

How to Uninstall Bitdefender Safepay

You improperly configured the settings in Bitdefender Safepay and/or you met other unwanted problems such as desktop lockups then, you wish to completely remove the hacker-proof Web browser from Bitdefender? Follow the provided simple...

Method 1 of 3:

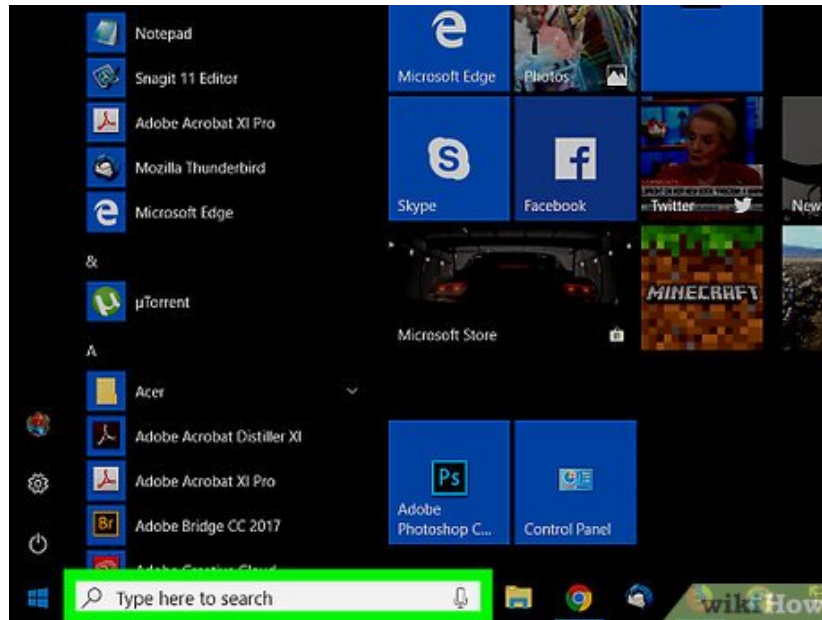

Using Repair or Remove

1.

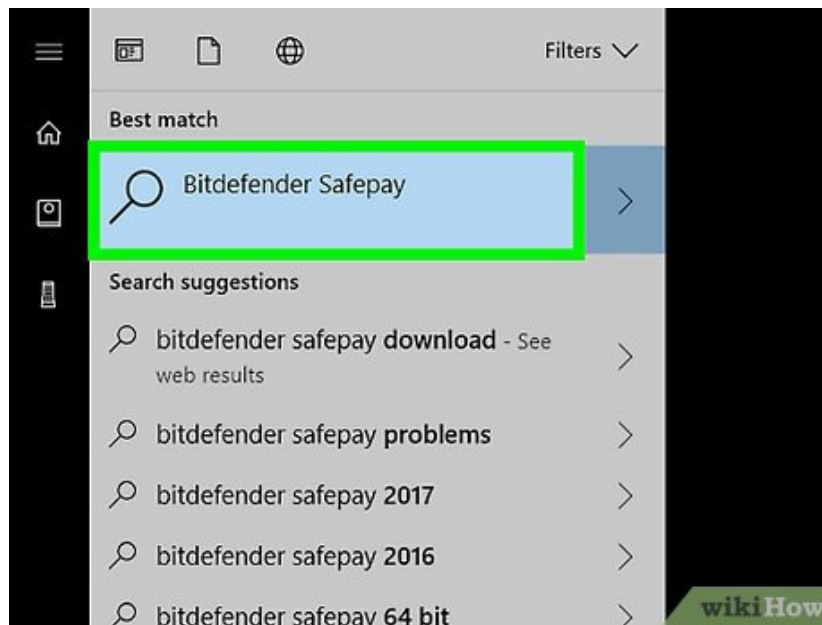

Open Start menu.

2.

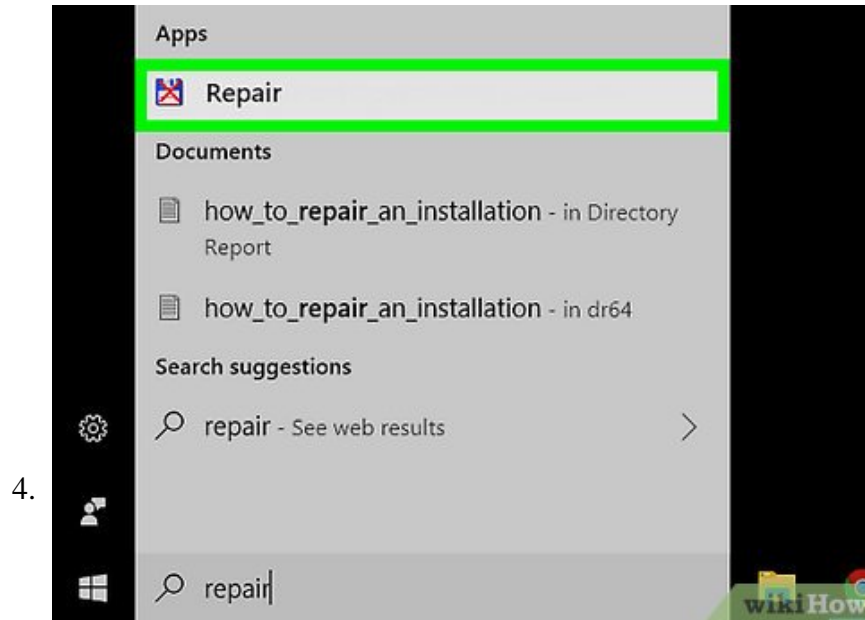

Select All Programs.

3.

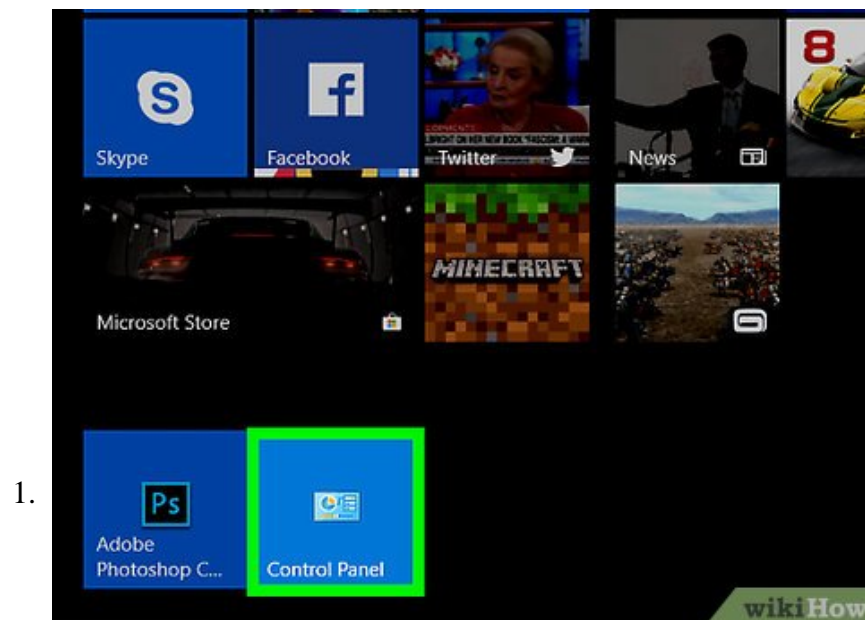

Enter the "Bitdefender Safepay" folder in the list.

Run "Repair or Remove" app.

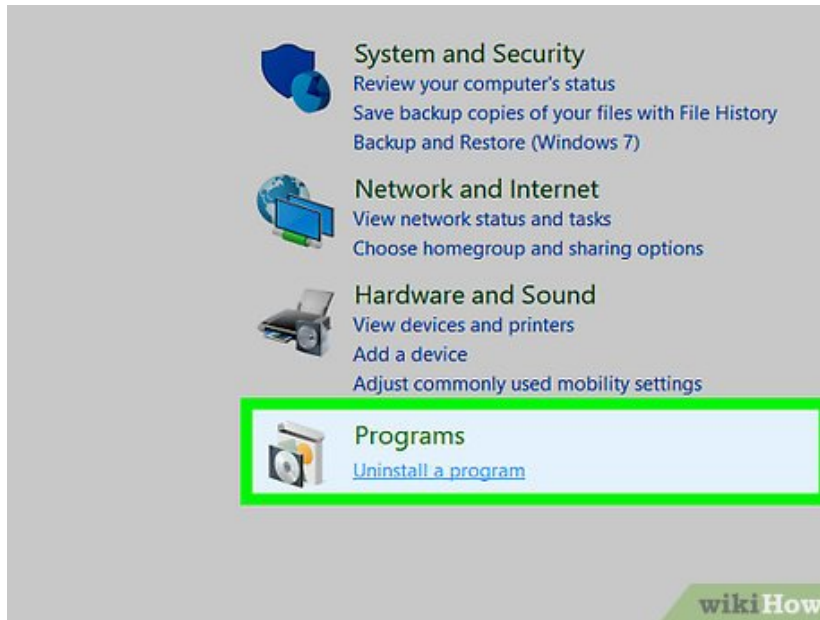

Method 2 of 3:

Using the Control Panel

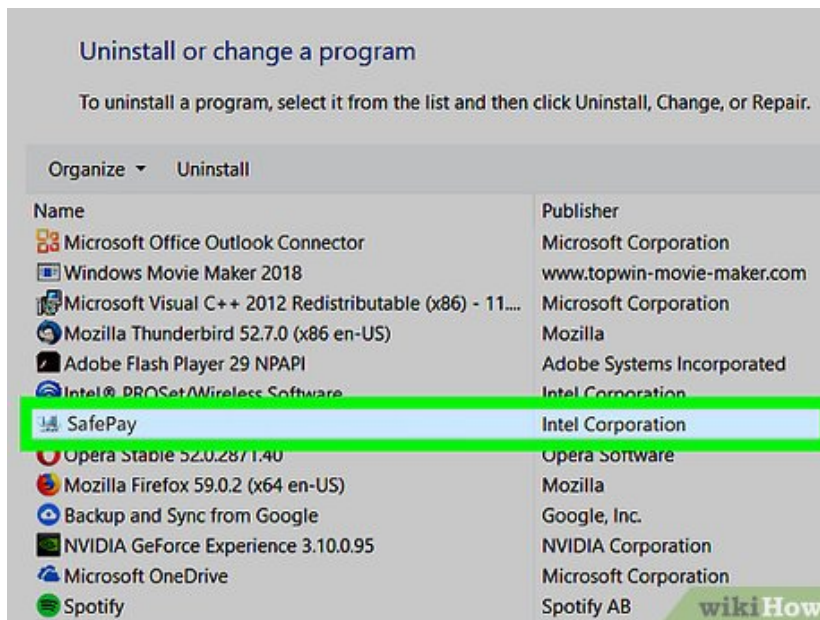

Go to Control Panel on the Start Menu.

2.

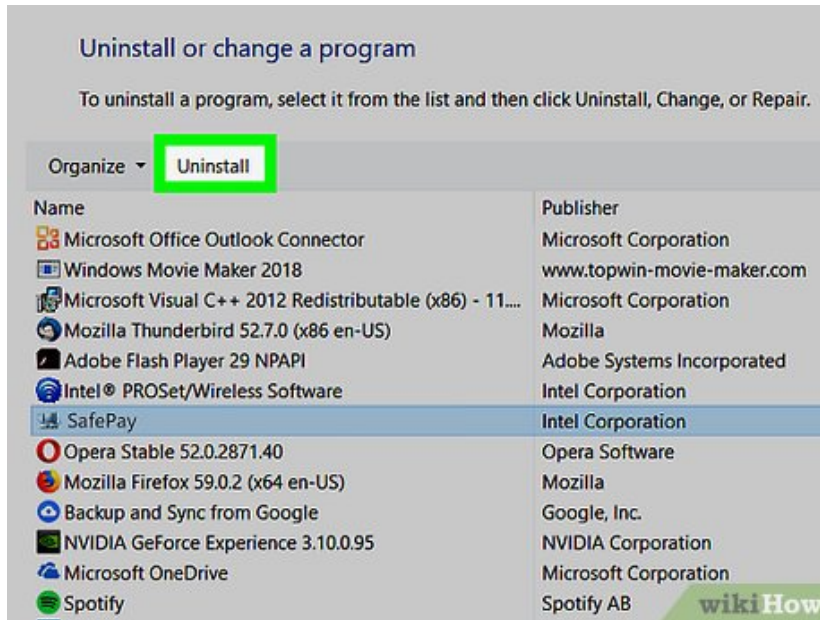

Click "Add/Remove" or "Uninstall a program" link.

3.

Locate the Bitdefender Safepay™ (v1.18.0.421).

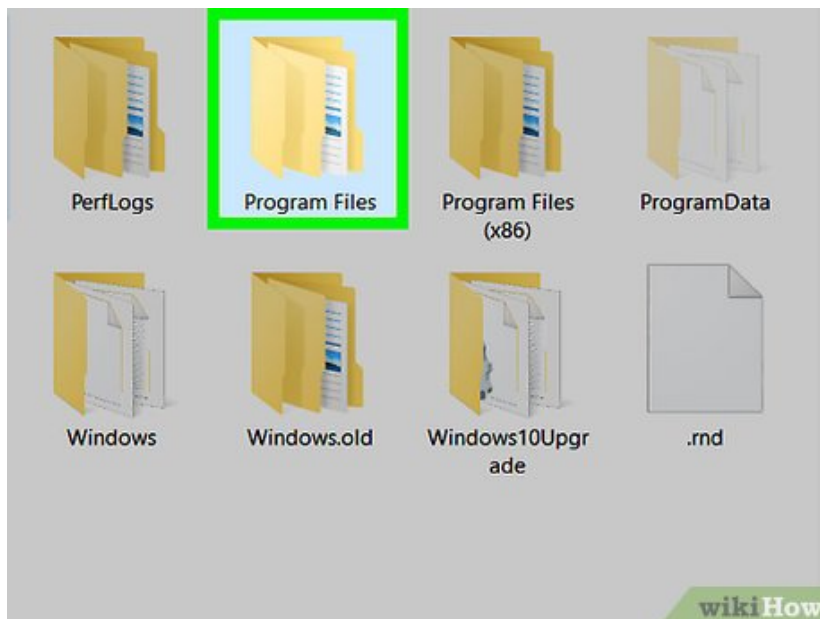

4.

Launch Uninstall option.

1. Note that remove 2 other installed components of Safepay software, "Microsoft Visual C++ 2010" if your system do not use them to work properly.

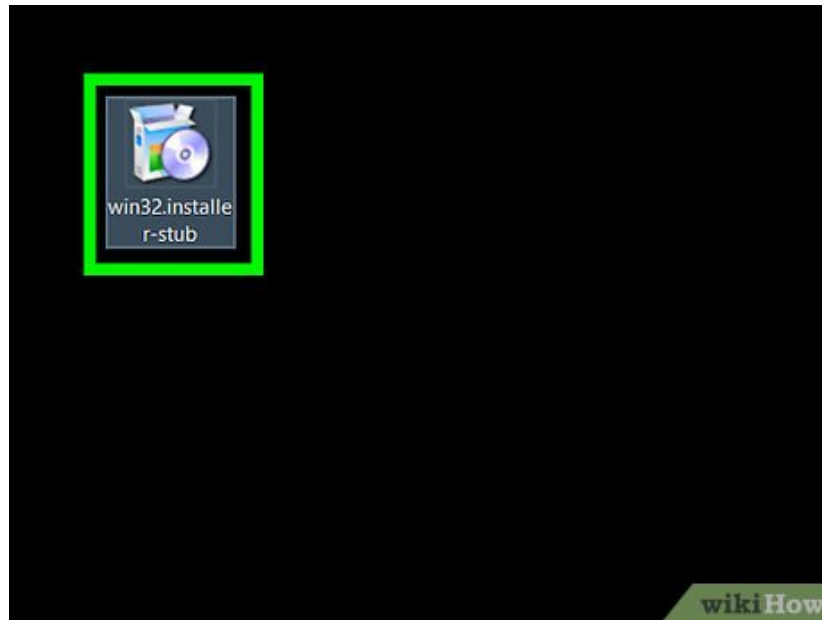

Method 3 of 3:

Editing the Registry (Not Recommended)

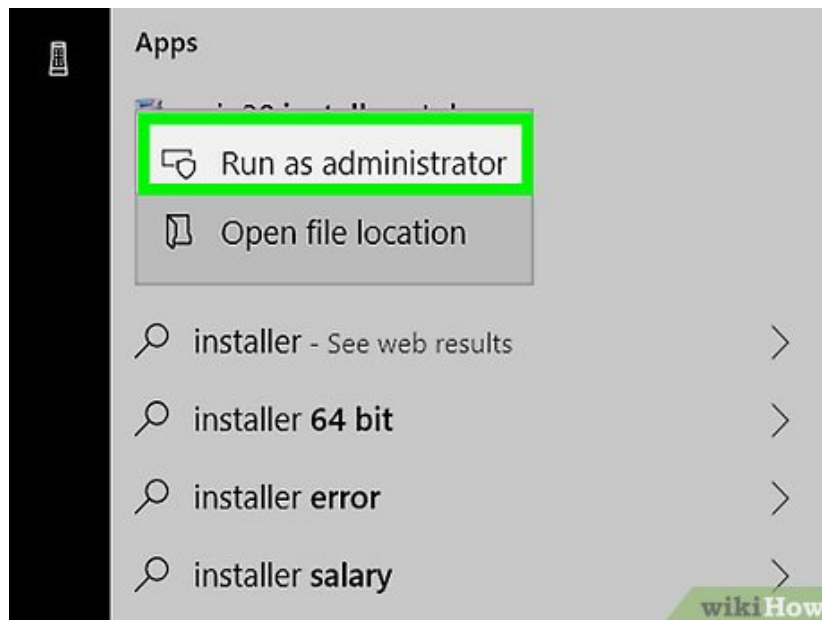

Go to the following "{8236B3FB-CF81-45EE-ACEE-6C0E64F79A7A}" file folder, which is saved under "C:Program FilesCommon FilesBitdefenderSetupInformation".

2.

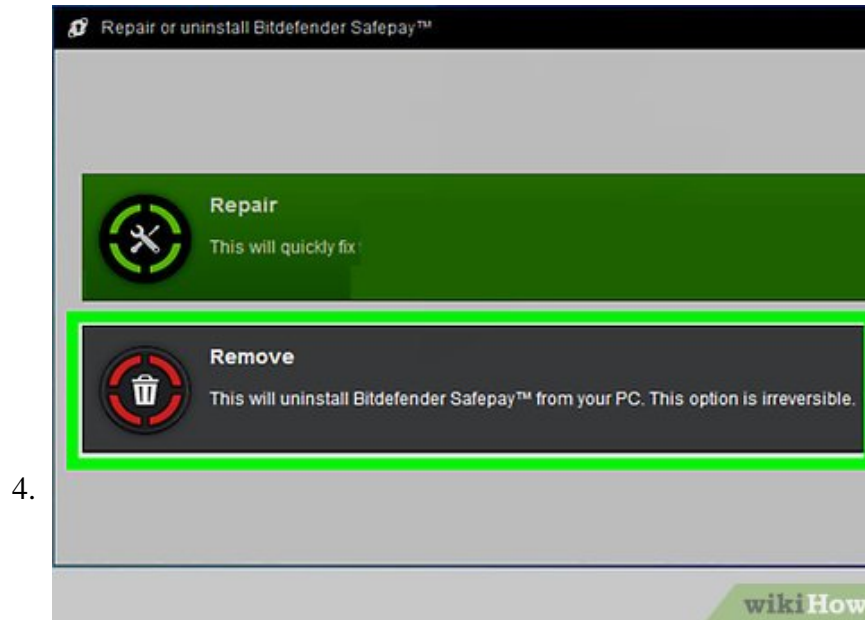

Run the setup application "installer" (559 KB).

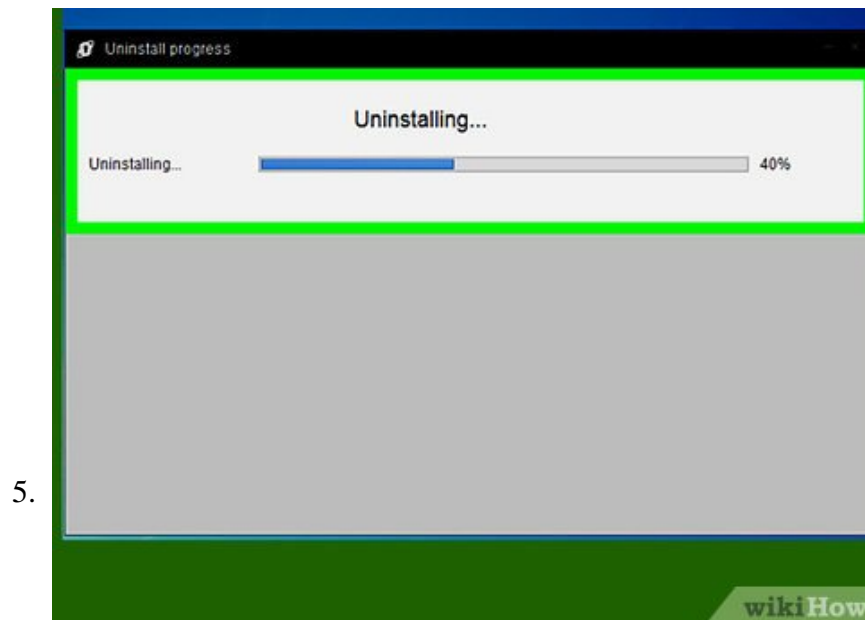

3.

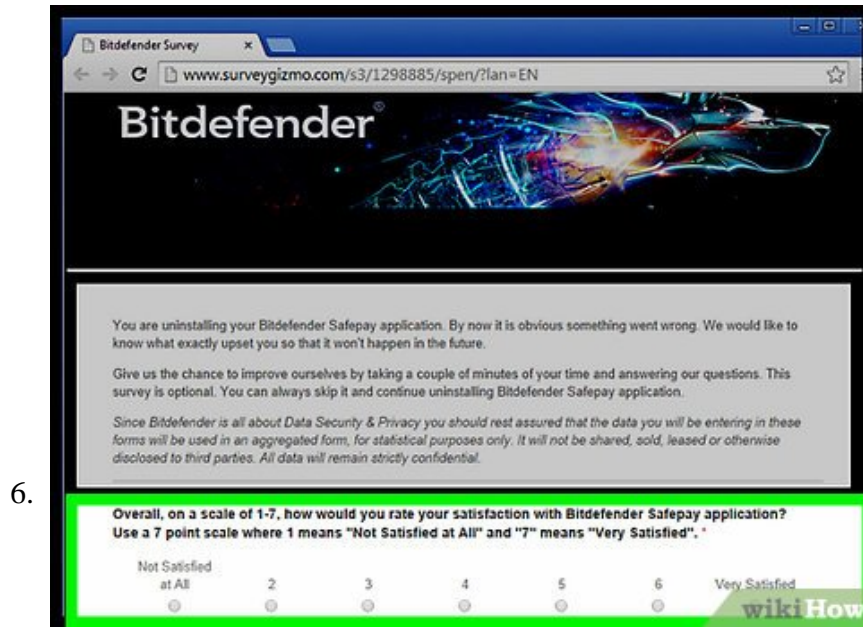

Use your Administrative privileges to proceed with the rest of uninstall progress: choose Yes from the UAC above.

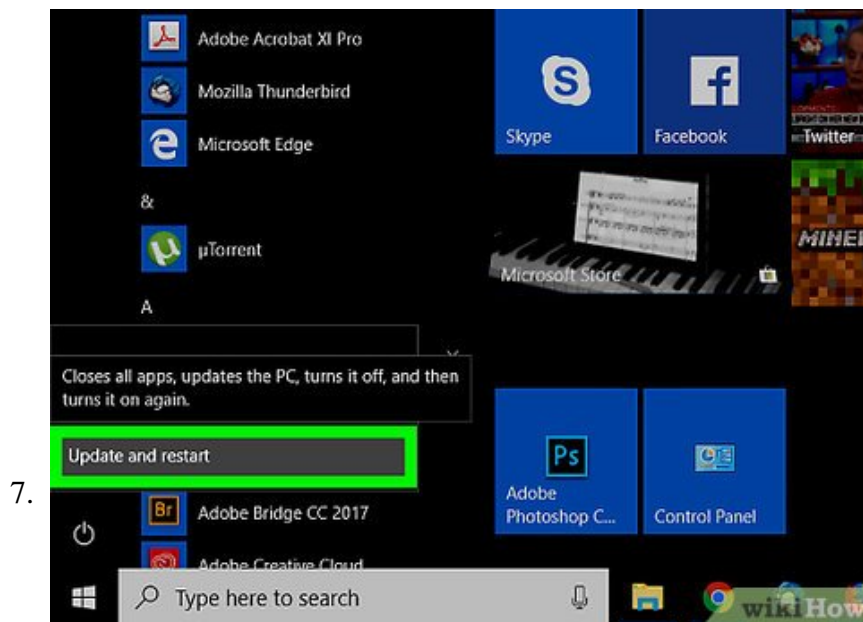

Select "Remove" option from the "Repair or uninstall Bitdefender Safepay™" wizard above.

Please wait while your request is being processing.

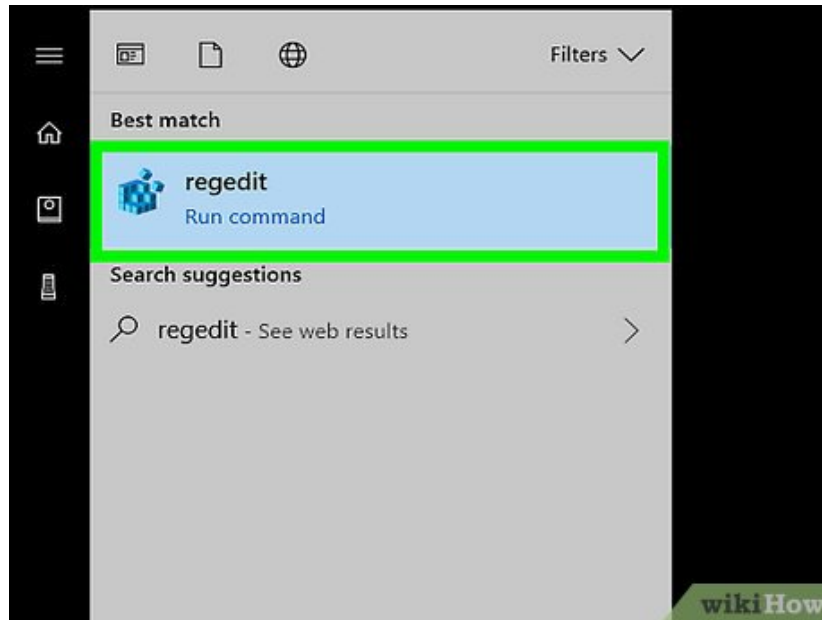

Your immediate response is highly appreciated: to do so, please consider completing the "Bitdefender Survey" (for the uninstalled Safepay) above.

Save and then restart your device.

8.

For experienced users only, try the manual steps to clean associated leftover traces. Or download the official uninstall tools for your half-gone Bitdefender client.
