

How to type Vietnamese on Mac computer?

For computer users, typing Vietnamese has become so simple and necessary in work, entertainment, life ... everyday. On Windows, we have Unikey, GoTiengViet, LaBan Key on Android, so what about Mac OS X?

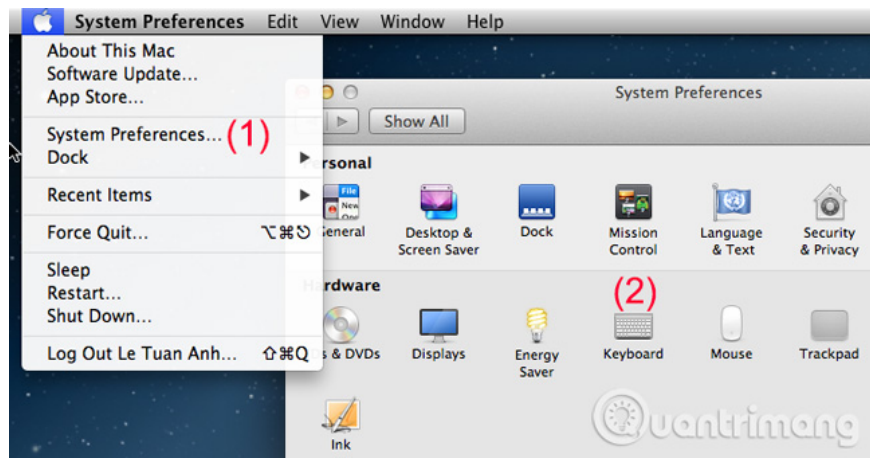

For computer users, typing Vietnamese has become so simple and necessary in work, entertainment, life . everyday. On Windows, we have Unikey, GoTiengViet, LaBan Key on Android, so what about Mac OS X?

1. Download Unikey for free.
2. Download LaBan Key for Android.

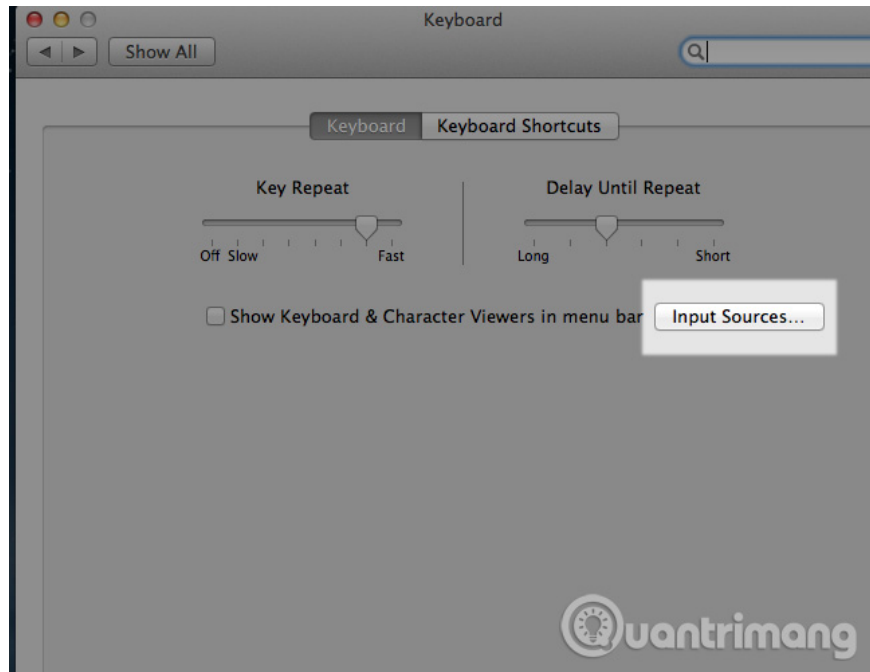

In the article below, we will introduce you some operations to type Vietnamese on Mac computer!

Method 1: use the default input method:

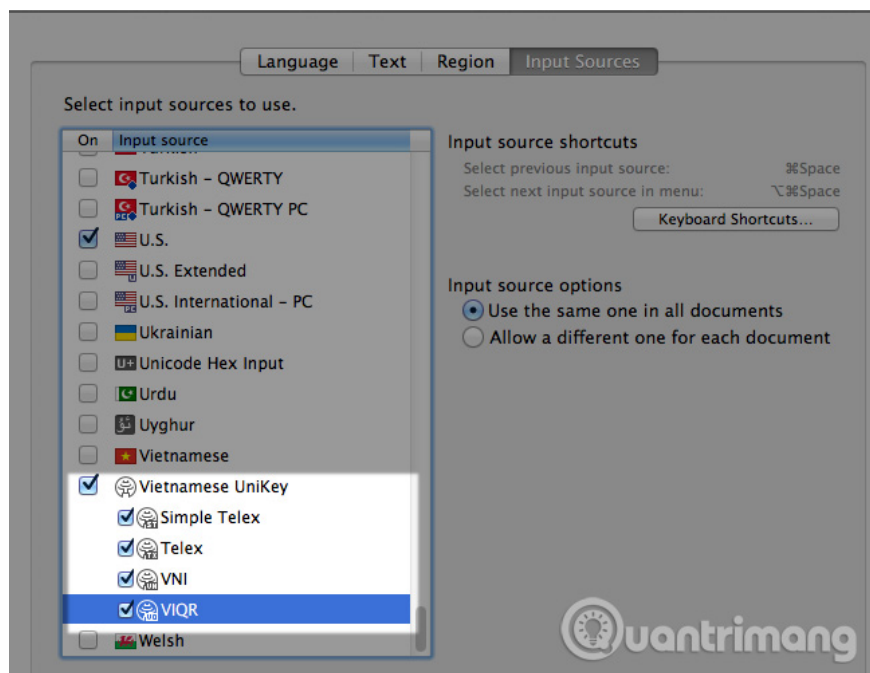

First, click on **the Apple icon**> select **System Preferences**> **Keyboard**:

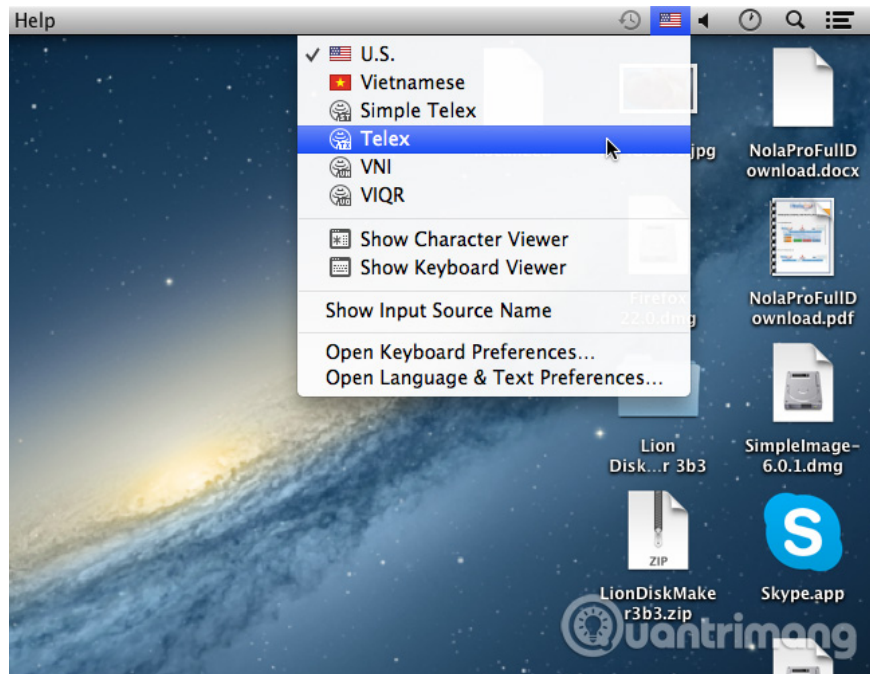

At the next screen, click **Input Sources** :

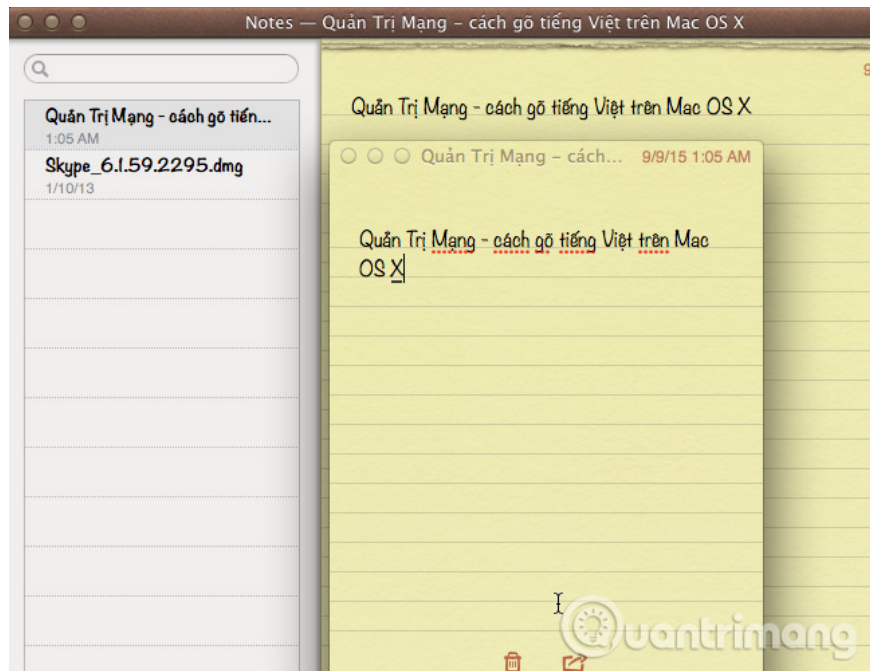

In the **Input Sources** screen, we will see a lot of Mac OS X built-in percussion, scroll down the list and select the corresponding typing modes in the **Vietnamese Unikey** section.

Immediately above the top right corner of the screen will appear a new set of typing mode table, you can switch to Vietnamese Telex or VNI input method:

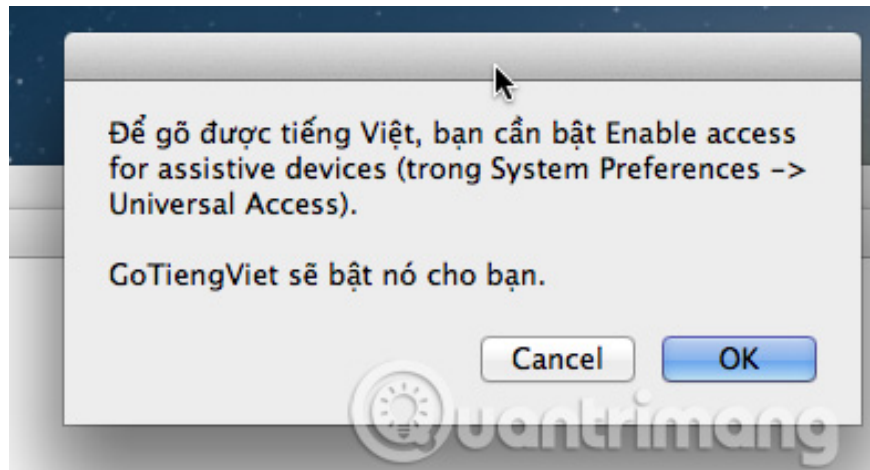

Please try:

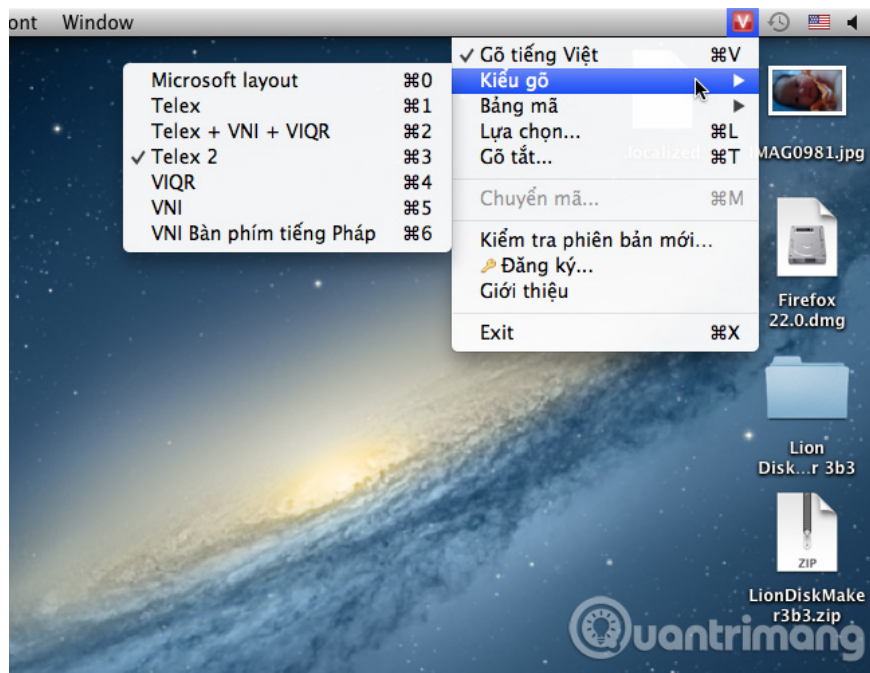

Method 2: use GoTiengViet:

1. Link to download GoTiengViet on Mac OS X.

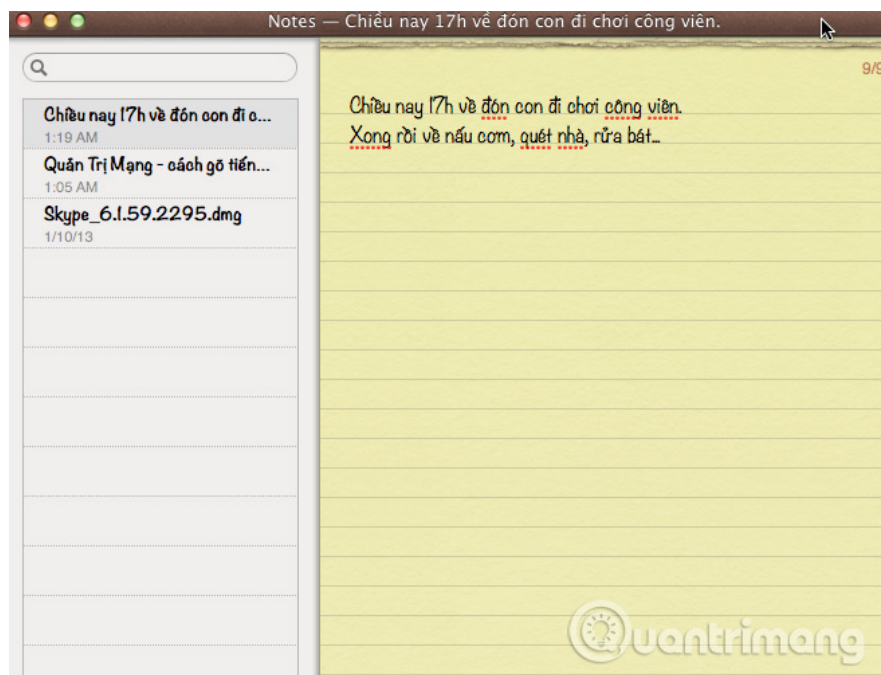

After downloading and installing successfully, the application will display the message as shown below, asking users to turn on **Enable access** . feature, click OK to be:

Similar to the way 1 above, **GoTiangViet** is also displayed in the upper right corner of the screen, with the interface quite similar to **Unikey** on **Windows** :

Why try typing Vietnamese:

Both ways work effectively and stably. Hopefully the above article can help you better understand the Mac operating system, Vietnamese keyboard. *Good luck!*
