3. The most notable new feature of Android 8.0 Oreo

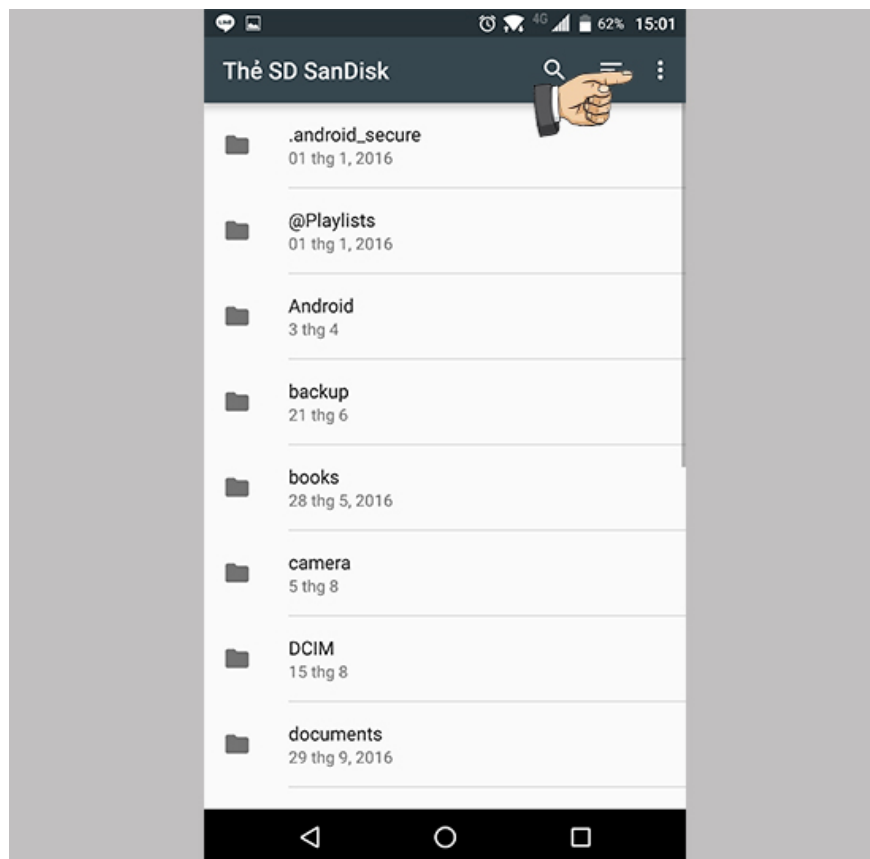

## Steps to transfer memory card as internal memory on Android 6.0

**Note:** Only phones that run Android 6.0 stock versions (originals, unmodified) or Android versions that are not restricted to this feature will be able to do so. Most Samsung phones have this feature limited.

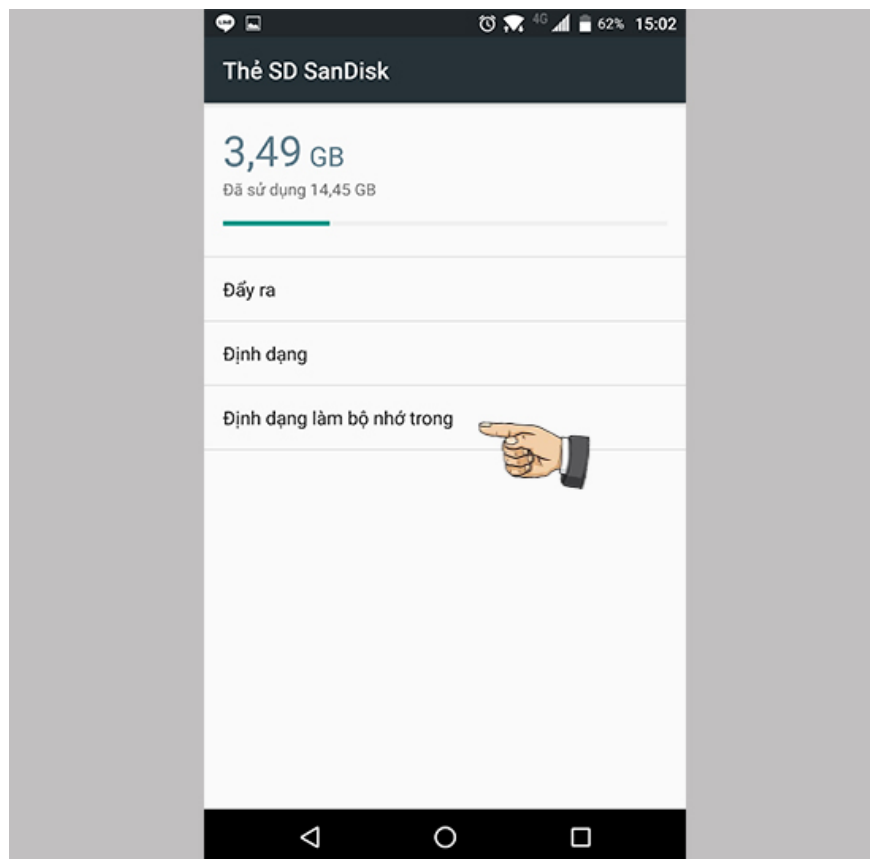

**Step 1:** Go to settings> select memory and usb.

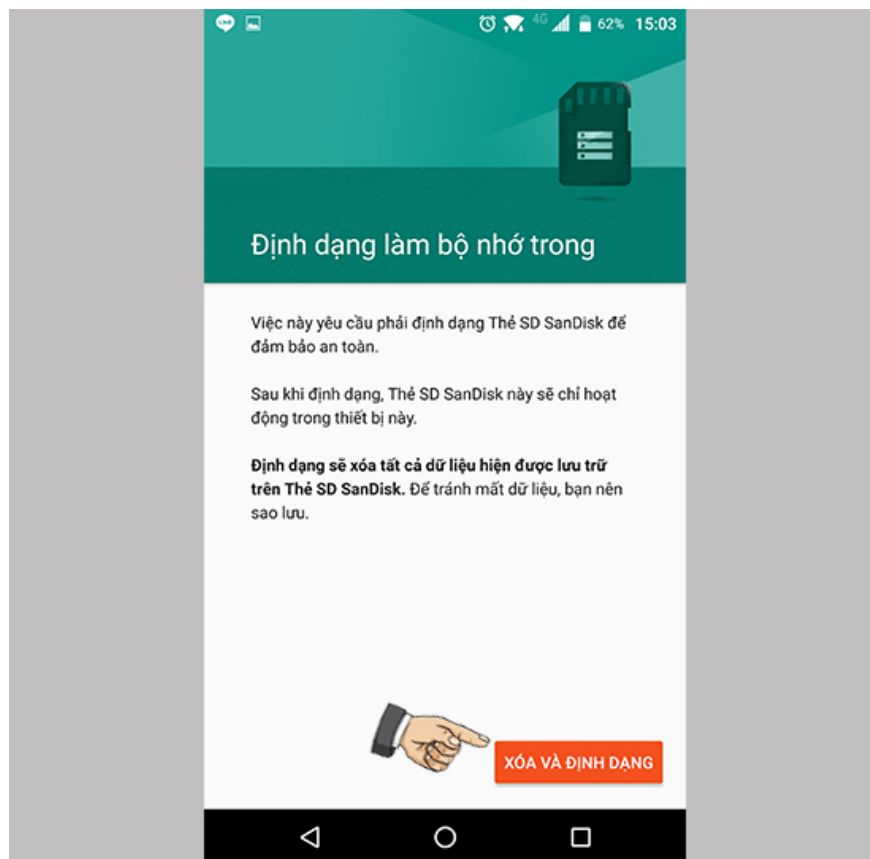

**Step 2:** Select SD memory card> click on 3 dots icon> select installation.

**Step 3:** Click to select the format as internal memory.

**Step 4:** Select delete and format is done.

**Note:** When formatting the memory card as internal memory, all data will be lost, so you should back up the data before proceeding so as not to lose important data.

So, with four steps, TipsMake.com has instructed you to be able to turn the memory card into internal memory on Android 6.0 simply and easily, right? Refer, make and share this little trick for your friends to know.

Good luck!
