

How to Uninstall Bing Translator

Bing Translator is an application used for automatic online translation of text and web pages. It's a free translation service, but if you don't want it around because you don't use it, you can uninstall it from your computer. There are...

Method 1 of 2:

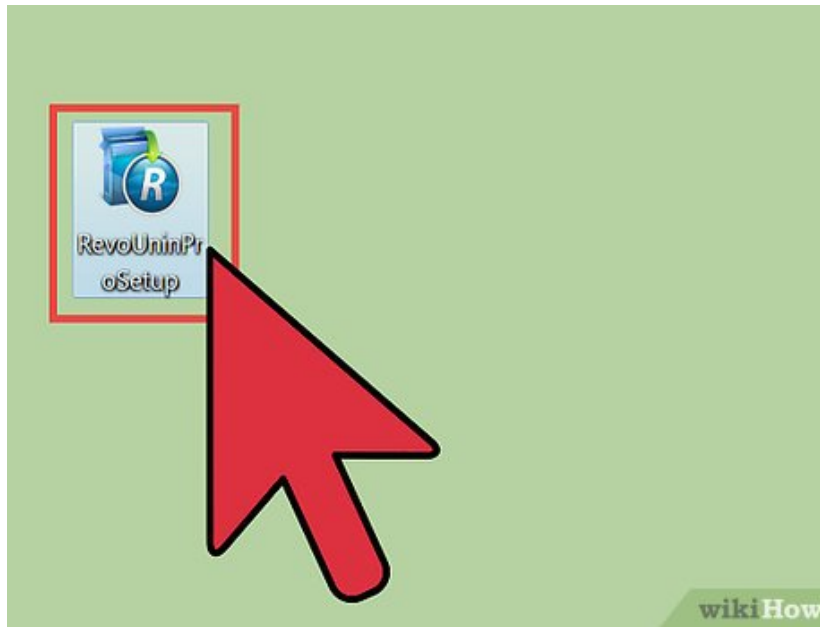

Using Max Uninstaller

1.

Download and install the Max Uninstaller tool. Visit the Max Uninstaller download page, and click the 'Download' button. Click 'Save' on the dialog box that appears to begin the download. After it has finished downloading, run the installer and follow the instructions on the Installation window.

2.

Go to your desktop and launch Max Uninstaller. A small window will appear seeking your permission to allow the program to make changes on your computer.

3.

Click the 'Yes' button on the small window. This will make Max Uninstaller open and expand. All currently installed programs will be listed on the right-hand side of the page.

4.

Select **Bing Translator** from the list. Scroll through the list and locate Bing Navigator. Click on it once you find it.

5.

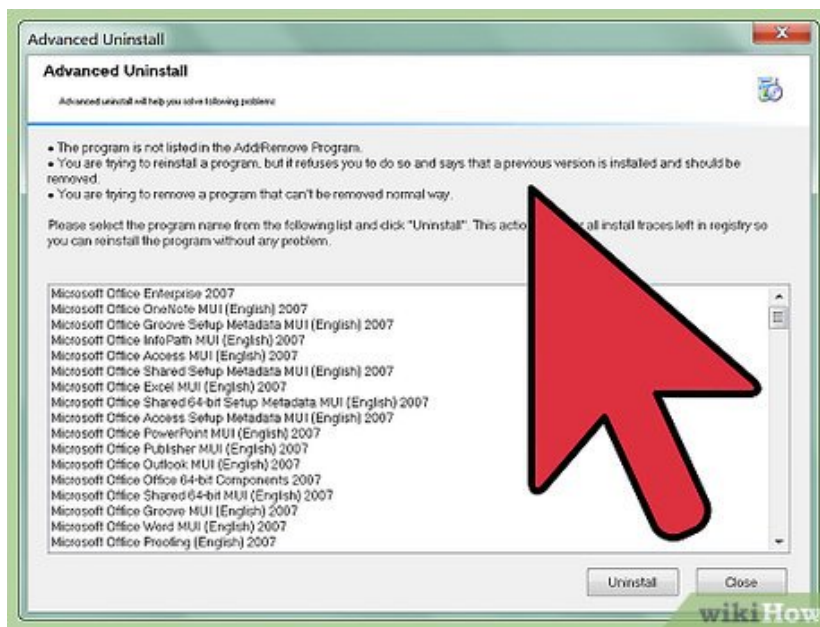

Click **'Run Analysis.'** This button is located at the bottom left corner of the page. Once the button is clicked, an analysis process will begin. The Analysis process is a background activity done by Max Uninstaller to determine resources occupied by Bing Translator. Wait for the analysis process to finish. When done, a 'Complete uninstall' button will pop up at the bottom left of the page.

6.

Click the 'Complete uninstall' button. This starts the regular uninstallation process. Wait for the removal (uninstall) process to finish.

7.

Click the 'Scan Leftovers' button. This button pops up at the bottom left corner of the page after the uninstallation process is over. Max Uninstaller will scan for Bing Translator leftovers. Wait for the process to finish.

8.

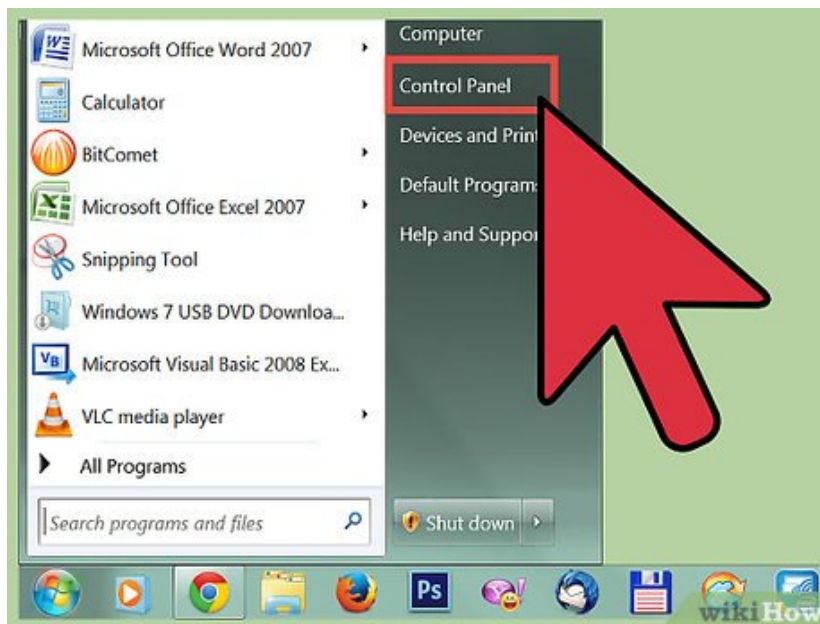

Click 'Delete leftovers.' Like 'Scan leftovers,' this button pops up at the bottom left of the page after Max Uninstaller has finished scanning for leftovers. This completely removes all the remains that were scanned out. A message will then appear informing you that the uninstallation process has completed successfully. Click 'OK' to close the message.

Method 2 of 2:

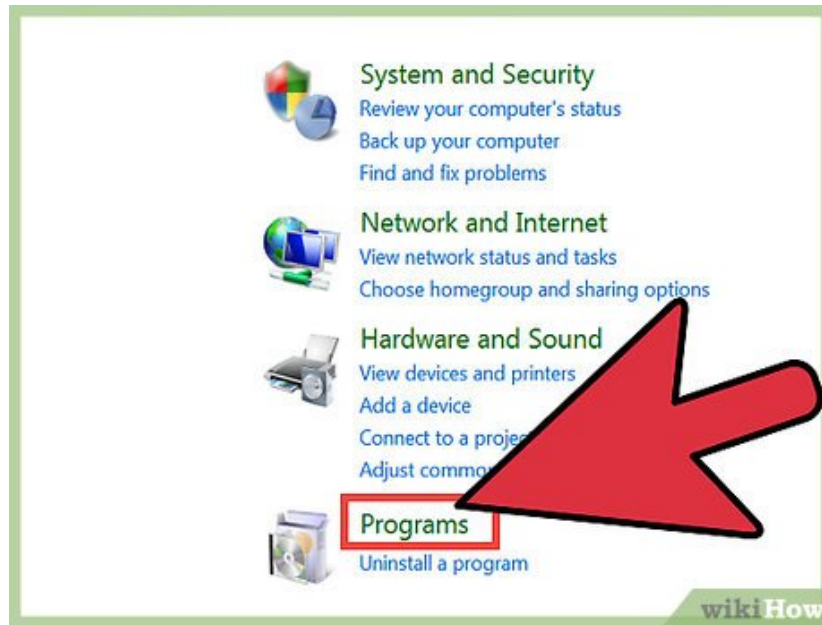

Uninstalling Bing Translator through the Control Panel

1.

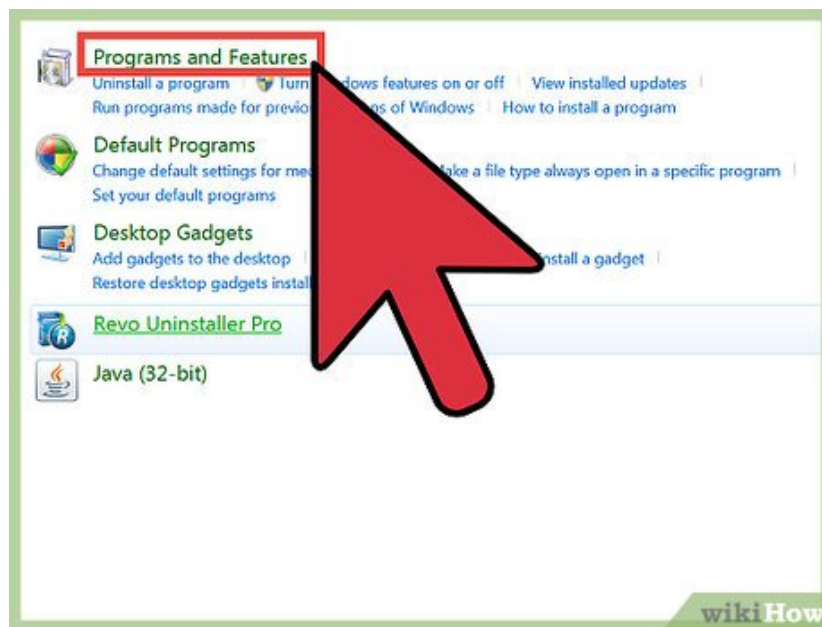

Open the Control Panel. Click the 'Start' button at the bottom left corner of the screen. A list of programs and features installed on your computer will appear. Select 'Control panel' from here to open this menu. Or if you use Windows 8 move your mouse to the right side and click search on the bar that pops up.

2.

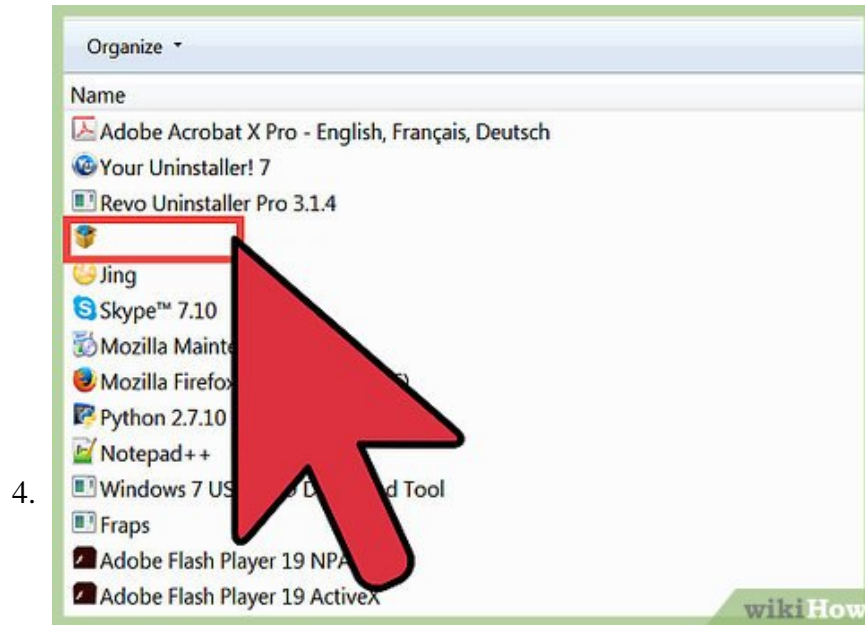

Select 'Programs.' This directs you to a page containing three options: Program and Features, Default Programs, and lastly, Desktop Gadgets.

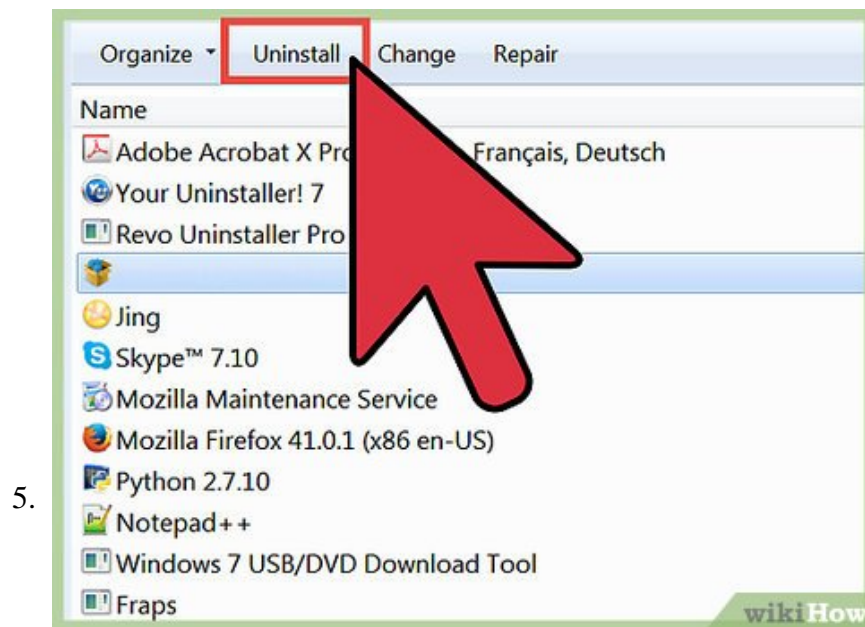

3.

Click 'Program and Features.' This option opens a window containing a list of all programs currently installed on your computer.

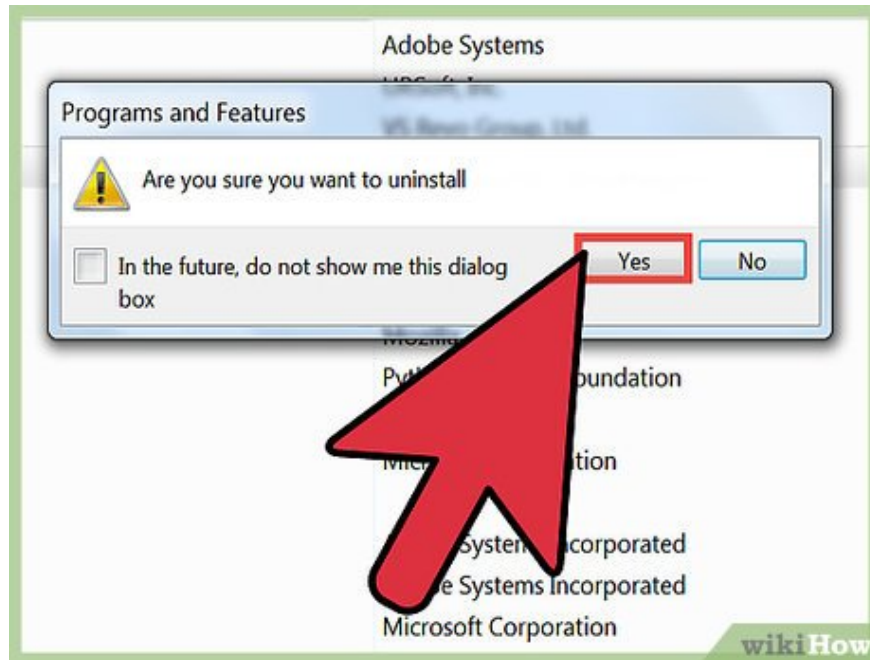

Locate and select Bing Navigator. On this list, you will see Bing Translator. Click on it to select it. An 'Uninstall' button will appear at the top center of the window.

Click the 'Uninstall' button. While Bing Translator is selected, click the 'Uninstall' button at the top to start the process of uninstalling the program. A pop-up message will appear seeking your permission to continue with the process of uninstalling. Click 'Yes' to confirm.

6. **Wait for uninstallation process to complete.** When the process has finished, a pop-up dialog box will appear. In this box is a message informing you that the process has been completed successfully. It will also ask you to reboot your computer so that all files stored in the computer that were used by the program will be deleted. Click 'Now' to reboot your computer. If, however, you do not want to reboot your computer now, you can click 'Later' to postpone the rebooting.
