Name

Password

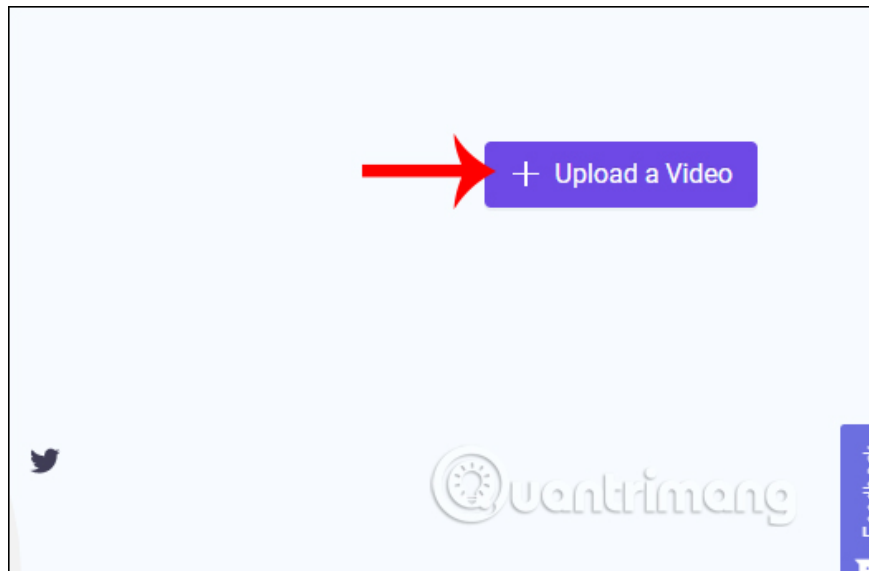

- ⊗ One uppercase alphabet
- ⊗ One lowercase alphabet
- ⊗ One number
- ⊗ One special symbol
- ⊗ A minimum of 8 characters

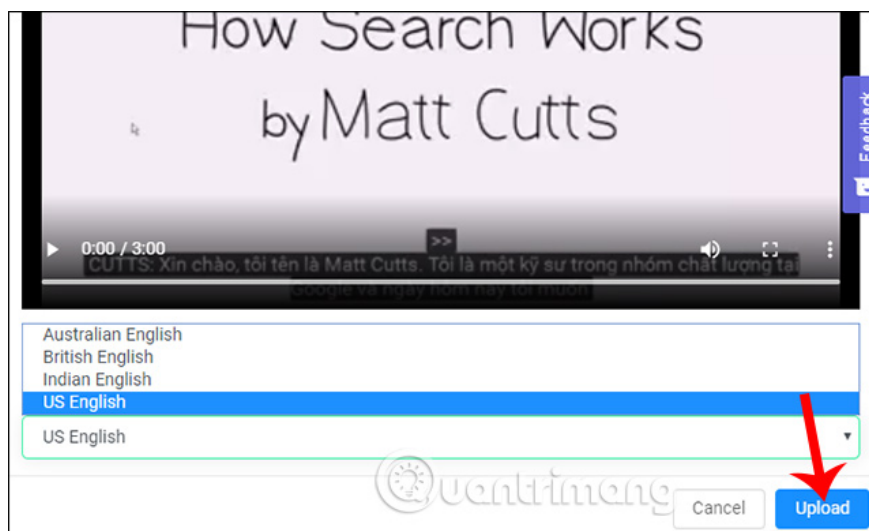

By clicking "Continue" I agree to Subly's [Terms of Service](#) and

Step 2:

Switch to the new interface, **click Upload a video in** the upper right corner to upload a video.

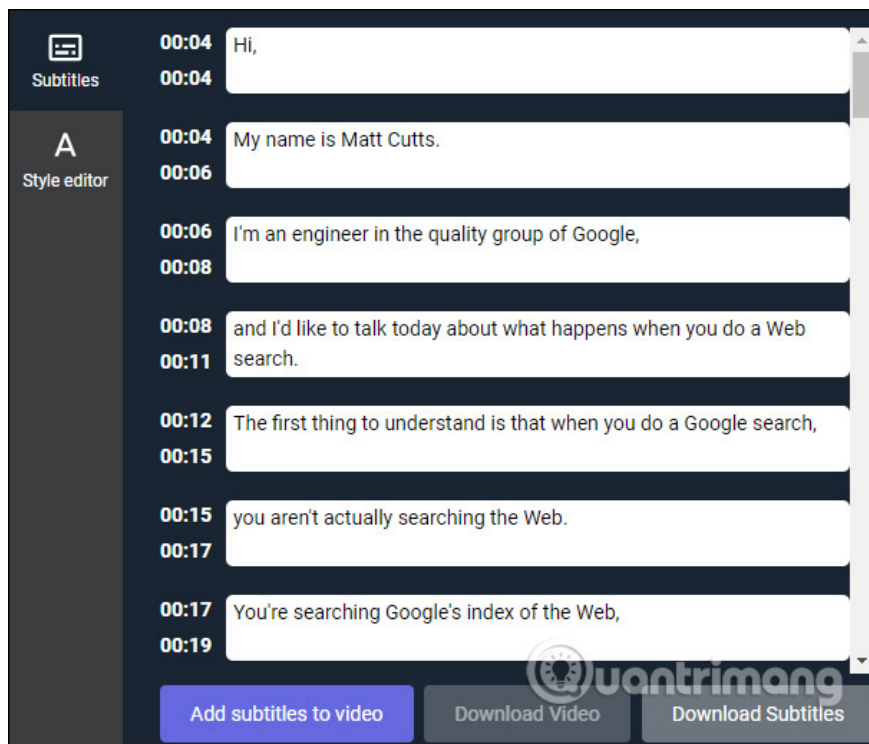

Now we will **select the English language for the video** and then **click Upload** to Subly proceed to host. Note that Subly is currently only available for English subtitles.

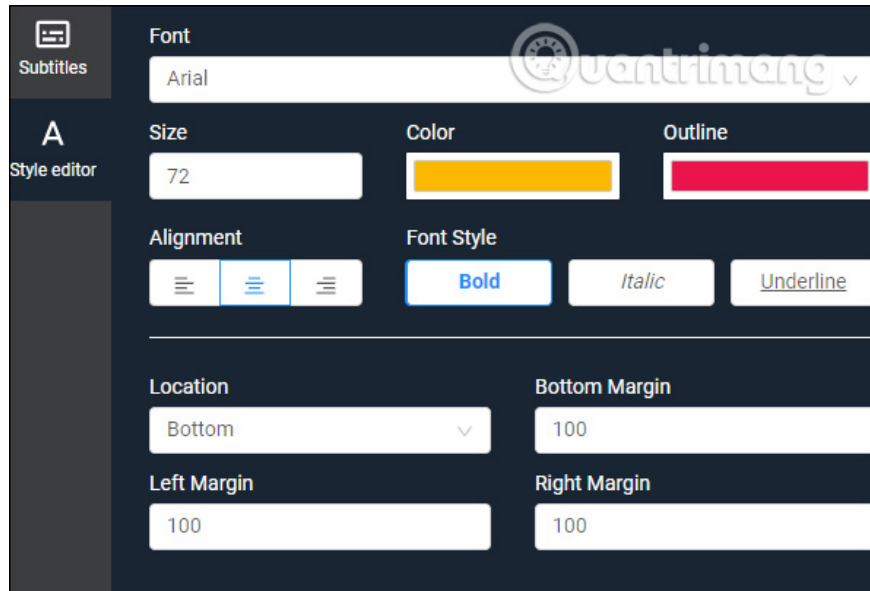

Step 3:

When the video is uploaded successfully, **click Ready** to view the subtitles. Switch to the new interface we will see the entire subtitle is exported from the voice in the video.

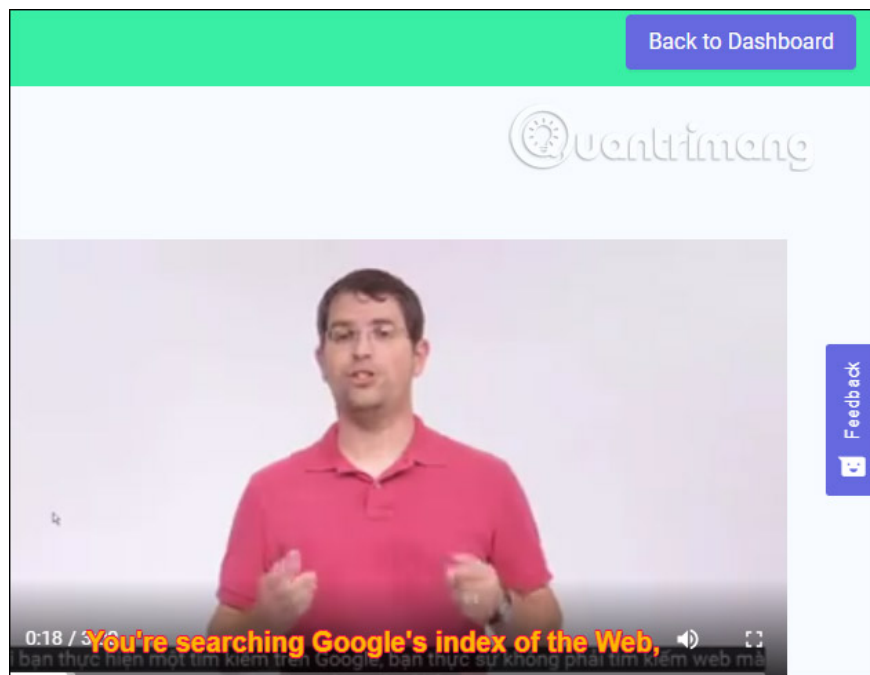

Here users will see each segment equivalent to the voice in the video. If you want to edit the subtitles, then you enter the content in each subtitle frame and then **click Add subtitles to video** to add subtitles for the video.

Style editor to edit the display style of subtitles for the video.

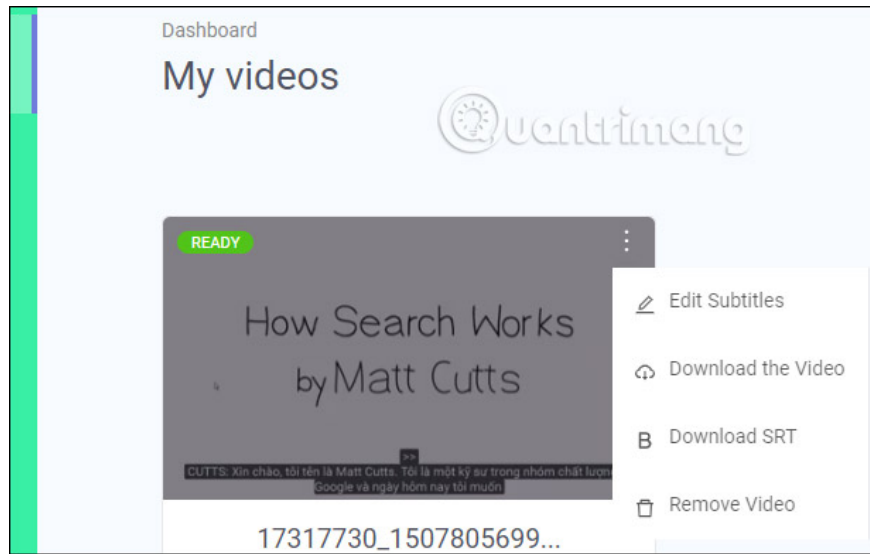

Any changes to the subtitles are applied and displayed right in the video. When you're done creating video subtitles, click **Back to dashboard** to return to the homepage.

Step 4:

Click on **the 3 dot icon in the video** and then display some options including:

1. Download the videos: Download videos with subtitles.
2. Download SRT: Download this video subtitle under SRT file.
3. Edit subtitles: Edit subtitles.
4. Remove video: Delete the video.
