Whether it is Windows or MacOS operating system, manufacturers are constantly developing and releasing updates with new versions with many convenient features for users. Recently, the icon group is a new feature introduced on Windows 10 and it is also present on Windows 11. For this feature, many users find it quite convenient but on the contrary, there are still some you don't like the icon group. Therefore, **how to ungroup applications on the Windows 10 + Windows 11 Taskbar** is of top concern. So, **TipsMake** will quickly guide you through this specific trick below.

## Share a super simple way to ungroup applications on the Windows 10 + Windows 11 Taskbar

*Before instructing you to ungroup Windows 10/Win 11 icons, the admin will talk a little about the icon grouping feature on Windows. Specifically, when this feature is enabled, all instances of the application, no matter how many windows you have open, will be grouped together with an icon on the Taskbar. So when you move to that icon, you'll see the instances you have open. Just click on the version you need.*

*Although this feature helps the taskbar become neater. But there are many users who still like the taskbar without icon groups so they can access the program they want quickly and easily without having to look far. Therefore, how to separate icon groups on the Windows 10 + Windows 11 Taskbar is a trick that many people are looking for. Don't worry, detailed instructions on how to ungroup are given below.*

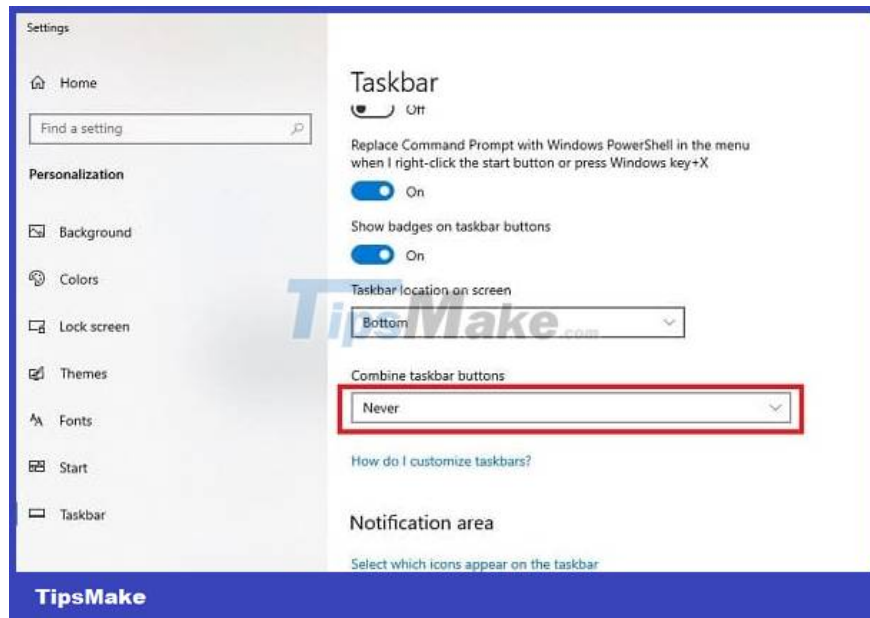

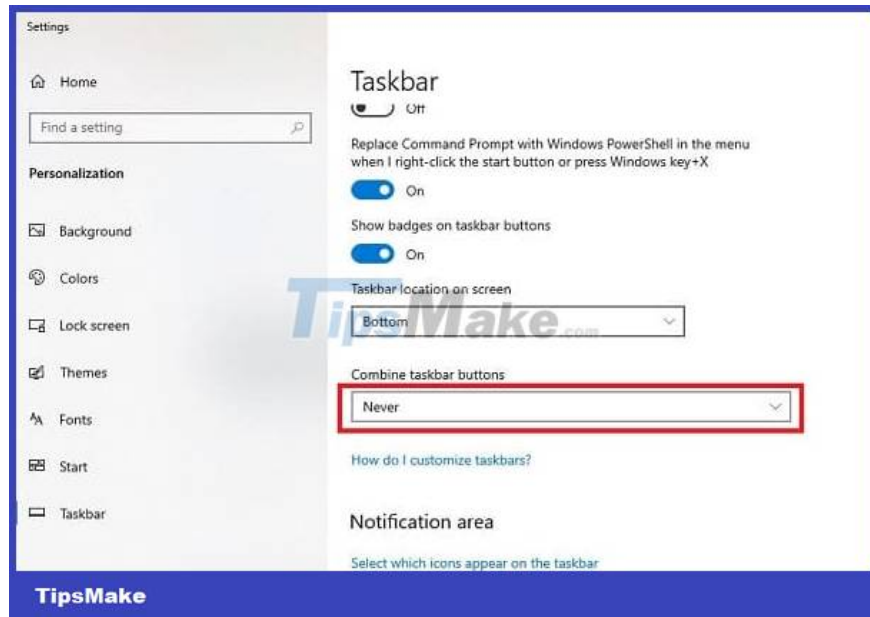

### Share how to ungroup applications on the Windows 10 Taskbar

For Windows 10, canceling an icon group is extremely simple.

1. **Step 1** : At the taskbar, right-click any empty space > Select **Taskbar Settings** .

1. **Step 2** : Find the **Combine taskbar buttons** section > Click on the arrow of this section and select **Never** to finish.

## Share how to ungroup applications on the Windows 11 Taskbar

If you want to ungroup Windows 11 icons, it's not as simple as Windows 10. Because icon grouping is the default setting of the Win 11 taskbar. Therefore, there will be no option to ungroup as instructed in Win 10 on Windows. 11. However, you can separate icon groups in the taskbar with supporting software. As follows:

### StartAllBack

**StartAllBack** is software that will help you ungroup taskbar icons on Windows 11. This is software used by many Windows 11 users. Because the software will help you experience the old Windows 10 interface on the

Win 10 operating system. However, this is an application that is not free and you have to pay a certain fee to install it.

After installing the software, open the StartAllBack application > Click **Taskbar** in the left menu > Find the line **Combine taskbar buttons**, click the drop-down arrow and select **Never** to ungroup the icon group on the taskbar > Start Restart your PC for these changes to take effect.

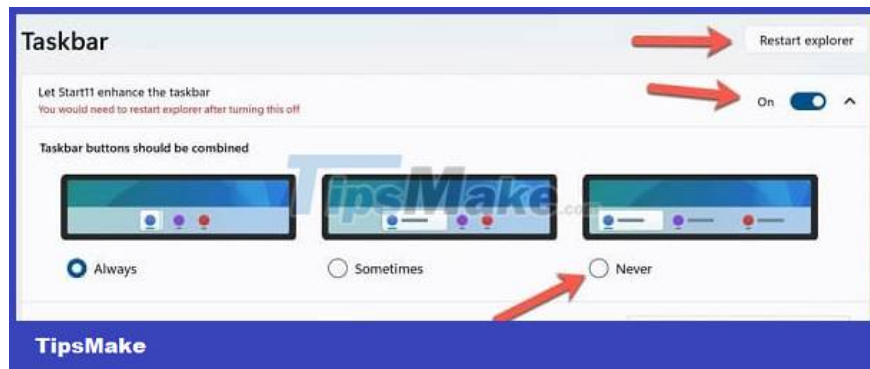

## Start11

**Start11** is also one of the paid applications that many people love and buy it to use and customize Windows 11. This application has up to 30 days of trial for you to experience to see if you buy it or not. Besides the useful features that the software brings, you can remove the taskbar icon group for Windows 11 in one fell swoop.

After installing the Start11 application on your computer, launch this application > Then, click on the **Taskbar** option > Turn **On** in the **Let Start11 enhance the taskbar** section > Tick **Never** > Click to select **Restart**

**Explorer (Restart). Explorer)** . Note, if you don't see the ungrouped icon on the taskbar, you just need to minimize and maximize any window and this change will take effect.

*Above is the way to ungroup applications on the Windows 10 + Windows 11 Taskbar that you are looking for. Hope you do it successfully.*
