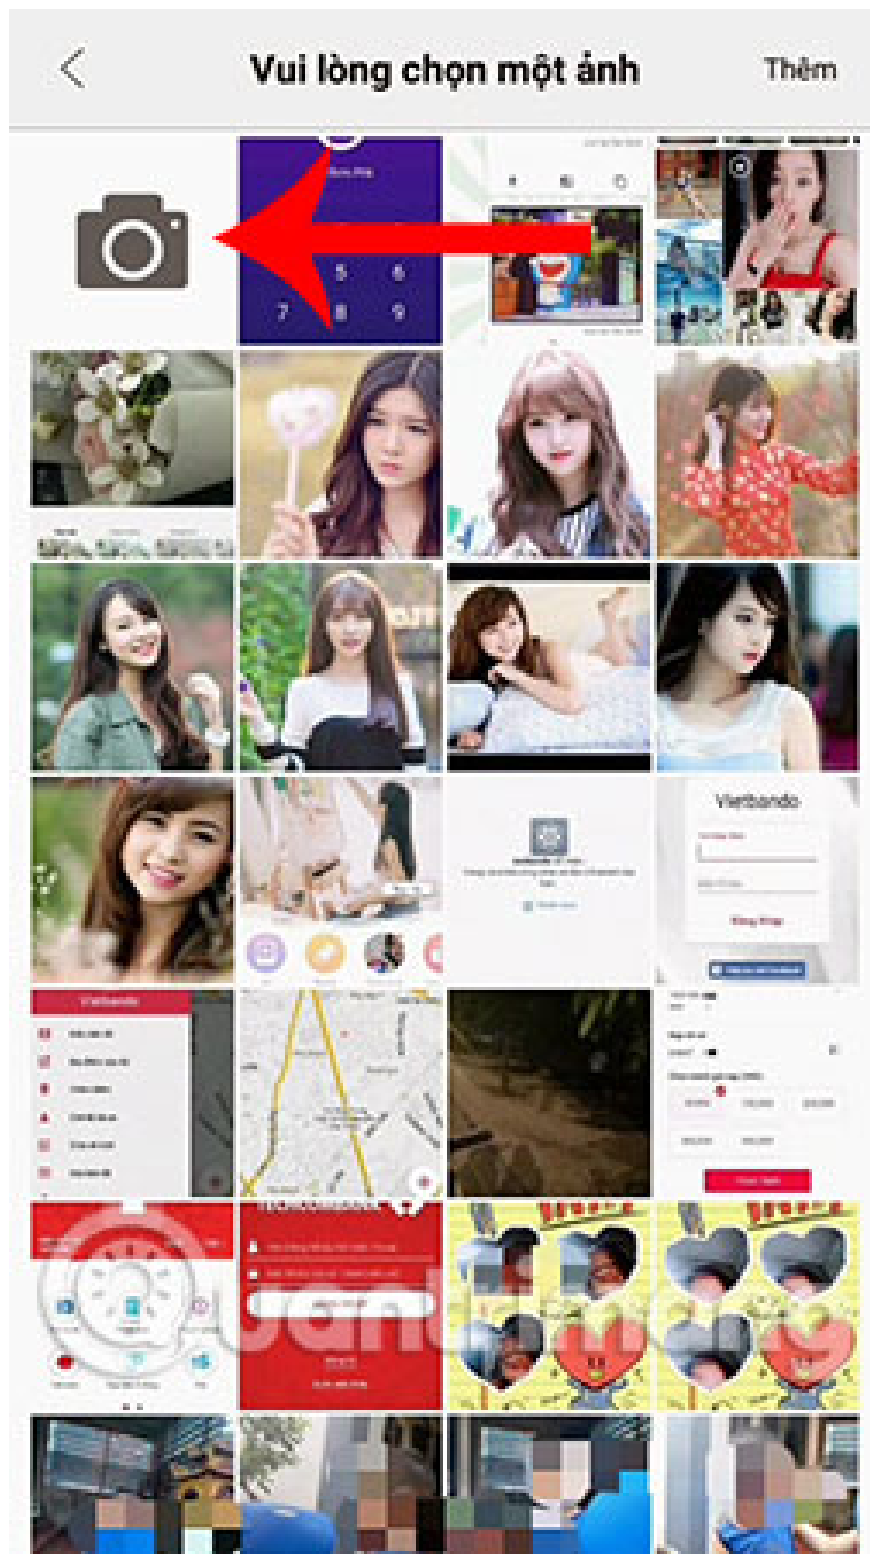

### Step 2:

Start the application, you click on the **Sketch** icon in the interface using WutaCam like the image below. Soon, the program will access the phone memory and display all the pictures in the photo gallery for you to choose. You can also select **the camera icon** to capture a new image and then process it with the newly captured image.

-  Gif
-  Sketch
-  Commend
-  Live T

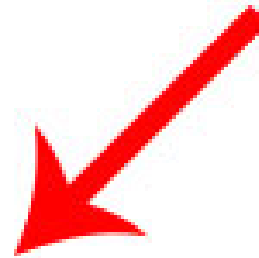

### Step 3:

When selecting (or capturing) an image, the system will automatically proceed to turn the image into a painting on WutaCam. If you wait a few seconds, you will get the result of the picture like the picture with 2 styles of painting is color or black and white.
